Comment. Several respondents expressed concern that lumber that does not meet the clear grade standard will cause them significant practical problems, particularly for products up to 12 inches thick which were manufactured as exportable clear grades but, upon inspection, failed to meet the standard. These respondents felt the rule would force them to remanufacture such lumber into exportable products up to 8¾ inches thick, or into other products.

Response. Congress included in the Act language permitting the export of clear grade timbers (cants or flitches) up to 12 inches thick and cants of a lesser grade up to 8¾ inches thick intended for remanufacture. Export R List Grading and Dressing Rules permit up to 10 percent of the pieces in a given lot to be outside the specified lumber grade for the lot. Therefore a lot of clear grade 12 inch cants may contain individual cants that do not meet this grade and still qualify for export, provided the lesser grade cants do not make up more than 10 percent of the total lot. If a given lot of 12 inch cants is outside this accepted grading tolerance level, the exporter will have to remove the below grade cants from the lot and re-saw them to not more than 8¾ inches in thickness before exporting or be in violation of the Act. Accordingly, no change in the rule as proposed is necessary.

Comment. Several respondents stated that the final regulations should allow export of clear lumber meeting the referenced grades in thicknesses up to and including 12 inches nominal. These respondents stated that a nominal 12 inches would permit cants cut from fresh cut green trees to be sawn slightly thicker than a true 12 inches to allow for shrinkage back to 12 inches as the wood dries.

Response. The Department declines to adopt this comment. The Act states specifically the maximum thickness of a cant meeting clear grade specification permitted to be exported without further processing is 12 inches (16 U.S.C. 620e(7)(ii)).

Comment. One respondent commented that a producer should be permitted to seek export customers who can use mismanufactured products as is, without further manufacture.

Response. Section 493(7)(B) of the Act (16 U.S.C. 620e(7)(B)) states explicitly the lumber grades and maximum timber sizes that may be exported for further manufacturing outside the United States. In accordance with the Act, products needing further processing before use must meet these grades and size restrictions before being exported. No change in the final rule is made in response to this comment.

Comment. Two respondents stated that the rule also should expressly permit the chipping of any Federal log or portion of a Federal log at domestic operations and that any log which is used solely for domestic chipping be considered a pulp or cull log even if it meets technical specifications for some other grade. Another respondent suggested that a load of logs consisting mainly of chip logs with some higher-grade logs mixed in should be classified as chip logs, even if all or some of the higher-grade logs are processed into some other product. This would prevent waste and encourage the most efficient use of these Federal logs.

Response. The rule does not preclude the chipping of any log obtained from Federal lands. However, the Act at 16 U.S.C. 620e(7)(B)(ix), exempts only pulp and cull logs from the meaning of the term "unprocessed timber," with regard to logs that are processed at domestic pulp mills, domestic chip plants or other domestic operations for the purpose of conversion of the log into chips. Congress did not state that any log converted into chips is exempted from the restrictions on unprocessed timber. Rather, Congress specifically excepted *pulp and cull logs* if they are processed into chips.

To assure that pulp and cull logs that may be indistinguishable from unprocessed timber are not subsequently exported, they must be identified, pursuant to the revised definition of unprocessed timber in 36 CFR 223.186 of this rule.

Determination of Unprocessed Western Red Cedar

Since publishing the proposed rule, the Bureau of Export Administration, Department of Commerce, published a proposed rule on June 3, 1991 (56 FR 25054), and a final rule on January 6, 1993 (58 FR 487), amending the Export Administration Regulation at 15 CFR 777.7, governing the export of unprocessed western red cedar. The Department of Commerce's final rule revises the definition of processed western red cedar to exclude any individual piece of western red cedar having a cross section that exceeds 2,000 square centimeters (310 square inches), regardless of grade. This change makes the United States' western red cedar export restrictions consistent with those of the Providence of British Columbia, Canada. Section 223.187(c) of this rule has been revised to conform with the change in the Department of Commerce's rule governing export of western red cedar.

Comment. One respondent mentioned the proposed rule published by the U.S. Department of Commerce and urged that the U.S. and Canadian Governments develop a standard definition for all species of unprocessed timber.

Response. Section 491(d)(5) of the Act (16 U.S.C. 620c(d)(5)), which imposes restrictions on exports of unprocessed timber originating from State or other public lands, states "nothing in this section shall be construed to supersede the provisions of section 7(i) of the Export Administration Act of 1979 (50 U.S.C. App. 2406(i))." In order to provide a consistent definition of western red cedar for Federal as well as State and other public lands, and to provide for consistent exporting procedures, § 223.187 of the proposed rule included the definition of western red cedar taken from the timber export regulations established by the Secretary of Commerce at 15 CFR 777.7, which implement section 7(i) of the Export Administration Act, as amended. Discussions on standard definitions of unprocessed timber for species other than western red cedar have not been undertaken as of this date. However, the Act specifically defines unprocessed timber in section 493(7)(A) and (B), and is sufficient for the purposes of this rule making.

In order to monitor any indirect substitution violations, the Department has added a certificate to a new paragraph (d) similar to the certificate for § 223.187(b) with regard to the intent of the shipper of record. The certificate requires the shipper of record to identify whether the product is intended for end product use, and to acknowledge that only processed western red cedar that is intended for end product use is exempt from the prohibition against indirect substitution. Western red cedar products that are "processed" may be exported, but they are not excluded from the prohibition against indirect substitution unless they are intended for end product use. Without this certificate, the Department has no way of enforcing the exemption from indirect substitution allowed for "finished products" of western red cedar, because the Department could not determine by inspection whether a product is intended for end product use. The certificate reads as follows: "I certify that the products in the shipment identified by my shipping order number ________, dated ________, are manufactured in accordance with the attached order from ______ (buyer) ______ of ______ (address) ______, numbered ________ and dated ________, are / are not intended for end product use. I understand that only western red cedar products that are *finished products* are exempt from the prohibition against indirect substitution in the Forest Resources Conservation and Shortgage Relief Act of 1990 (16 U.S.C. 620b(b)(1)) and its implementing regulations. I make this certification with full knowledge and understanding of the export and substitution restrictions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) (Act) and its implementing regulations. I fully acknowledge and understand that to require western red cedar under the indirect substitution exemption in section 490(b)(1) of the Act (16 U.S.C. 620b(b)(1)) for purposes other than domestic processing into finished products will be a violation of this Act, its implementing regulations, and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies for such violation." The signatory process and Chief Executive Officer authorization of the signatory is the same as for the certificate in § 223.187(b).

Otherwise, the Department has made several changes to the text as proposed for technical and editorial clarity, but such changes have no substantive effect.

Section 223.188 Prohibitions Against Exporting Federal Timber

This section of the proposed rule was identical to that in the interim rule. Section 489 of the Act (16 U.S.C. 620a) continues the prohibition against the export of timber from Federal lands west of the 100th meridian in the contiguous 48 States that has been renewed annually through the Appropriations Act for Interior and Related Agencies.

Comment. Only one comment was received on this section. The respondent stated that "Our company opposes export of logs regardless of origin."

Response. The Act does not prohibit exporting of logs from private lands as long as logs from Federal lands are not substituted for those exported private logs in the domestic market. The Department has no authority to restrict private log exporting allowed by the Act; therefore, this section of the final rule is unchanged.

Section 223.189 Prohibitions Against Substitution

This section of the proposed rule also was almost identical to that in the interim rule; the proposed rule added a paragraph (a)(3) to § 223.189. This section was repeated in the proposed rule to provide readers with a comprehensive review of the Act's implementing regulations and to provide for public comment on the interim rule. Several changes have been made to clarify this section.

Section 490 of the Act (16 U.S.C. 620b) limits direct and indirect substitution of unprocessed Federal timber for unprocessed timber exported from private lands. Section 490(a) of the Act (16 U.S.C. 620b) entitled "*Direct Substitution*") states that no person may purchase directly from any Department or agency of the United States unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States if:

(A) Such unprocessed timber is to be used in substitution for exported unprocessed timber originating from private lands; or

(B) Such person has exported unprocessed timber originating from private lands during the preceding 24-month period.

Proposed § 223.189(a)(3) stated that no person may acquire unprocessed timber from Federal lands if the person transfers unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States to a third person, and that third party or successive parties export that unprocessed private timber. The third party or successive parties who acquire such unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 states may not export such timber.

Proposed paragraph (a)(3) would reduce the potential for violations of the substitution prohibition. The potential is particularly high in multiple transfers of unprocessed timber originating from private lands in which any of the parties acquire or wish to acquire Federal timber. The paragraph would protect the person who acquires unprocessed Federal timber and transfers unprocessed private timber from a possible substitution violation by making it unlawful for the person acquiring the private timber to export it.

The Act exempts from these prohibitions persons with historic export quotas. The 24-month restriction is waived by a certification process described in § 490 of the Act, and § 223.189 (c) and (d) of the proposed rule.

Nineteen public comments were received on this section.

Comment. Several respondents said that the certification language should indicate that the individual signing the certification on behalf of a corporation is doing so in his or her capacity as an officer or agent of that corporation, not in a personal capacity.

Several respondents also commented that a corporation's Chief Executive Officer should not necessarily be required to sign the certification, since the Chief Executive Officer may have limited knowledge of the firm's acquisition and disposition of unprocessed timber. These respondents suggested that a designated officer or agent of the corporation be permitted to sign the certification on behalf of the corporation.

Response. The certification language holds the corporate officer signing the certification liable in a corporate capacity, not a personal capacity. The certificate must be signed by someone with authority to bind the corporation. The Department prefers to have the signature of the official with clear authority to bind the corporation, the Chief Executive Officer: it would be difficult for the Department to determine if officers, other than the Chief Executive Officer, could bind the corporation. This requirement is similar to the requirement in 36 CFR 223.171(b)(6)(1992), issued pursuant to the Federal Timber Contract Payment Modification Act (16 U.S.C. 618), with which participating timber purchasers complied. In that regulation, the Chief Executive Officer is required to sign a statement for a corporation certifying the accuracy of information submitted. The Chief Executive Officer need not have personal knowledge of the information which he or she is certifying, but must ascertain that the information is true, complete, and accurate to the best of his or her knowledge and belief.

Comment. One respondent wrote that certifications should not be binding if a person or corporation later decides to stop buying Federal timber.

Response. The Department declines to adopt this proposal. As discussed earlier, the final rule adopts and amended the definition of "substitution", which states that substitution occurs when a person exports during any calendar year in which the person has Federal timber in the person's possession or under contract within the same geographic and economic area.

Comment. One respondent objected to implementation of the interim rule before the public had a chance to comment on it.

Response. The Department would have preferred prior notice and comment; however, for the reasons set forth in the preamble to the interim rule, immediate implementation was necessary. Comment on the interim rule was provided for in the proposed rule. These comments have been analyzed in this rule.

Comment. Three respondents asked that provisions for requesting waivers of 24-month prohibition against purchasing Federal timber following export of private timber indicate when and under what circumstances waivers will be granted.

Response. The waiver of the 24-month prohibition was available only to applicants applying by December 20, 1990. Acceptance or rejection of waivers depended upon the Administrative Law Judge's ruling on sourcing area applications. That ruling has occurred, and applicants have been notified of those decisions. In addition, the Forest Service has sent letters advising each applicant of the status of its sourcing area application and request for waiver. Therefore, no change in the rule is necessary. Persons whose waivers were disapproved are not bound by the request for the waiver (36 CFR 223.189(g)(2)).

Comment. One person commented that the rule should clarify that persons signing the waiver of the 24-month prohibition, which requires export to cease for three years, may not export within the sourcing area for as long as the sourcing area is approved.

Response. The Department agrees with this comment. Therefore, in response to this comment, the Department has added a sentence to proposed paragraph (f), now paragraph (5) of § 223.189(f), stating that persons signing the waiver, like all sourcing area holders, may not export unprocessed private timber originating from within the sourcing area.

Comment. Several respondents asked for clarification regarding whether a person who may not purchase unprocessed Federal timber may purchase unprocessed private timber from a person who may purchase unprocessed Federal timber.

Response. A person who may purchase unprocessed Federal timber may purchase unprocessed private timber from someone who may purchase unprocessed Federal timber, provided that the person purchasing the unprocessed private timber does not export the private timber if the timber must be domestically processed (e.g., if the private timber originates from within a sourcing area).

Proposed paragraph (a)(3) has been rewritten to clarify that a person may not purchase unprocessed Federal timber in the west if the person transfers unprocessed private timber from the west *that requires domestic processing,* to a third party, if that party or successive parties exports the unprocessed private timber. The last sentence concerning the prohibition against third or successive parties exporting such timber has also been modified to state that the restriction applies to private timber that requires domestic processing. The restrictions in paragraph (a)(3) are meant only to apply to timber requiring domestic processing, to follow the intent of the Act, which provides certain exemptions allowing for the purchase of unprocessed Federal timber and the export of unprocessed private timber.

Comment. Several respondents expressed concern that they could lose their right to buy Federal timber and be in violation of the substitution prohibitions, if a party to whom they sell unprocessed Federal timber exports private timber.

Response. Section 492(a)(2) of the Act (16 U.S.C. 620d(a)(2)) states that a person who transfers unprocessed Federal timber will provide to the person acquiring such timber a written notice regarding the Federal origin of the timber, and receive from such party written acknowledgment of the notice and an agreement to comply with the requirements of the Act. 36 CFR 223.193(b) implements section 492(a)(2) of the Act (16 U.S.C. 620d(a)(2)), and provides procedures to follow when timber from Federal lands is transferred to another person. To implement this provision, the Department has developed forms intended to relieve the seller of liability if subsequent buyers violate the export or substitution restrictions of the Act. A seller or buyer who cannot produce the appropriate document upon request could be found in violation of the Act. Accordingly, no change in the rule is necessary to respond to the concern.

Comment. One respondent expressed concern that the rule makes the Federal purchaser who sells private timber responsible for the acts of subsequent purchasers of private timber. One respondent suggested that persons with sourcing areas who sell private timber originating from the sourcing area be required to notify the buyer that such timber must be domestically processed.

Response. In order to protect Federal purchasers from the actions of subsequent private purchasers, the proposed rule included an acknowledgment of the prohibition, and an agreement to notify subsequent holders of the timber and marking requirements for unprocessed private timber. These requirements have not been changed in the final rule. 36 CFR 233.194. The Department has clarified § 223.189(a)(3) to state that a person may not purchase unprocessed Federal timber if the person exports or sells for export unprocessed private timber that requires domestic processing.

Comment. In connection with private timber monitoring, one respondent asked whether the prohibition against a Federal purchaser's selling private timber for export applies when the Federal purchaser sells "cutting rights" to the private timber. This respondent also asked if the prohibition applies when the Federal purchaser sells private land and timber.

Response. Since "cutting rights" are basically a timber sale, private timber acquired in this manner would be subject to the prohibition against substitution. If land with timber on it is sold, the purchaser would be evaluated separately from the seller, unless the purchaser and the seller are the same "person" under the definitions in the Act and in these regulations (for instance, if they are affiliated). However, if the land is sold, and the seller reacquires the cut over land within 24 months of the original sale, that person would be subject to the prohibition against substitution. Current definitions in the statute and the rules govern this situation. No change to the rule is necessary in response to this comment. It should be noted that the sale of land encompassing part or all of a sourcing area, and/or the sale of the sourcing area facility, being a change in circumstances, will trigger a review of the sourcing area.

Comment. Several respondents suggested that the rules exempt surplus species from substitution prohibitions.

Response. The Department agrees with this comment. While the Act specifically exempts surplus species from the prohibition against export of unprocessed Federal timber, it does not exempt surplus species from the prohibition against substitution. However, the intent of the prohibition against substitution supports the exemption of surplus species from the prohibition against substitution. The Conference Report states that, "[t]he general reason for limiting substitution is to restrict companies from purchasing Federal timber for their mills and then exporting private timber from the same general area." (Conf. Rpt. at 252.) Presumably, the private timber that is exported would be processed in the mill if Federal timber could not be purchased for that purpose. A species may be declared surplus to domestic needs if there is no domestic market for the species. If there is no domestic market, there would be no manufacturing of that species in domestic mills. The purchase of the surplus species would not facilitate the purchaser's exporting of private timber by providing Federal timber for the purchaser's mill. Therefore, there is no reason to subject surplus species to the prohibition against substitution. Accordingly, a new paragraph (a)(4) of § 223.189 has been added to the final rule to exempt surplus species from the prohibition against substitution, and states: "The prohibitions in paragraphs (a)(1)–(3) shall not apply to specific quantities of grades and species of unprocessed timber which the Secretary of Agriculture has determined to be surplus to domestic manufacturing needs."

Paragraph (a)(1) of the proposed rule (now paragraph (a)(1)(A)) has been modified to reflect the modified definition of substitution. Paragraph (a)(2) has been added to the prohibitions against substitution to parallel when substitution occurs, pursuant to the definition in § 223.186. Paragraph (a)(2) concerns the prohibition against exporting unprocessed private timber and purchasing unprocessed Federal timber in the same geographic and economic area in the same calendar year. Explanations of these modifications may be found in the preamble discussion of the definition of substitution.

Paragraph (3) has been added to § 223.189(e) to clarify that a portion of National Forest System timber from Washington State is exempt from the prohibition against indirect substitution, pursuant to § 223.203. Section 223.189(f) has been revised by adding paragraph (4) to reflect the revised definition of substitution. The revised definition of substitution includes the export of unprocessed private timber during any calendar year that a person has unprocessed Federal timber in possession or under contract.

Having considered the comments addressing § 223.189, the Department is adopting this section as proposed with the changes to the provisions as discussed.

Section 223.190 Sourcing Area Application Procedures

Subsection 490(c) of the Act (16 U.S.C. 620b) requires the Secretary of Agriculture to prescribe procedures for applying for approval of a sourcing area. At a minimum, the procedures shall require the applicant to state the location of private lands from which, in the previous year, the applicant has harvested or otherwise acquired unprocessed timber which was exported from the United States; and the location of each timber manufacturing facility owned or operated by the applicant within the proposed sourcing area boundaries from which the applicant proposes to process timber originating from Federal lands.

The Act also requires that the Secretary provide the opportunity for a hearing on the application and that approval or disapproval be on the record.

Any sourcing area approval must be based on a determination by the Secretary that the area includes the manufacturing facilities at which the applicant expects to process the Federal timber, and that the area is geographically and economically separate from any area from which that person harvests for export any unprocessed timber originating from private lands.

The Secretary also shall consider equally the timber purchasing patterns of the applicant on private and Federal lands with those of other persons in the same local vicinity and the relative similarity of such purchasing patterns. The interim rule defined manufacturing facilities in the "same local vicinity" as those facilities located within 30 miles of the community where the applicant's facility is located. However, the term "same local vicinity" may include more distant communities if manufacturing facilities in those communities depend on the same source of timber and have similar purchasing patterns. Thus, the relative similarity of purchasing patterns would be determined by examining the location and similarity of unprocessed timber being acquired for the affected facilities.

Nine respondents commented on this section of the rule.

Comment. Several respondents indicated that the final rule should specify who may apply for a new sourcing area or request modification of an existing sourcing area, and what time constraints might apply.

Response. The Department agrees with the suggestions to state who may apply for a sourcing area. A person who is not an exporter, or is not affiliated with a person who exports, may not apply for a sourcing area. The Act states that the Secretary may approve a sourcing area if the area where the applicant desires to purchase Federal timber is economically and geographically separate from the area from which that person "harvests for export" unprocessed private timber (16 U.S.C. 620b(c)(3)). The language is clearly geared towards current exporters. Further, a person who does not export does not need a sourcing area.

In contrast, person need only "desire" to process Federal timber in order to apply for a sourcing area (16 U.S.C. 620b(c)(3)). In fact, a person could not both be processing Federal timber outside of an approved sourcing area and exporting unprocessed private timber without violating the prohibition against substitution. The "desire" to process Federal timber may include the intent to acquire or become affiliated with a mill that processes Federal timber. In the case of an affiliation, the Department must have written confirmation that the sourcing area applicant intends to acquire or affiliate with a mill that processes Federal timber as soon as the sourcing area is approved. This will prevent persons from obtaining a sourcing area when one is not needed; in other words, when both processing Federal timber and exporting private timber are not occurring. In order to clarify that the "desire" to process Federal timber may include the intent to acquire or become affiliated with a mill that processes Federal timber, and that written proof of this intent is required when applying for a sourcing area, the Department has expanded paragraph (a) for § 223.190 of the rule as follows: "Subject to the restrictions described in § 223.189 of this subpart and, except as provided in paragraph (b) of this section, a person who owns or operates a manufacturing facility and who exports unprocessed timber originating from private lands may apply for a sourcing area in accordance with the procedures of this section. However, an owner/operator of a manufacturing facility who exports unprocessed timber originating from private lands may not possess or acquire unprocessed timber originating from Federal lands unless the acquisition is within an approved sourcing area. A person who intends to acquire or become affiliated with a manufacturing facility that processes Federal timber and who is an exporter may apply for a sourcing area. Written proof of the intent to acquire or affiliate must be included in the sourcing area application, signed by the applicant and the person or, in the case of a corporation, the Chief Executive Officer, whose company the applicant intends to acquire or affiliate with. This certification must be on letterhead and must be notarized. A sourcing area application that the Secretary determines would be approved will be granted tentative approval pending final notification by the applicant of acquisition of or affiliation with the manufacturing facility. The tentative approval of the sourcing area will lapse unless the acquisition or affiliation occurs within 30 days of the tentative approval of the sourcing area. A sourcing area is not valid until final approval of the sourcing area.

The direct substitution prohibition did not apply to a person who applied for a sourcing area on or before December 20, 1990. A request for modification of an existing sourcing area shall trigger a review pursuant to the procedures and restrictions in § 223.191(e)."

Comment. One respondent suggested that marking a private timber source on a map was adequate. Another respondent stated that the exact location of timber sales for exported timber need not be identified.

Response. The Act requires that sourcing area applicants provide the Secretary with the "location of private lands from which such person has harvested or otherwise acquired" exported timber (16 U.S.C. 620b(c)(A)). While the Act does not require the identity of individual timber sales, it does require the identity of the lands where timber sales were purchased. No change in the rule is necessary.

Comment. Several respondents thought that sourcing area applicants should be required to show where private and federal timber had been acquired in the previous 24 months in order to provide information on "timber purchasing patterns on private and federal lands of the applicant." The Act requires consideration of this factor in the determination of an economically and geographically separate sourcing area. One respondent thought that sourcing area applicants should be required to document that no private timber had been exported from within the area that is the subject of the application, since the Act provides for the sourcing area exemption if a person has not exported unprocessed private timber from within the sourcing area in the previous 24 months.

Response. The Department has records of timber sale purchases on Forest Service lands, so the applicant need not provide this information. An application encompassing lands administered by other federal agencies would be reviewed by those agencies. As far as information regarding private timber purchases, 16 U.S.C. 620b(c)(2)(A) of the Act and § 223.190(c)(1)(iii) of the interim rule (and this final rule) require that applicants provide information on the location of private timber purchases in the previous 12 months. The Forest Service can verify these purchases and the purchases of others in the area through Forest Service records and, in the case of private timber purchases, through state harvesting permits, severance or yield tax records, industrial safety records and by other means. The Department believes that this information is sufficient to determine whether a sourcing area is economically and geographically separate from an applicant's exporting area.

However, the Department agrees that the Act requires that persons with sourcing areas may not have exported unprocessed private timber originating from private lands within the previous 24 months. To clarify implementation of this requirement, the Department has amended the requirement in paragraph (iii) of § 223.190(c)(1) to read as follows: "The location of private lands within and outside the desired sourcing area where the person has, within the 24 months immediately preceding the date of the application, acquired unprocessed timber originating from private land which was exported * * *." The Act requires sourcing area applicants to provide "at a minimum * * * information regarding the location of private lands within the previous year" from which the person has harvested or otherwise acquired unprocessed timber for export (16 U.S.C. 620b(c)(2)(A)). Given the Act's requirement that no export has occurred within the sourcing area in the previous 24 months, requiring information regarding private timber purchases for the previous 24 months comports with the Act's requirements. The Act's requirement of a year's worth of information addresses the application process. Rather than obtaining additional information from the applicant during the adjudication process to determine whether exporting has occurred during the previous 24 months within the proposed sourcing area, the Department believes it is more efficient to obtain all of the information at once. This information is required for sourcing area applications submitted on or after September 8, 1995. Further, the Department has added a sentence to the certification that accompanies the sourcing area application in § 223.190(c)(4). The sentence reads as follows: "I certify that I have not exported unprocessed timber originating from private lands within the boundaries of the sourcing area that is the subject of this application in the previous 24 months."

Comment. One respondent suggested that a map of haul roads used for timber sourcing the manufacturing facility be included in the application, and that the rule clarify that the application be public information.

Response. The interim rule already required a map of the intended sourcing area (36 CFR 223.190(c)(1)). The Department believes that this is sufficient, along with the records of timber sale purchases, to meet the Act's requirements without requiring that haul roads be identified.

The interim rule states that applications are not confidential information (36 CFR 223.190(d)). The rule acknowledges that some information may be deemed confidential under the Freedom of Information Act. Therefore, the rule allows applicants to mark such information for consideration of confidentiality. This information should not hinder other parties in their review of sourcing area applications.

Comment. One respondent stated that overlapping sourcing areas of different applicants caused concern regarding complexity of administration.

Response. Each sourcing area application is adjudicated on its own merits. As long as each sourcing area application meets the criteria in the Act and the regulations, it will be approved. It is likely that different applicants will have valid sourcing areas that overlap. Overlapping sourcing areas will increase the complexity of administration and will require strict accountability and tracking. No change in the rule is necessary.

Comment. One respondent thought that the substantive standard for evaluation of a sourcing area should be clearly stated.

Response. The Department believes that the standard for evaluation was stated clearly in 36 CFR 223.190(h)(5) (now 36 CFR 223.190(i)) and no change is necessary.

Comment. One respondent stated that the definition of "same local vicinity" is too broad and does not accurately reflect the intent of Congress. Another respondent said that the final rule should specify that the applicants need only identify those competitors located within 30 miles known by the applicant to have similar sourcing patterns and products. Several respondents said that the term "same general vicinity," found at 36 CFR 223.190(c)(2), should be defined. Another respondent stated that the only reason "same local vicinity" seems to encompass mills beyond 30 miles in the regulations is for notice and commenting purposes; if the Department wants input from a broader spectrum, it should change the notice requirements, but persons beyond the "same local vicinity" should not be weighted equally with those in the same local vicinity.

Response. The Act at 16 U.S.C. 620b(c)(3) requires that the Secretary consider the timber purchasing patterns of the applicant as well as other persons "in the same local vicinity." In implementing this requirement, the interim rule used the guidance in the Conference Report and stated that "same local vicinity" is normally the manufacturing facilities located within 30 miles of the community where the applicant's manufacturing facility is located. However, this definition alone is inadequate to cover the Act's requirement to consider timber purchasing patterns, so the interim rule stated that the "same local vicinity" may include more distant communities if those communities are dependent on the same source of timber and have similar purchasing patterns. Applicants are required to provide this information, to the best of their knowledge, since they would be the primary source of this information.

"Same general vicinity" was a typographical error, which has been corrected to read, "same local vicinity." The notice requirement is meant to notify those persons whose purchasing patterns would be relevant to the sourcing area application. No change in the rule is necessary.

Comment. One respondent suggested that only the predominant activities of other mills should be considered in determining the "relative similarity of purchasing patterns" in 36 CFR 223.190(h)(5)(iii) (now 36 CFR 223.190(i)(3)). The respondent stated that one-time purchase of federal timber should not be compared to a dozen purchases by a competitor.

Response. Pursuant to the Act, the Department considers only purchasing *patterns.* An anomalous sale would not be considered a pattern. No change is necessary in the rule in response to this comment.

Further review of the sourcing area procedure has indicated that the similarity of products being produced by the applicant and other manufacturing facilities in the same local facility, as specified under paragraph (iii) of § 223.190(h)(5) of the interim rule and proposed rule (now paragraph (3) of § 223.190(i)), is not significant in determining the "relative similarity of purchasing patterns." The major factor needed to determine the similarity of purchasing patterns is whether the timber that competing purchasers bid on and bought was similar. This criterion was already included in paragraph (h)(5)(iii) (now paragraph (i)(3)).

Accordingly, paragraph (i)(3) of § 223.190 in the rule has been revised to eliminate consideration of the similarity of products being produced by competing facilities in the same local vicinity as a factor to determine the similarity of purchasing patterns.

Comment. Several respondents stated that sourcing areas should be approved as requested if there is no "credible opposition" to the application.

Response. The Act establishes specific criteria by which the Secretary may approve an application. The Secretary may approve an application "only if" the Secretary determines that the requested sourcing area is economically and geographically separate from the area from which the applicant harvests private timber for export (16 U.S.C. 620b(c)(3)). Thus, regardless of the extent of opposition to an application, the Secretary must make an independent determination using the standards established by the Act.

Comment. Several respondents stated that applicants should be allowed to provide supplemental information after submission of the application if other parties raise issues or questions about the application.

Response. The Act requires the sourcing area determinations to be made "on the record and after an opportunity for a hearing" (16 U.S.C. 620b(c)(3)). This process, pursuant to the Administrative Procedure Act (5 U.S.C. 554), requires the Department to give parties an opportunity for submission and consideration of facts, arguments and offers of settlement when time and the public interest allow. Applicants must submit the information required by the Act and implementing regulations in order for the application to be processed, regardless of additional information that may be supplied pursuant to the formal adjudication.

Comment. One respondent suggested that this section should state that a sourcing area applicant need not submit a sourcing area application to the Bureau of Indian Affairs, even if the Bureau's lands are part of the proposed sourcing area.

Response. In defining "Federal lands," Section 493 of the Act (16 U.S.C. 620e) specifically excludes Indian and Native Corporation lands. This exclusion is repeated in § 223.186 of this rule. The Department feels these exclusions are adequate and declines to repeat these exclusions in this section of the rule.

Comment. Another respondent suggested that this section be revised to limit the persons entitled to request a hearing to the applicant and other applicants for the same competing sourcing area.

Response. The Department disagrees. Section 490(c)(3) of the Act directs the Secretary to approve or disapprove an application, "on the record and after an opportunity for a hearing." Use of this specific language places the Act under the provisions of the Administrative Procedures Act, which requires public involvement in the decision-making process.

Comment. One respondent stated that section 556(d) of the Administrative Procedure Act (5 U.S.C. 551, *et seq.*), the statute governing the administrative process by which sourcing area determinations are made, does not require a full, evidentiary hearing, but allows for a hearing based in part or in full on written submissions.

Response. Section 556(d) of the Administrative Procedure Act states that, "(i)n rule making or determining claims for money or benefits or applications for initial licenses an agency may, when a party will not be prejudiced thereby, adopt procedures for the submission of all or part of the evidence in written form" Sourcing area applications are not claims, for either money or benefits. Sourcing area applications may be viewed like a "license," in which case, submission of the evidence could be in written form. However, the agency has sole discretion to adopt procedures for a hearing based solely on written evidence, and only when a party will not be prejudiced. Based on the initial round of sourcing area applications, in which the ability to cross examine witnesses and to bring all parties together was significant in making fair, informative determinations, the Department declines to adopt this suggestion.

Comment. One respondent suggested that final regulations should state explicitly that firms with domestic mills in approved sourcing areas may use non-Federal unprocessed timber from outside an approved sourcing area to supplement their log supply.

Response. The Act provides for the specific exemption from the prohibition against substitution in the form of sourcing areas. Sourcing areas have specific requirements. Among these requirements is that sourcing areas include all of the private and Federal lands that source the manufacturing facility (36 CFR 223.186). To haul unprocessed private timber originating outside of the sourcing area into the sourcing area violates the approved sourcing area boundary. The area from which the sourcing area holder harvests for export has exported unprocessed timber is no longer geographically and economically separate from the area from which the person sources the manufacturing facility (16 U.S.C. 620b(c)(3)). Once the sourcing area holder is no longer abiding by the sourcing area boundaries, the sourcing area holder may no longer depend on the valid exemption from substitution that a sourcing area provides. The sourcing area holder would then be in violation of the sourcing area boundary, as well as the prohibition against substitution by having purchased unprocessed Federal timber west of the 100th meridian in the contiguous 48 States within 24 months of having exported unprocessed private timber from the west. In order to clarify this issue, the Department has added paragraph (k) to § 223.190 that states as follows: "Transporting or causing to be transported unprocessed private timber from outside of a sourcing area into a sourcing area by the holder of the sourcing area is prohibited as a violation of the sourcing area boundary. Such violation will cause a review of the sourcing area, and could subject the sourcing area holder to the penalties and remedies for violations of the Forest Resources Conservation and Shortage Relief Act of 1990, 16 U.S.C. 620, *et seq.*, and its implementing regulations."

Comment. One respondent stated that the regulations should clarify when a sourcing area is "in effect."

Response. An approved sourcing area is in effect until the holder of the sourcing area relinquishes it, or the sourcing area is disapproved upon review of the sourcing area. A sentence clarifying this has been added to new paragraph (m) of § 223.190.

Comment. Several respondents stated that a person with an approved sourcing area should be allowed to relinquish the sourcing area and then export timber from private lands in that area at any time.

Response. The Department disagrees with this comment. While a person with an approved sourcing area may relinquish the sourcing area at any time, the person may not begin exporting from that area immediately. A person may not export unprocessed private timber as long as that person has unprocessed Federal timber in the person's possession or under contract in the same fiscal year, pursuant to the definition of substitution in § 223.186. To clarify this issue with regard to sourcing areas, the Department is amending § 223.190 by adding paragraph (1). Paragraph (1) states that sourcing areas may be relinquished at any time provided the following certification waiver is signed:

"I am relinquishing the approved sourcing area, described in the Secretary's determination in FSAA ________ on ______, 19____. I understand that I may not export unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States during a fiscal year in which I have unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States in my possession or under contract, pursuant to the prohibitions against substitution in the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*).("Act") and its implementing regulations. I also understand that I may not purchase unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States within 24 months of having exported unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States, pursuant to the prohibition against substitution in the Act and its implementing regulations. I make this certification with full knowledge and understanding of the Act and its implementing regulations and do fully understand that exporting unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States during a fiscal year in which I have unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States in possession or under contract, or purchasing unprocessed timber originating from Federal lands west of

the 100th meridian in the contiguous 48 States within 24 months of having exported unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States is a violation of the substitution provisions of the Act, its implementing regulations, and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided for such violation."

The certificate must be signed by the person making such certification or, in the case of a corporation, by its Chief Executive Officer; must be on company letterhead; and must be notarized.

Comment. One respondent had several comments about the certification that accompanies the sourcing area application, found at 36 CFR 223.190(c)(4). First, the respondent recommended striking the phrase "concerning my timber purchasing and export patterns" from both the first and second sentences. The respondent stated that applicants should certify to the truth of the entire application, not just the purchasing and export activities, and that the certification could be misunderstood to require applicants to submit information not otherwise required. The respondent further stated that the certification incorrectly cites section 492 in order to prohibit the export of unprocessed private timber. The respondent contends that nothing in the Act prohibits the export of private unprocessed timber.

Response. The Department disagrees that the certification language "concerning my timber purchasing and export patterns" should be deleted. Complete and accurate information regarding an applicant's timber purchasing and export patterns is crucial to the determination of whether an applicant's intended Federal timber purchasers are economically and geographically separate from the applicant's exporting area. Regarding the reference to section 492, the Department agrees that this citation could benefit from some clarification. Therefore, the Department is changing the reference to section 492 to a general reference to the entire Act, to ensure that applicants review the entire Act for potential violations. The new citation will be 16 U.S.C. 620, *et seq*. The Department is also deleting the reference to the requirement to cease purchasing unprocessed Federal timber within the proposed sourcing area if the sourcing area is disapproved, since only initial applicants could have been purchasing unprocessed Federal timber before the sourcing area's approval. The Department has also added the phrases "and its implementing regulations" to the sentence about the prohibition against exporting unprocessed private timber from within an approved sourcing area. While these changes may clarify the certification language, the Department believes that the original certification published in the interim rule was sufficiently clear. Applicants signing the initial certification are bound by that certification.

Comment. One respondent stated that in order for the Secretary to "consider equally" competitors' practices, the Forest Service should have information from the competitors that is as complete and reliable as the applicant's information. Several respondents said that persons submitting information should have to certify that information provided is complete and accurate. The respondent also said that the complete sourcing information of all competitors from the same local vicinity should be examined, not just a contesting competitor.

Response. The Department agrees that complete and accurate information regarding competitors is necessary to determine whether a sourcing area should be approved. The Department makes its own independent assessment of competitors in the same local vicinity based on information submitted, including the Forest Service's records. The Department does not believe that competitors need to provide certain information; the information received is weighted based on its completeness and accuracy, as judged against other submissions. The Department does agree, however, that parties to a sourcing area determination should certify to the truth of what they are providing. Therefore, the Department is amending 36 CFR 223.190 by adding a new paragraph (j) that states that a person submitting a written comment certify at the end of the comment, but before the signature that the information provided is true and accurate, to the best of the person's knowledge, and that failure to provide true and accurate information could be a violation of the False Statements Act (18 U.S.C. 1001).

Comment. One respondent stated that the agency should show which boundaries the Department would approve, and permit the applicant to revise its application to match those boundaries. Another respondent said that sourcing area applications should not simply be denied, but that applicants should be able to modify the proposed sourcing area.

Response. The Act does not require the Department to provide the boundaries that the agency would accept except for applications received by December 20, 1990 (16 U.S.C. 620(c)(4); 36 CFR 223.191). However, the procedures provided for recommended settlements and adjustments during the initial application process, and will provide the same opportunities for subsequent applications.

Comment. One respondent said the rule should state that a person may apply for a sourcing area at any time, but will receive certain advantages if the person applied by December 20, 1990.

Response. The Department believes this was clarified in the final rule of limited scope, published on December 19, 1991 (56 FR 65834). The sections of that rule that have information about sourcing areas may be found at 36 CFR 223.191, and have been repeated in this rule making for clarity.

The rule making that established the procedures for sourcing area applications and reviews of sourcing areas made technical amendments to this section to conform it to the procedures. Additional technical amendments were made in this rule making to conform it to the procedures. Otherwise, except as noted earlier, this section is adopted as proposed.

Section 223.191 Sourcing Area Disapproval and Review Procedures

Section 223.191 was included in the interim rule, published November 20, 1990 (55 FR 48572), and was revised by the final rule published in the **Federal Register** on December 19, 1991 (56 FR 65834). The rule making that established the procedures for sourcing area applications and reviews of sourcing areas made technical amendments to this section to conform it to the procedures. No changes were proposed or are being made to this section by this rule making. Section 223.191 is included in this final rule for continuity and to avoid confusion as to its status.

Section 223.192 Procedures for a Non-Manufacturer

Section 223.192 gives non-manufacturers the opportunity to make the same business decisions as manufacturers; that is, whether to export unprocessed private timber or buy Federal timber. However, because the non-manufacturer does not have a manufacturing facility, the non-manufacturer cannot establish a sourcing area.

Five responses were received from the public on this section of the rule.

Comment: All five respondents commented that they could find nothing in the Act preventing non-manufacturers from having sourcing areas, or required that timber be processed by the original purchaser. The parties said that the final rule should allow non-manufacturers to apply for sourcing areas from within which such a person could buy Federal timber, but not export timber from private lands.

Several of these respondents stated further that controls on indirect substitution prevent abuses, and that there is no reason to limit competition for Federal timber further by preventing non-manufacturers from bidding in areas that are economically and geographically separate from any areas from which they and their affiliates may export private timber.

Response. The Department disagrees with these comments. The exemption that allows a person to purchase Federal timber while exporting private timber is the sourcing area exemption. The Act clearly directs the sourcing area exception to the prohibition against substitution toward persons with manufacturing facilities. Subsection 490(c)(3) of the Act (16 U.S.C. 620(c)(3)) states that the Secretary may approve the application, "only if * * * the area that is the subject of the application, in which the timber manufacturing facilities at which the applicant desires to process timber originating from Federal lands are located" is geographically and economically separate from lands from which the applicant exports. Further, subsection 490(c)(2) of the Act (16 U.S.C. 620b(c)(2)) requires information from the applicant regarding the location of each timber manufacturing facility "owned and operated" by the applicant. This scheme clearly indicates that Congress intended the Act to limit the sourcing area exception to persons who both export private timber and manufacture timber domestically. Therefore, the Department declines to adopt these comments in the final rule.

Some minor, no-substantive changes have been made to the text of this section as proposed for technical and editorial clarity.

Section 223.193 Procedures for Reporting Acquisition and Disposition of Federal Timber

Annual report. Section 492(a)(1) of the Act provides that each person who, either directly or indirectly, acquires unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States shall report the receipt and disposition of such timber to the Secretary concerned, in such form as the Secretary may, by rule, prescribe; and that such person may not be held responsible for the reporting of the disposition of any such timber held by subsequent persons. In addition, the Conference Report on this section states that the conferees intend the Secretary of Agriculture to have a complete account of transactions relating to the acquisition and disposition of unprocessed timber originating from Federal lands (Conf. Rpt. p. 259).

The rule (§ 223.193(a)) as proposed would have required that an annual report on the acquisition and disposition of Federal timber be submitted to the Forest Service. Any person acquiring and/or disposing of such timber would be required to submit an annual report.

As proposed, such report would provide, by fiscal year, an accounting of the unprocessed Federal timber acquired, processed, stored, or transferred to another person. The report would require statements regarding the volume of timber acquired, processed, stored and/or transferred to another person, and the origin of such timber. In addition, the report would require the date of acquisition or disposal, from whom acquired, the timber sale name, the contract number, log brands, bar coded tag number and other markings for timber acquired or disposed. The rule as proposed would require submission of the first report December 1, 1991, and subsequent reports on December 1 of each year thereafter.

Twenty-seven respondents commented on this section. The comments essentially focused on three topic areas: The need for the annual report; the difficulty in obtaining the unprocessed Federal timber inventory information requested; and the burden that the information requirement would place on individual companies.

Comment. Comments received questioning the need for the annual report were as follows:

- Annual reporting requirements are not necessary and they are unduly burdensome.
- An annual report may be appropriate for holders of the State of Washington indirect substitution quotas, but should be limited to the facts necessary to show that the quota has not been exceeded.
- The Act does not require retention of these and other records for three years.
- The annual report is redundant; the Department already has this information through the tracking system and/or at the end of each sale.

Response. Section 492 of the Act (16 U.S.C. 620d(a)) states that each person who acquires unprocessed Federal timber, directly or indirectly, shall report to the Secretary the receipt and disposition of such timber. The Secretary will prescribe in the rule the form of the report, which would include frequency. Section 492 of the Act also requires the Secretaries of Agriculture and the Interior to report to Congress on the disposition of unprocessed Federal timber in the west and the practice of indirect substitution, based on the information gathered in subsection (a) (16 U.S.C. 620(b)). Form(s) and reporting frequency as shown in the final rule are those considered to be the minimum necessary to meet the Act's requirements of reporting and monitoring. Retention of these records for three years is important for monitoring purposes, as logs are often in commerce for several years. The annual report is not redundant. The annual report informs the Department as to what volume has been processed and what volume has been exported; the transfer documents inform the Department as to the commercial path of timber. Taken together, these documents allow the Department to track timber from the first purchase through processing or exporting. Further, information gathered at the end of each sale does not account for annual processing of Federal timber by third parties, which the annual report will do.

Comments. Several respondents commented that the information for the annual report required by pre-enactment rules at § 223.48 is sufficient to meet the accounting requirements of the Act, and strongly objected to the volume inventory reporting requirement in the proposed rule. Specific comments included the following:

- Logs generally are sorted by species, size, or grade, and are placed into corresponding storage decks. These decks contain logs from all origins. Tracking such logs by origin would be very costly and impractical.
- To comply with the rule, a purchaser may be forced to buy more land and expand the log yard to accommodate the additional decks needed to separate logs according to origin as well as species, size, grade, etc.
- There is no way to determine the actual volume of Federal timber held in inventory without making estimates at the mill.
- Inventory tagging of each log is possible, but costly. Moreover, tags are easily lost in handling, and many purchases do not have computers and scanners to handle tags.
- The rules would require the scaling and labeling of every log, in addition to branding and marking.
- It is proper to maintain requirements for sale-by-sale disposition of Federal timber on an annual basis, but 100 percent accountability of each individual log cannot be achieved.

Response. The Department agrees with many of these concerns. Accordingly, the Department has removed the requirements to report volume in inventory at the beginning and end of the year. Otherwise, other than as noted, the Department has adopted the form as proposed, with minimal changes in titles, instructions, and certification language. The information requirements in paragraphs (a)(1) through (a)(7) of § 223.193 in the proposed rule have been reduced and revised in new paragraphs (a)(1) through (a)(5) in this rule as discussed below.

The Department believes that information regarding individual logs acquired is not onerous and provides the Department with information to track logs as required by the Act. Brands other than brands registered by a State or agency are required to have a pictorial representation on the form for purposes of identification, since they do not have registration numbers. Contracts awarded before August 20, 1990, require purchasers to submit an annual report on form FS–2400–46, *Purchaser Certification of Timber Domestically Processed or Exported* (OMB No. 0596–0021, Expires March, 1997). The annual report under § 223.193 of this final rule will be very similar to the present reporting form. Like the present reporting form, the annual report under § 223.193 will include a requirement to record the volume of unprocessed private timber exported. This can be found in new paragraph (4) of § 223.193 of this rule.

The major differences between the present form FS–2400–46 and the new annual reporting form are as follows: (1) The form title is changed to read "Certification of Receipt and Disposition of Timber Originating from National Forest Lands"; and (2) the instructions state that any person who directly or indirectly acquired or processed timber originating from National Forest System lands in the previous calendar year must complete the annual report. The Department has changed the final rule to require the annual report by calendar year, rather than fiscal year, because of the purchasers' familiarity with reporting by calendar year and to provide consistency with prohibitions in the regulations.

The Department wants to clarify that actual volume must be reported. In order to monitor and investigate transactions, and to prosecute violations of the Act, the Department must have the actual volume recorded. This will enable the Department to validate the accuracy of the information submitted. Further, the Department will be able to meet the Act's requirement to submit the report to Congress based on the information gathered. Further, the Department needs actual volume recorded in order to monitor the annual quota exempted from the indirect substitution prohibition in Washington State. Third party scaling organizations have the ability to provide accounting reports, and do so as a matter of course, which will reduce the reporting burden.

Comment. Several persons commented that if annual reports are required the first one should not be due before the rules have been in effect for the previous year.

Response. The Department agrees. The first annual report will be for the first calendar year in which the rules are published with the first report due March 1 following the first reporting period. Calendar years prior to the rule's publication will be reported on the current FS–2400–46 form.

Comment. One respondent said that the person submitting the annual report should not have to certify that the information is not confidential.

Response. The Department has revised this requirement. If a person submitting the annual report would like something to be kept confidential, the person should so mark the information. The Department will then evaluate the confidentiality of the information pursuant to the applicable laws.

A new paragraph, § 223.193(a)(5)(ii), has been added to assure that the certifier is eligible to acquire unprocessed timber originating from Federal lands in accordance with the Act. This certification is needed to help assure that the requirements of the Act are enforceable.

A new paragraph, § 223.193(a)(5)(iv), has been added to require the retention of the form and records for three (3) years and to make them available for inspection to authorized Federal officials on request. Retention of these records for three years is important for monitoring purposes and for enforcement of the Act, as logs are often in commerce for several years.

Transfer of Unprocessed Federal Timber

Section 492(a)(2) of the Act states that each person who transfers to another person unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 states shall, before completing such transfer: (1) Provide to the person receiving the timber a written notice which identifies the Federal origin of the timber, (2) receive from that person a written acknowledgment of the notice and an agreement that person will comply with the Act, and (3) provide the appropriate Regional Forester, or other official to whom such authority has been delegated, with copies of all such notices, acknowledgments, and agreements.

Section 223.193(b) of the proposed rule would require each person who transfers unprocessed timber originating from National Forest System lands to provide such other person with the notice, acknowledgment, and agreement executed on a form provided by the Forest Service. The proposed § 223.193(b) would also require the transferor to provide copies of each such executed form to the appropriate Regional Forester within 10 days of such transfer.

The transferor includes anyone who sells, trades, or otherwise transfers unprocessed Federal timber. The transferor is not only the initial holder of a contract to harvest Federal timber, but is also any person who subsequently acquires the Federal timber, and in turn transfers it to another person.

Proposed § 223.193(b) would require the transferor to state the origin, species, volume, from who acquired, timber sale name, contract number, log brand, bar-coded tag number, and other markings of unprocessed Federal timber on the form. The proposed form would contain a statement that the purchaser of Federal timber, whether directly or indirectly obtained from the Federal government, agrees to maintain records of all transactions involving unprocessed Federal timber for a period of three (3) years from the date of the transfer, and will make all records involving log transactions available to an authorized U.S. Government official upon request.

The proposed form also would include a certificate stating that the information supplied is a true, accurate, current, and complete statement to the best of the transferor's knowledge, and agreeing to send the form to the appropriate Regional Forester or other administering office within ten (10) days of the transfer. The transferor would agree to obtain a fully completed Notice of Origin form from the transferee, and the transferor would acknowledge that failure to report completely and accurately the transfer of unprocessed Federal timber will subject the transferor to the penalties and remedies in the Act and the penalties in the False Statements Act. The transferor would also be required to acknowledge that he or she has read and understands the form. The certification would also require the transferor to acknowledge that the information provided is not confidential.

Comments. Several comments were received on this procedure. Some respondents were concerned that a seller of Federal logs might be held liable for the illegal actions of the buyer or subsequent buyers, or that the seller would be certifying that the buyer will comply with the Act, including the requirement to retain records.

One person stated that the rule should indicate that a timber seller is exonerated from further liability if all necessary notices, certifications, acknowledgments, and record keeping obligations required under the Act are satisfied.

Response. Section 492(a) of the Act (16 U.S.C. 620d(a)(1)) states that the transferor of unprocessed Federal logs may not be held responsible for subsequent persons' reports of the disposition of such timber. The transaction reporting form to be supplied by the Forest Service, when properly completed and returned to the Forest Service, will release the seller from such liability.

By completing the form, the seller does not certify that the buyer is legally eligible to purchase unprocessed Federal timber pursuant to the Act. The rules and the form require the buyer of the timber to make that certification. The form is a way to notify the buyer, who may have no direct contact with the Federal government, of the rules to which the purchaser is bound.

However, the Department agrees that a statement clarifying liability should appear in the rule. Therefore, the Department has added to the final rule paragraph (4) of § 223.193(b), which states: "Except as otherwise provided by law, a person who transfers unprocessed Federal timber to another person and meets all notice, certification acknowledgment, reporting and record keeping requirements contained in this section shall be relieved from further liability for such timber pursuant to the Act."

Comment. One individual stated that the 10-day period for distribution of the completed transfer document was unrealistically short, especially for a company engaged in a large number of such transactions. Another stated that requiring prompt reporting of such comprehensive information is a substantial and costly burden, particularly given the penalties for mis-reporting or making a single mistake. Still another stated that a phase-in period should be allowed so that companies can adjust or alter their accounting system to meet these requirements.

Response. Effective monitoring and enforcement are dependent on prompt reporting of transfers. All the documents needed to report a transfer are available at the time a transfer agreement is reached, therefore there is little reason that more than 10 calendar days are needed to report that transfer to the Forest Service. The Department also does not believe a phase-in period for complying with these requirements is necessary. The proposed rule has given persons ample time to prepare for compliance with the final rule. Therefore, no change in the final rule is needed.

Comment. One respondent said that the certification language in § 223.193(b)(3)(vi) should state, "an acknowledgment of the prohibition against acquiring unprocessed federal timber *by* a person" who is prohibited by the Act from purchasing unprocessed Federal timber directly from the United States, rather than *from* a person.

Response. The Department does not agree with the comment. The rule already provides that the person acknowledges that he or she may purchase unprocessed Federal timber in accordance with the Act (§ 223.193(b)(3)(ix)). This separate acknowledgment reminds the person acquiring the timber that Federal timber that may not be purchased directly, may not be purchased indirectly either. No change in the rule is necessary.

Comment. One respondent stated that the transfer form should be shorter, with an acknowledgment of the requirement for domestic processing of unprocessed Federal timber, and an acknowledgment that the transfer of unprocessed Federal timber to persons who are not qualified to acquire Federal timber constitutes a violation of the Act, and an acknowledgment from the person acquiring the timber that the person will domestically process the timber.

Response. The certifications provide that the person receiving the timber knows that the timber must be domestically processed, and that the timber is subject to the prohibition against substitution (§ 223.193(b)(3) (vii) and (ix)). The Department agrees, however, that the person transferring the timber needs to acknowledge that transfer of the timber to persons not qualified to acquire Federal timber constitutes a violation of the Act. Persons not qualified to acquire Federal timber are those who could not acquire that timber directly from the Federal government, in violation against substitution, or those who acquire the Federal timber for export. Completion of the form, including acknowledgment of the buyer's eligibility to acquire the timber is sufficient to protect the seller of the timber from an invalid transfer (New paragraph (4) of § 223.193 relieves a person of liability if all notices, agreements and acknowledgments in this section are met except as otherwise provided by law). Accordingly, a sentence has been added to the certification at § 223.193(b)(2)(ii) that the certifier acknowledges that the transfer of unprocessed Federal timber to a person who is not eligible to acquire such timber either because of a substitution violation, or because the person is acquiring such timber for export is a violation of the Act.

Comment. One respondent stated that a violation of the terms of the certification should not be a violation of the Act, but a violation of the contract.

Response. The terms of the certification include an agreement to comply with the Act, and follow procedures to ensure that the government can monitor the transfer of logs, pursuant to 16 U.S.C. 620d(a). Additionally, the Act states that any violation of the Act or regulations implementing the Act is punishable by fines, the amount of which is determined by the specific circumstances. Further, transfer of logs does not always occur within the context of a government contract, although violation of the Act is grounds for canceling a government contract (16 U.S.C. 620d(d)(2)). Therefore, no change is made to the certification language in response to this comment.

Comment. One respondent outlined an alternative to the certifications, branding and painting developed in the proposed rules. The respondent stated that the Department should certify all purchasers who are authorized to buy Federal timber. This would include manufacturers, non-manufacturers and those who buy Federal timber from third parties.

Purchasers certified to purchase Federal timber would report all transactions, including transfer of private timber, to the agency within 10 days. A transfer agreement would be developed by the agency including the agency certification numbers for buyer and seller, estimated volume and a statement that all logs with yellow paint must be domestically produced.

All Federal logs would be painted on at least one end prior to leaving the sale area. All logs requiring domestic processing which are transferred to a third party would be painted on both ends with yellow paint prior to transfer. All logs transferred to a third party would be hammer branded with a mill brand prior to transfer. Waivers would be provided. The respondent states that the key to the Act is to show that a person who purchased Federal timber has not sold private timber for export, and that anyone may purchase unmarked logs, but purchasers authorized to purchase Federal timber may not transfer unmarked logs for export. Therefore, there is no reason to identify the origin as long as logs are marked for domestic processing.

Response. The Department disagrees with this approach. First, while the Department can identify purchasers of Federal timber, it has no way of identifying persons who acquire Federal timber beyond the first purchaser. Therefore, a national certification of all persons who acquire Federal timber is not possible. Second, while it is true that a major component of the Act is that a person acquiring Federal timber has not transferred private timber for export, simply certifying that a person may acquire Federal timber is inadequate for enforcement of the Act. A person with a sourcing area may acquire Federal timber from within that sourcing area, and may transfer private timber for export outside of the sourcing area. Simply identifying the person is inadequate; the Department would need to establish where the timber originated to determine whether there had been a violation. The ability to purchase unmarked logs would render meaningless any tracking system. The Department would have no way of knowing whether a violation of the Act had occurred, based on either the transferor or the origin of the logs. Further, a person acquiring such logs also has no assurance that the transaction is legal. The Department has tried to make the tracking system as straightforward as possible while enabling the monitoring of the logs, as required by the Act. No change in the rule has been made in response to this comment.

Comment. One person stated that the amount of information that must be promptly reported by the buyer and seller of logs, coupled with the penalties for each violation of these requirements, make these requirements a substantial barrier to transferring logs to processors that can mill them to their highest and best use.

Another respondent commented that requiring that records be maintained for 3 years will create considerable additional storage requirements, and that there is no reason to collect the amount of information required in this section. This person said that only a signed statement stipulating that the logs must be domestically processed should be required.

Response. The Act requires the Secretary to draft any regulations necessary to implement the Act. The Department believes that the names of the log seller and the buyer, the log identification markings, the Federal agency contract number, and the volume of Federal logs included in the transaction is the minimum amount of information needed to monitor compliance with the Act. The log identification marks and contract number are necessary to determine origin of the logs and the original buyer. The volume is necessary to track logs, to determine the extent of an alleged violation and to help assess civil penalties. The retention of unprocessed log transfer transaction statements is necessary for the Department to monitor and assure compliance with log export and substitution restrictions. Without such records, the Department could not fulfill its responsibilities to implement and enforce the Act. Therefore, the Department declines to adopt these comments.

Comment. One person commented that because many log transfer agreements are made before actual volume measurements are performed, the Department must be willing to accept estimated log volumes rather than actual log volumes on the transfer form.

Response. The Department will accept volume estimates used in the actual transaction. If the transaction is based on standing tree (cruise) estimates, that will be the volume used for reporting the transaction. If the transaction is based on actual log scale volume, that is the volume to be reported. The phrase "estimated volume or actual volume if the transfer is based on log scale volume," has been added to paragraph (b)(1) in response to this comment.

Comment. One person commented that there is no justification for requiring either the transferrers or the transferees to certify that the information submitted is not confidential.

Response. The Department has revised this requirement. If a person signing the transfer form would like to keep something confidential, the person should mark the information. The Department will then evaluate the confidentiality of the information pursuant to the applicable laws. Therefore, the Department has modified the sentence on confidentiality in the form and in paragraph (b)(3)(ix) of proposed § 223.193.

Comment. One respondent stated that a person transferring unprocessed federal logs must certify that the person understands the Act and regulations which can involve complex legal issues. Two respondents expressed concern that the rule requires persons to reach legal conclusions on issues where the law is unclear with regard to the log transfer documents and the annual reports, and complained that the administering agency is unwilling to give advisory opinions.

Response. While the Act, and therefore the regulations implementing the Act can be complex, a purchaser of unprocessed timber must understand these rules in order to abide by the law. No enforcement of the reporting requirements of the Act or these rules will occur until after this rule is published. The Forest Service is willing to meet with anyone to discuss the Act and/or the regulations when the regulations are finalized. However, the Department cannot give legal advice. No change in the rule is necessary.

A new paragraph, § 223.193(b)(3)(ii), has been added to clarify that the purchaser of Federal timber agrees to allow Federal officials access to log storage and processing facilities for the purpose of monitoring compliance with the Act and implementing regulations. This requirement clarifies that the Federal logs in possession of an indirect purchaser are subject to the same review as Federal logs acquired directly. Without access to log storage and processing facilities, the Department believes the Act's requirements to monitor indirect substitution and enforce its prohibitions would be severely hampered because of an inability to monitor log movement.

A new paragraph, § 223.193(b)(3)(iv), has been added to assure that indirect purchasers are aware the Act requires anyone who acquires federal timber to report the timber's receipt and disposition, 16 U.S.C. 620d(a)(1). Therefore, this paragraph references the required annual report.

Other than the changes noted, the Department has adopted several minor changes to the proposed text of this section for technical and editorial clarity which have no substantive effect.

Section 223.194 Procedures for Reporting Acquisition and Disposition of Private Timber

Under the Act, a person who sells or otherwise transfers private timber that requires domestic processing and has in the person's possession or subsequently acquires unprocessed Federal timber could be in violation of the prohibition against substitution if the buyer of the unprocessed private timber were to export it. To protect a person who deals in both unprocessed Federal and unprocessed private timber from such substitution liability, proposed § 223.194 would require such a person to notify and receive an acknowledgment from the person acquiring the unprocessed private timber that such timber must be domestically processed, not exported, and would require that such transfers be reported to the Forest Service within 10 days of the transaction. The Forest Service would provide a form for such purpose. The statement on the proposed form would provide: (1) Notice to the person receiving the unprocessed private timber that exporting that timber would violate the regulations prohibiting substitution; (2) Notice to the person receiving the unprocessed private timber that the timber has been identified for domestic manufacturing by marking the logs with highway yellow paint that must be retained on the timber; (3) The acknowledgment of the notice by the recipient; (4) An agreement to include the statement in any subsequent transaction documents; (5) A signed copy of the transaction statement to be sent to the applicable Regional Forester within ten (10) calendar days of the transaction; and (6) An agreement to retain records of all transactions involving acquisition and disposition of unprocessed timber from Federal or private lands west of the 100th meridian in the contiguous 48 states for a period of three (3) years from the date of disposal by manufacturing or transfer.

Comments. This requirement drew 18 responses, most of which generally opposed the reporting requirements involving the acquisition and disposition of private timber, and specifically opposed the frequency requirements. These respondents said that their internal accounting and office practices made compliance within the 10 day time frame impossible. Other respondents said the reporting procedures were satisfactory.

Response. The Act specifically prohibits substitution of unprocessed Federal timber for export unprocessed private timber, and assigned the responsibility for monitoring compliance of these prohibitions to the Secretaries of Agriculture and the Interior. Reporting the acquisition and disposition of private timber, along with random site visits, are crucial to fulfilling this monitoring responsibility. The Department cannot enforce the Act's prohibition against substitution and the specific exceptions, without the ability to track unprocessed private timber. Therefore, the Department declines to adopt the suggestions that the proposed reporting of private timber transactions be removed from the rule. As stated earlier, the Department believes that prompt reporting of transfers is vital to effective enforcement of the Act and believes that reporting such transfers within 10 calendar days is not excessively burdensome.

Comment. One respondent commented that the requirement to notify the person receiving unprocessed private timber that the timber has been identified for domestic processing by a spot of yellow paint that must be retained would be extremely expensive, and particularly difficult for small businesses.

Response. In order to enforce the Act's restrictions against direct and indirect substitution, it is necessary to mark all logs that must be domestically processed. Otherwise, there is no way to distinguish between private logs that may be exported, because there is no link to the acquisition of federal logs, and private logs that may not be exported because of the potential violation of substitution. The additional requirements, required by the Act's prohibitions, are the minimal means of identifying logs to be processed. No change in the rule has been made in response to this comment.

Comment. One person stated the rule should require persons who sell private timber from within their approved sourcing area to notify purchasers that they cannot export the logs under the Act.

Response. The rule's "Notice and Acknowledgment of Requirement to Domestically Process Timber Originating from Private Land" accomplishes this objective.

Comment. One respondent states that the rule should clarify that the transaction statements are not required from persons who trade in private timber that originates from outside a sourcing area.

Response. There are no requirements to complete such a statement for transactions involving unprocessed private timber from outside a person's approved sourcing area, because such timber does not require domestic processing. However, the Department agrees that this could be clarified. Therefore, paragraph (a) of § 223.194 has been amended to delete the language regarding private lands located within a sourcing area, and to add a new sentence at the end of the paragraph as follows: "Unprocessed timber originating from private lands located outside of a sourcing area may be transferred by the holder of the sourcing area, or by persons acquiring such unprocessed timber who are eligible to export such timber, without including such a statement."

Paragraph (a) of § 223.194 has also been amended to note that the reporting requirement applies to timber that requires domestic processing, including private timber originating within a sourcing area. This clarification is included to encompass all timber that requires domestic processing.

Paragraphs (b)(1) and (2) have been revised to include the required contents of the notice, including an agreement to permit authorized Federal officials access to private log storage and processing facilities in order to monitor compliance with the Act. As with monitoring of Federal log transfers, discussed earlier in this preamble, without permission to enter into private log storage and processing facilities of those persons in possession of private timber that requires domestic processing, the Department believes the indirect substitution prohibitions of the Act will be substantially unenforceable. This monitoring is a necessary component of enforcing the prohibition against substitution through the export of private timber that requires domestic processing, pursuant to § 223.189(a)(3).

Paragraph (b) has also been revised to include acknowledgments that the person transferring or acquiring the unprocessed private timber is: (1) Aware that failure to comply with the domestic manufacturing requirement for the unprocessed timber or failure to notify subsequent persons of these requirements is a violation of the Act, (2) understands that failure to completely and accurately report and identify unprocessed timber is a violation of the Act and the False Statements Act (18 U.S.C. 1001), and (3) the form has been read and understood. These acknowledgments are needed to assure that the certifier is aware of and understands the potential consequences of violating the Act. These changes assure that the requirements of the Act are enforceable.

Paragraph (b) has also been revised to remove the actual certification statements appearing on the form from the rule.

Further, the Department has clarified in new paragraph (c) that persons who fully comply with the notification requirement in this section are not liable for the actions of persons who subsequently acquire such timber in violation of the Act, except as otherwise provided by law.

The Department has adopted several minor changes to the proposed text of this section for technical and editorial clarity but which have no substantive effect.

General Comments Relating to the Reporting Requirements of Both Sections 223.193 and 223.194

Comment. Several respondents indicated the reporting requirements are too burdensome and costly. Some stated the burden is greatest on the smaller businesses that must commit substantial amounts of their limited time and resources to understanding and complying with these rules. Some stated that these requirements could eliminate some small businesses from continuing to purchase Federal logs. One respondent suggested that there be an annual notification by company, rather than a notification on each sale. One respondent said that it is impractical to require accounting by individual logs. Two respondents wrote that while these are new and added administrative procedures for the purchasers of Federal timber, the provisions appear reasonable and necessary to fulfill the intent of the legislation.

Response. As discussed previously, the annual reporting requirements of the Act do not differ significantly from what is presently being required in contracts awarded before August 20, 1990. The difference is that under the Act, persons who acquire National Forest System timber indirectly must submit an annual report. Previously only those persons who acquired unprocessed timber from National Forest System lands directly had to submit an annual report. In addition, the transfer reporting requirements under the Act are new. Contracts awarded before August 20, 1990 do not have this reporting requirement. Individual logs have never been requested to be identified in annual reports; reporting is done by volume.

The Act requires that a person notify the recipient about the Federal origin of the timber before a transfer occurs; an annual report would not meet this requirement. Completion of these transaction reports, which are on forms furnished by the Forest Service, takes from 5–20 minutes each to complete. The Department does not believe the new forms will have a major impact on timber purchasers, including small businesses.

The most time-consuming task is the annual report. However, most National Forest System timber purchasers have been providing similar information in the previous annual report since 1973.

The initial impact to all businesses will be the submitting of two different sets of forms: those for sales awarded before August 20, 1990, and those awarded on or after August 20, 1990.

The Department anticipates that at least 90 percent of the pre-enactment contracts will be completed and closed within three years of publication of this rule. The dual reporting burden will be steadily and substantially reduced over that period.

Comment. One respondent asked that the terms "transaction" and "transaction statement" be defined. Specifically, the respondent was concerned that a "transaction statement" not include log prices.

Response. The Department agrees. These terms are used in § 223.194 and have been defined in § 223.186 of this rule as follows: "*Transaction* means an arrangement involving the transfer of unprocessed timber. *Transaction statement* is a signed copy of one of the transaction reporting forms in 36 CFR 223.193 and 223.194." The transaction statement does not require information regarding log prices.

Comment. One person was concerned that the forms are inappropriate for a corporation or partnership because they are written for the individual. The person suggested that the forms be revised to accommodate all types of businesses.

Response. The forms are drafted to accommodate the definition of a *person*, which includes the individual as well as corporations. Therefore, the suggestion is not adopted. The individual signing the form is responsible for the content in that person's official capacity.

Comment. One respondent stated that maintaining records for three years is not necessary.

Response. The retention of acquisition and disposition records is necessary for the Department to monitor and ensure compliance with the prohibitions against export and substitution. Logs are often in commerce for several years. Without the availability of records, the Department could not fulfill its responsibilities to implement and enforce the Act on National Forest System lands by tracking the timber back to its source. The Act provides for the Secretary to draft such regulations as may be necessary to implement the Act.

Paragraphs (a)(5)(iv), (b)(2)(iv), and (b)(3)(I) of § 223.193 and paragraphs (b)(1)(iv) and (b)(2)(iv) of § 223.194 implement this requirement of the Act. Paragraphs (b)(1)(iv) and (b)(2)(iv) of § 223.194 have been revised to make them consistent with paragraphs (a)(5)(iv), (b)(2)(iv), and (b)(3)(I) of § 223.193, relating to the availability of records. The portion of paragraph (a) of § 223.194 that concerns the notification statement has been changed to paragraph (b), and has been revised to clarify that notification is necessary only for timber that requires domestic processing. Some other minor changes have been made to the proposed text of this section for technical and editorial clarity but which will have no substantive effect.

Section 223.195 Procedures for Identifying and Marking Timber

Section 223.195 of the proposed rule would require marking and identifying of unprocessed logs originating from National Forest System lands located west of the 100th meridian in the 48 contiguous States. Proposed § 223.195 would require each unprocessed log originating from National Forest System lands west of the 100th meridian in the contiguous 48 states to be marked on each end with a spot of highway yellow paint and with a hammer brand approved for use by the Forest Supervisor of the National Forest from which the unprocessed log originates. In addition, if the unprocessed log is sold to a third party, proposed § 223.195 would require it to be tagged on one end with a bar-coded tag, which would identify the origin of the unprocessed log by timber sale contract number, region, national forest, ranger district, and log number.

As proposed, § 223.195 would permit only the Regional Foresters of Regions 1, 2, 3, and 4 to waive the requirements to hammer-brand on an individual sale basis if there is no history of logs from any origin being exported from the area of the purchaser's operations if the purchaser is in compliance with these regulations, including the provision relating to transfer documents, and the purchaser has certified that he or she has not exported logs from that area in the last 24 months.

Proposed § 223.195 would reserve highway yellow paint for identifying logs originating from west of the 100th meridian in the contiguous 48 states that require domestic manufacturing.

Comments. This section drew 70 responses. Forty-four comments opposed the proposed use of bar code tags as burdensome, costly and unnecessary to implement the Act.

Response. In analyzing all comments and conducting surveys of National Forests and bar code tag manufacturers, the Department concludes that at this time bar coding would not be an effective or efficient way to track logs. Therefore, the bar coding requirements have been removed from the final rule. Likewise, these requirements have been removed from the reporting requirements in §§ 223.193 and 223.194. However, authorization is provided for the testing of alternative methods for possible future revision of this rule.

Comments. Twenty-four comments addressed the double-end hammer branding and yellow painting requirements for identifying National Forest logs. None supported this requirement, but several persons said they preferred hammer branding and painting to tagging logs with bar codes. Comments included the following points:

- Increased branding and painting makes the entire industry pay for the actions of a few bad characters.
- Some sales are so far removed from export yards that increased branding and painting are not necessary.
- Branding and painting requirements compromise safety, because they are manual work that must be done on the landing.
- The waiver provisions are unrealistic, too stringent, and not adjustable to local circumstances or conditions. Judgment as to requirements should be returned to the field.
- Painting and branding small and lower valued timber is problematic; flexibility regarding requirements should be made available in Regions 5 and 6, to accommodate conditions on the ground.
- Painting and branding should be required only on most logs and/or a minimum of 10 logs per load. Many logs larger than 10″ or 12″ should be branded on one end.
- Branding and painting on both ends conflicts with the utilization standards that require logs to be bucked at the break; this is impossible to do because the long is shattered.

Response. Following the reassessment of the use of bar coded tags, the Department believes that hammer branding and yellow painting are the best options currently available for identifying logs not available for export. The Department must be able to identify and track unprocessed Federal and private logs ineligible for export. To make tracking possible and to comply with the Act, all Federal and private logs required to be domestically processed must have long lasting and easily recognizable identifying marks which will stay on the logs until processed.

The Department acknowledges that some logs have more export value than others, and that it is difficult to get a legible brand on a small diameter log 100 percent of the time. With regard to the utilization standards, each end may need to be sawed in some instances. Consequently, the Department has rewritten proposed § 223.195 in the final rule to include paragraphs (e) and (f).

Paragraph (e) permits the Chief of the Forest Service to waive the painting requirements on National Forest logs and private logs when other identification methods that are equal or better than the yellow painting method are found. An easily identified marking indicating which logs must be domestically processed is essential for enforcement purposes. However, this waiver allows for developing technology.

Paragraph (f) amends the criteria by which the Regional Forester may waive all or a portion of the branding requirements in Regions 1, 2, 3 and 4. The Regional Forester remains the appropriate person to grant waivers. The Regional Forester has the broad perspective regarding exporting in the region. Given the Department's recent experiences with logs being transported great distances for commercial purposes, this broad perspective is essential to make the waiver determination. The proposed requirement that exporting not have occurred in the area of the purchaser's operations has been modified in the final rule. The requirement in the final. rule is that exporting not have occurred in the previous five years in the purchaser's area of operations. While providing some time for logs to be in commerce, this modification also accounts for changed market conditions. However, to ensure effective enforcement of the Act, a new paragraph (iv) has been added to § 233.195(f)(1) to state that if the Regional Forester determines that exporting is or has been occurring within the person's area of operation within the previous 5 years, the Regional Forester shall revoke the waiver. Further, the certificate for Regions 1–4 states that the person not have exported in the area of operations in the past five years, to parallel the waiver requirement. In addition, the waiver is valid only for the person's area of operations. The Department believes it is helpful to provide flexibility to those purchasers whose logs would not have the opportunity to intermingle with export traffic. However, it is essential to monitor those logs that do leave the area of operations, and have a greater opportunity to intermingle with export traffic, in order to enforce the Act. Unmarked logs make enforcement of the Act's restrictions impossible, since their ability to be exported is not documented.

Paragraph (f) also allows for waiver of branding on one end on logs less than ten inches in diameter on the large end within Region 5 & 6 that will be processed at a specifically identified facility. The Department recognizes that it may be difficult to brand a small log. One respondent suggested a waiver for logs less than eight inches in diameter on the large end. However, the Department is permitting waiver of one-end branding for logs less than ten inches on the large end, because there has not been significant demand for round wood of this size in the export market, so the chance of these logs mingling with exportable logs is low. However, paragraph (iv) states that if the Regional Forester determines that logs ten (10) inches or less in diameter inside bark on the large end are being exported in the Region, the Regional Forester shall revoke the waiver. This allows the agency to respond effectively to changed conditions. All waivers are granted on an individual timber sale basis.

The Department has also moved the waiver of painting requirements to paragraph (e), following the requirements to paint unprocessed timber originating from private lands in paragraph (d). This move clarifies that the waiver of painting requirements may apply to all unprocessed logs otherwise requiring yellow paint.

With regard to safety, logging is universally recognized as an inherently dangerous occupation. To minimize safety hazards to both private and Federal employees, logging contractors, landowners and managing agencies must work together to provide a reasonably safe working environment. Log accountability and identification must also be provided to assure that the government receives full payment for logs and that logs requiring domestic processing are not exported. No change in the rule is necessary; however, the Department is always interested in more efficient and effective methods for identifying and tracing logs to assure compliance with the Act.

Comment. One respondent commented that long logs are manually bucked, decked, and held for processing through a small sawmill or chip-and-saw. These logs are "in process," but the regulations do not recognize this situation. More flexible identification of in-process logs is necessary—or Regional Foresters need more funding and direction to monitor and enforce existing regulations. Another respondent stated that non-grade logs are often difficult to brand and paint, discouraging the use of small and highly defective logs because of cost.

Response. The proposed rule would require that if a log is cut into two or more pieces, each piece shall be identified in the same manner as the original piece. This provision was deemed necessary to assure that all Federal logs and other logs requiring domestic processing are properly identified, even when such logs are remanufactured into shorter length segments, to prevent possible exporting.

However, the Department has concluded that in some situations it may be highly impractical, very costly and not necessarily in the Government's interest for a person to have available for use all branding hammers needed to replace brands assigned to logs of Federal origin that he or she may be acquiring from other persons. Consequently, paragraph (b)(1) permitting the use of yard catch brands has been added to § 223.195 of the final rule as follows: "A generic log hammer brand, knows as a "catch brand", used to identify ownership, may be used to replace lost, removed, unreadable or otherwise missing brands where such use is authorized by the Regional Forester and approved by the Contracting Officer. Use of such a catch brand on a log or log segment will signify Federal origin."

Further, the Department recognizes that sometimes such re-branding may not be appropriate or necessary, particularly where such pieces are being immediately processed, and/or final processing is to continue on-site, within a relatively short period of time. Accordingly, the Department has added the following to paragraph (b)(2) of § 223.195: "The requirement to preserve identification of log pieces shall not apply to logs cut into two or more segments as part of the mill in-feed process immediately before processing. Log segments that are returned to or placed in storage must be marked on both ends with yellow paint."

With regard to non-grade logs that may be difficult to brand and paint, the Department has provided a waiver of branding on one end for logs 10″ or less, assuming they are not being exported in the Region. The Department believes that the waiver addresses this respondent's concern.

Comment. One respondent objected to the waiver in a person's area of operations. The respondent stated that his company had many areas of operations, and one area should not be affected by another.

Response. The area of operations that will be considered is within the Region where the waiver will occur. Otherwise, the Regional Forester could not grant a waiver. A smaller area would lose meaning in terms of identifying transport of logs for export. No change to the rule is necessary in response to this comment.

Comment. The same respondent said that the criterion in the proposed rule at 36 CFR 223.195(c)(4)(ii), now in paragraph (f)(1)(ii) of the final rule, that persons must certify that they have not exported unprocessed timber from private lands west of the 100th meridian in the contiguous 48 States in the previous 24 months means that those with statutory exemptions from substitution in other circumstances (sourcing areas) could not receive a waiver.

Response. The waiver of branding would have to be evaluated along with any exemptions from substitution to which a person is subject. However, even if exporting is allowed in the same area that Federal timber may be purchased, for instance, under the indirect substitution exemption in § 223.203, this would not affect branding requirements. The Department would need to monitor the flow of logs especially carefully in this situation, to insure that the intermingling of exportable and non-exportable logs does not occur. No change in the rule is necessary in response to this comment.

Comment. One respondent stated that the waiver provision is too limited to be useful, because it requires no history of logs from any origin being exported from the area. This respondent felt that few waivers will be implemented because Region 1 logs have been exported, and other Regions will be reluctant to grant waivers.

Response. The Department believes the revision of the waiver provisions in the final rule discussed above adequately addresses this comment. The revised waiver procedures give the Regional Foresters the ability to address unique local conditions.

Comment. One respondent stated that the annual requirement to certify that a Federal timber purchaser has not exported would suffice for the certification in the waiver of branding requirements.

Response. The Department believes that a separate certification for the particular purpose of waiving branding in a specific area is less confusing, since the purposes of each form are different.

Comment. One respondent suggested that notification of log sales between companies within a Region be reported to the Federal government in lieu of the marking and certification requirements. Only logs leaving a region would be required to be marked.

Response. In order to monitor export activity effectively, logs must be identified. A notification will not assist in identifying logs. Consistent and accurate tracking of these portable, fungible products requires individual log identification.

Analysis of these comments revealed that the proposed rule failed to state when such identifying marks should be applied to the logs. With regard to National Forest System logs, the product identification provision, C(T)6.82, in the timber sale contract requires that painting and branding of products be done before removal from the sale area. This has been a long-standing requirement and practice. Therefore, the Department has added this requirement to paragraph (c) of the final rule to avoid any possible confusion as to when the identifying marks are to be applied to logs originating from National Forest System lands.

With regard to private logs requiring domestic manufacturing, they must be marked before removal from the harvest area. If private logs are acquired by a person who may not export such logs, the logs must be marked by the person acquiring the logs at the time of the acquisition. This requirement has been added to paragraph (d) of the final rule.

Comment. One person stated that an estimated additional cost of $1.00 per thousand board feet will be incurred to comply with the new regulations requiring the painting of private and Federal logs and that these requirements appeared to not recognize the principle of cost/benefit ratios.

Response. The Department recognizes that some companies will incur additional costs by complying with these marking requirements. However, with the exception of the requirement to paint private logs, very similar branding and painting requirements have been required of National Forest timber sale purchasers in most areas of Regions 5 and 6 for at least 20 years, and more recently in Region 1. The Department believes the additional cost of properly identifying logs requiring domestic manufacturing in areas where branding and painting has not been extensively utilized in the past is necessary for effective implementation of the Act.

Comment. One respondent stated that adding yellow paint to private logs could cause confusion, because Federal and private loads could not be readily distinguished from a distance.

Response. The purpose of the yellow paint is to identify the log as requiring domestic processing, not to identify ownership or origin. Loads of National Forest, Bureau of Land Management, State Forest, and some private logs in Oregon and Washington currently carry yellow paint marks. Log identification is maintained by the log brands and truckload receipts displayed on each respective load. Therefore, the Department believes that the yellow paint does not cause confusion, and that no revision of the rule is warranted.

Comment. One respondent was concerned with the requirement that each unprocessed log shall be marked on each end with a spot of yellow paint and with a hammer brand approved for use.

Response. The Department expects timber sale administrators to administer contract requirements in a firm and reasonable manner to assure compliance with the objectives and provisions of the Act and these regulations. This rule provides for waivers of the requirements in some circumstances.

Comment. One respondent stated that the Department should waive the bar code tagging and highway yellow paint requirements on private timber for any purchaser who doesn't export logs.

Response. The requirement to use bar coding has been removed in the final rule. The export of private timber which has been identified as requiring domestic processing is a substitution violation. Only private timber that requires domestic processing must be painted. The yellow paint markings are essential to monitor compliance with the prohibitions against substitution. However, the Department has adopted a limited waiver of painting requirements where special conditions warrant, pursuant to § 223.195(e) of the final rule.

Comment. One reviewer stated a need for quick release of log brands for reuse.

Response. The proposed rule would require a 24-month waiting period before release of an assigned log brand to ensure that all logs harvested under the assigned brand had been domestically manufactured. The 24-month period guards against substitution violations. The Department recognizes that in those States that require registered log brands, many companies will have to develop and register additional log brands to meet this requirement. The Forest Service will strive to release brands for re-assignment as soon as possible following the 24-month period. No revision of the rule is necessary.

The Department has made several minor changes to the text of this section as proposed for technical and editorial clarity, but which have no substantive effect.

Section 223.196 Civil Penalties for Violation

Section 492(c) of the Act establishes civil penalties for violation of the Act of not more than $500,000 for each violation or three times the gross value of the unprocessed timber involved for a violator who exported or caused to be exported unprocessed Federal timber; not more than $500,000 for a violator who willfully violates any provision of the Act or any regulation issued under the Act; not more than $75,000 for each violator who commits a violation in disregard of such provisions and/or regulations; and not more than $50,000 for each violation by a violator who should have known that the action constituted a violation of such provisions and regulations.

The last three penalties may be assessed regardless of whether a violation caused the actual export of unprocessed Federal timber. The Act also provides that a penalty assessed under the Act shall not exclude any other penalty provided by law and shall be subject to review in an appropriate United States district court.

The proposed rule at § 223.196 merely repeats the language of the Act.

This section drew four comments.

Comment: Some respondents felt that 100 percent compliance with the branding, painting, log tagging, bar coding, and inventory requirements is impossible. They thought that minor instances of an illegible brand, or a missed log brand or paint should be handled in relation to the infraction. These respondents felt the final rule must be flexible and attainable so that responsible and prudent purchasers can operate without facing civil penalties. In the view of these respondents, current log accountability requirements adequately meet the Act's enforcement objectives. Another respondent said that the Forest Service should list priorities for enforcement.

Response: The Department recognizes that the law and these rules must be administered with prudence and good judgment. The Act imposes strict fines on violations of "any provision" of the Act or regulations implementing the Act. The Act also states that the Secretary *may* assess fines based "on the record and after an opportunity for a hearing." Therefore the Act ensures that those persons accused of violations will have a full and fair opportunity to present their views and that the actual assessment of penalties is discretionary. The Department believes that the regulations as written reflect the Act. The Department expects all timber sale purchasers and other persons acquiring unprocessed Federal timber to comply with the log identification requirements contained in this rule. The Forest Service will enforce the Act and these regulations as written, and will consider infractions on a case-by-case basis. The Department disagrees that current log accountability requirements are adequate and declines to adopt this comment.

Comment. One person stated that the penalties for non-willful offenses are excessive, and another person stated that the "stiff penalties for lost or damaged tags are unreasonable."

Response: The Department has no authority to change the penalties stipulated in the Act. However, Congress established maximum penalties ("not more than"), but not minimum penalties. The severity of the penalty to be assessed in each case will be based on the severity of the offense. Bar code tags are not required in the final rule. No change in the rule as proposed is necessary to respond to this comment.

Comment. One person suggested making the penalty for exporting Federal timber severe enough to deter violations of the Act.

Response. Congress authorized the Secretary to assess civil penalties of up to $500,000 for each violation, and to debar and cancel contracts in order to deter illegal exports or substitution activities. Moreover, the penalties provided by the Act do not exclude any other penalty provided by law. The Department has no statutory authority to establish penalties beyond those specified by law. Therefore, this comment cannot be adopted.

Section 223.197 Civil Penalty Assessment Procedures

Section 492(c) of the Act (16 U.S.C. 620d(c)) provides that if the Secretary of Agriculture finds, on the record and after an opportunity for a hearing, that a person has violated the Act or its regulations, he or she may impose certain civil penalties for such violation(s). For purposes of assessing these penalties, the Department has added the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) to the list of statutes governed by the adjudicatory procedures at 7 CFR 1.130, *et seq.* in a separate, final rulemaking document (56 FR 22105, May 14, 1991).

Comment. Two persons commented that, as determined in "*Tall* v. *United States*", factual determinations can be made only by a jury, not simply on an administrative record.

Response: The Administration Procedure Act (APA), under 5 U.S.C. 554, governs formal adjudication if a statute requires a determination to be made, "on the record after opportunity for an agency hearing * * *." The Act requires the Secretary to assess certain penalties if he/she finds, "on the record and after an opportunity for a hearing" that a person meets the elements of the various penalties (16 U.S.C. 620d(c)(1)).

While section 554 exempts an adjudication from the formal administrative adjudication process if a matter is subject to a subsequent trial of the law and the facts de novo in a court (5 U.S.C. 554(1)), this exception is not found in the Act. On the contrary, the Act states that an administrative penalty shall be, "subject to review in an appropriate United States district court" (16 U.S.C. 620d(c)(3)). In other words, adjudication of civil penalties may occur in an ordinary formal administrative process, with record review in district court. None of the research data bases revealed a case entitled "*Tall* v. *United States*" dealing with this issue.

Section 223.198 Administrative Remedies for Violation

Section 492(d)(2) of the Act provides that, in addition to the provision for debarment in subpart C of this part, the head of the appropriate Federal department or agency also may cancel any contract entered into with a person found to have violated the Act or regulations or contracts issued under the Act.

The proposed rule would clarify that such a finding shall constitute a serious violation of contract terms pursuant to § 223.116(a)(1) regarding cancellation of contracts.

Three persons responded to this section.

Comment. These persons suggest that no adverse action should be taken against a timber purchaser before expiration of all appeal rights on debarment proceedings. To do otherwise would violate substantive and procedural due process protections.

Response. To protect the public's interest the Department will continue to suspend timber sale operations as soon as improprieties are determined. This is consistent with current procedure under existing regulations. The procedures applicable to the debarment of persons violating the Act, or any regulation or contract issued under the Act are not applicable to existing contracts which are under consideration for cancellation. The debarment procedures apply to future timber sales and future acquisitions of Federal timber. Any debarment action will be taken consistent with the Act and the regulation issues pursuant to the Act. No change in the rule as proposed is necessary to address this comment.

Comment. One respondent suggested that contracting officers be given appropriate guidance on which violations justify the drastic remedy of contract cancellation, including direction on considering whether the violation was intentional, produced significant financial benefits to the perpetrator, etc. Another respondent said that the authority to cancel contracts should not be delegable.

Response. Adequate checks and balances currently exist. Having been given broad powers under the Contract Disputes Act of 1978 (41 U.S.C. 601 *et seq.*), contracting officers are still required to draw counsel and advice from Forest Service law enforcement specialists to determine criminal intent, the Regional Forester's and Chief's contracting specialists, the Department's Office of the General Counsel (OGC), and in some cases the Department of Justice's U.S. Attorney's Office before deciding which violations justify contract cancellation. No additional direction in this final rule is necessary.

Section 223.199 Procedures for Cooperation with Other Agencies

Section 495 of the Act (16 U.S.C. 620f) states that the Secretaries of Agriculture and Interior shall, in consultation, each prescribe new, coordinated, and consistent regulations to implement this title on lands which they administer. Subsection 491(d)(2) of the Act (16 U.S.C. 602c(d)(2)) authorizes the States to cooperate with Federal and State Agencies with appropriate jurisdiction to further the intent of this title. The Act also requires the Secretary of Commerce to issue certain orders and promulgate rules and guidelines necessary to carry out this title.

State and Federal government agencies clearly have individual responsibilities under the Act. Cooperation among these agencies in monitoring and enforcing these regulations provides the most efficient use of limited personnel and financial resources. Cooperative Agreements and/or Memoranda of Understanding between governmental agencies are common in similar situations where there are common responsibilities and interests.

Cooperative efforts to enforce this Act might include exchanging information on sourcing area applications, sourcing area approvals or disapprovals, log brands being used, logging activity, and proposed timber sales. Agencies may cooperate on monitoring export facilities or log storage areas so that each agency would not be required to make separate visits. This cooperative effort would also reduce the impact on the operators of the export facilities and storage areas.

The Department has consulted with and discussed cooperative agreements with the Bureau of Land Management, the Department of Defense and other agencies managing public timber resources in the development of the rule as proposed.

Comment. One person commented that neither the preamble nor the proposed regulations mentions any consultation or any effort to be coordinated and consistent at the national level.

Response. Cooperative agreements and Memoranda of Understanding with other public agencies may be developed at the National Forest, Regional or National Office levels, depending on the program impacts and range of interest. National manuals and handbooks provide direction and guidelines for drafting assistance and consulting with higher-level officials and the Department's Office of General Counsel before entering into such agreements. No further direction is necessary in this final rule.

Section 223.200 Determination of Surplus Species

Section 489(b) of the Act (16 U.S.C. 620a(b)) and the proposed rule would require that determinations that specific quantities of grades and species are surplus to domestic manufacturing needs must be made in accordance with Title 5, United States Code, section 553, the rule making section of the Administrative Procedure Act. The proposed rule also would require that withdrawals of such determinations be done in accordance with the same procedure. Section 491(h) of the Act (16 U.S.C. 620c) requires withdrawals of such determinations to be done "by rule."

The proposed rule would require that review of a determination that a quantity of grade or species is surplus must be reviewed at least once every three (3) years. Notice of the review will be published in the **Federal Register**. The public will have at least 30 days to comment on the review.

The proposed rule specifically requested comments on the current determinations that Alaska yellow cedar and Port Orford cedar supplies are surplus to domestic manufacturing needs. These comments will be used to develop a separate rule making on surplus species determinations. The proposed rule repeated the interim rule which continued the surplus designation of these two species until hearings could be held, in order to avoid the disruption that could be caused by suddenly discontinuing their present surplus status.

Fourteen responses were received on this section. Most of these addressed whether Port Orford cedar should be classified as being surplus to domestic manufacturing needs. Other species discussed and/or proposed for surplus consideration were Alaskan yellow cedar, Western juniper, Rocky Mountain juniper and Pacific yew.

Comment. Six respondents stated that there is a strong domestic demand for Port Orford cedar, and urged that Port Orford cedar no longer be exported in log form. Five other respondents stated Port Orford cedar is still surplus to domestic manufacturing needs, and that if the species were to be declared non-surplus it would disrupt employment and adversely affect the local communities where it is grown and harvested.

Response. The Department is considering these comments in its development of the proposed rule on surplus species.

Comment. One respondent stated that hearings could pose problems for small manufacturers, who might be "disciplined" by larger companies for opposing the export of Port Orford Cedar.

Response. The Act requires a "hearing" on the issue of surplus species. Hearings will be conducted via the rule making process. Comments may be submitted anonymously in response to the proposed rule on surplus species when it is published.

Comment. Comments regarding other species were as follows:

One person stated that Alaska yellow cedar is not surplus to domestic manufacturing needs, and that a hearing would find mills willing to purchase and process the species should it be prohibited from export. Another party stated that Alaska yellow cedar is surplus.

One person responded that Western/Rocky Mountain/Utah juniper should be made a surplus species. This respondent and another respondent suggested also that Pacific yew should also be declared surplus and permitted to be exported because there is little if any domestic use for this species.

Response. Again, these comments will be analyzed in the development of the proposed determination of the surplus species regulation. All interested parties should be prepared to submit comments regarding this proposed determination during the comment period provided in the **Federal Register** publication.

Comment. Two persons commented that the proposed procedures in the rule for determining surplus species appear adequate, and another party commented that the entire set of regulations should be finalized before determining if Port Orford cedar or Alaska yellow cedar supplies exceed domestic manufacturing needs.

Response. The Department agrees with these comments. No revision of the rule is necessary. Some minor changes to the text of this section as proposed have been made for technical and editorial clarity, but have no substantive effect.

Section 223.201 Limitations on Timber Harvested in Alaska

Section 223.161 of the current regulations is repeated, with minor editing, in this Subpart to consolidate all export and substitution restriction rules applicable to all States located west of the 100th meridian. The repetition was needed to make clear that the provision regarding Alaska applies to contracts entered into before, during, and after the date of enactment of the Act.

No comments were received on this section. Therefore, the Department adopts this section, with only minor editing.

Section 223.202 Information Requirements

This rule imposes additional information collection requirements in the form of applications, certifications, reports and record keeping requiring clearance from OMB for compliance with the Paperwork Reduction Act. In the proposed rule, this section provided estimates of the time needed to collect this information, and provided addresses to send comments on these estimates.

The comments submitted concerning the information collection requirements relating to the proposed annual report and the transaction notices are discussed in the Department's responses to comments received on §§ 223.193 and 223.194.

Comment. Several respondents stated that there will be a significant, additional paperwork burden on private companies.

Response. Section 492 of the Act (16 U.S.C. 620d) specifically requires that log transactions be reported. The implementing regulations require the minimum burdens necessary for enforcement of this and other provisions of the Act. The Department has worked to lessen the paperwork burden in this final rule.

Section 223.203 Indirect Substitution Exception for National Forest System Timber From Within Washington State

Section 223.203 was included in the final rule published in the **Federal Register** on December 19, 1991 (56 FR 65834). Section 223.203 is included in this rule making for continuity and to avoid confusion as to its status. The names of the persons obtaining a share of the Washington State quota of unprocessed Federal timber that is exempt from the prohibition against substitution, and the amount of the share for each person, are identified in a new paragraph (e) of § 223.203. The Act requires that the names of persons obtaining such shares and the amount of the shares be established "by rule." 16 U.S.C. 620b(b)(2)(A).

Otherwise, the Department has made minor changes to the text for technical and editorial clarity, including the removal of paragraph (a) in its entirety as redundant and unnecessary. The prohibition against indirect substitution discussed in this paragraph is covered in § 223.189 of this subpart. The remaining paragraphs in this section have been correspondingly re-coded to reflect the deletion in this rule making. These changes have no substantive effect.

General Comments

Several comments that did not fit into any of the above regulatory sections are addressed here.

Comment. One respondent expressed the belief that face-to-face communications between potentially affected timber industry companies and the Federal land management agencies are critical in the development of any regulation.

Response. Publishing through the **Federal Register** and receiving public comments was the most efficient and cost effective method available to develop these rules. The Forest Service plans to conduct several informational meetings nationwide after the final regulations go into effect. This will give interested persons an opportunity to gain a better understanding of the rules and how they will be applied.

Comment. One respondent thought that assumptions made in the National Forest Management Plans on local timber demand will be outdated because exporting firms will gain additional access to certain Federal timber through sourcing areas, and that some forest plans may have to be amended to reflect this change in timber demand.

For example, increased demand might prompt the Forest Service to increase the annual allowable sale quantity in a particular forest plan. However, such an increase could significantly affect the environmental quality of the forest. Direct or indirect environmental impacts may result from the proposed rule, and such impacts should be analyzed in a review in compliance with the National Environmental Policy Act (NEPA).

Another respondent expressed concern for the lack of any environmental review associated with the rule. The respondent stated that the rule permits previously ineligible persons to buy Federal timber. The respondent stated that could change the timber demand which might cause the Forest Service to increase the allowable sale quantity in a particular forest plan. The respondent concluded that such an increase might have substantial environmental ramifications on the affected forest, and therefore an environmental review is necessary.

Response. The Department has conducted an environmental assessment and made a Finding of No Significant Impact (see information under "Environmental Impact", below). The existing rules at 36 CFR 223.160 are less restrictive as to who may buy Federal timber than the Act and these implementing regulations. The existing rules require only that a company not export private timber from within an area tributary to its domestic processing plant if that person also purchased Federal timber directly from a Federal agency to supply that plant. If the company had an established "historic quota" that company could purchase Federal timber and export private timber from within its tributary area if neither its historic purchase quota nor its historic export quota were exceeded in any calendar year.

However, the existing rules did not restrict indirect substitution, so when a company reached its historic export or purchase quota, it could continue to acquire from a third party all the federal timber it wanted from within its tributary area for its plant.

Moreover, a company's tributary area was not subject to approval by the Department. The tributary area was simply the geographic area from which unprocessed timber was delivered to a processing facility and was not subject to a formal review and approval process. The tributary area changed with the circumstances.

This Act eliminates historic quotas, and prohibits companies from exporting private timber from within an approved sourcing area, or from west of the 100th meridian in the contiguous 48 States if the company has no approved sourcing area, and prohibits indirect substitution. Instead of the tributary areas under the old rule, the Act requires sourcing areas to be formally approved by the Secretary—and those sourcing areas can be changed only upon review and agreement of the Department. This Act imposes far more restrictive conditions in order for exporting companies to acquire federal timber than under the pre-enactment rules.

Further, any proposed change in the allowable sale quantity on a forest would be subject to an environmental review at the time of the proposal.

All aspects of forest plans are subject to monitoring and periodic reviews, including the allowable sale quantity (ASQ). All reviews shall consider the Standards and Guidelines from which the specific plan was developed, plus any modifications, and shall be conducted within NEPA guidelines. This regulation proposed only to limit the persons eligible to purchase National Forest timber. The regulation does not affect the quantity or quality of timber to be sold, where the sales are located (other than west of the 100th meridian in the contiguous 48 States), the contract period, or operating seasons. The Department disagrees that this rule may cause an increase in demand for National Forest System timber.

Comment. One respondent stated that log exporting problems should be regulated at the docks where the ships are loaded by stopping all log exports, not by burdening private companies with excessive log identification and reporting regulations.

Response. The Act requires monitoring at the time of acquisition. The Act does not prohibit export of all logs, but of Federal logs and some private logs. Given this divergent treatment of a fungible commodity, it is necessary to regulate the logs in transit, as well as on the export docks.

Comment. Several respondents said that the regulations will have adverse effects on competition and employment, as mill owners will not be competitive in bidding for private timber, and that the annual effect of the regulation will be over $100 million.

Response. While the Act does monitor commerce, it also preserves processing jobs and natural resources domestically. The regulations implement these objectives through monitoring and enforcement mechanisms.

Comment. Several respondents commented that the proposed rule imposes significant new requirements on small business timber sale purchasers and other entities.

Response. The proposed rule in and of itself does not impose significant new requirements. The Act places certain requirements on persons engaged in acquiring unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States and exporting unprocessed private timber originating from private lands. The Act also requires the Secretary of Agriculture to implement the requirements of the Act through this rule making. The final rule simply implements the provisions of the Act. Further, the Department has modified the rule in order to further minimize the burdens on timber purchasers while still enabling enforcement of the Act.

Amendment to 36 CFR Part 261—Prohibitions

Part 261—Prohibitions would be amended to include 16 U.S.C. 620(f) as part of the authority citation.

Section 261.6 Timber and Other Forest Products

The proposed rule would add paragraph (i) to § 261.6 making a violation of the Act, or its implementing regulations, subject to penalties under Part 261. Subsections 492(c) (1) and (2) and Subsection 492(d) of the Act specifically provide for civil penalties and administrative remedies for violations of the Act that are included in another section of the proposed rule. Subsection 492(c)(3) of the Act states that the penalties provided under § 492(c) do not exclude any other penalty provided by law. Proposed § 261.6(i) is such a penalty. Inclusion of violations under §§ 223.185 through 223.202 in § 261.6(i) is essential for consistent and complete implementation of the Act. The prohibition at § 261.6(g) regarding the current export regulations existing at subpart D would be retained to continue enforcement of regulations governing timber sale contracts issued prior to enactment and publication of this final rule.

Comment. One said that the Act did not authorize criminal penalties, nor are they necessary in light of the serious civil and administrative sanctions.

Response. Criminal sanctions are authorized by the Organic Act, 16 U.S.C. 551, and by 18 U.S.C. 3559(a)(7) and 18 U.S.C. 3571(b)(6). These sanctions applied to export violations before enactment of the Act, and are another tool for enforcement. Consequently, it is not necessary to change this section.

Summary

Having fully considered the relevant comments received on the proposed rule, the Department is adopting this final rule, with the modifications previously described in response to comments received. This rule supersedes those provisions of the interim rule published in the **Federal Register** on November 20, 1990. Together with the rule of December 19, 1991, (56 FR 65834) this rule comprises the implementing regulations for the

Forest Resources Conservation and Shortage Relief Act of 1990 except for the separate rule making to be done on surplus species.

This rule is effective upon publication. This rule making relates to agency management, public property and contracts, and therefore pursuant to the Administrative Procedure Act (5 U.S.C. 553(a)(2), is exempt from the 30-day delay between publication of a rule and its effective date. Further, a delayed effective date is not required if a rule is a substantive rule which grants or recognizes an exemption (5 U.S.C. 553(d)(1)). This rule provides certain exemptions from the restrictions on substitution, and therefore may be effective immediately. In addition, a delayed effective date is not required if good cause is found and published with the rule (5 U.S.C. 553(d)(3)). Good cause exists to make this rule making effective upon publication due to the many deadlines in the Act for monitoring and enforcement of the Act.

Environmental Impact

Based on both experience and environmental analysis, this final rule will have no significant effect on the quality of the human environment, individually or cumulatively, and the Forest Service has made a Finding of No Significant Impact (40 CFR 1508.27). This rule only establishes certain administrative procedures to limit the persons qualified to purchase unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States. It does not affect the amount of timber to be sold, where the sales will be located, when they will be operated, the contract period, the contract size, resource protection requirements, or any aspect of on-the-ground contract performance. This rule does not alter the requirement that each timber sale must be analyzed and documented in compliance with the National Environmental Policy Act and its implementing regulations. Copies of the Environmental Assessment and Finding of No Significant Impact may be obtained by writing or calling the person or office listed earlier in this document under **FOR FURTHER INFORMATION CONTACT**.

Controlling Paperwork Burdens on the Public

Because of the previous publication of portions of this comprehensive rule making, some sections of this rule making already have OMB control numbers. Previously approved OMB Control Numbers 0596–0114, 0596–0115, and 0596–0021, as well as new information collection requirements, are being consolidated under OMB Control Number 0596–0114.

The procedures in §§ 223.189 and 223.192, and some of the procedures in § 223.190 were approved by the Office of Management and Budget (OMB) and assigned Control Number 0596–0114 upon issuance of the interim rule. Control Number 0596–0114 has been reapproved by OMB for use through May 31, 1997. OMB approved the information collection requirements in §§ 223.191 and 223.203 for use through August 31, 1995, and assigned them Control Number 0596–0115. OMB approved the information collection requirements in § 223.48 and § 223.87 for use through May 31, 1997 and assigned them Control Number 0596–0021; the information collection requirements in § 223.48 and § 223.87 have been revised.

The application and reporting procedures in §§ 223.187, 223.193, 223.194, 223.195, and some of the procedures in § 223.190 of this final rule contain new record keeping and reporting requirements as defined in 5 CFR part 1320 and, therefore, impose additional paperwork burdens on the affected public. The Office of Management and Budget (OMB) has approved these requirements, and assigned them Control Number 0596–0114.

Unfunded Mandates Reform

Pursuant to Title II of the Unfunded Mandates Reform Act of 1995, which the President signed in law on March 22, 1995, the Department has assessed the effects of this rule on State, local, and tribal governments and the private sector. This rule does not compel the expenditure of $100 million or more by any State, local, or tribal governments or anyone in the private sector. Therefore, a statement under section 202 of the Act is not required.

Regulatory Impact

This final rule was reviewed under USDA procedures and determined to be a significant rule under Executive Order 12866 on Regulatory Planning and Review because of the strong public interest expressed in the proposed rule. Accordingly, this final rule was subject to OMB review.

This rule has been considered in light of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), and it has been determined that the action will not have a significant economic impact on a substantial number of small entities as defined by that Act. Economic impacts associated with implementation of this rule result directly from the Forest Resources Conservation and Shortage Relief Act, and not from the rule itself. The rule imposes no additional requirements on small business timber sale purchasers or other small entities beyond what is required by the Forest Resources Conservation and Shortage Relief Act of 1990.

This rule has been reviewed in accordance with the principles and criteria contained in Executive Order 12630 and it has been determined that the rule does not pose the risk of a taking of constitutionally protected private property.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under this rule: (1) All state and local laws and regulations are in conflict with this rule or which could impede its full implementation will be preempted; (2) no retroactive effect will be given to this rule; and (3) it will not require administrative proceedings before parties may file suit in court challenging its provisions.

List of Subjects

36 CFR Part 223

Exports, Government contracts, National Forests, Reporting requirements, and Timber sales.

36 CFR Part 261

Crime, Law enforcement, and National Forests.

Therefore, for the reasons set forth in the preamble, part 223 and part 261 of Title 36 of the Code of Federal Regulations are amended as follows:

PART 223—SALE AND DISPOSAL OF NATIONAL FOREST SYSTEM TIMBER

1. The authority citation for part 223 is revised to read as follows:

Authority: 90 Stat. 2958, 16 U.S.C. 472a; 98 Stat. 2213, 16 U.S.C. 618, 104 Stat. 714–726, 16 U.S.C. 620–620j, unless otherwise noted.

Subpart B—Timber Sale Contracts

2. Revise § 223.87 to read as follows:

§ 228.87 Requirements of bidders concerning exports.

In order to have a bid considered responsive for a sale of timber from National Forest System lands, each bidder must certify that the bidder is eligible to purchase timber from National Forest System lands consistent with the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) and its implementing regulations at 36 CFR part 223, and that the bidder's timber purchase and export activities are in compliance with the timber export and substitution provisions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) and its implementing regulations at 36 CFR part 223.

Subpart C—Suspension and Debarment of Timber Purchasers

3. Revise paragraph (a) of § 223.130 to read as follows:

§ 223.130 Scope.

(a) This subpart prescribes policies and procedures governing the debarment and suspension of purchasers of National Forest System timber. This subpart further prescribes policies and procedures governing those persons who violate the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*).

* * * * *

4. Revise § 223.131 to read as follows:

§ 223.131 Applicability.

These regulations apply to purchasers of National Forest System timber as well as to those persons who violate the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*). These regulations do not apply to Forest Service procurement contracts which are governed by regulations at 41 CFR 4–1.6.

5. Amend § 223.133 by revising the definitions of *Affiliates, Debarment,* and *Purchaser* and by adding in alphabetical order definitions of *Federal lands* and *Person* to read as follows:

§ 223.133 Definitions.

* * * * *

Affiliates are business concerns or persons, whose relationship entails the following:

(a) either party directly or indirectly controls or has the power to control the other; or

(b) a third party directly or indirectly controls or has the power to control both. In determining whether affiliation exists, the Forest Service shall consider all appropriate factors, including, but not limited to, common ownership, common management, common facilities, and contractual relationships. Further guidelines to be used in determining affiliation are found in the Small Business Administration regulation in 13 CFR 121.401.

* * * * *

Debarment means action taken by a debarring official under §§ 223.136 through 223.140 to exclude a purchaser from Forest Service timber sale contracts for a reasonable, specified period of time. A purchaser so excluded is "debarred." Debarment pursuant to the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.* means action taken by a debarring official under §§ 223.136–223.140 to exclude persons from entering into any contract for the purchase of unprocessed timber originating from Federal lands and from taking delivery of unprocessed Federal timber purchased by another party for the period of debarment.

* * * * *

Federal lands means, for the purposes of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*), lands that are owned by the United States, but does not include any lands the title to which is:

(a) Held in trust by the United States for the benefit of any Indian tribe or individual,

(b) Held by any Indian tribe or individual subject to a restriction by the United States against alienation, or

(c) Held by any Native Corporation as defined in section 3 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602).

* * * * *

Person means any individual, partnership, corporation, association, or other legal entity, and includes any subsidiary, subcontractor, parent company, and business affiliates.

* * * * *

Purchaser means any person, who:

(a) Submits bids for, is awarded, or reasonably may be expected to submit bids for or be awarded, a Forest Service timber sale contract;

(b) Conducts business with the Forest Service as an agent or representative of another timber sale purchaser; or

(c) For the purposes of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) (Act), any person who violates the Act or any regulation or contract issued under the Act, or any person who may reasonably be expected to enter into a contract to purchase or receive delivery of unprocessed Federal timber in violation of the Act or its implementing regulations.

* * * * *

6. Revise § 223.135 to read as follows:

§ 223.135 Effect of listing.

(a) Except as otherwise provided in paragraph (b) of this section, purchasers debarred or suspended in accordance with this subpart shall be excluded from bidding on or award of Forest Service timber sale contracts. The Forest Service shall not knowingly solicit or consider bids from, award contracts to, approve a third party agreement with, or renew or otherwise extend, except pursuant to the terms of a contract term adjustment, an existing timber sale contract with these purchasers, unless the Chief of the Forest Service or authorized representative determines, in writing, that there is a compelling reason for such action.

(b) In addition to the provisions of paragraph (a) of this section, persons debarred pursuant to § 223.137(g) shall be prohibited from entering into any contract to purchase unprocessed timber from Federal lands and shall also be precluded from taking delivery of Federal timber purchased by another person for the period of debarment.

* * * * *

7. Amend § 223.136 by revising paragraph (b) to read as follows:

§ 223.136 Debarment.

* * * * *

(b) *Effect of proposed debarment.* (1) Upon issuance of a notice of proposed debarment by the debarring official and until the final debarment decision is rendered, the Forest Service shall not solicit or consider bids from, award contracts to, approve a third party agreement with, renew or otherwise extend, except pursuant to the terms of a contract term adjustment, any contract with that purchaser. The Chief of the Forest Service or authorized representative may waive this exclusion upon a written determination identifying compelling reasons to continue doing business with that purchaser pending completion of debarment proceedings.

(2) In addition to paragraph (b)(1) of this section, issuance of a notice of proposed debarment under § 223.137(g) shall preclude such person from entering into any contract to purchase unprocessed timber originating from Federal lands, and from taking delivery of unprocessed Federal timber from any other party who purchased such timber.

* * * * *

8. Amend § 223.137 by adding paragraph (g) to read as follows:

§ 223.137 Causes of debarment.

* * * * *

(g) Violation of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*). (Act) or any regulation or contract issued under the Act.

* * * * *

9. Revise paragraphs (a) and (b) of § 223.139 to read as follows:

§ 223.139 Period of debarment.

(a) Debarment shall be for a period commensurate with the seriousness of the cause(s):

(1) The debarring official shall consider any suspension period or

period since issuance of the notice of proposed debarment in determining the debarment period.

(2) Generally, a debarment for those causes listed at § 223.137 (a)–(f) of this subpart should not exceed three (3) years, except as otherwise provided by law.

(3) A debarment for the causes listed at § 223.137(g) shall not exceed five (5) years.

(b) The debarring official may extend the debarment for those causes listed at § 223.137 (a)–(f) of this subpart for an additional period if that official determines that an extension is necessary to protect the Government's interest. However:

(1) A debarment may not be extended solely on the basis of the facts and circumstances upon which the initial debarment action was based;

(2) If debarment for an additional period is necessary, the debarring official shall initiate and follow the procedures in § 223.138 to extend the debarment.

* * * * *

Subpart D—Timber Export and Substitution Restrictions

10. Revise § 223.159 to read as follows:

§ 223.159 Scope and applicability.

The rules of this subpart apply to all timber sale contracts awarded before August 20, 1990, the date of enactment of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*). The rules at § 223.162 shall remain in effect for all contracts awarded on or after August 20, 1990, until September 8, 1995. Contracts awarded on or after August 20, 1990 are subject to the rules of subpart F of this part, unless otherwise noted. Contracts awarded on or after September 8, 1995 are governed in full by subpart F.

§ 223.161 [Removed and reserved]

11. Remove and reserve § 223.161.

§ 223.163 [Removed]

12. Remove § 223.163.

13. Subpart F is revised to read as follows:

Subpart F—The Forest Resources Conservation and Shortage Relief Act of 1990 Program

Sec.

223.185 Scope and applicability.
223.186 Definitions.
223.187 Determination of unprocessed timber.
223.188 Prohibitions against exporting unprocessed Federal timber.
223.189 Prohibitions against substitution.
223.190 Sourcing area application procedures.
223.191 Sourcing area disapproval and review procedures.
223.192 Procedures for a non-manufacturer.
223.193 Procedures for reporting acquisition and disposition of unprocessed Federal timber.
223.194 Procedures for reporting the acquisition and disposition of unprocessed private timber.
223.195 Procedures for identifying and marking unprocessed timber.
223.196 Civil penalties for violation.
223.197 Civil penalty assessment procedures.
223.198 Administrative remedies.
223.199 Procedures for cooperating with other agencies.
223.200 Determinations of surplus species.
223.201 Limitations on unprocessed timber harvested in Alaska.
223.202 Information requirements.
223.203 Indirect substitution exception for National Forest System timber from within Washington State.

§ 223.185 Scope and applicability.

This subpart implements provisions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) that became effective upon enactment or as otherwise specified in the Act. As of September 8, 1995, this subpart applies to unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States that requires domestic processing. Except as provided later in this paragraph, this subpart applies to all unprocessed timber originating from National Forest System lands west of the 100th meridian in the contiguous 48 States acquired from timber sale contracts awarded on or after August 20, 1990. The rules regarding substitution at § 223.162 of subpart D apply to unprocessed timber acquired from timber sale contracts awarded between August 20, 1990, and September 8, 1995, as provided in § 490(a)(2)(A) of the Act. The rules regarding reporting the acquisition and disposition of unprocessed Federal timber at § 223.193 of this subpart apply to all transfers of unprocessed Federal timber originating from National Forest System lands west of the 100th meridian in the contiguous 48 States regardless of timber sale contract award date.

§ 223.186 Definitions.

The following definitions apply to the provisions of this subpart:

Acquire means to come into possession of, whether directly or indirectly, through a sale, trade, exchange, or other transaction. The term "acquisition" means the act of acquiring. The terms "acquire" and "purchase" are synonymous and are used interchangeably.

Act means the Forest Resources Conservation and Shortage Relief Act of 1990 (Pub. L. No. 101–382, 104 Stat. 714–726; 16 U.S.C. 620–620j).

Area of operations refers to the geographic area within which logs from any origin have neither been exported nor transported to an area where export occurs. The area of operations will be determined for individual Forest Service Administrative Units or groups of Administrative Units by the Regional Foresters of Regions 1, 2, 3, and 4 on an as-needed basis, and used as part of the criteria for evaluating requests to waive the identifying and marking requirements for unprocessed Federal logs.

Cants or *Flitches* are synonymous, and mean trees or portions of trees, sawn on one or more sides, intended for remanufacture into other products elsewhere.

Civil penalties:

Willful disregard means a person knew or showed reckless disregard for the matter of whether the person's conduct is prohibited by the Forest Resources Conservation and Shortage Relief Act of 1990, 16 U.S.C. 620, *et seq.* with regard to the prohibition against exporting unprocessed Federal timber (including causing unprocessed timber to be exported).

Willfully means a person knew or showed reckless disregard for the matter of whether the person's conduct is prohibited by the Forest Resources Conservation and Shortage Relief Act of 1990, 16 U.S.C. *et seq.*, or regulations issued under the Act, even though such violation may not have caused the export of unprocessed Federal timber in violation of the Act.

Disregard means to ignore, overlook, or fail to observe any provision of the Act or a regulation issued under this Act, even though such violation may not have caused the export of unprocessed Federal timber in violation of the Act.

Should have known means committing an act that a reasonable person in the timber industry would have known violates a provision of the Act or regulations issued under the Act, even though the violation may not have caused the export of unprocessed Federal timber in violation of the Act.

Each violation refers to any violation under the Act or its implementing regulations with regard to a single act, which includes but is not limited to a single marking (or lack thereof) on a single log, the export of a single log, or a single entry on a document.

Export means transporting, or causing to be transported, either directly or through another party, unprocessed timber to a foreign country. Export occurs:

(1) On the date that a person enters into an agreement to sell, trade, exchange or otherwise convey such timber to a person for delivery to a foreign country;

(2) When unprocessed timber is placed in an export facility in preparation (sorting, bundling, container loading etc.) for shipment outside the United States; or,

(3) When unprocessed timber is placed on board an ocean-going vessel, rail car, or other conveyance destined for a foreign country.

Federal lands means lands that are owned by the United States west of the 100th meridian in the contiguous 48 States, but do not include any land the title to which is;

(1) Held in trust by the United States for the benefit of any Indian tribe or individual;

(2) Held by any Indian tribe or individual subject to a restriction by the United States against alienation; or

(3) Held by any Native Corporation as defined in section 3 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602).

Finished products means products from trees, portions of trees or other roundwood products processed to standards and specifications intended for end product use.

Fiscal year means the Federal fiscal year beginning October 1, and ending the following September 30.

Gross value means the total value a person received from the transfer of unprocessed Federal timber involved in a violation, before production, delivery, agent fees, overhead, or other costs are removed.

Hammer brand refers to an identifying mark or brand composed of numbers, letters, characters, or a combination of numbers, letters, or characters permanently attached to a hammer, or other similar striking tool. The hammer brand must make a legible imprint of the brand in the end of a log when struck.

Highway yellow paint refers to an oil base or equivalent yellow paint of lasting quality comparable to the yellow paint used to mark highways.

Log refers to an unprocessed portion of a tree that is transported to a manufacturing facility or other location for processing, transferring to another person, or exporting. "Logs" is synonymous with "timber".

Manufacturing facility means a permanently located processing plant used to convert unprocessed timber into products.

Non-manufacturer means a person who does not own or operate a manufacturing facility.

Person means any individual, partnership, corporation, association, or other legal entity and includes any subsidiary, subcontractor, parent company, and business affiliates. Persons are affiliates of each other when either directly or indirectly, one person controls or has the power to control the other or a third party or parties control or have the power to control both. In determining whether or not affiliation exists, consideration shall be given to all appropriate factors, including but not limited to common ownership, common management, common facilities, and contractual relationships.

Private lands means lands, located west of the 100th meridian in the contiguous 48 States held or owned by a person. Such term does not include Federal lands or public lands, or any land the title to which is;

(1) Held in trust by the United States for the benefit of any Indian tribe or individual;

(2) Held by any Indian tribe or individual subject to a restriction by the United States against alienation; or

(3) Held by any Native Corporation as defined in section 3 of the Alaska Native Claims Settlement Act (43 U.S.C. 1602).

Processed means timber processed into products listed in § 223.187 of these regulations.

Purchase has the same meaning as *acquire*. The terms are used interchangeably.

Same geographic and economic area means the land within the boundaries of an approved sourcing area.

Sourcing area means the geographic area approved by the Secretary which includes a person's timber manufacturing facility and the private and Federal lands from which the person acquires or intends to acquire unprocessed timber to supply such manufacturing facility; a sourcing area must be geographically and economically separate from any area from which that person harvests for export any unprocessed timber originating from private lands.

Substitution occurs when:

(1) A person acquires, directly or indirectly, unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States and engages in exporting or selling for export, unprocessed timber originating from private lands within the same geographic and economic area; or

(2) A person acquires, directly or indirectly, unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States and, during the preceding 24-month period, exported unprocessed timber originating from private lands; or

(3) A person exports or sells for export, unprocessed timber originating from private lands within the same geographic and economic area in the same calendar year that the person has unprocessed timber originating from Federal lands in the person's possession or under contract; or

(4) A person purchases, directly or indirectly, unprocessed timber originating from Federal lands if such person sells or otherwise transfers unprocessed timber that originates from private lands west of the 100th meridian in the contiguous 48 States and that requires domestic processing, to a third party if that third party or successive parties export that unprocessed private timber. A third party or successive parties who acquire such unprocessed timber that originates from private lands west of the 100th meridian in the contiguous 48 States and that requires domestic processing may not export such timber.

Transaction means an arrangement involving the transfer of unprocessed timber.

Transaction statement is a signed copy of one of the transaction reporting forms in 36 CFR 223.193 and 223.194.

Transfer means to pass title, sell, trade, exchange, or otherwise convey unprocessed timber to another person.

Unprocessed timber means trees or portions of trees or other roundwood not processed to standards and specifications suitable for end product use and intended for remanufacture. Unprocessed timber does not include products intended for remanufacture that meet the criteria listed in § 223.187(a) (2) or (3). For the purposes of reporting and identifying under §§ 223.193, 223.194 and 223.195, unprocessed timber also means timber products listed in § 223.187 of these regulations, and other timber products including house logs that are part of a structure kit, that are indistinguishable from other unprocessed timber.

§ 223.187 Determinations of unprocessed timber.

(a) *All species except western red cedar.* Unprocessed timber, as defined in § 223.186 of this Subpart, does not include timber processed into any one of the following:

(1) Lumber or construction timbers, except western red cedar, meeting current American Lumber Standards Grades or Pacific Lumber Inspection Bureau Export R or N list grades, sawn on 4 sides, not intended for remanufacture. To determine whether

such lumber or construction timbers meet this grade and intended use standard, the shipper of record must have in its possession for each shipment or order, and available for inspection upon the request of the Forest Service:

(i) A legible copy of a lumber inspection certificate certified by a lumber inspection/grading organization generally recognized by the industry as setting a selling standard; and,

(ii) A statement by the manufacturer certifying under the penalties provided in section 492 of the Act (16 U.S.C. 620d) and the False Statements Act (18 U.S.C. 1001) that the products in the shipment or order are intended to be used as shipped, are manufactured into products, or processed into pulp, and are not to be manufactured into other products. The certification statements shall be made in accordance with paragraph (b) of this section. The certification statements in paragraph (b) of this section are not required if the lumber or construction timbers described in paragraph (a)(1) of this section or the pulpwood bolts described in paragraph (a)(8) of this section otherwise may be exported without regard to an intent to remanufacture or process into pulp. For instance, because the timber originates from private land from which timber may be exported.

(2) Lumber, construction timbers, or cants for remanufacture, except western red cedar, meeting current American Lumber Standards Grades or Pacific Lumber Inspection Bureau Export R or N list clear grades, sawn on 4 sides, not to exceed 12 inches (30.5 cm) thick. To determine whether such lumber, timbers, or cants meet this grading standard, the shipper of record must have in its possession for each shipment or order and available for inspection, upon the request of the Forest Service, a legible copy of a lumber inspection certificate certified by a lumber inspection/grading organization generally recognized by the industry as setting a selling standard.

(3) Lumber, construction timbers, or cants for remanufacture, except western red cedar, that do not meet the grades referred to in paragraph (a)(2) of this section and are sawn on 4 sides, with wane less than ¼ of any face, not exceeding 8¾ inches (22.2 cm) thick.

(4) Chips, pulp, or pulp products.

(5) Veneer or plywood.

(6) Poles, posts, or piling cut or treated with preservatives for use as such.

(7) Shakes or shingles.

(8) Aspen or other pulpwood bolts, not exceeding 100 inches in length, exported for processing into pulp. Shippers of record of such pulpwood bolts must have in their possession, and available for inspection upon request of the Forest Service, in accordance with paragraph (b) of this section, a manufacturer's certificate that such bolts are intended for processing into pulp.

(9) Pulp logs or cull logs processed at domestic pulp mills, domestic chip plants, or other domestic operations for the purpose of conversion of logs into chips.

(b) *Export product certifications.* (1) Manufacturers of lumber or construction timbers described in paragraph (a)(1) of this section and pulpwood bolts described in paragraph (a)(8) of this section, shall certify to the following statements:

(2) *Lumber or construction timbers;* "I certify that the products in the shipment identified by my shipping order number ________ dated ________, are manufactured in accordance with the attached order from (*buyer*) of (*address*), numbered ________ and dated ________, are intended to be used as shipped and are not to be remanufactured into other products. I make this certification with full knowledge and understanding of the export and substitution restrictions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620 *et seq.*) (Act) and its implementing regulations. I fully understand that exporting unprocessed timber originating from Federal lands or unprocessed timber from private lands which is required to be processed domestically is a violation of this Act, its implementing regulations, and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided for such violations."

(3) *Pulpwood bolts.* "I certify that the pulpwood bolts in the shipment identified by my shipping order number ________ dated ________, are manufactured in accordance with the attached order from (*buyer*) of (*address*), numbered ________ and dated ________, are intended to be processed into pulp and are not to be remanufactured into other products. I make this certification with full knowledge and understanding of the export and substitution restrictions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) (Act) and its implementing regulations. I fully understand that exporting unprocessed timber originating from Federal lands or unprocessed timber from private lands which is required to be processed domestically is a violation of this Act, its implementing regulations, and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided for such violations."

(4) *Signatory procedures.* Certificates shall be on company letterhead, and signed by the person manufacturing the shipment. In the case of a corporation, the certificates must be signed by a person authorized, in writing, by the Chief Executive Officer pursuant to 36 CFR 223.187(b)(4), to sign the certificates in 36 CFR 223.187(b) on behalf of the corporation.

(5) *Chief Executive Officer Authorization.* The authorization by the Chief Executive Officer shall be on company letterhead, shall be notarized, and shall read as follows:

> "I authorize ________ to sign the certificates in 36 CFR 223.187(b) on behalf of (*name of corporation*). I make this authorization with full knowledge and understanding of the export and substitution restrictions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620 *et seq.*) (Act) and its implementing regulations. I fully understand that exporting unprocessed timber originating from Federal lands or unprocessed timber originating from private lands which is required to be processed domestically is a violation of this Act, its implementing regulations, and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided for such violation."

(6) Exporters of other timber products originating from Federal lands not specifically listed in § 223.187 which may develop export markets in the future may also require similar certification statements. Such statements will be provided by the Forest Service.

(c) *Western red cedar.* Unprocessed western red cedar timber does not include manufactured lumber authorized for export under license by the Department of Commerce, and lumber from private lands processed to standards established in the lumber grading rules of the American Lumber Standards Association or the Pacific Lumber Inspection Bureau, or timber processed into any of the following products:

(1) Lumber of American Lumber Standards Grades of Number 3 dimension or better, or Pacific Lumber Inspection Bureau Export R-List Grades of Number 3 common or better, with a maximum cross section of 2,000 square centimeters (310 square inches) for any individual piece of processed western red cedar, regardless of grade. To determine whether such lumber meets these established standards, grades and size restrictions, the shipper of record must have in its possession for each shipment, and available for inspection upon the request of the Forest Service, a legible copy of a lumber inspection certificate certified by a lumber inspection/grading organization generally recognized by the industry as setting a selling standard. Export restrictions governing western red cedar timber harvested from Federal, State or other public lands are found in 7(i) of the Export Administration Act of 1979 as amended (50 U.S.C. appendix 2406(i)), and implementing regulations at 15 CFR 777.7.

(2) Chips, pulp, and pulp products;

(3) Veneer and plywood;

(4) Poles, posts, pilings cut or treated with preservatives for use as such and not intended to be further processed; and

(5) Shakes and shingles.

(d) *Finished Products.* Shippers of record of products manufactured from unprocessed western red cedar originating from Federal lands, acquired by the manufacturer under the exemption from the prohibition against indirect substitution at § 223.189(e)(1), must have in their possession for each shipment a certificate from the manufacturer that such products are *finished products* as defined in § 223.186 of this subpart. The certification statement shall read as follows:

(1) "I certify that the products in the shipment identified by my shipping order number ______, dated ______, are manufactured in accordance with the attached order from ____ (buyer) ____ of ______ (address) ______, numbered ____ and dated ______, are intended for end product use. I understand that only western red cedar products that are *finished products* are exempt from the prohibition against indirect substitution in the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620b(b)(1)) and its implementing regulations. I make this certification with full knowledge and understanding of the export and substitution restrictions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) (Act) and its implementing regulations. I fully acknowledge and understand that to acquire western red cedar under the indirect substitution exemption in 16 U.S.C. 620b(b)(1) for purposes other than domestic processing into finished products will be a violation of this Act, its implementing regulations, and the False Statements Act (18 U.S.C. 1001) and may subject me to the penalties and remedies provided for such violation."

(2) *Signatory procedures.* Certificates shall be on company letterhead, and signed by the person manufacturing the shipment. In the case of a corporation, the certificate must be signed by a person authorized, in writing, by the Chief Executive Officer, pursuant to 36 CFR 223.187(d)(3), to sign the certificate in 36 CFR 223.187(d)(1) on behalf of the corporation.

(3) *Chief Executive Officer Authorization.* The authorization by the Chief Executive Officer shall be on company letterhead, shall be notarized, and shall read as follows:

> "I authorize ________ to sign the certificate in 36 CFR 223.187(d)(1) on behalf of (name of corporation). I make this authorization with full knowledge and understanding of the export and substitution restrictions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) (Act) and its implementing regulations. I fully understand that exporting unprocessed timber originating from Federal lands or unprocessed timber originating from private lands which is required to be processed domestically is a violation of this Act, its implementing regulations, and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided for such violation."

§ 223.188 Prohibitions against exporting unprocessed Federal timber.

No person who acquires unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States may export such timber from the United States, or sell, trade, exchange, or otherwise convey such timber to any other person for the purpose of exporting such timber from the United States. This prohibition does not apply to specific quantities of grades and species of such unprocessed Federal timber that the Secretary of Agriculture determines to be surplus to domestic manufacturing needs.

§ 223.189 Prohibitions against substitution.

(a) *Direct substitution prohibition.* Except as otherwise provided by this section:

(1) No person may purchase directly from any department or agency of the United States unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States if:

(i) Such person acquires unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States and engages in exporting or selling for export, unprocessed timber originating from private lands within the same geographic and economic area; or

(ii) Such person has, during the preceding 24-month period, exported unprocessed timber originating from private lands.

(2) No person may export or sell for export, unprocessed timber originating from private lands within the same geographic and economic area in the same calendar year that the person has unprocessed timber originating from Federal lands in the person's possession or under contract.

(3) No person may purchase unprocessed timber originating from Federal lands if such person sells or otherwise transfers unprocessed timber that originates from private lands west of the 100th meridian in the contiguous 48 States and that requires domestic processing, to a third party if that third party or successive parties export that unprocessed private timber. A third party or successive parties who acquire such unprocessed timber that originates from private lands west of the 100th meridian in the contiguous 48 States and that requires domestic processing may not export such timber.

(4) The prohibitions in paragraphs (a)(1)–(3) of this section shall not apply to specific quantities of grades and species of unprocessed timber which the Secretary of Agriculture has determined to be surplus to domestic manufacturing needs.

(b) *Exemptions.* (1) Pursuant to section 490(c) of the Act (16 U.S.C. 620b), all persons who applied for a sourcing area by December 20, 1990, in accordance with § 223.190 of this subpart, were exempt from the prohibitions against substitution, in accordance with § 223.189(a)(1) of this subpart, until such time that the approving official approved or disapproved the application.

(2) Pursuant to Section 490(a) of the Act (16 U.S.C. 620b), an exemption to the prohibition in § 223.189(a)(1)(B) of this subpart is provided to:

(i) A person with a historic export quota who submitted a certification in accordance with § 223.189 (c) and (d) of this subpart; and

(ii) A non-manufacturer who submitted a certification in accordance with § 223.192 of this subpart.

(3) Pursuant to § 490(c) of the Act (16 U.S.C. 620b), the prohibitions against direct substitution in § 223.189(a) (1) and (2) of this subpart do not apply to a person who acquires unprocessed timber originating from Federal lands within an approved sourcing area, does not export unprocessed timber originating from private lands within the approved sourcing area while the approval is in effect, and, if applicable, received a waiver of the prohibition against exporting unprocessed timber originating from private lands within the sourcing area during the preceding 24 months, in accordance with § 223.189 (f) and (g) of this subpart.

(c) *Historic export quota exemption.* The prohibition against the purchase of Federal timber for a person who has exported unprocessed timber originating from private lands, within the preceding 24-month period, shall not apply to a person with a historic export quota approved by the Secretary and who has been exporting unprocessed private timber in accordance with the log export and substitution regulations of the Secretary of Agriculture at 36 CFR part 223, subpart D, in effect before August 20, 1990, if:

(1) That person certified in writing to the Regional Forester of the Region administering the historic export quota, on or before November 20, 1990, that the person would cease exporting unprocessed timber originating from private lands on or before February 20, 1991, and

(2) The exporting ceased in accordance with such certification.

(d) *Application for historic export quota exemption.* To obtain an exemption from the prohibition against export within the preceding 24-month period for purchasing Federal timber based on an approved historic export quota described in paragraph (c) of this section, a person must have applied in writing to the applicable Regional Forester on or before November 20, 1990. The certificate must have been notarized. The application was required to be on company letterhead and must have included:

(1) An agreement to retain records of all transactions involving acquisition and disposition of unprocessed timber from both private and Federal lands within the area(s) involved in the certification, for a period of three (3) years beginning November 20, 1990, and to make such records available for inspection upon the request of the Regional Forester, or other official to whom such authority has been delegated.

(2) A signed certification which reads as follows:

> "I have purchased, under an historic export quota approved by the Secretary of Agriculture, unprocessed timber originating from Federal lands located west of the 100th meridian in the contiguous 48 States during the preceding 24 months in direct substitution for exported unprocessed timber originating from private lands. I desire to purchase directly from a Department or agency of the United States, unprocessed timber originating from Federal lands located in such area of the United States. I make this certification for the exemption from the prohibition against export within the preceding 24-month period for purchasing Federal timber required by the Forest Resources Conservation and Shortage Relief Act of 1990, (Pub. L. No. 101–382, August 20, 1990, 16 U.S.C. 620, *et seq.*) (Act). I hereby certify that I will cease all exporting of such unprocessed private timber from lands west of the 100th meridian in the 48 contiguous States of the United States by February 20, 1991. I make this certification with full knowledge and understanding of the requirements of this Act and do fully understand that failure to cease such exporting as certified will be a violation of this Act (16 U.S.C. 620d) and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided from such violation."

(3) The certification must have been signed by the person making such certification or, in the case of a corporation, by its Chief Executive Officer.

(e) *Indirect substitution prohibition.* No person may purchase from any other person unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States if such person would be prohibited by paragraph (a) of this section from purchasing such timber directly from a Department or agency of the United States, pursuant to § 490(b) of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*). The prohibition in this paragraph does not apply to the following:

(1) To the acquisition of western red cedar, which is domestically processed into finished products.

(2) To a person who acquires unprocessed timber originating from Federal lands within an approved sourcing area, does not export unprocessed timber originating from private lands within the approved sourcing area while the approval is in effect, and, if applicable, receives a waiver of the prohibition against exporting unprocessed timber originating from private lands within the sourcing area during the preceding 24 months in accordance with § 223.189 (f) and (g) of this subpart.

(3) To the limited amount of unprocessed National Forest System timber within Washington State that is exempt from the prohibition against indirect substitution, pursuant to § 223.203.

(f) *Waiver within a sourcing area.* The prohibitions in § 223.189(a) (1) and (2) against direct and indirect acquisition of unprocessed timber originating from Federal lands do not apply if:

(1) A person acquires such timber from within an approved sourcing area located west of the 100th meridian in the 48 contiguous States;

(2) Has not exported unprocessed timber originating from private lands located within the approved sourcing area during the preceding 24 months;

(3) Does not export such private timber from within the approved sourcing area during the period the sourcing area is in effect; and

(4) Does not export such private timber during any calendar year in the same geographic and economic area that unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States is under contract or in possession, if the sourcing area is no longer in effect, pursuant to the definition of substitution in 36 CFR 223.186.

(5) The appropriate Regional Forester could waive, in writing, the prohibition against export within the preceding 24-month period for any person who certified in writing, on or before November 20, 1990, that on or before February 20, 1991, that person would cease exporting unprocessed timber originating from private lands within the approved sourcing area for a period of not less than three (3) years. Signatories of this certificate who received an approved sourcing area, like all holders of sourcing areas, are subject to the prohibition against exporting unprocessed timber originating from private lands within the sourcing area boundaries, pursuant to this paragraph.

(g) *Application for waiver within a sourcing area.* To obtain a waiver of the prohibition against export within the preceding 24-month period for purchasing Federal timber described in paragraph (f) of this section, a person must have submitted a request for waiver, in writing, to the Regional Forester of the region in which the manufacturing facility being sourced is located, which must have been received by the Regional Forester on or before November 20, 1990, and which must have been signed by the person making such request or, in the case of a corporation, by its Chief Executive Officer. The request for waiver must be notarized and, in the case of a corporation, with its corporate seal affixed. The request shall be on company letterhead with its corporate seal affixed and must include:

(1) An agreement to retain records of all transactions involving acquisition and disposition of unprocessed timber from both private and Federal lands within the area(s) involved in the waiver request, for a period of three (3) years beginning November 20, 1990, and to make such records available for inspection upon the request of the Regional Forester, or other official to whom such authority has been delegated.

(2) A signed certification statement which reads as follows:

> "I have engaged in exporting of unprocessed timber originating from private land located within the sourcing area for which I am applying. I desire to purchase directly from a department or agency of the United States unprocessed timber originating from Federal lands located within the desired sourcing area. I hereby request waiver of the prohibition against export within the preceding 24-month period for purchasing Federal timber required by the forest Resources Conservation and Shortage Relief Act of 1990 (Pub. L. No. 101–382, August 20, 1990, 16 U.S.C. 620, *et seq.*) (Act). I hereby certify that I will cease all exporting of such unprocessed private timber from within the desired sourcing area by February 20, 1991, and will not resume such exporting for a period of not less than three (3) years. I make this certification with full knowledge and understanding of the requirements of this Act and do fully understand that failure to cease such exporting as certified will be a violation of Section 492 of this Act (16 U.S.C. 620d) and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided for such violation."

§ 223.190 Sourcing area application procedures.

(a) Subject to the restrictions described in § 223.189 of this subpart and, except as provided in paragraph (b) of this section, a person who owns or operates a manufacturing facility and who exports unprocessed timber originating from private lands may apply for a sourcing area in accordance with the procedures of this section. However, an owner/operator of a manufacturing facility who exports unprocessed timber originating from Federal lands may not possess or acquire unprocessed timber originating from Federal lands unless the acquisition is within an approved sourcing area. A person who intends to acquire or become affiliated with a manufacturing facility that processes Federal timber and who is an exporter may apply for a sourcing area. Written proof of the intent to acquire or affiliate must be included in the sourcing area application, signed by the applicant and the person or, in the case of a corporation, the Chief Executive Officer, whose company the applicant intends to acquire or affiliate with. This certification must be on letterhead and must be notarized. A sourcing area application that the Secretary determines would be approved will be granted tentative approval pending final notification by the applicant of acquisition of or affiliation with the manufacturing facility. The tentative approval of the sourcing area will lapse unless the acquisition or affiliation occurs within 30 days of the tentative approval of the sourcing area. A sourcing area is not valid until final approval of the sourcing area. The direct substitution prohibition did not apply to a person who applied for a sourcing area on or before December 20, 1990. A request for modification of an existing sourcing area shall trigger a review pursuant to the procedures and restrictions in § 223.191(e).

(b) As provided in the Act, a person who has requested an exemption or waiver of the prohibition against export within the preceding 24-month period, pursuant to § 223.189 of this subpart, must have applied for the desired sourcing area on or before December 20, 1990.

(c) *Applications.* Sourcing area applications shall include:

(1) A map of sufficient scale and detail to clearly show:

(i) The applicant's desired sourcing area boundary. This boundary will include both the private and Federal lands from which the applicant intends to acquire unprocessed timber for sourcing its manufacturing facilities;

(ii) The location of the timber manufacturing facilities owned or operated by the applicant within the proposed sourcing area where the person intends to process timber originating from Federal land;

(iii) The location of private lands within and outside the desired sourcing area where the person has, within the 24 months immediately preceding the date of the application, acquired unprocessed timber originating from private land which was exported, sold, traded, exchanged, or otherwise conveyed to another person for the purpose of exporting such timber;

(2) A list of other persons with timber manufacturing facilities located within the same general vicinity as the applicant's facilities;

(3) Any other information the applicant may believe is appropriate to support approval of the requested sourcing area; and

(4) A statement signed by the person certifying under the penalties provided in Section 492 of this Act (16 U.S.C. 620d) and the False Statements Act (18 U.S.C. 1001) that the information provided in support of the application is true, complete, and accurate to the best of the applicant's knowledge. The statement shall read as follows:

> "I certify under penalties of 16 U.S.C. 620d and 18 U.S.C. 1001, that the information provided in support of this application, is true, complete, and accurate to the best of my knowledge concerning my timber purchasing and export patterns. I certify that the information provided concerning my timber purchasing and export patterns fully and accurately reflects, to the best of my knowledge, the boundaries of the sourcing area for which I am applying. I make this certification with full knowledge and understanding of the export and substitution restrictions of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) (Act) and its implementing regulations. I certify that I have not exported unprocessed timber originating from private lands within the boundaries of the sourcing area that is the subject of this application in the previous 24 months. I fully understand that, if this application is approved, exporting unprocessed private timber originating from within the approved sourcing area will be a violation of this Act (16 U.S.C. 620, *et seq.*) its implementing regulations, and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided for such violation."

(d) *Confidential information.* Applications are not considered confidential. However, if a person does submit confidential information as part of an application, the information should be marked confidential. Information so marked will be afforded the rights and protection provided under the Freedom of Information Act.

(e) *Where to submit the application.* A sourcing area applicant shall send the application to the Office of Administrative Law Judges and shall, simultaneously, send a copy of the sourcing area application to the Forest Service Regional Forester of the region in which the manufacturing facility being sourced is located. Where the sourcing area application will cover purchases from more than one agency, application is to be made to the agency from which the applicant expects to purchase the preponderance of its Federal timber. The sourcing area applicant must also send a complete copy of the application to each agency concerned. The lead agency shall make the decision in consultation with, and upon co-signature of, the other agencies concerned.

(f) *Signatory procedures.* Sourcing area applications must be signed by the person making the request, or in the case of a corporation, by its Chief Executive Officer, and must be notarized. The application shall be on company letterhead.

(g) The sourcing area application and review process will be conducted pursuant to the Rules of Practice Governing the Adjudication of Sourcing Area Applications and Formal Review of Sourcing Areas Pursuant to the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*), found at 7 CFR part 1, subpart M.

(h) A final decision on a sourcing area application or a formal sourcing area review will be issued within four (4) months of the receipt of the application or initiation of the review.

(i) The following criteria must be met for sourcing area approval:

(1) The Administrative Law Judge, or, on appeal, the Judicial Officer must find that the proposed sourcing area is

geographically and economically separate from any area that the applicant harvests or expects to harvest for export any unprocessed timber originating from private lands. In making such a finding, the Administrative Law Judge, or, on appeal, the Judicial Officer shall consider the timber purchasing patterns of the applicant on private and Federal lands equally with those of other persons in the same local vicinity and the relative similarity of such purchasing patterns.

(2) The "same local vicinity" will normally be manufacturing facilities located within 30 miles of the community where the applicant's manufacturing facility is located, but may include more distant communities if manufacturing facilities in those communities depend on the same source of timber and have similar purchasing patterns.

(3) The relative similarity of purchasing patterns of other mills shall be determined by considering the location and similarity of unprocessed timber being acquired by those facilities.

(4) Lines defining the geographic area shall be based on major natural and cultural features, including, but not limited to, prominent ridge systems, main roads or highways, rivers, political subdivisions, and not characterized by random lines.

(j) *Comments*. Persons may submit comments on sourcing area applications pursuant to the Rules of Practice Governing the Adjudication of Sourcing Area Applications and Formal Review of Sourcing Areas Pursuant to the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, et seq.), found at 7 CFR part 1, subpart M. Persons submitting a comment must certify at the end of the comment, but before the signature, to the following: "I certify that the information provided by me is true and accurate, to the best of my knowledge, and I understand that failure to provide true and accurate information could be violation of the False Statements Act (18 U.S.C. 1001)."

(k) Transporting or causing to be transported unprocessed private timber from outside of a sourcing area into a sourcing area by the holder of the sourcing area is prohibited as a violation of the sourcing area boundary. Such violation will cause a review of the sourcing area, and could subject the sourcing area holder to the penalties and remedies for violations of the Forest Resources Conservation and Shortage Relief Act of 1990, 16 U.S.C. 620, *et seq.*, and its implementing regulations.

(l) A person with an approved sourcing area may relinquish the sourcing area at any time provided the person certifies to the following:

> "I am relinquishing the approved sourcing area, described in the Secretary's determination in FSAA ________ on ________, 19____. I understand that I may not export unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States during the fiscal year in which I have unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States in my possession or under contract, pursuant to the prohibition against substitution in the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) ("Act") and its implementing regulations. I also understand that I may not purchase unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States within 24 months of having exported unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States, pursuant to the prohibitions against substitution in the Act and its implementing regulations. I make this certification with full knowledge and understanding of the Act and its implementing regulations and do fully understand that exporting unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States during a fiscal year in which I have unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States in possession or under contract, or purchasing unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States within 24 months of having exported unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States is a violation of the substitution provisions of the Act and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided for such violation."

The certificate must be signed by the person making such certification or, in the case of a corporation, by its Chief Executive Officer; must be on company letterhead; and must be notarized.

(m) A sourcing area is in effect until it is relinquished by the sourcing area holder, or is disapproved upon review of the sourcing area.

§ 223.191 Sourcing area disapproval and review procedures.

(a) Notwithstanding any other provision of law, an applicant whose sourcing area application was submitted by December 20, 1990, and was disapproved could either phase out of purchasing Federal timber or phase out of exporting unprocessed timber originating from private lands within the sourcing area that would have been approved, as follows:

(1) *Phase-out of Federal timber purchasing.* The applicant could purchase, in the 9-month period after receiving the application disapproval, unprocessed timber originating from Federal lands in the disapproved sourcing area, in an amount not to exceed 75 percent of the annual average of such person's purchases of unprocessed Federal timber in such area during the 5 full fiscal years immediately prior to the date of submission of the application. In the 6-month period immediately following the 9-month period, such person could purchase not more than 25 percent of such annual average, after which time the prohibitions against direct substitution, set forth in § 223.189 of this subpart, shall apply; or

(2) *Phase-out of private timber exporting.* The applicant could continue to purchase unprocessed timber originating from Federal lands within the disapproved sourcing area without being subject to the phase-out of Federal timber purchasing procedures described in paragraph (a) of this section, if the following requirements were met:

(i) The applicant certified to the Regional Forester or the approving official to whom such authority has been delegated, within 90 days after receiving the disapproval decision, as follows:

(A) An applicant that has exported unprocessed timber originating from private lands from the geographic area that would have been approved provided a signed certification that reads as follows:

> "I have engaged in the exporting of unprocessed private timber originating from private lands located within the geographic area the approving official would have approved as a sourcing area for my manufacturing facility. I desire to continue purchasing unprocessed Federal timber from within such area. I hereby certify that I will cease all exporting of unprocessed timber from private lands located within the area that would have been approved by [the applicant shall insert date 15 months from date of receipt of the disapproval decision]. I agree to retain records of all transactions involving acquisition and disposition of unprocessed timber from both private and Federal lands within the area involved in the certification, for a period of three (3) years beginning on the date of receipt of the disapproval notification, and to make such records available for inspection upon the request of the Regional Forester, or other official to whom such authority has been delegated. I make this certification with full knowledge and understanding of the requirements of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) (Act) and do fully understand that failure to cease such exporting as certified will be a violation of the Act and may subject me to the penalties and remedies for such violation. Further, I fully understand that such violation may subject me to the penalty of perjury pursuant to the False Statements Act (18 U.S.C. 1001). I certify that the information in this certificate is true, complete, and accurate to the best of my knowledge and belief.";

or,

(B) An applicant who has not exported unprocessed timber originating from private lands from the geographic area that the Secretary would have approved provided a signed certification that reads as follows:

> "I have not exported timber originating from private lands within both the sourcing area that the Secretary would have approved and the disapproved sourcing area in the past 24 months, pursuant to the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*), and I am accepting the area that the Secretary would have approved as my sourcing area. I certify that the information in this certificate is true, complete, and accurate to the best of my knowledge and belief."

(ii) Each certification statement set forth in paragraph (a)(2)(i) of this section must have been signed by the person making such certification or, in the case of a corporation, by its Chief Executive Officer; must have been on company letterhead; must have been notarized; and must have had a corporate seal attached.

(iii) The person signing such certification set forth in paragraph (a)(2)(i)(A) of this section must have provided to the Regional Forester the annual volume of timber exported by that person during the five (5) full fiscal years immediately preceding submission of the application, originating from private lands in the geographic area for which the application would have been approved.

(iv) When the applicant submitted the certificate, the area the Secretary would have approved, as shown on the sourcing area map provided by the Secretary, became an approved sourcing area. If the certificate was not submitted, the sourcing area that would have been approved did not become an approved sourcing area.

(3) The phase-out of Federal timber purchasing and the phase-out of private timber exporting procedures provided by paragraphs (a)(1) and (a)(2) of this section do not apply to persons submitting sourcing area applications after December 20, 1990, or to persons requesting review of disapproved sourcing areas.

(b) *Limits on purchases and exports.* (1) During the 15-month period following disapproval of a sourcing area, a person who elects to phase-out of private timber exporting as described in paragraph (a)(2) of this section, may not:

(i) Purchase more than 125 percent of the person's annual average purchases of unprocessed timber originating from Federal lands within the person's disapproved sourcing area during the five (5) full fiscal years immediately prior to submission of the application; and,

(ii) Export unprocessed timber originating from private lands in the geographic area determined by the approving official for which the application would have been approved, in amounts that exceed 125 percent of the annual average of that person's exports of unprocessed timber from such private land during the five (5) full years immediately prior to submission of the application.

(2) At the conclusion of the 15-month export phase-out period, the prohibition against exporting private timber originating from within the area shall be in full force and effect as long as the sourcing area remains approved, pursuant to this subpart F of this part 223.

(c) *Presentation of map to applicant whose sourcing area is disapproved.* The area determined by the deciding official that would have been approved shall be drawn on a map and presented to the applicant by the deciding official with the notice of disapproval of the application.

(d) *Effect of prior certification to cease exporting.* An applicant's previous certification to cease exporting beginning February 20, 1991, for a period of three (3) years from within the disapproved sourcing area pursuant to paragraphs (f) and (g) in § 223.189 of this subpart shall remain in full force and effect for persons with approved and disapproved sourcing areas.

(e) *Review process and frequency.* (1) Approved sourcing areas shall be reviewed not less often than every five (5) years. A tentative date for a review shall be included in the Administrative Law Judge's, or, on appeal, the Judicial Officer's determination or stated in writing by the Regional Forester following the determination. At least 60 days prior to the tentative review date, the Regional Forester or other such reviewing official shall notify the person holding the sourcing area of the pending review, publish notice of such review in newspapers of general circulation within the sourcing area, and invite comments, to be received no later than 30 days from the date of the notice, from all interested persons, including the person holding the sourcing area. For 10 working days following the comment period, any person submitting a written comment and the person with the sourcing area may review the comments. If there is disagreement among the persons who submitted written comments regarding the proper sourcing area, the reviewing official shall convene an informal meeting convenient to the persons that all interested persons may attend. If an agreement cannot be reached among the persons, formal administrative adjudication shall occur. The Administrative Law Judge, or, on appeal, the Judicial Officer shall, on the record and after opportunity for a hearing, approve or disapprove the sourcing area being reviewed, pursuant to the Rules of Practice Governing the Adjudication of Sourcing Area Applications and Formal Review of Sourcing Areas Pursuant to the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*), found at 7 CFR part 1, subpart M.

(2) Disapproved sourcing areas shall be reviewed using the process described in paragraph (e)(1) of this section upon resubmission of an application, provided the applicant has accepted the area the Secretary would have approved as a sourcing area pursuant to paragraph (a)(2) of this section.

(3) The Department reserves the right to schedule a review, at the request of the Forest Service or the person holding the sourcing area, at any time prior to the scheduled tentative review date, with 60 days notice.

(4) Sourcing areas being reviewed shall continue in full force and effect pending the final review determination.

(f) *Reporting and record keeping procedures.* The reporting and record keeping procedures in this section constitute information collection requirements as defined in 5 CFR part 1320. These requirements have been approved by the Office of Management and Budget and assigned clearance number 0596–0115.

§ 223.192 Procedures for a non-manufacturer.

(a) Persons who do not own or operate a manufacturing facility (non-manufacturer) are not eligible to apply for or be granted a sourcing area.

(b) The prohibition against the purchase of Federal timber for a person who has exported unprocessed timber originating from private lands within the preceding 24-month period shall not apply, if the person certified in writing to the Regional Forester of the region(s) in which the person purchases National Forest System timber by November 20, 1990, that the person would cease exporting unprocessed timber originating from private lands by February 20, 1991, for a period of three (3) years, and the exporting did cease in accordance with such certification.

(c) To obtain an exemption from the prohibition against export within the preceding 24-month period for purchasing Federal timber described in § 223.189 (a) and (b) of this subpart, a person must have applied in writing to the applicable Regional Forester on or before November 20, 1990. The application was required to be on company letterhead and, in the case of a corporation, with its corporate seal affixed, and must have included:

(1) An agreement to retain records of all transactions involving acquisition and disposition of unprocessed timber from both private and Federal lands within the area(s) involved in the certification, for a period of three (3) years beginning November 20, 1990, and to make such records available for inspection upon the request of the Regional Forester, or other official to whom such authority has been delegated.

(2) A signed certification which reads as follows:

> "I have engaged in the exporting of unprocessed timber originating from private lands located west of the 100th meridian in the contiguous 48 States during the preceding 24 months. I desire to purchase directly from a department or agency of the United States, unprocessed timber originating from Federal lands located in such area of the United States. I make this certification for the exemption from the prohibition against export within the preceding 24-month period for purchasing Federal timber required by the Forest Resources Conservation and Shortage Relief Act of 1990 (Pub. L. No. 101–382, August 20, 1990, 16 U.S.C. 620, *et seq.*) (Act). I hereby certify that I will cease all exporting of such unprocessed private timber from west of the 100th meridian in the contiguous 48 States of the United States by February 20, 1991. I make this certification with full knowledge and understanding of the requirements of this Act and do fully understand that failure to cease such exporting as certified will be a violation of this Act (16 U.S.C. 620d) and the False Statements Act (18 U.S.C. 1001), and may subject me to the penalties and remedies provided for such violation."

(3) The certification must have been signed by the person making such certification or, in the case of a corporation, by its Chief Executive Officer. The certificate must have been notarized.

§ 223.193 Procedures for reporting acquisition and disposition of unprocessed Federal timber.

(a) *Annual report.* Each person who directly or indirectly acquires or possesses unprocessed timber originating from National Forest System lands located west of the 100th meridian in the 48 contiguous States shall submit an annual report on a form provided by the Forest Service on the acquisition and disposition of such timber. Such report shall be on a calendar year basis and shall be sent to the Regional Forester, or other official to whom such authority is delegated, who administers the National Forest System lands from which the majority of timber originated, not later than March 1 of each year, beginning March 1, 1997. The form shall include:

(1) A summary for the calendar year listing, by company, from whom the timber was acquired; the date of acquisition; the origin of National Forest System timber acquired; the sale name; the contract number(s); brand registration number(s) of brands registered by a state or agency or a pictorial representation of sale brand(s) if brands not registered by a state or agency; to whom the timber was sold, transferred or otherwise conveyed to another person; and the date of disposal;

(2) An accounting by origin, in net board feet Scribner or cubic feet, of the volume of National Forest System timber acquired, the volume domestically processed by the purchaser or affiliates, and the volume sold or transferred for domestic processing;

(3) The volume by species of National Forest System surplus species timber acquired and exported or sold for export;

(4) The volume (MBF Net Scribner or cubic) of the unprocessed timber originating from private lands west of the 100th meridian in the contiguous 48 States that was exported, and

(5) A certificate stating that:

(i) The certifier has read and understands the form;

(ii) The certifier is eligible to acquire unprocessed timber originating from Federal lands in accordance with the Act;

(iii) The information supplied is a true, accurate, current, and complete statement of the receipt and disposition of unprocessed timber originating from National Forest System lands to the best of the certifier's knowledge;

(iv) The certifier agrees to retain a copy of the form and records of all transactions involving unprocessed Federal timber and to make such records available for inspection upon request of an authorized official of the United States for three (3) years from the date of disposal by manufacture or transfer; and

(v) The certifier acknowledges that failure to report completely and accurately the receipt and disposition of timber will subject the certifier to the penalties and remedies in the Act and the penalties in the False Statements Act (18 U.S.C. 1001).

(6) The information provided is presumed to be not confidential, unless specifically marked confidential, in which case confidentiality will be evaluated under applicable laws.

(b) *Transfer of unprocessed National Forest System timber.* Each person who transfers to another person unprocessed timber originating from National Forest System lands shall undertake the following:

(1) Before completing such transfer, provide to such other person a written notice of origin, species, estimated volume or actual volume if the transfer is based on log scale volume, from whom acquired, sale name, contract number, and log brand of unprocessed National Forest System timber being transferred on a form provided by the Forest Service;

(2) Before completing such transfer, certify that the information supplied is a true, accurate, current, and complete statement to the best of his or her knowledge. As part of the certification, the certifier shall:

(i) Agree to send a signed copy of the form required in paragraph (b)(1) of this section within 10 calendar days of such transfer, which shall include all notices, acknowledgments, and agreements, required by this section, to the appropriate Regional Forester who administers the National Forest System lands from which this timber originates, or other official to whom such authority is delegated, and to retain a copy for the certifier's records;

(ii) Acknowledge that the transfer of unprocessed Federal timber to a person for export or to a person who may not purchase timber directly from the Federal government is a violation of the Act;

(iii) Agree to obtain full completed notice of origin form from the transferee;

(iv) Agree to retain records of all transactions involving unprocessed Federal timber for a period of three (3) years from the date of transfer and to make all records involving log transactions available to an appropriate Federal official upon request. Records include all forms and certificates required by these regulations;

(v) Acknowledge that failure to report completely and accurately the receipt and disposition and/or transfer of unprocessed National Forest System timber will subject the certifier to the penalties and remedies in the Act (16 U.S.C. 620, *et seq.*) and the penalties in the False Statements Act (18 U.S.C. 1001); and

(vi) Certify that he or she has read and understands the form.

(3) Before completing such transfer, obtain from the person acquiring such

timber on the same form provided by the Forest Service.

(i) An agreement to retain for a period of three (3) years from date of transfer the records of all sales, exchanges, or other disposition of such timber, and make such records available for inspection upon the request of an authorized official of the United States;

(ii) An agreement to allow Federal officials access to log storage and processing facilities for the purpose of monitoring compliance with the Act and implementing regulations;

(iii) An agreement to maintain and/or replace all brands and paint identifying the Federal origin of each piece of unprocessed Federal timber as described in § 223.195;

(iv) An agreement to submit, by March 1, the annual report required in § 223.193(a);

(v) An agreement to submit a completed notice of origin form for the Federal timber received and to receive an agreement to comply with the Act and regulations in such form if the person transfers any or all of the timber listed in the document;

(vi) An acknowledgment of the prohibition against acquiring unprocessed Federal timber from a person who is prohibited by the Act from purchasing the timber directly from the United States;

(vii) An acknowledgment of the prohibitions against exporting unprocessed Federal timber and against acquiring such timber in substitution for unprocessed private timber west of the 100th meridian in the contiguous 48 States;

(viii) A declaration of its business size and manufacturing classification, as defined under the Small Business Administration Regulations at 13 CFR part 121; and

(ix) A certificate stating that the certifier has read and understands the form; is eligible to acquire unprocessed timber originating from Federal lands in accordance with the Act; has been notified that some or all of the unprocessed timber included in this transfer is subject to export and substitution restrictions; supplied information is a true, accurate, current, and complete statement of the receipt and disposition of the unprocessed timber originating from National Forest System lands to the best of the certifier's knowledge; and acknowledges that failure to report completely and accurately the transfer of unprocessed Federal timber will subject the certifier to the penalties and remedies in the Act (16 U.S.C. 620, *et seq.*) and the penalties in the False Statements Act (18 U.S.C. 1001). The information provided is presumed to be not confidential, unless specifically marked confidential, in which case confidentiality will be evaluated under applicable laws.

(4) Except as otherwise provided by law, a person who transfers unprocessed Federal timber to another person and meets all notice, certification, acknowledgment, reporting and record keeping requirements contained in this section shall be relieved from further liability for such timber pursuant to the Act.

§ 223.194 Procedures for reporting the acquisition and disposition of unprocessed private timber.

(a) *Notice of domestic processing requirement.* Each person who acquires unprocessed timber originating from Federal lands located west of the 100th meridian in the 48 contiguous States, and who also possesses or acquires unprocessed timber from private lands located west of the 100th meridian in the 48 contiguous States that requires domestic processing, including unprocessed timber originating within an approved sourcing area, and in turn sells, trades or otherwise conveys such unprocessed private timber to another person, must include a statement notifying the person acquiring the unprocessed private timber that such private timber must be domestically processed. Unprocessed timber originating from private lands located outside of a sourcing area may be transferred by the holder of the sourcing area, or by persons acquiring such unprocessed timber who are eligible to export such timber, without including such a statement.

(b) The notification statement, pursuant to paragraph (a) of this section, shall accompany each transaction involving unprocessed private timber that requires domestic processing. The statement shall be on a form provided by the Forest Service or a legible copy of such form.

(1) On such form, described in paragraph (b) of this section, the person transferring the timber shall:

(i) Give notice to the person receiving the unprocessed private timber that exporting that timber would violate the Act and its implementing regulations;

(ii) Give notice to the person receiving the unprocessed private timber that the timber has been identified for domestic manufacturing by a spot of highway yellow paint on each log end that must be retained on the timber;

(iii) Agree to send a signed copy of the transaction statement to the Regional Forester within 10 calendar days of the transaction;

(iv) Agree to retain records of all transactions involving the acquisition and disposition of unprocessed timber for a period of three (3) years from the date of disposal by manufacturing or transfer and to make such records available for inspection upon the request of an authorized official of the United States;

(v) Acknowledge that failure to completely and accurately report and identify unprocessed timber is a violation of the Act, and regulations issued under the Act, and the False Statements Act (18 U.S.C. 1001); and

(vi) Certify that the form has been read and understood.

(2) On such form, described in paragraph (b), the person acquiring the timber shall:

(i) Acknowledge receipt of the notice of requirement to domestically process timber originating from private land;

(ii) Certify that a statement pursuant to paragraph (b)(1) will be included in any subsequent transaction documents;

(iii) Agree to maintain yellow paint markings on each log end until the timber is domestically processed or transferred;

(iv) Agree to retain records of all transactions involving the acquisition and disposition of unprocessed timber for a period of three (3) years from the date of disposal by manufacturing or transfer and to make such records available for inspection upon the request of an authorized official of the United States;

(v) Agree to send a signed copy of the transaction statement to the Regional Forester within 10 calendar days of the transaction;

(vi) Agree to allow authorized officials access to log storage and processing facilities for the purpose of monitoring compliance with the Act and its implementing regulations;

(vii) Acknowledge that failure to comply with the domestic manufacturing requirements for unprocessed timber or failure to notify subsequent persons of this requirement may subject the certifier to the civil penalties and administrative remedies provided in the Act and regulations issued under the Act;

(viii) Acknowledge that failure to completely and accurately report and identify unprocessed timber is a violation of the Act, and regulations issued under the Act, and the False Statements Act (18 U.S.C. 1001); and

(ix) Certify that the form has been read and understood.

(c) Except as otherwise provided by law, a person who transfers unprocessed private timber to another person and meets all notice, certification, acknowledgement, distribution, reporting and record keeping requirements contained in this section shall be relieved from further liability for such timber with regard to the export and substitution restrictions pursuant to the Act.

§ 223.195 Procedures for identifying and marking unprocessed timber.

(a) *Highway yellow paint.* The use of highway yellow paint on unprocessed logs west of the 100th meridian in the contiguous 48 States shall be reserved for identifying logs requiring domestic manufacturing.

(b) *Preserving identification.* All identifying marks placed on an unprocessed log to identify the National Forest System origin of that log and/or to identify the log as requiring domestic processing shall be retained on the log until the log is domestically processed. If the identifying marks are lost, removed, or become unreadable, they shall be replaced. If the log is cut into two or more segments, each segment shall be identified in the same manner as the original log.

(1) A generic log hammer brand, known as a "catch brand", used to identify ownership, may be used to replace lost, removed, unreadable or otherwise missing brands where such use is authorized by the Regional Forester and approved by the Contracting Officer. Use of such a catch brand on a log or log segment will signify Federal origin.

(2) The requirement to preserve identification of log pieces shall not apply to logs cut into two or more segments as a part of the mill in-feed process immediately before processing. Log segments that are returned to or placed in storage must be marked on both ends with yellow paint.

(c) *National Forest System logs.* Except as otherwise provided in this subsection, all unprocessed logs originating from National Forest System timber sales west of the 100th meridian in the contiguous 48 States shall, before being removed from the timber sale area, be marked on each end as follows:

(1) Painted on each end with a spot of highway yellow paint not less than three square inches in size; and,

(2) Branded on each end with a hammer brand approved for use by the Forest Supervisor of the National Forest from which the logs originate. The brand pattern may not be used to mark logs from any other source for a period of 24 months after all logs have been removed from the sale area and until such brand pattern is released in writing by the Forest Supervisor.

(d) *Private logs.* All unprocessed logs originating from private lands west of the 100th meridian in the contiguous 48 States that require domestic manufacturing pursuant to § 223.194 of this subpart, shall be painted on each end with a spot of highway yellow paint not less than three (3) square inches in size before removal from the harvest area. If private logs are acquired by a person who may not export such logs, the logs must be marked by the person acquiring the logs at the time of the acquisition.

(e) *Waiver of painting requirements.* The log painting requirements pursuant to paragraphs (c)(1) and (d) of this section may be waived if the Chief of the Forest Service determines that alternate methods for identifying logs required to be domestically processed are equal to or better than the procedures required herein.

(f) *Waiver of branding requirements.* Regional Foresters may waive the branding requirements pursuant to paragraph (c)(2) of this section as follows:

(1) *Regions 1, 2, 3, and 4.* On an individual timber sale basis, all or a portion of the branding requirements pursuant to paragraph (c)(2) of this section may be waived, if:

(i) Unprocessed logs from any origin are not known to have been exported by any person from the person's area of operations within the previous 5; years.

(ii) The person certifies as follows:

> "I hereby request waiver of the requirements to brand each end of individual logs originating from the _______ timber sale, Forest Service contract number _______ pursuant to 36 CFR 223.195. I certify that I have not exported or sold for export unprocessed timber from private lands within my area of operations in five years. I certify that I understand, that if granted, the waiver applies only to unprocessed logs being processed within my area of operations. I certify that any unprocessed logs to which this waiver applies that are transferred, or sold for transfer, outside my area of operations will be branded on both ends in full compliance with 36 CFR 223.195. I make this certification with full knowledge and understanding of the requirement of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*) (Act) and its implementing regulations at 36 CFR part 223. I fully understand that failure to abide by the terms of the waiver will be a violation of this Act (16 U.S.C. 620, *et seq.*) and the False Statements Act (18 U.S.C. 1001) and may subject me to the penalties and remedies provided for such violation.";

and,

(iii) The person otherwise complies with the regulations relating to transfers of logs between persons.

(iv) If the Regional Forester determines that unprocessed logs from my origin are being exported, or are known to have been exported within the previous 5 years, by any person from the person's area of operations, the Regional Forester shall revoke the waiver.

(2) *Regions 5 and 6.* On an individual timber sale basis, the branding requirement pursuant to paragraph (c)(2) of this section may be waived for logs ten (10) inches or less in diameter inside bark on the large end may be waived if:

(i) One end of each log is branded;

(ii) The person certifies as follows:

> "I hereby request waiver of the requirement to brand each end of individual logs ten (10) inches or less in diameter inside bark on the large end, originating from the _______ timber sale, U.S. contract number _______ pursuant to 36 CFR 223.195. I certify that I understand, if granted, that the waiver applies only to unprocessed logs being processed at _______, and further certify that any and all unprocessed logs to which waiver would apply that are transferred, or sold for transfer, will be branded on both ends in full compliance 36 CFR 223.195. I make this certification with full knowledge and understanding of the requirements of the Forest Resources Conservation and Shortage Relief Act of 1990 (Pub. L. No. 101–382, August 20, 1990; 16 U.S.C. 620, *et seq.*) (Act) and its implementing regulations at 36 CFR Part 223. I fully understand that failure to abide by the terms of the waiver will be a violation of this Act (16 U.S.C. 620, *et seq.*) and the False Statements Act (18 U.S.C. 1001) and may subject me to the penalties and remedies provided for such violation.";

and,

(iii) The purchaser otherwise complies with the regulations relating to transfers of logs between persons.

(iv) If the Regional Forester determines that logs ten (10) inches or less in diameter inside bark on the large end are being exported in the Region, the Regional Forester shall revoke the waiver.

(3) The Chief of the Forest Service may authorize the testing of alternative methods of branding for consideration in future amendment of these regulations. Such alternative methods and logs marked under those methods shall be closely monitored.

§ 223.196 Civil penalties for violation

(a) *Exporting Federal timber.* If the Secretary of Agriculture finds, on the record and after providing an opportunity for a hearing, that a person, with willful disregard for the prohibition in the Act exporting unprocessed Federal timber, exported or caused to be exported unprocessed timber originating from Federal lands in violation of the Act, the Secretary may assess against such person a civil penalty of not more than $500,000 for each violation, or 3 times the gross value of the unprocessed timber involved in the violation, whichever amount is greater.

(b) *Other violations.* If the Secretary of Agriculture finds, on the record and after providing an opportunity for a hearing, that a person has violated any provision of the Act, or any regulation issued under the Act relating to National Forest System lands, even though that the violation may not have caused the export of unprocessed Federal timber in violation of such Act, the Secretary may:

(1) Assess against such person a civil penalty of not more than $500,000, if the Secretary determines that the person committed such violation willfully;

(2) Assess against such person a civil penalty of not more than $75,000 for each violation, if the Secretary determines that the person committeed such violation in disregard of such provision or regulation; or

(3) Assess against such person a civil penalty of not more than $50,000 for each violation, if the Secretary determines that the person should have known that the action constituted a violation.

(c) *Penalties not exclusive and judicial review.* A penalty assessed under paragraph (a) or (b) of this section shall not be exclusive of any other penalty provided by law, and shall be subject to review in an appropriate United States district court.

§ 223.197 Civil penalty assessment procedures.

Adjudicatory procedures for hearing alleged violations of this Act and its implementing regulations and assessing penalties shall be conducted under the rules of practice governing formal adjudicatory proceedings instituted by the Secretary. Such procedures are found at 7 CFR 1.130, *et seq.*

§ 223.198 Administrative remedies.

In addition to possible debarment action provided under subpart C of this part, the Chief of the Forest Service, or other official to whom such authority is delegated, may cancel any timber sale contract entered into with a person found to have violated the Act or regulations issued under the Act. Such a finding shall constitute a serious violation of contract terms pursuant to § 223.116(a)(1) of this part.

§ 223.199 Procedures for cooperating with other agencies.

The Regional Foresters may enter into agreements to cooperate with the Department of the Interior, the Department of Defense, and other Federal, State and local agencies for monitoring, surveillance and enforcing the Act.

§ 223.200 Determinations of surplus species.

(a) Determinations that specific quantities of grades and species are surplus to domestic manufacturing needs and withdrawals of such determinations shall be made in accordance with title 5, United States Code, section 553.

(b) Review of a determination shall be made at least once in every 3-year period. Notice of such review shall be published in the **Federal Register**. The public shall have no less than 30 days to submit comments on the review.

(c) Alaska yellow cedar and Port Orford cedar, which the Secretary of Agriculture found to be surplus to domestic processing needs pursuant to 36 CFR 223.163, the rules in effect before August 20, 1990, shall continue in that status until new determinations are published.

§ 223.201 Limitations on unprocessed timber harvested in Alaska.

Unprocessed timber from National Forest System lands in Alaska may not be exported from the United States or shipped to other States without prior approval of the Regional Forester. This requirement is necessary to ensure the development and continued existence of adequate wood processing capacity in Alaska for the sustained utilization of timber from the National Forests which are geographically isolated from other processing facilities. In determining whether consent will be given for the export of timber, consideration will be given to, among other things, whether such export will:

(a) Permit more complete utilization on areas being logged primarily for local manufacture,

(b) Prevent loss or serious deterioration of logs unsalable locally because of an unforeseen loss of market,

(c) Permit the salvage of timber damaged by wind, insects, fire or other catastrophe,

(d) Bring into use a minor species of little importance to local industrial development, or

(e) Provide material required to meet urgent and unusual needs of the Nation. (16 U.S.C. 472a; 16 U.S.C. 551; 16 U.S.C. 616)

§ 223.202 Information requirements.

(a) The procedures in § § 223.189 and 223.192, and some of the procedures in § 223.190 were approved by the Office of Management and Budget (OMB) and assigned Control Number 0596–0114 upon issuance of the interim rule. Control Number 0596–0114 has been reapproved by OMB for use through May 31, 1997. OMB approved the information collection requirements in § § 223.191 and 223.203 for use through August 31, 1995, and assigned them Control Number 0596–0115. OMB approved the information collection requirements in § § 223.48 and 223.87 for use through March 31, 1997 and assigned them Control Number 0596–0021; the information collection requirements in § § 223.48 and 223.87 have been revised. OMB Control Numbers 0596–0114, 0596–0115, and 0596–0021 have been consolidated under OMB Control Number 0596–0114.

(b) The application and reporting procedures in § § 223.187, 223.193, 223.194, 223.195, and some of the procedures in § 223.190 of this final rule contain new record keeping and reporting requirements as defined in 5 CFR part 1320 and, therefore, impose additional paperwork burdens on the affected public. The Office of Management and Budget (OMB) has approved these requirements, and assigned them Control Number 0596–0114.

§ 223.203 Indirect substitution exception for National Forest System timber from within Washington State.

(a) *Exception limits.* A limited amount of unprocessed National Forest System timber originating from within Washington State could have been acquired by a person otherwise covered by the prohibition against indirect substitution, pursuant to § 490(b) of the Act and § 223.189(e) of this subpart.

(1) The amount of such unprocessed timber was limited to whichever is less:

(i) The higher of the applicant's actual purchase receipts for unprocessed timber originating from National Forest System lands within Washington State or the Department's records, during fiscal years 1988, 1989, and 1990, divided by 3; or

(ii) 15 million board feet.

(2) Such limit shall not exceed such person's proportionate share of 50 million board feet.

(b) *Application, review and approval process.* To obtain a share of the 50 million board feet exempted from the prohibition against indirect substitution in section 490(b) of the Act, a person must have submitted an application. Applications were required to include at least the following:

(1) The amount of volume exception being requested, in thousand board feet (MBF);

(2) A signed certification that reads as follows:

"I certify that, except for an approved share of unprocessed Federal timber, in accordance with 36 CFR 223.203, the prohibition contained in section 490(b) of the Act (16 U.S.C. 620b) applies to me. I have exported unprocessed timber originating from private lands from west of the 100th meridian in the 48 contiguous States and have acquired unprocessed timber from National Forest System lands located within Washington State in 1988, 1989 and/or 1990. I certify that the information provided in support of this application is a true, accurate, current and complete statement, to the best of my knowledge and belief. I agree to retain records of all transactions involving the acquisition and disposition of unprocessed timber from Federal lands within the area involved in this application for a period of 3 years beginning on the date the application is approved, and to make such records available for inspection upon the request of the Regional Forester or other official to whom such authority has been delegated. I make this certification with full knowledge and understanding of the requirements of the Act and do fully understand that if this application is approved, the amount of exception granted under this approval may not be exceeded in any one fiscal year, and do fully understand that if such exception is exceeded I will be in violation of the Act (16 U.S.C. 620, *et seq.*), and I may be subject to the penalties and remedies provided for such violation. Further, I do fully understand that such violation may subject me to the penalty of perjury pursuant to the False Statements Act (18 U.S.C. 1001).";

and

(3) The application listed under this section must have been signed by the person making such application or, in the case of a corporation, by its Chief Executive Officer. The application must have been on the company's letterhead and must have been notarized.

(4) The application made under this section must have been mailed to the Regional Forester in Portland, Oregon, no later than January 8, 1992. Applicants were notified of the approving official's decision by letter. If approved, the amount of the exception becomes effective upon publication in the **Federal Register**.

(5) Prospective applicants could review Department records upon request prior to the deadline for submitting applications. An applicant could voluntarily submit information documenting the amount of purchases of unprocessed timber originating from National Forest System lands within Washington State. The Department then determined which amount is higher, verified by either the Department's records or the applicant's records. The Department then determined the applicant's portion of the 50 million board feet by determining the lesser of the amount verified by the records or 15 million board feet. Applicants could submit the information documenting the amount of purchases in the following manner:

(i) Actual receipts for purchasing unprocessed timber from National Forest System lands within Washington State; or

(ii) A statement by a certified public accountant of:

(A) A summary by fiscal year for 1988, 1989 and 1990 of the applicant's acquisitions of timber originating from National Forest System lands in the State of Washington, listing total volume for each of the three fiscal years; and

(B) The average volume for the three fiscal years. The volumes to be reported were the harvest volumes, except in the case of open sales. Advertised volumes had to be reported for open sales.

(C) The certified public accountant must have certified to the following:

"I certify that under the penalties and remedies provided in § 492 of the Act (16 U.S.C. 620d) and the penalty of perjury provided in the False Statements Act (18 U.S.C. 1001) that the information provided in support of this application is, to the best of my knowledge and belief, a true, accurate, current, and complete statement of [applicant's company's name] National Forest System timber acquisitions originating from within the State of Washington for fiscal years 1988, 1989 and/or 1990."

(D) The certified public accountant's statement and certification must have been on the accountant's company letterhead, must have been notarized, and must have accompanied the applicant's application.

(c) *Selling and trading rights.* The purchase limit right obtained under this rule may be sold, traded, or otherwise exchanged with any other person subject to the following conditions:

(1) Such rights may not be sold, traded, or otherwise exchanged to persons already in possession of such rights:

(2) Any person selling, trading, or exchanging any or all of the rights obtained under this rule shall advise the Regional Forester of the amount being traded and the name(s) of the person(s) acquiring such rights within 15 days of the transaction; and

(3) No person may have or acquire more than 15 million board feet in one fiscal year.

(d) *Information collection.* The application procedures in this section constitute information collection requirements as defined in 5 CFR part 1320. These requirements have been approved by the Office of Management and Budget and assigned clearance number 0596–0114.

(e) *Persons with approved shares.* The application period for shares of the indirect substitution exception for acquiring unprocessed timber originating from National Forest Systems lands within the State of Washington closed on January 8, 1992. Persons with approved shares are responsible for monitoring and controlling their acquisitions of National Forest System timber originating from within the State of Washington to assure approved share amounts are not exceeded in any Federal fiscal year. Unused portions of annual shares may not be "banked" for use in future fiscal years. The acquisition of such National Forest System timber must be reported to the Forest Service in accordance with § 223.193 of this subpart. The following shares are approved as of September 8, 1995:

(1) Cavenham Forest Industries, Portland, OR, 1,048,000 board feet.

(2) Weyerhauser, Tacoma, WA, 15,000,000 board feet.

PART 261—PROHIBITIONS

13. The authority citation for part 261 is revised to read as follows:

Authority: 16 U.S.C. 551; 16 U.S.C. 472; 7 U.S.C. 1011(f); 16 U.S.C. 1246(i); 16 U.S.C. 1133(C)–(d)(1); 16 U.S.C. 620(f).

Subpart A—General Prohibitions

14. Amend § 261.6 by adding paragraph (i) to read as follows:

§ 261.6 Timber and other forest products.

* * * * *

(i) Violating the Forest Resources Conservation and Shortage Relief Act of 1990 (16 U.S.C. 620, *et seq.*), or its implementing regulations at 36 CFR 223.185–223.203.

* * * * *

Dated: August 28, 1995.

James R. Lyons,

Under Secretary, Natural Resources and Environment.

Department of Commerce

National Oceanic and Atmospheric Administration

50 CFR Part 672 et al.

Groundfish of the Gulf of Alaska; Groundfish Fishery of the Bering Sea and Aleutian Islands Area; Consolidate Recordkeeping and Reporting Requirements; Proposed Rule

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 672 and 675

[Docket No. 950727194–5194–01; I.D. 062795C]

RIN 0648–AG54

Groundfish of the Gulf of Alaska; Groundfish Fishery of the Bering Sea and Aleutian Islands Area; Consolidate Recordkeeping and Reporting Requirements

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to remove and to consolidate several sections of regulations in parts 672 and 675; to simplify and streamline the remaining regulations, including the recordkeeping and reporting requirements; to consolidate area descriptions and coordinates into maps and tables; to consolidate codes, values, and descriptions into tables; and to correct errors and clarify vague text. These actions are intended to facilitate management of the groundfish fisheries and the enforcement of groundfish regulations. They are necessary to promote the goals and objectives of the Fishery Management Plans (FMPs) for Groundfish of the Gulf of Alaska (GOA) and the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (BSAI).

DATES: Comments must be received on or before October 10, 1995.

ADDRESSES: Comments may be sent to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802, Attn: Lori J. Gravel, or be delivered to Federal Building, Fourth Floor, 709 West 9th Street, Juneau, AK. Comments on the collection-of-information requirements may be sent to the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget (OMB) (0648–AG54), Washington, DC 20503 (Attn: NOAA Desk Officer), and to Patsy A. Bearden, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802.

FOR FURTHER INFORMATION CONTACT: Patsy A. Bearden, 907–586–7228.

SUPPLEMENTARY INFORMATION: Fishing for groundfish by U.S. vessels in the exclusive economic zone (EEZ) of the BSAI and the GOA is managed by NMFS according to the FMPs for Groundfish of the Gulf of Alaska and the Groundfish Fishery of the Bering Sea Aleutian Islands Area. The FMPs were prepared by the North Pacific Fishery Management Council (Council) under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and are implemented by regulations governing the U.S. groundfish fisheries at 50 CFR parts 672 and 675. General regulations that also pertain to the U.S. fisheries appear at 50 CFR part 620.

This action proposes amendments to regulations as follows: (1) Consolidate § 675.2 into § 672.2; § 675.3 into § 672.3; § 675.4 into § 672.4; and § 675.5 into § 672.5; (2) remove the requirement for the groundfish utilization survey at § 672.5(d) and (e) and other outdated requirements; (3) update and replace §§ 672.2, 672.3, 672.4 (including the Federal Fisheries Permit Application), and 672.5 (including logbooks, reports, and forms); (4) amend §§ 672.7, 675.27, and § 677.4; (5) revise the scientific term for steelhead trout at §§ 672.20(e)(1) and 675.20(c)(1); (6) place all tables and figures currently found in part 675 in part 672, revised and renumbered, and add new tables and figures; (7) revise and insert references to tables and figures within the text of parts 672 and 675; (8) revise and insert paragraph titles to several paragraphs in parts 672 and 675; (9) revise the time citation "00:01 a.m." to read "0001 hours" in §§ 672.20(a), 675.20(a), 672.23(f), and 675.23(d); (10) revise GOA reporting area codes from 61, 62, 63, 64, 65 to read 610, 620, 630, 640, and 650; (11) revise and insert references to GOA reporting areas; (12) add new GOA reporting area code 690 and new BSAI reporting area codes 300, 400, and 550; (13) place all reporting area codes and coordinates in maps and tables; and (14) divide most reporting areas into Alaska state waters and Federal waters for reporting purposes. A description of, and reasons for, these actions follow.

I. Consolidation of Regulations

Although the GOA and BSAI have separate FMPs, much of the regulatory text for the two management areas is the same. NMFS proposes to remove duplicate text that is found also in part 672 (GOA management area) from several sections of part 675 (BSAI management area) and to replace the removed text with a cross reference to part 672. This action will shorten the regulations as well as simplify and clarify the text. Those sections affected would be: Section 675.2 into § 672.2 (Definitions); § 675.3 into § 672.3 (Relation to other laws); § 675.4 into § 672.4 (Permits); and § 675.5 into § 672.5 (Recordkeeping and reporting).

II. Removal of Existing Regulations

NMFS would remove outdated regulations that no longer apply to the groundfish fisheries. This action would shorten the regulatory text and create a simpler, more pertinent body of regulations.

A. Groundfish Utilization Surveys

NMFS proposes to remove regulations at § 672.5(d) and (e) that require completion of an annual groundfish utilization survey. The original purpose of the survey was to estimate domestic annual processing (DAP) groundfish utilization each year for purposes of allocating groundfish among foreign fishing, DAP, and joint-venture processing (JVP) operations. Since 1990, the groundfish fisheries have been fully domesticated, and foreign fishing and JVP operations have been discontinued. Groundfish utilization surveys are no longer needed. The time spent on the labor-intensive surveys by industry provides no useful guidance for annual projections of DAP harvest and production activity.

B. Text Within 675.27(g)

NMFS proposes to remove regulations at § 675.27(g), regarding the Western Alaska Community Development Program, Community Development Quota (CDQ) requirements, that are entitled "CDQ fishing requirements," since these regulations are found in recordkeeping and reporting requirements at § 672.5.

C. Logbooks

1. *Duration of Set or Trawl.* NMFS proposes to remove recordkeeping and reporting requirements at § 672.5 for Catcher Vessels and Catcher/Processors to record duration of set or trawl in the Catcher Vessel Daily Fishing Logbook (DFL) and Catcher/Processor Daily Cumulative Production Logbook (DCPL), respectively. This information can be obtained from the logbook through calculations of start and end times.

2. *Joint-venture Operation.* The requirement to record in a DFL whether delivery by a Catcher Vessel was made to a foreign processor vessel in a joint-venture operation would be removed, since joint-venture operations for groundfish no longer occur in the EEZ off Alaska.

3. *Number of Days Fishing Activity.* The requirement to record the number of days that fishing activity was conducted and when fish were received would be removed from the weekly

production report. This information, originally thought to provide effort information, did not result in useful information.

III. Revision of Regulations

The need for existing recordkeeping and reporting requirements was discussed in the preamble to the proposed rule for Amendments 13 and 18 to the FMPs (54 FR 36333, September 1, 1989). The recordkeeping and reporting requirements implemented under Amendments 13 and 18 (54 FR 50386, December 6, 1989) subsequently were revised to repeal monthly product value reporting requirements (55 FR 34933, August 27, 1990). Additional revisions were published for public comment and implemented under a 1991 interim final rule (56 FR 9636, March 7, 1991). No comments were received on the interim final rule during the public review period.

NMFS proposes to incorporate recommendations from the groundfish industry, NMFS management staff, and enforcement staff to reduce the reporting burden; to improve the format of the logbooks, reports, and forms; and to create a more effective, timely, and comprehensive collection of information to facilitate management of the groundfish fisheries in the EEZ off Alaska.

A. Revisions to Statistical and Reporting Areas

1. *Coordinates.* The codes and coordinates for GOA and BSAI statistical and reporting areas would be presented in maps and tables (see Figures 1 and 3). This action would provide easy access to these data by allowing the reader to refer to one source for all statistical and reporting area coordinates.

2. *Three-digit GOA statistical and reporting area codes.* Two-digit statistical and reporting area designations in the GOA would be changed to 3-digit designations by adding a zero to existing area numbers (e.g., reporting areas 61 through 65 would be designated as areas 610 through 650, respectively) (see Figure 3). Since existing statistical and reporting areas associated with the BSAI are designated by 3-digit codes, revision of the GOA-associated designations to 3-digit statistical and reporting area codes would provide a uniform coding system for incorporation into computer databases.

3. *Bogoslof District, BSAI.* A final rule implementing Amendment 17 to the FMP for the Groundfish Fishery of the BSAI (57 FR 10430, March 26, 1992) established Statistical Area 518 (the Bogoslof District) for purposes of managing the Aleutian Basin pollock stock. The coordinates published for the new area were incorrectly specified in the final rule. NMFS proposes to correct the error in the coordinates of Statistical Area 518 (see Figure 1).

4. *Division between BSAI and GOA Reporting Areas.* The division between reporting areas associated with BSAI and GOA would be described in coordinates along the Alaska Peninsula and the Aleutian Islands (see Figures 1 and 3). Lack of this information has caused problems in groundfish catch reporting and in enforcement of regulations.

5. *New Reporting Areas.* Generally, a reporting area includes a statistical area plus adjacent Alaska State waters and is identified by the same number used to identify the statistical area. NMFS proposes to add six reporting areas that do not follow that scheme (see Figures 1 and 3).

Two reporting areas would be added that are completely within Alaska State waters. Reporting area 649 (Prince William Sound) and reporting area 659 (inside waters of Southeast Alaska) would be established to allow inseason managers to differentiate reported sablefish and demersal shelf rockfish harvests that are managed under Alaska State groundfish quotas.

Four additional reporting areas would be added that are completely outside the EEZ off Alaska—300, 400, 550, and 690—to allow differentiation of fish harvested in areas outside the EEZ.

6. *Corrections to Existing Statistical Areas.* NMFS proposes that a code correction be made for two statistical areas, 511 and 522, that had already been assigned to two non-contiguous areas. This duplication was the result of the subdivision of a large area into smaller areas and inadvertence by not renumbering those areas. Statistical areas 508 and 509 would replace the two areas 511, and statistical areas 523 and 524 would replace the two areas 522. This action would result in more precise identification of the location of groundfish harvested in the BSAI.

7. *Distinction between Federal and State Portions of a Reporting Area.* NMFS proposes to distinguish between Federal waters (statistical areas) and Alaska State waters in any reporting area. Two questions would be added in the DFL, Buying Station Daily Cumulative Logbook (DCL), DCPLs, Weekly Production Report (WPR), Daily Production Report (DPR), Buying Station Check-in/Check-out, and Mothership or Catcher/Processor Check-in/Check-out Reports to request that the reader distinguish between Federal waters or Alaska State waters within any reporting area. This action would accommodate fee assessment of landings under the North Pacific Fisheries Research Plan (Research Plan) authorized by the Magnuson Act. Research Plan fee assessments would not apply to fish, except Pacific halibut, caught in Alaska State waters.

B. Figures and Tables

NMFS proposes to clarify coordinates and descriptions of areas in various sections of parts 672 (GOA management area) and 675 (BSAI management area) and to use maps and tables. Existing figures and tables from both the GOA and BSAI would be renumbered, revised, and placed after the text of part 672. In-text tables would be removed from paragraph 672.24(d), presented in Figure 5b, and relocated after the text of part 672; in-text tables would be removed from paragraph 672.24(e), presented in Table 6, and relocated after the text of part 672. This action would codify and improve access to information needed for compliance with recording and reporting requirements in the following figures and tables:

Figure 1—BSAI statistical and reporting areas; a—map, b—coordinates of reporting areas;

Figure 2—BSAI Catcher Vessel Operational Area (map includes coordinates);

Figure 3—GOA statistical and reporting areas; a—map, b—coordinates of reporting areas;

Figure 4—Herring Savings Areas in the BSAI; a—map, b—coordinates of reporting areas and effective dates;

Figure 5—Kodiak Island areas closed to trawls other than pelagic trawl gear; a—map, b—coordinates of reporting areas;

Figure 6—Length overall of a vessel; and

Figure 7—Location of trawl test areas in the GOA and the BSAI (map includes coordinates).

Table 1—Product codes (new table; these codes were formerly referred to in the Product Recovery Rate (PRR) tables at §§ 672.20 and 675.20). The various products that may be made from groundfish are described here and are assigned a 2-digit product code. Product codes also are used to describe various types of discard; these often are referred to as discard products;

Table 2—Species codes (new table). The various species of groundfish are listed in Table 2;

Table 3—Product recovery rates for groundfish species (renumbered);

Table 4—Bering Sea Subarea Steller Sea Lion Protection Areas (moved from text);

Table 5—Aleutian Islands Subarea Steller Sea Lion Protection Areas (moved from text);

Table 6—Gulf of Alaska Steller Sea Lion Protection Areas (moved from text);

Table 7—Communities determined to be eligible to apply for Community Development Quotas (renumbered);

Table 8—Harvest Zone Codes for Use with Product Transfer Reports and Vessel Activity Reports (new table);

Table 9—Required Logbooks, Reports, and Forms (new table);

Table 10—Gulf of Alaska, Retainable Percentages (renumbered); and

Table 11—Bering Sea and Aleutian Islands Management Area, Retainable Percentages (renumbered).

C. Revisions to Logbooks, Reports, and Forms

NMFS proposes to improve the format of existing logbooks, reports, and forms and to add a new logbook for Buying Stations, in addition to the following revisions:

1. *Metric tons.* The required weight units used to record amounts of landings, product, and discards of groundfish and herring would be revised from "pounds (lb) or nearest 0.1 metric ton (mt)" to "pounds (lb) or nearest 0.01 metric ton (mt)" on all forms and logbooks. This change would allow NMFS to obtain catch data from processors that traditionally have smaller landings. Finer resolution in the database would increase the accuracy of inseason quota management actions.

2. *Daily Fishing Logbook (DFL).* Recording the delivery date under Catch Delivery Information in the DFL would be required for use by NMFS Enforcement personnel. Other revisions to the DFL are proposed to improve the format of the logsheet and to record CDQ information.

At-sea discard information would be required from Catcher Vessels, without increasing the paperwork burden, through the use of an additional blue sheet in the DFL that the operator turns in to the processor with the harvest.

3. *Daily Cumulative Production Logbook (DCPL)*—a. *Mothership or Catcher/Processor.* The Catcher/Processor and Mothership DCPLs would be revised to improve the format of the logsheet and to record CDQ information.

b. *Shoreside Processor.* The Shoreside Processor DCPL would be divided into two parts identified as Part I and Part II, to allow for a greater number of daily entries, particularly in the product section. This action would allow flexibility in the use of the logbook by different types and sizes of Shoreside Processors. Part I would include four subparts: Processor identification information, Catcher Vessel delivery information, landings information, and discarded species information.

Part II would be used to record product information by week-ending date, management area, and species and product codes. Data would be recorded on one page for up to 3 weeks. This action would result in a more efficient page layout and a reduced reporting burden, since groundfish products would not be reported for separate reporting areas or gear types.

Other revisions are proposed to improve the format of the logsheet and to record CDQ information.

4. *Buying Station Daily Cumulative Logbook (DCL).* The operator or manager of a Buying Station would be required to maintain a DCL to record data about Catcher Vessel delivery and discards as well as Buying Station discards that occur after acceptance of the delivery from the Catcher Vessel and prior to delivery to a Mothership or Shoreside Processor. The proposed requirements for a Buying Station DCL would provide a defined procedure for a Mothership or Shoreside Processor to obtain data and report to NMFS any Catcher Vessel harvest and discard that is received, sorted, and delivered by a Buying Station.

5. *Product Transfer Report (PTR).* The name of the Product Transfer Logbook (PTL) would be changed to Product Transfer Report (PTR) to give the form a more accurate name, because it is not a logbook. An addition would be made to the PTR to indicate whether the form is an original or revised report; this information would improve data entry speed and accuracy.

a. *Mothership or Catcher/Processor PTR.* Each Mothership or Catcher/Processor would be required to record the U.S. Coast Guard document number of the vessel on a PTR and collect additional identification information concerning transfer handling, destination, or receipt. The PTR would indicate whether a particular transfer forms the beginning or end of an audit period; whether a transfer is a complete or partial offload; and what amount and type of products remain on board after the transfer. These revisions are needed to simplify and improve the accuracy of audits of Motherships or Catcher/Processors by NMFS Enforcement personnel.

A harvest zone designation (distinct from reporting or statistical area, see Table 8) would be added to the PTR to indicate whether groundfish were harvested in or outside of the EEZ off Alaska. This information is needed to complete requests for statistical reports from members of Congress and other Government officials. NMFS Enforcement and Management personnel would use the information recorded on the PTR to determine ownership of a product from its place of origin to its first destination.

b. *Shoreside Processor.* The Shoreside Processor PTR would be revised to collect additional information concerning transfer handling, destination, or receipt.

6. *Check-in/Check-out Report*—a. *Mothership or Catcher/Processor.* This form would be revised to determine intended primary and secondary target species. This information would provide fishery managers with an estimate of fishing effort for individual species in each reporting area and would enable them to better project fishery closures. Regulations also would be clarified to allow operators of Catcher/Processors using hook-and-line or pot gear to be "checked into" several reporting areas if their gear is simultaneously fishing in those areas.

A requirement would be added to record processor type, because vessels can function in more than one category. This information is needed by fishery managers for quota management purposes.

Other revisions are proposed to improve the format of the form and to record CDQ information.

b. *Shoreside Processor.* A Check-in/Check-out report would be required; it would supersede the existing requirement for a Shoreside Processor to check in through submittal of its first WPR. Each Shoreside Processor would submit a Check-in report before receipt of groundfish, either at the beginning of the fishing year or after submission of a Check-out report.

Products from groundfish often are stored at the Shoreside Processor premises for a long time, along with stored products resulting from non-groundfish fisheries. Fish products that are not intended for storage are transferred from a Shoreside Processor directly to trucks. An accurate on-site groundfish product inventory and audit is therefore difficult to conduct. The Shoreside Processor Check-in/Check-out Report would be revised to record the amount of fish product held or stored at the time the Check-in report is filed. Enforcement personnel would be able to use this information to calculate product on hand at any time from records in the shoreside DCPL and PTRs.

Other revisions are proposed to improve the format of the form and to record CDQ information.

c. *Buying Station.* Each operator or manager of a Buying Station would be required to submit a Check-in Report prior to receipt of groundfish from Catcher Vessels; a Check-out Report would be required upon completion of delivery of all groundfish to a Mothership or Shoreside Processor. A separate Check-in or Check-out Report would be required from the Buying Station operator or manager for each Shoreside Processor or Mothership with which the Buying Station is associated. The proposed Buying Station Check-in/Check-out Report would yield additional effort information needed for quota management.

7. *Weekly Production Report (WPR).* The current WPR would be replaced with two similar WPR forms, one for use by Shoreside Processors and another for use by Motherships or Catcher/Processors.

a. *Mothership or Catcher/Processor.* Each Mothership or Catcher/Processor would be required to record the fisheries permit number and the Alaska Department of Fish and Game (ADF&G) processor code, because both are necessary to identify a processor; a requirement is proposed to report the number of crew members at the end of each weekly reporting period—this information is needed by NMFS economists for national statistical reports; and a requirement is proposed to add the preprinted ADF&G fish ticket numbers that were issued to Catcher Vessels for each delivery made during the weekly reporting period. This information is needed by NMFS to make comparisons of processor-reported Federal and State data for reporting accuracy.

Intended target information would be requested for the next weekly reporting period. This information would be used by NMFS to improve fishing effort projection for individual species.

Two additions would be made to the WPR to improve data entry speed and accuracy, the first to indicate whether the form is an original or revised report, and the second to indicate the date the WPR is prepared.

All references to "retained products" would be revised to read "product". Other revisions are proposed to improve the format of the form and to record CDQ information.

b. *Shoreside Processor.* Each Shoreside Processor would be required to record product data by management area (BSAI or GOA) rather than by reporting area. This would be used for enforcement purposes and for the collection of economic data for national statistical reports.

8. *Daily Production Report (DPR).* NMFS would be authorized to require, through publication in the **Federal Register**, submittal of DPRs. The DPR is used when a fishery is expected to be of too short duration to be managed based on weekly reports. The product reporting section of the DPR would be revised to create separate sections for responses from Shoreside Processors or Motherships and Catcher/Processors. The Shoreside Processor would report landings, as weighed before processing, in a section entitled, "Shoreside Only Landings". The Mothership and Catcher/Processor would report weight of products in a section entitled, "Processor Vessel Only Products". Within these columns, the following information would be recorded for each product: The product code; indication of ancillary, primary, or reprocessed product type; and weight in metric tons. Other revisions would be made to indicate whether a given DPR is an original or revised report and to record the date the form was prepared. This information is needed to ensure an accurate and complete database. Several questions would be added to request additional information about the processor's representative. Other revisions to the DPR are proposed to improve the format of the form and to record CDQ information.

9. *U.S. Vessel Activity Report (VAR).* Existing regulations at 50 CFR 299.5 require U.S. vessels fishing in the Russian economic zone (EZ) in joint ventures to submit a VAR prior to crossing the seaward boundary of the EEZ. The applicability of the VARs currently required under § 299.5 would be expanded to require vessels to submit a VAR report to the Regional Director immediately prior to crossing the seaward boundary of the EEZ off Alaska or immediately prior to crossing the U.S./Canada international boundary between Alaska and British Columbia. The VAR would be used to augment existing recordkeeping and reporting requirements and would not replace the Check-in/Check-out reports or WPRs required under § 672.5.

NMFS has observed increased landings in U.S. ports of undocumented fish allegedly harvested from waters seaward of the EEZ off Alaska. NMFS is concerned that some portion of these landings may consist of fish illegally harvested in the EEZ off Alaska. Although the VAR requirements under § 299.5 address this concern for U.S. vessels fishing in the Russian EZ, NMFS believes that better information must be obtained concerning U.S. fishing activities in waters outside the EEZ off Alaska in order to document the origin and quantity of fish that are brought into the EEZ.

In light of the new requirements for distinguishing between groundfish fishing activity in state or Federal waters as well as pending international regulations for migratory species such as swordfish, the VAR would assist NMFS in tracking U.S. fishing vessels entering or leaving fishing grounds off Alaska from the coterminous United States and/or Hawaii.

10. *Designated Representative.* Each owner, operator, or manager of each Catcher Vessel, Catcher/Processor, Mothership, Shoreside Processor, or Buying Station participating in, or receiving groundfish from, a groundfish fishery would be required to identify a contact person or representative prior to commencement of fishing or processing activities. Although the representative may complete the logbooks, the required reports and forms, or both, the owner, operator, and manager would remain responsible for accurate and timely completion of all reporting requirements. The operator or manager is not always present or available to complete the recordkeeping and reporting requirements. In some instances the logbooks are maintained on board a vessel while the reports and forms are submitted to NMFS by a person in an office hundreds of miles away. Identifying a representative prior to commencement of fishing activity ensures a smooth data flow between the industry and NMFS, allowing quota management to be accurate and timely.

The name of the representative would be required to be reported on each logbook, WPR, DPR, PTR, Check-in/Check-out Report, and VAR (if applicable) and that the telephone number and facsimile number for that person also be provided. Proposed revisions to the recordkeeping requirements would standardize the text on all forms and logbooks to refer to that person as the representative.

D. Maintenance and Retention of Records

NMFS proposes the following requirements for the benefit of Enforcement officers conducting audits of Catcher Vessels, Motherships, Catcher/Processors, Shoreside Processors, and Buying Stations. In order to conduct a thorough audit of fish products on board or on site, paper copies of all groundfish transactions must be accessible for inspection.

1. *Three-year retention period.* The original (white) copy of all logbooks and a paper copy of all reports and forms submitted to NMFS required under amended §§ 672.5 and 675.5 would be

required to be retained for 3 years after the end of the fishing year during which the records were made. In addition, the Mothership and Shoreside Processor would be required to retain the original (white) copy of all DCLs from associated Buying Stations for 3 years, and the Buying Station would be required to retain the pink copy of all DCLs for 3 years.

2. *Retention during fishing year.* The original (white) copy of all logbooks, a paper copy of all reports and forms submitted to NMFS, and the blue DFL logsheet received from Catcher Vessels required under amended §§ 672.5 and 675.5 would be required to be kept on board a vessel or on site a Shoreside Processor or Buying Station until the end of the fishing year during which the records were made and for as long thereafter as fish or fish products recorded in the logbook, reports, and forms are retained.

3. *Inspection.* The logbooks, reports, and forms required under amended §§ 672.5 and 675.5 would be required to be made available for inspection upon the request of an authorized officer.

4. *Weekly reporting periods.* As set out in regulations at §§ 672.2 and 675.2, the current definition of a weekly reporting period is the period from 0001 hours Monday morning until 2359 hours the following Sunday night, Alaska local time (A.l.t.). NMFS has determined that this weekly reporting period does not allow sufficient time to obtain, process, and summarize weekly observer reports in the subsequent week. A reporting period from Sunday-through-Saturday would provide an additional day to process observer data, integrate these data with the WPRs received from the industry, and produce weekly catch reports. Therefore, the definition of the weekly reporting period would be changed to 0001 hours, A.l.t., Sunday morning until 2359 hours, A.l.t., the following Saturday night. The deadline for receipt of WPRs from Motherships, Catcher/Processors, and Shoreside Processors would remain Tuesday at 1200 hours, A.l.t.

5. *Inactive and active periods.* The operator or manager would be required to account for each day of the fishing year by indicating active and inactive periods on the Catcher Vessel DFL, Catcher/Processor DCPL, Mothership DCPL, Buying Station DCL, and Shoreside Processor DCPL. A single logbook page could be used to account for inactive periods of more than one day within a quarter.

6. *CDQ Information.* The DFL, DCL, and DCPL would be used to account for groundfish harvested under the CDQ Program through the addition of questions on those logbooks, as well as on WPRs, DPRs, and Check-in/Check-out reports to indicate CDQ information. The CDQ information would be transferred from the logbook by the manager or operator of a Mothership, Catcher/Processor, or Shoreside Processor to WPRs, DPRs, and Check-in/Check-out reports. This information is needed because CDQ quotas are managed on an individual basis, and because CDQ harvest information must be kept separate from other types of management quotas.

7. *Scientific name for steelhead trout.* The scientific name for steelhead trout would be revised to read, "*Oncorhynchus mykiss*" in §§ 672.20(e) and 675.20(c). The scientific community currently prefers this new term as a more precise description of steelhead trout.

8. *Time.* The time citation "00:01 a.m." in §§ 672.20(a), 675.20(a), 672.23, and 675.23 would be changed to read "0001 hours" to conform with the revised definition of fishing year.

Classification

This proposed rule contains collection-of-information requirements subject to the Paperwork Reduction Act. OMB approval for the majority of this information has been obtained under OMB control numbers 0648–0206 and 0213; additions and revisions to the collection have been submitted to OMB for approval. Additional burden would result from the requirements set forth for the new Buying Station DCL and Check-in/Check-out report, and also from revisions to existing reports.

An estimated additional response time for compliance with these new forms is expected to be between 25 minutes and 2.0 hours annually for the operator or manager of each processor or Buying Station and 27 minutes for each Catcher Vessel operator. The additional annual burden to Shoreside Processors and Buying Stations to comply with requirements for Check-in/Check-out reports is estimated to average about 8 minutes and 6 minutes, respectively, for each Check-in or Check-out report. Revisions to the format of other logbooks and/or additions to information collected by logbooks are minimal and are not anticipated to significantly increase reporting burden to the industry. The requirements include: The U.S. Vessel Activities Report, 15 minutes; Weekly Production Report, 18 minutes; Daily Production Report, 10 minutes; Processor Product Transfer Report, 11 minutes; and the Catcher Vessel Logbook, 15 minutes.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. NMFS proposes to consolidate several sections of regulations in parts 672 and 675 by correcting errors, clarifying vague text, removing outdated requirements, as well as simplifying and streamlining the remaining regulations, including the recordkeeping and reporting requirements. All of the recommended revisions are designed to make the regulations easier for the public to use and to enhance the ability of NMFS to collect more accurate and timely groundfish data and to improve the management of the groundfish fisheries. To the extent that there will be additional burden for the industry, it will be minor when compared with the increased ease of use resulting from clarification, simplification, and streamlining.

Send comments regarding this burden estimate or any other aspect of this collection-of-information, including suggestions for reducing this burden, to NMFS and to OIRA, OMB (see **ADDRESSES**).

This action has been determined to be not significant for purposes of E.O. 12866.

List of Subjects in 50 CFR Parts 672 and 675

Fisheries, Reporting and recordkeeping requirements.

Dated: August 15, 1995.

Gary Matlock,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR parts 672 and 675 are proposed to be amended as follows:

PART 672—GROUNDFISH OF THE GULF OF ALASKA

1. The authority citation for part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

Subpart A—General

2. In § 672.1, paragraph (a) is revised to read as follows:

§ 672.1 Purpose and scope.

(a) Regulations in this part, along with parts 602, 620, 676, and 677 of this chapter, implement the Fishery Management Plan for Groundfish of the Gulf of Alaska.

* * * * *

3. Section 672.2 is revised to read as follows:

§ 672.2 Definitions.

In addition to the definitions in the Magnuson Act and in § 620.2 of this chapter, the terms used in this part have the following meanings:

Active/inactive periods—(1) *Active periods*—(i) *Catcher Vessel.* An active period for a Catcher Vessel means a period of time when the Catcher Vessel is in a reporting area (except 300, 400, 550, or 690) or gear remains on the grounds in a reporting area (except 300, 400, 550, or 690) regardless of the vessel location.

(ii) *Shoreside Processor, Mothership, Catcher/Processor, and Buying Station.* An active period for a Shoreside Processor, Mothership, Catcher/Processor, and Buying Station means a period of time when checked-in.

(2) *Inactive periods*—(i) *Catcher Vessel.* An inactive period for a Catcher Vessel means any period which does not qualify as an active period.

(ii) *Shoreside Processor, Mothership, Catcher/Processor, or Buying Station.* An inactive period for a Shoreside Processor, Mothership, Catcher/Processor, or Buying Station means a period of time when not checked-in.

ADF&G means the State of Alaska Department of Fish and Game.

Alaska local time (A.l.t.) means the current Alaska time, either daylight savings time or standard time.

Alaska State waters means waters shoreward of the exclusive economic zone (EEZ) off Alaska.

Aleutian Islands Subarea (AI) of the BSAI means that portion of the EEZ contained in Statistical Areas 541, 542, and 543 (see Figure 1 of this part).

Authorized fishing gear means hook-and-line, jig, longline, longline pot, nonpelagic trawl, nontrawl, pelagic trawl, pot-and-line, and trawl; defined as follows:

(1) *Hook-and-line* means a stationary, buoyed, and anchored line with hooks attached, or the taking of fish by means of such a device;

(2) *Jig* means a single non-buoyed, non-anchored line with hooks attached, or the taking of fish by means of such a device;

(3) *Longline* means a stationary, buoyed, and anchored line with hooks or two or more groundfish pots attached, or the taking of fish by means of such a device (see § 672.24(b) or § 675.24(b) of this chapter);

(4) *Longline pot* means a stationary, buoyed, and anchored line with two or more pots attached, or the taking of fish by means of such a device;

(5) *Nonpelagic trawl* means a trawl other than a pelagic trawl;

(6) *Nontrawl* means hook-and-line, jig, longline, and pot-and-line gear;

(7) *Pelagic trawl* means a trawl that:

(i) Has no discs, bobbins, or rollers;

(ii) Has no chafe protection gear attached to the foot rope or fishing line;

(iii) Except for the small mesh allowed under paragraph (7)(ix) of this definition:

(A) Has no mesh tied to the fishing line, head rope, and breast lines with less than 20 inches (50.8 cm) between knots, and has no stretched mesh size of less than 60 inches (152.4 cm) aft from all points on the fishing line, head rope, and breast lines and extending past the fishing circle for a distance equal to or greater than one half the vessel's length overall; or

(B) Has no parallel lines spaced closer than 64 inches (162.6 cm), from all points on the fishing line, head rope, and breast lines and extending aft to a section of mesh, with no stretched mesh size of less than 60 inches (152.4 cm), extending aft for a distance equal to or greater than one half the vessel's length overall;

(iv) Has no stretched mesh size less than 15 inches (38.1 cm) aft of the mesh described in paragraph (7)(iii) of this definition for a distance equal to or greater than one half the vessel's length overall;

(v) Contains no configuration intended to reduce the stretched mesh sizes described in paragraphs (7)(iii) and (iv) of this definition;

(vi) Has no flotation other than floats capable of providing up to 200 lb (90.7 kg) of buoyancy to accommodate the use of a net-sounder device;

(vii) Has no more than one fishing line and one foot rope for a total of no more than two weighted lines on the bottom of the trawl between the wing tip and the fishing circle;

(viii) Has no metallic component except for connectors (e.g., hammerlocks or swivels) or net-sounder device aft of the fishing circle and forward of any mesh greater than 5.5 inches (14.0 cm) stretched measure;

(ix) May have small mesh within 32 ft (9.8 m) of the center of the head rope as needed for attaching instrumentation (e.g., net-sounder device); and

(x) May have weights on the wing tips;

(8) *Pot-and-line* means a stationary, buoyed line with a single pot attached, or the taking of fish by means of such a device; and

(9) *Trawl* means a conical-shaped net that is towed through the water for catching fish or other organisms. The net accumulates its catch in the closed, small end (usually called the cod end). This definition includes, but is not limited to, Danish and Scottish seines and otter trawls.

Bering Sea and Aleutian Islands Management Area (BSAI) means the Bering Sea and Aleutian Islands subareas (see Figure 1 of this part).

Bering Sea Subarea (BS) of the BSAI means that portion of the EEZ contained in Statistical Areas 508, 509, 512, 513, 514, 516, 517, 518, 519, 521, 523, 524, and 530 (see Figure 1 of this part).

Bogoslof District means that part of the Bering Sea Subarea contained in Statistical Area 518 (see Figure 1 of this part).

Breast line means the rope or wire running along the forward edges of the side panels of a net, or along the forward edge of the side rope in a rope trawl.

Buying Station means a person or vessel that receives unprocessed groundfish from a vessel for delivery at a different location to a Shoreside Processor or Mothership and that does not process those fish.

Bycatch Limitation Zone 1 (Zone 1) means that part of the Bering Sea Subarea that is contained within the boundaries of Statistical Areas 508, 509, 512, and 516 (see Figure 1 of this part).

Bycatch Limitation Zone 2 (Zone 2) means that part of the Bering Sea Subarea that is contained within the boundaries of Statistical Areas 513, 517, and 521 (see Figure 1 of this part).

Catcher/Processor means a vessel that is used for catching fish and processing that fish.

Catcher Vessel means a vessel that is used for catching fish and that does not process on board.

Catcher Vessel Operational Area (CVOA) (see Figure 2 of this part and § 675.22(g) of this chapter).

Central Aleutian District means that part of the Aleutian Islands Subarea contained in Statistical Area 542 (see Figure 1 of this part).

Community Development Plan (CDP) (applicable through December 31, 1995) means a plan for a specific Western Alaska community or group of communities approved by the Governor of the State of Alaska and recommended to NMFS under § 675.27 of this chapter.

Community Development Quota (CDQ) (applicable through December 31, 1995) means a Western Alaska community development quota for pollock assigned to an approved CDP. All CDQs, in the aggregate, equal one-half of 15 percent of the total allowable catch specified for pollock that is placed in reserve under § 675.20(a)(3) of this chapter.

Community Development Quota Program (CDQ program) (applicable through December 31, 1995) means the Western Alaska Community

Development Program implemented under § 675.27 of this chapter.

Community Development Quota Reserve (CDQ reserve) (applicable through December 31, 1995) means one-half of 15 percent of the total allowable catch specified for pollock in each subarea or district that is placed in reserve under § 675.20(a)(3) of this chapter.

Daily reporting period or day is the period from midnight until the following midnight using Alaska local time (A.l.t.).

Directed fishing means any fishing activity that results in the retention of an amount of a species or species group on board a vessel that is greater than the maximum retainable by catch amount for that species or species group as calculated under § 672.20 (g) and (h) and § 675.20 (h) and (i) of this chapter.

Donut Hole means international waters of the Bering Sea outside the limits of the EEZ and Russian economic zone as depicted on the current edition of NOAA chart INT 813 Bering Sea (Southern Part).

Eastern Aleutian District means that part of the Aleutian Islands Subarea contained in Statistical Area 541 (see Figure 1 of this part).

Exclusive Economic Zone (EEZ) (see § 620.2 of this chapter).

Federal waters means waters within the EEZ off Alaska.

Fish product weight means the weight of the fish product in pounds or to at least the nearest hundredth of a metric ton (0.01 mt). Fish product weight is based upon the number of production units and the weight of those units. Production units include pans, cartons, blocks, trays, cans, bags, and individual fresh or frozen fish. The weight of a production unit is the average weight of representative samples of the product, and may include additives but not packaging. Any allowance for water added cannot exceed 5 percent of the gross product weight (fish, additives, and water).

Fishing activity (see definition for fishing in § 620.2 of this chapter).

Fishing circle means the circumference of a trawl intersecting the center point on a fishing line, and that is perpendicular to the long axis of a trawl.

Fishing day (see part 676 of this chapter).

Fishing line means a length of chain or wire rope in the bottom front end of a trawl to which the webbing or lead ropes are attached.

Fishing month (see § 672.26 or § 675.26 of this chapter).

Fishing trip: (1) For purposes of directed fishing calculations, see § 672.20(h)(2) and § 675.20(i)(2) of this chapter.

(2) For purposes of pollock roe retention, see § 672.20(i)(4) and § 675.20(j)(5) of this chapter.

Fishing year means the period of time beginning at 0001 hours, A.l.t., on January 1 and ending at 2359 hours, A.l.t., on December 31 (see § 672.23(a) and § 675.23(a) of this chapter).

Foot rope means a chain or wire rope attached to the bottom front end of a trawl and attached to the fishing line.

Gear Deployment: (1) *For trawl gear* means where the trawl gear reaches the fishing level and begins to fish.

(2) *For jig/troll, hook-and-line, or longline gear* means where the gear enters the water.

(3) *For pot-and-line gear* means where the first pot enters the water.

Gear Retrieval—(1) *For trawl gear*, gear retrieval means where retrieval of trawl cable commences.

(2) *For jig/troll gear*, gear retrieval means where the jig/troll gear leaves the water.

(3) *For hook-and-line or longline pot gear*, gear retrieval means where the last hook-and-line or longline pot gear of a set leaves the water, regardless of where the majority of the haul or set took place.

(4) *For pot-and-line gear*, gear retrieval means where the last pot of a set leaves the water.

Governor means the Governor of the State of Alaska.

Groundfish means target species and the "other species" category, specified annually pursuant to § 672.20(a)(1) or § 675.20(a)(1) of this chapter.

Gulf of Alaska (GOA) means that portion of the EEZ contained in Statistical Areas 610, 620, 630, 640, and 650 (see Figure 3 of this part).

Head rope means a rope bordering the top front end of a trawl.

Herring Savings Area means any of three areas in the BSAI presented in Figure 4 of this part (see also § 675.21(c)(2) of this chapter for additional closure information):

Inshore component (applicable through December 31, 1995) means that part of the U.S. groundfish fishery off Alaska that includes:

(1) All shoreside processing operations;

(2) All processor vessels that process, on a daily average during any weekly reporting period, less than 18 mt of Pacific cod harvested in the GOA and pollock in aggregate round weight equivalents, and are less than 125 ft (38.1 m) in length overall; and

(3) All processor vessels in Alaska State waters (waters adjacent to the State of Alaska and shoreward of the EEZ) that process, at a single geographic location during a fishing year, pollock harvested in a directed fishery for pollock, or Pacific cod harvested in a directed fishery for Pacific cod in the GOA, and that submit a Check-in notice and weekly production report as required at § 672.5(c). For purposes of this definition, a single geographic location will be determined by the geographic coordinates reported on a Check-in report submitted by the vessel operator when that vessel engages in a directed fishery for Pacific cod in the GOA or pollock for the first time in a fishing year.

IPHC means International Pacific Halibut Commission (see part 301 of this title).

Joint venture processing (JVP) (see § 611.2 of this chapter).

Landing means off-loading fish.

Length overall (LOA) of a vessel means the horizontal distance, rounded to the nearest foot, between the foremost part of the stem and the aftermost part of the stern, excluding bowsprits, rudders, outboard motor brackets, and similar fittings or attachments (see Figure 6 of this part).

Logbook means Daily Cumulative Production Logbook (DCPL), Daily Cumulative Logbook (DCL), or a Daily Fishing Logbook (DFL) required by § 672.5.

Manager, with respect to any Shoreside Processor or Buying Station, means the individual responsible for the operation of the Shoreside Processor operation or Buying Station.

Maximum sustainable yield (MSY) (see part 602 of this chapter).

Mothership means a vessel that receives and processes groundfish from other vessels.

Net-sounder device means a sensor used to determine the depth from the water surface at which a fishing net is operating.

nm means nautical mile.

Non-allocated or nonspecified species means those fish species, other than prohibited species, for which a TAC has not been specified (e.g., grenadier, prowfish, lingcod).

Observer means any person certified under the NMFS Observer Plan (see part 676 of this chapter).

Offshore component (applicable through December 31, 1995) means all processor vessels in the U.S. groundfish fisheries off Alaska not included in the definition of "inshore component."

Optimum yield (OY) (see § 672.20 and § 675.20 of this chapter).

"Other species" is a category that consists of groundfish species in each management area that are not specified as target species (see § 672.20 and § 675.20 of this chapter).

Processing, or to process, means the preparation of fish to render it suitable for human consumption, industrial uses, or long-term storage, including but not limited to cooking, canning, smoking, salting, drying, freezing, or rendering into meal or oil, but does not mean icing, bleeding, heading, or gutting.

Processor vessel means, unless otherwise restricted, any vessel that has been issued a Federal fisheries permit and that can be used for processing groundfish.

Quarter or quarterly reporting period means one of four successive 3-month periods during a calendar year, which begin at 0001 hours, A.l.t., on the first day of each quarter, and end at 2359 hours, A.l.t., on the last day of each quarter. The four quarters for each year are specified as follows:

1st quarter:January 1 through March 31
2nd quarter:April 1 through June 30
3rd quarter:July 1 through September 30
4th quarter:October 1 through December 31

Regional Director means Director, Alaska Region, National Marine Fisheries Service.

Regulatory area means any of three areas of the EEZ in the GOA (see Figure 3 of this part) described as follows:

(1) *Eastern Regulatory Area* means Statistical Areas 640 and 650.

(2) *Central Regulatory Area* means Statistical Areas 620 and 630.

(3) *Western Regulatory Area* means Statistical Area 610.

Reporting area means any of the areas described in Figures 1 and 3 of this part.

Resident fisherman (see § 675.27(d)(7) of this chapter).

Round-weight equivalent means the weight of fish calculated by dividing the weight of the primary product made from that fish by the standard product recovery rate for that primary product as listed in § 672.20(j), or, if not listed, the weight of fish calculated by dividing the weight of a primary product by the standard product recovery rate as determined using the best available evidence on a case-by-case basis.

Set means a string of pots or hook-and-line gear or a group of pots that are deployed in a similar location with similar soak time.

Shoreside Processor or shoreside processing operation, means any person or vessel that receives unprocessed groundfish, except Catcher/Processors, Motherships, Buying Stations, restaurants, or persons receiving groundfish for use as bait or personal consumption.

Southeast Outside District of the GOA means that part of the Eastern Regulatory Area contained in Statistical Area 650 (see Figure 3 of this part).

Statistical area means the part of any reporting area defined in Figures 1 and 3 of this part, contained in the EEZ.

Steller Sea Lion Protection Areas (for BSAI, see Tables 4 and 5 of this part, § 672.24(e), § 227.12 of this title, and § 675.24(f) of this chapter); for GOA, see Table 6 of this part).

Stem means the foremost position of a vessel; a section of timber or cast, forged or rolled metal to which the sides of a vessel are united at the fore end with the lower end scarfed to the keel and the bowsprit, if one is present, resting on the upper end.

Stern means the aftermost part of the vessel.

Stretched mesh size means the distance between opposite knots of a four-sided mesh when opposite knots are pulled tautly to remove slack.

Support vessel means any vessel that is used in support of other vessels regulated under this part and part 675 of this chapter, including, but not limited to, supplying a fishing vessel with water, fuel, provisions, fishing equipment, fish processing equipment or other supplies, or transporting processed fish. The term "support vessel" does not include processor vessels or tender vessels.

Target species are those species or species groups, except the "other species" category, for which a TAC is specified pursuant to § 672.20(a) and § 675.20(a) of this chapter.

Tender Vessel means a vessel that is used to transport unprocessed fish received from another vessel to a Shoreside Processor, Mothership, or Buying Station.

Total allowable catch (TAC) (see § 672.20(a)(2) and § 675.20(a)(2) of this chapter).

Transfer includes any loading, offloading, shipment or receipt of any groundfish product, including quantities transferred inside or outside the EEZ, within any state's territorial waters, within the internal waters of any state, at any Shoreside Processor, or any offsite meal reduction plant.

Trawl test areas (see Figure 7 of this part and § 672.24(f) and § 675.24(g) of this chapter).

Vessel Activity Report (VAR) (see § 672.5(c)(5)).

Vessel operations category (see § 672.4).

Walrus Protection Areas (see § 675.22(f) of this chapter).

Weekly reporting period means a time period, which begins at 0001 hours, A.l.t., Sunday morning (except during the first week of each year, when it starts on January 1) and ends at 2359 hours, A.l.t., the following Saturday night (except during the last week of each year when it ends on December 31).

West Yakutat District of the GOA means that part of the Eastern Regulatory Area of the GOA contained in Statistical Area 640 (see Figure 3 of this part).

Western Aleutian District means that part of the Aleutian Islands Subarea contained in Statistical Area 543 (see Figure 1 of this part).

Wing tip means the point where adjacent breast lines intersect or where a breast line intersects with the fishing line.

4. In § 672.3, paragraphs (a) and (c) are revised to read as follows:

§ 672.3 Relation to other laws.

(a) *Foreign fishing*. Regulations governing foreign fishing for groundfish in the GOA are set forth at § 611.92 of this chapter. Regulations governing foreign fishing for groundfish in the BSAI are set forth at § 611.93 of this chapter. Regulations governing U.S. nationals fishing in the Russian fisheries are set forth in part 299 of this title.

* * * * *

(c) *Domestic fishing for groundfish*. Regulations governing the conservation and management of groundfish in the GOA for vessels of the United States are set forth at this part and parts 620, 676, and 677 of this chapter. Regulations governing the conservation and management of groundfish in the BSAI are set forth in this part and parts 620, 675, 676, and 677 of this chapter.

* * * * *

5. Section 672.4 is revised to read as follows:

§ 672.4 Fisheries permit.

(a) *General*. (1) No vessel of the United States may be used to fish for groundfish in the GOA or in the BSAI unless the owner first obtains a Federal fisheries permit for the vessel issued under this part, except as provided in paragraph (a)(2) of this section. A Federal fisheries permit is effective only until December 31 of the year in which it is issued. Fisheries permits are issued without charge.

(2) Vessels of the United States that fish in the GOA or BSAI for any non-groundfish species, including but not limited to, halibut, crab, salmon, scallops, and herring, and that do not retain any bycatch of groundfish are not required to obtain a Federal fisheries permit issued under this part.

(b) *Federal Fisheries Permit Application*—([illegible] *Rec* [illegible]

application and permit. A person may obtain an application for a Federal fisheries permit required under paragraph (a) of this section from: National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802–1668, fax number: 907–586–7465.

(2) *Completed application.* (i) A person may obtain the Federal fisheries permit required under paragraph (a) of this section by submitting a written permit application to the address given in paragraph (b)(1) of this section.

(ii) The owner or operator of a vessel must answer each question on the permit application in the manner set forth in paragraph (c) of this section.

(iii) The owner or operator must mail completed forms to the address given in paragraph (b)(1) of this section or fax completed forms to: (907)586–7313.

(iv) The owner or operator must complete a separate application for each vessel or processor and must retain a copy of each completed or revised application.

(v) The owner or operator must type or print legibly the information requested on the application.

(3) *Application deficiency.* Upon receipt of an incomplete or improperly completed fisheries permit application, the Regional Director will notify the applicant of the deficiency in the permit application. If the applicant fails to correct the deficiency, the permit will not be issued. No permit will be issued to an applicant until a complete application is received.

(c) *Permit application contents.* The owner or operator must record:

(1) If application is for an amended permit, the current Federal Fisheries Permit number and information that has changed.

(2) If for a vessel, the complete name and homeport (city and state) of the vessel; the ADF&G vessel number; the U.S. Coast Guard documentation number or Alaska registration number; the vessel's length overall and registered net tonnage; and the telephone, fax, and COMSAT (satellite communication) numbers used on board the vessel.

(3) *Shoreside processor information.* If a shoreside processor, refer to § 677.4(b) of this chapter.

(4) *Owner information.* The owner of the vessel or shoreside processor must record the owner's name, permanent business mailing address, telephone and fax numbers; and the name of any company (other than the owner) that manages the operations of the vessel or shoreside processor.

(5) *Federal fisheries permit information.* The owner must record:

(i) The fishery or fisheries and the vessel operations category for which the permit would apply as set forth under paragraph (e) of this section and § 672.2;

(ii) If a Catcher Vessel or Catcher/Processor, the gear type(s) used for groundfish operations;

(iii) If a Catcher Vessel, whether groundfish is retained only as bycatch from halibut, crab, or salmon fisheries; and whether sablefish (black cod) is the only groundfish targeted in the GOA.

(6) *Signature.* The owner must sign and date the application.

(d) *Fisheries permit issuance.* (1) Except as provided in subpart D of 15 CFR part 904, upon receipt of a properly completed permit application, the Regional Director will issue a fisheries permit required by paragraph (a) of this section.

(2) The Regional Director will send the fisheries permit to the applicant along with the appropriate logbooks as provided under § 672.5.

(e) *Vessel operations category.* (1) A fisheries permit issued under paragraph (d)(1) of this section authorizes a vessel to conduct operations as a Catcher Vessel, Catcher/Processor, Mothership, Tender Vessel, or Support Vessel.

(2) A vessel may be issued a fisheries permit as a support vessel or as any combination of the other four categories (Catcher Vessel, Catcher/Processor, Mothership, Tender Vessel). A vessel permitted as a Catcher Vessel, Catcher/Processor, Mothership, or Tender Vessel may also conduct all operations authorized for a support vessel.

(f) *Amended permit.* (1) An owner or operator who applied for and received a fisheries permit under this section must notify the Regional Director, in writing, of any change in the information provided under paragraph (c) of this section within 10 days of the date of that change.

(2) An application for an amended permit must be made on the permit application as set forth in paragraph (c) of this section.

(3) If the application is for an amended fisheries permit required under paragraph (a) of this section and designates a change or addition of a vessel operations category, the amended permit must be on board the vessel before the new type of operations begins.

(g) *Duration.* (1) A fisheries permit remains in effect through December 31 of the year for which it is issued unless it is revoked, suspended, or modified under 15 CFR part 904 (Civil Procedures), or unless it is surrendered or invalidated.

(2) A fisheries permit is surrendered when the original permit is submitted to and received by NMFS Enforcement Office in Juneau.

(h) *Alteration.* No person may alter, erase, or mutilate any fisheries permit issued under paragraph (a) of this section. Any fisheries permit that is intentionally altered, erased, or mutilated is invalid.

(i) *Transfer.* A Fisheries permit issued under paragraph (a) of this section is not transferable or assignable and is valid only for the vessel for which it is issued.

(j) *Inspection.* (1) An original fisheries permit issued under paragraph (a) of this section must be carried on board the vessel whenever the vessel is fishing. Photocopied or faxed copies are not considered originals.

(2) A permit issued under paragraph (a) of this section must be presented for inspection upon the request of any authorized officer.

(k) *Sanctions.* Procedures governing permit sanctions and denials are found at subpart D of 15 CFR part 904.

(l) *Condition.* No person may use a vessel for which the Regional Director has issued a permit under paragraph (a) of this section to fish in the Donut Hole, or to possess fish in the EEZ that were caught in the Donut Hole, during the fishing year for which the permit is issued.

(m) *Moratorium permit.* In addition to the Federal fisheries permit required by paragraph (a) of this section and any other permits that may be required by Federal or Alaska state regulations, a moratorium permit may be required by part 676 of this chapter for a vessel of the United States if the vessel is used to conduct directed fishing for moratorium groundfish species, as defined at § 676.2 of this chapter, in the Gulf of Alaska or Bering Sea and Aleutian Islands management area.

6. Section 672.5 is revised to read as follows:

§ 672.5 Recordkeeping and reporting.

(a) *Applicability and general requirements*—(1) *Applicability.* (i) Except as otherwise provided, this section applies to:

(A) Any Catcher Vessel, Mothership, Catcher/Processor, or Tender Vessel, 5 net tons or larger, which is required to have a fisheries permit under § 672.4; and

(B) Any Shoreside Processor, Mothership, or Buying Station that receives groundfish from vessels required to have a fisheries permit under § 672.4.

(ii) A Shoreside Processor, Mothership, or Buying Station subject to recordkeeping and reporting requirements must report all groundfish and prohibited species received, including:

(A) Fish received from vessels not required to have a fisheries permit;

(B) Fish received under contract for handling or processing for another processor.

(2) *Responsibility.* The operator of a Catcher Vessel, Catcher/Processor, Mothership, or Buying Station delivering to a Mothership (hereafter referred to as the operator) and the manager of a Shoreside Processor or Buying Station delivering to a Shoreside Processor (hereafter referred to as the manager) are each responsible for compliance with the applicable recordkeeping and reporting requirements of this section. In addition, the owner of a vessel, Shoreside Processor, or Buying Station must ensure that the operator, manager, or designated representative (see paragraph (b) of this section) complies with these requirements and is responsible for compliance.

(3) *Groundfish logbooks and forms.* The Regional Director will prescribe and provide logbooks and forms required under this section as shown in Table 9 of this part. The operator or manager must use these logbooks and forms or obtain approval from the Regional Director to use electronic versions of the logbooks and forms.

(4) *Participant identification information.* The operator or manager must record on all required records, reports, and logbooks:

(i) The name of the Catcher Vessel, Catcher/Processor, Mothership, Shoreside Processor, or Buying Station as displayed in official documentation;

(ii) If a vessel, the Federal Fisheries Permit number and ADF&G vessel number (if applicable);

(iii) If a processor, the Federal Processor Permit number and ADF&G processor number;

(iv) If a Buying Station, the name and ADF&G vessel number (if applicable) of the Buying Station; the name, ADF&G processor number, and Federal Processor Permit number of associated processor;

(v) If a Shoreside Processor or land-based Buying Station, the geographic location of operations.

(5) *Representative identification.* The name, daytime business telephone number (including area code), fax or TELEX number, and the COMSAT number (if applicable) of the representative;

(6) *Maintenance of records*—(i) *General.* The operator or manager must maintain all records, reports, and logbooks in a legible, timely, and accurate manner; in English; if handwritten, in indelible ink; if computer-generated, a printed, paper copy; and based on Alaska local time.

(ii) When applicable, the operator or manager must record in each report, form, and logbook the following information:

(A) *Page number.* Number the pages in each logbook consecutively, beginning with page one and continuing throughout the logbook for the remainder of the fishing year, except that the manager of a Shoreside Processor must number the DCPL pages within Part I and Part II separately beginning with page one, etc.;

(B) *Date,* presented as month-day-year;

(C) *Time,* in military format to the nearest hour, A.l.t.;

(D) *Position Coordinates,* latitude and longitude to the nearest second;

(E) *Reporting Area codes,* given in Figures 1 and 3 of this part;

(F) *Species codes,* each target species, the "other species" category, and prohibited species (see §§ 672.20(e) and 675.20(c) of this chapter), using the species codes given in Table 2 of this part;

(G) *Original/Revised Report.* If a report is the first one submitted to the Regional Director for a given date, gear type, and reporting area, "ORIGINAL REPORT". If report is a correction to a previously submitted report for a given date, gear type, and reporting area, "REVISED REPORT";

(H) *Metric tons.* The required weight units used to record amounts of landings, product, and discards of groundfish and herring must be recorded in pounds (lb) or to the nearest 0.01 mt on all forms and logbooks.

(7) *Active and inactive periods.* The operator or manager must, in the DFL, DCL, or DCPL:

(i) Account for each day of the fishing year by indicating active and inactive periods, as defined in § 672.2;

(ii) Use a separate logbook page for each day of an active period;

(iii) Indicate on one page the first and last day of an inactive period;

(iv) *Fishing activity.* The operator or manager must indicate all fishing activity, which is defined as follows:

(A) If a Catcher Vessel, harvest or discard of groundfish;

(B) If a Catcher/Processor, harvest, discard, or processing of groundfish;

(C) If a Mothership or Shoreside Processor, receipt, discard, or processing of groundfish;

(D) If a Buying Station, receipt, discard, or delivery of groundfish;

(v) If in an active period and there is fishing activity, the operator or manager must record:

(A) The gear type used to harvest the groundfish. If a Catcher Vessel or Catcher/Processor and using hook-and-line longline gear, the average number of hooks per skate;

(B) The reporting area code where gear retrieval was completed; whether gear retrieval was in Federal or Alaska State waters;

(C) If a Catcher Vessel, whether a NMFS-certified observer is on board the vessel. If a Catcher/Processor, Mothership, or Shoreside Processor, the number of NMFS-certified observers on board or on site;

(D) The number of crew, except certified observer;

(E) Whether harvest is under a CDQ program; if yes, the CDQ number;

(F) If a Catcher Vessel or Buying Station, the name and ADF&G processor number of the Mothership or Shoreside Processor to which groundfish deliveries were made;

(vi) If in an active period and there is no harvesting, discard, receipt, or processing of groundfish, the operator or manager must indicate "NO FISHING ACTIVITY" and briefly describe the reason.

(8) *Landings information.* The manager of a Shoreside Processor must:

(i) Record and report groundfish landings by species codes and product codes as defined in Tables 1 and 2 of this part for each reporting area, whether in Alaska State waters or Federal waters, gear type, and CDQ number;

(ii) Record in the DCPL each day on the day such landings occur, the following additional information:

(A) The daily combined scale weight of landings retained for processing from a Catcher Vessel or any associated Buying Station, in pounds or to at least the nearest 0.01 mt;

(B) If more than one page is used during a weekly reporting period, the total amount of landings carried forward from the previous page;

(C) At the end of each weekly reporting period, the cumulative total weight, calculated by adding the daily totals and total carried forward for that week;

(iii) Summarize the DCPL for each weekly reporting period on a WPR or for each day on a DPR (if applicable). If there were no landings during a reporting period, write "NO LANDINGS" on the first row of the WPR landings section or under the DPR landings column for that day.

(9) *Product information.* The operator or manager of a Catcher/Processor, Mothership, or Shoreside Processor must, where required:

(i) Record and report groundfish products by species codes, product codes, and product designations as defined in Tables 1 and 2 of this part for each reporting area, whether in Alaska State waters or Federal waters, gear type, and CDQ number;

(ii) Record in the DCPL each day on the day such production occurs, the daily total, balance brought forward (except for Shoreside Processor), and cumulative total fish product weight (see § 672.2) for each product of groundfish in pounds or to at least the nearest 0.01 mt;

(iii) Summarize the DCPL for each weekly reporting period on a WPR or for each day on a DPR (if applicable). If there was no production during a weekly reporting period, indicate "NO PRODUCTION" on the first row of the WPR production section or under the DPR products column for that day.

(10) *Discarded/donated species information.* The manager or operator must, where required:

(i) Record and report discards and donations by species codes and discard product codes as defined in Tables 1 and 2 of this part for each reporting area, whether in Alaska State waters or Federal waters, gear type, and CDQ number;

(ii) Record the estimated daily total, balance brought forward, and cumulative total round fish weight in the DFL, DCL, or DCPL each day on the day such discards occur for each discard of groundfish species, groundfish species groups, and Pacific herring in pounds or to at least the nearest 0.01 mt;

(iii) Record the estimated daily total, balance brought forward, and cumulative total numbers in the DFL, DCL, or DCPL each day on the day such discards occur for each discard of Pacific salmon, steelhead trout, Pacific halibut, king crab, and Tanner crab;

(iv) Summarize the DCPL for each weekly reporting period on a WPR or for each day on a DPR (if applicable). If there were no discards during a reporting period, write "NO DISCARDS" on the first row of the WPR discard section or under the DPR discard column for that day.

(v) *Catcher Vessel discards/donations.* (A) The operator must record in the DFL discards that occur prior to and during harvest and must submit the blue DFL logsheets (discards copy) to the Buying Station, Mothership, or Shoreside Processor receiving the harvest at the end of the weekly reporting period;

(B) If a Catcher Vessel discards fish from an unsorted codend prior to delivery to a processor, the operator of the vessel must estimate and record in the DFL the amount and species composition of the discards made at sea (discard code 98);

(vi) *Buying Station discards/donations.* (A) The operator or manager must record in the DCL on a daily basis on the day such discard occurs, all discards that occur after receipt of harvest from a Catcher Vessel and prior to delivery to a Mothership or Shoreside Processor;

(B) If a blue DFL logsheet is received from a Catcher Vessel and contains reports of discards, the operator or manager must record in the DCL the discards on the day the DFL logsheet is received from the Catcher Vessel;

(vii) *Catcher/Processor discards/donations.* The operator must record in the DCPL on the day such discard occurs all discards that occur prior to harvest, during harvest, and during processing;

(viii) *Mothership or Shoreside Processor discards/donations.* (A) The operator or manager must record into the DCPL on a daily basis on the day such discard occurs, all discards that occur on site after receipt of groundfish, and all discards that occur during processing of groundfish;

(B) If a blue DFL logsheet is received from a Catcher Vessel and discards are reported, the operator or manager must record in the DCPL the discards on the day the DFL logsheet is received from the Catcher Vessel;

(C) If a yellow DCL logsheet is received from a Buying Station and discards are reported, the operator or manager must record in the DCPL the discards on the day the DCL logsheet is received from the Buying Station;

(11) *Contract processing.* (i) The manager of a Shoreside Processor or operator of a Mothership who receives groundfish to be handled or processed under contract for another processor or business entity must report these fish to the Regional Director consistently throughout a fishing year using one of two methods:

(A) Record landings (if applicable), discards, and products of contract-processed groundfish routinely in the DCPL without separate identification; or

(B) Record landings (if applicable), discards, and products of contract-processed groundfish in a separate DCPL identified by the name, Federal Processor permit number, Federal Fisheries permit number (if applicable), and ADF&G Processor code of the associated business entity;

(ii) If contract-processed groundfish records are kept separate from the routine DCPL, the operator or manager of the Mothership or Shoreside Processor must summarize and report that information on a WPR identified by the name, Federal Processor permit number, Federal Fisheries permit number (if applicable), and ADF&G Processor code of the associated business entity.

(12) *Alteration of records.* (i) The operator, manager, or any other person may not alter or change any entry or record in a logbook except that an inaccurate or incorrect entry or record may be corrected by lining out the original and inserting the correction, provided that the original entry or record remains legible.

(ii) No person except an authorized officer may remove any original page of any logbook.

(13) *Inspection of records.* The operator or manager of a Catcher Vessel, Catcher/Processor, Mothership, or Shoreside Processor, must make all logbooks, reports, and forms required under paragraph (a)(3) of this section available for inspection upon the request of an authorized officer.

(14) *Submittal of logbooks, reports and forms*—(i) *Quarterly submittal of logbook.* (A) The operator of a Catcher Vessel, Catcher/Processor, Mothership, or the manager of a Shoreside Processor must submit the yellow logsheets on a quarterly basis to: NMFS Alaska Fisheries Science Center, Logbook Program, 7600 Sand Point Way NE, Building 4, Seattle, WA 98115.

(B) The operator or manager must submit the yellow logsheets as follows: First quarter, by May 1 of that year; second quarter, by August 1 of that year; third quarter, by November 1 of that year; and fourth quarter, by February 1 of the following year.

(ii) *Submittal of reports and forms.* Reports and forms may be submitted by the operator or manager by:

(A) Using the NMFS printed form and faxing it to the fax number on the form; or

(B) Transmitting a data file with required information and forms to NMFS by modem or satellite (specifically INMARSAT standards A, B, or C).

(15) *Record retention*—(i) *Original copy.* (A) The operator of a Catcher Vessel, Catcher/Processor, or Mothership and the manager of a Shoreside Processor must retain the original (white) copy of all logbooks and a paper copy of all reports and forms, including those reports and forms that were originally submitted electronically:

(*1*) On site until the end of the fishing year during which the records were made and for as long thereafter as fish or fish products recorded in the logbook, reports, and forms are retained;

(*2*) For 3 years after the end of the fishing year during which the records were made;

(B) The operator or manager of a Buying Station must retain the original (white) copy of all DCLs required under paragraph (a)(2) of this section on site until the Buying Station has concluded receiving groundfish for a Shoreside Processor or Mothership and for as long as fish and fish products recorded in the DCL are retained by the Buying Station;

(ii) *Yellow DCL logsheet.* When the operator of a Mothership or the manager of a Shoreside Processor submits on a quarterly basis to NMFS, the yellow DCL logsheets received from associated Buying Stations per paragraph (a)(14) of this section, the operator or manager must retain a photocopy of the yellow DCL logsheets until the original DCL is received from the associated Buying Station operator or manager.

(iii) *Blue DFL logsheet.* The operator of a Mothership and the manager of a Shoreside Processor must retain the blue DFL logsheets (discard reports) through the last day of the fishing year during which the records were made.

(iv) *Pink DCL logsheet.* The operator or manager of a Buying Station must retain the pink DCL logsheets for 3 years after the end of the fishing year during which the records were made.

(16) *Integration of Buying Station records.* (i) The operator or manager of a Buying Station must maintain a separate DCL for each Shoreside Processor or Mothership to which the Buying Station delivers groundfish during a fishing year.

(ii) The operator or manager of a Buying Station must submit upon delivery of catch, the yellow DCL logsheets, to the Shoreside Processor or Mothership to which it delivers groundfish, along with the blue DFL logsheets and ADF&G fish tickets or catch receipts for that delivery.

(iii) Upon conclusion of receiving groundfish for a Shoreside Processor or Mothership, the Buying Station operator or manager must submit the original DCL to the Shoreside Processor manager or Mothership operator to which deliveries were made.

(iv) If the Mothership operator or the Shoreside Processor manager receives fish from a Buying Station, the operator or manager must incorporate all of the DCL information into the DCPL.

(b) *Designated representative.* The operator or manager of a Catcher Vessel, Mothership, Catcher/Processor, Shoreside Processor or Buying Station must identify one person to fill out and sign the logbook, complete the recordkeeping and reporting forms, or both, and to identify who will be the contact person for inquiries from NMFS. Designation of a representative under this paragraph does not relieve the owner, operator, or manager of responsibility for compliance with this part.

(c) *Catcher Vessel DFL and Catcher/Processor DCPL*—(1) Requirement. (i) The operator of each Catcher Vessel or Catcher/Processor subject to this part must:

(A) Answer each question on the DFL or DCPL in the manner set forth under paragraphs (c) (3) through (7) of this section; and

(B) Submit the DFL or DCPL in the manner set forth under paragraphs (c)(2) and (a)(14), respectively, of this section.

(ii) *Pair trawl.* If two Catcher Vessels are dragging a trawl between them (pair trawl), a separate DFL must be maintained by each of the vessels. Each vessel operator must log the amount of the catch retained by that vessel and any fish discarded by the vessel.

(2) *Time limit and submittal.* (i) The operator must record in the DFL or DCPL, the time, position, and estimated groundfish catch weight within 2 hours after gear retrieval;

(ii) The operator must record all other information required in the DFL or DCPL by noon of the day following gear retrieval if a Catcher Vessel or by noon of the day following completion of production if a Catcher/Processor;

(iii) The operator of a Catcher Vessel must submit the blue DFL logsheets with delivery of the harvest to the operator or manager of the Buying Station, Mothership, or Shoreside Processor;

(iv) Notwithstanding other time limits, the operator of a Catcher Vessel must record all information required in the DFL within 2 hours after the vessel's catch is offloaded;

(3) The operator must record on each page:

(i) Page number as defined at paragraph (a)(6)(i) of this section;

(ii) The date;

(iii) If a Catcher Vessel, the vessel name and ADF&G vessel registration number. If a Catcher/Processor, the name, ADF&G processor number, and Federal Processor number of the Catcher/Processor;

(iv) The operator's signature;

(v) Active/inactive period. Whether Catcher Vessel or Catcher/Processor is in an active or inactive period as defined at paragraph (a)(7) of this section.

(4) The operator must record the following for each haul or set:

(i) *Gear deployment.* The number of haul or set, by sequence; begin time and position coordinates of gear deployment; average sea depth and average gear depth, recorded to the nearest meter or fathom.

(ii) *Gear retrieval.* The date, time, and position coordinates of gear retrieval. If the vessel is using longline hook-and-line gear, the number of skates set. If the vessel is using longline pot or single pot gear, the total number of pots set.

(iii) The estimated total round fish weight of the groundfish catch; and

(iv) The species code of the intended target species from Table 2 of this part.

(5) The operator must record discard/donation information as defined at paragraph (a)(10) of this section.

(6) If a Catcher Vessel, the operator must record:

(i) The date of delivery.

(ii) The name, ADF&G processor code, and ADF&G fish ticket number(s) provided by the manager or operator of the Mothership, Shoreside Processor, or Buying Station.

(7) If a Catcher/Processor, the operator must record product information as set forth at paragraph (a)(9) of this section.

(d) Buying station DCL—(1) Requirement. The operator or manager of each Buying Station subject to this part must:

(i) Answer each question on the DCL in the manner set forth under paragraphs (d)(3) through (5) of this section; and

(ii) Submit the DCL in the manner set forth under paragraphs (d)(2) and (a)(14), respectively, of this section.

(2) Time limits. (i) The operator or manager must record entries in the DCL as to Catcher Vessel delivery information within 2 hours after completion of receipt of the groundfish.

(ii) All other information required in the DCL must be recorded by noon of the day following the day the receipt of groundfish was completed or discard occurred.

(3) The operator or manager must record for each page:

(i) Page number as defined at paragraph (a)(6)(i) of this section;

(ii) The date;

(iii) The Buying Station name and, if a vessel, the ADF&G vessel number;

(iv) The operator's or manager's signature.

(v) *Active/inactive period.* Whether Buying Station is in an active or inactive period as defined at paragraph (a)(7) of this section.

(vi) The name and ADF&G processor code of the Mothership or Shoreside Processor to which groundfish deliveries were made;

(vii) The number of crew;

(4) The operator or manager must record the following information for each delivery of groundfish:

(i) The ADF&G fish ticket number issued to each Catcher Vessel delivering groundfish. If a fish ticket was not issued, the catch receipt number of the transaction;

(ii) Whether blue DFL logsheets were received from Catcher Vessel;

(iii) The time when receipt of groundfish catch was completed;

(iv) The name and ADF&G vessel registration number of the Catcher Vessel delivering the groundfish;

(v) The total groundfish delivery weight.

(5) The operator or manager must record discard/donation information as defined at paragraph (a)(10) of this section.

(e) *Mothership DCPL*—(1) *Requirement*. The operator of each Mothership subject to this part must:

(i) Answer each question on the DCPL in the manner set forth under paragraphs (e) (3) through (6) of this section; and

(ii) Submit the DCPL in the manner set forth under paragraphs (e)(2) and (a)(14), respectively, of this section.

(2) *Time limits.* (i) The operator must record entries in the DCPL as to Catcher Vessel or Buying Station delivery information within 2 hours after completion of the groundfish receipt.

(ii) All other information required in the DCPL must be recorded by noon of the day following the day the catch receipt, discard, or production occurred.

(3) The operator must record on each page:

(i) Page number as defined at paragraph (a)(6) of this section;

(ii) The date;

(iii) The name, ADF&G processor number, and Federal Processor number;

(iv) The operator's signature.

(v) Whether Mothership is in an active or inactive period as defined at paragraph (a)(7) of this section.

(4) The operator must record for each delivery:

(i) Whether delivery is from a Catcher Vessel or a Buying Station;

(ii) The name and ADF&G vessel registration number (if applicable) of the Catcher Vessel or Buying Station delivering the groundfish;

(iii) The time and position coordinates of the Mothership when groundfish catch is received;

(iv) The estimated total round fish weight of the groundfish catch;

(v) The ADF&G fish ticket number issued to each Catcher Vessel delivering groundfish. If a fish ticket is not issued, record the catch receipt number of the transaction.

(5) The operator must record discard/donation information as defined at paragraph (a)(10) of this section.

(6) The operator must record product information as defined at paragraph (a)(9) of this section.

(f) *Shoreside Processor DCPL*—(1) *Requirement*. The manager of each Shoreside Processor subject to this part must:

(i) Answer each question on the DCPL in the manner set forth under paragraphs (f) (3) through (7) of this section;

(ii) Submit the DCPL in the manner set forth under paragraphs (f)(2) and (a)(14), respectively, of this section.

(2) *Time limits*—(i) The manager must record in the DCPL all Catcher Vessel or Buying Station delivery information within 2 hours after completion of the groundfish receipt.

(ii) All other information required in the DCPL must be recorded by noon of the day following the day the catch receipt, discard, or production occurred.

(3) *Part I.* The operator must record on each page:

(i) *Page number*. If page is for an individual day, the date. If page is for 1 week, week-ending date. See also paragraph (a)(6)(i) of this section.

(ii) Participant identification information as defined at paragraph (a)(4) of this section.

(iii) The signature of the manager.

(iv) Whether the Shoreside Processor is in an active or inactive period as defined at paragraph (a)(7) of this section.

(4) *Delivery information*. The manager must record the following information for each delivery:

(i) Date and time when receipt of groundfish catch was completed;

(ii) Whether delivery is from Catcher Vessel or Buying Station;

(iii) Whether blue DFL logsheets were submitted by Catcher Vessel;

(iv) The name and ADF&G vessel registration number (if applicable) of the Catcher Vessel or Buying Station delivering the groundfish;

(v) The total scale weight of groundfish delivery in pounds or to the nearest 0.01 mt;

(vi) The ADF&G fish ticket number issued to the Catcher Vessel delivering groundfish. If a fish ticket is not issued, record the catch receipt number of the transaction.

(5) *Landings information (Part IC).* The manager must record:

(i) The date next to the appropriate day of the week (SUN through SAT);

(ii) Landings information as defined at paragraph (a)(8) of this section.

(6) *Discarded/donated species information (Part ID).* The manager must record:

(i) The date next to the appropriate day of the week (SUN through SAT);

(ii) Discard information as defined at paragraph (a)(10) of this section.

(7) *Part II.* The manager must record:

(i) Page numbers must be consecutive within Part II, beginning with page one for the first day product was produced after the start of the fishing year and continuing throughout the section for the remainder of the fishing year;

(ii) The name, ADF&G processor code number, and Federal Processor number of Shoreside Processor;

(iii) The signature of the manager.

(iv) *Product information.* (A) The week-ending date;

(B) The management area (BSAI or GOA);

(C) The date next to the appropriate day of the week (SUN through SAT);

(D) Product information as defined at paragraph (a)(9) of this section.

(g) *Groundfish product transfer report (PTR)*—(1) *Requirement.* (i) The operator of a Mothership or Catcher/Processor or the manager of a Shoreside Processor must record each transfer of groundfish product on a separate PTR.

(ii) The operator or manager must answer each question on the PTR in the manner set forth under paragraphs (g) (3) through (6) of this section for each transfer of groundfish or groundfish product and must submit the PTR in the manner set forth under paragraph (g)(2) of this section.

(iii) *Shoreside Processor transfer to offsite meal reduction plant.* The manager of a Shoreside Processor must report on a PTR those fish products which are subsequently transferred to an offsite meal reduction plant;

(iv) *Transfer of groundfish for bait.* The operator or manager must report on a PTR, daily sales or transfer of groundfish to vessels for bait. Individual sales of groundfish for bait purposes during a day may be aggregated when recording the amount of product leaving a facility that day.

(2) *Time limits and submittal.* The operator or manager must:

(i) Record all product transfer information on a PTR within 2 hours of the completion of the transfer;

(ii) Submit a copy of each PTR to the Regional Director to fax number 907–586–7313 within 24 hours of completion of transfer.

(3) The operator or manager must record on each page:

(i) Whether an original or revised report, as defined at paragraph (a)(6) of this section;

(ii) Page numbers must be numbered sequentially, with the first transfer of the fishing year as page 1 and continuing throughout the remainder of the fishing year;

(iii) If product (including raw fish) is received, "RECEIPT". If product (including raw fish) is offloaded from a Mothership or Catcher/Processor,

"OFFLOAD". If product (including raw fish) is shipped from a Shoreside Processor, "SHIPMENT";

(iv) Representative identification information, as defined at paragraph (a)(5) of this section;

(v) If a Catcher/Processor or Mothership, the participant identification information as defined at paragraph (a)(4) of this section and Coast Guard Documentation number. If a Shoreside Processor, the participant identification information as defined at paragraph (a)(4) of this section.

(4) *Transfer information.* The operator or manager must record the following information for each transfer:

(i) If another vessel is involved with the transfer, the name and call sign of the vessel receiving or delivering groundfish or groundfish products;

(ii) If a Mothership or Catcher/Processor and the transfer takes place in port, the port of landing and country if a foreign location;

(iii) If transfer is made to an agent, the agent's name. For purposes of this part, agent is defined as the transport company, the buyer, or the distributor;

(iv) *Intended first destination of product.* (A) If an offload or shipment, the intended destination of vessel or agent receiving groundfish or groundfish product. If receipt, not applicable;

(B) If an offload or shipment has several destinations, the primary or first intended destination;

(C) If offload or shipment is going to a single agent and initial destination but requires loading on multiple vans, trucks, or airline flights, the transfer may be recorded on a single PTR page;

(v) *Date and time of product transfer*—(A) *Start date.* The date and time the transfer starts;

(B) *Finish date.* The date and time the transfer is completed:

(*1*) If shipment is an individual van load or flight, the date and time when each shipment leaves the plant;

(*2*) If shipment involves multiple vans or trucks, the date and time when loading of vans or trucks is completed for each day;

(*3*) If shipment involves air freight, record date and time when the last air freight shipment of the day leaves the plant;

(vi) *Position transferred.* If a Catcher/Processor or Mothership and transfer of product is made at sea, the transfer position coordinates.

(5) *Products and quantities offloaded, shipped, or received.* (i) If a Catcher/Processor or Mothership, the Harvest Zone code of the area in which groundfish were harvested as defined in Table 8 of this part;

(ii) The species code and product code for each product transferred as defined in Tables 1 and 2 of this part;

(iii) The number of cartons or production units transferred;

(iv) The average net weight of one carton for each species and product code in kilograms or pounds;

(v) The total net weight (fish product weight, to the nearest 0.01 mt) of the products transferred.

(6) If a Catcher/Processor or Mothership, whether transfer is a total or partial offload. If partial offload, the total fish product weight, to the nearest 0.01 mt, of the products (by harvest zone, species and product codes) remaining on board after this transfer;

(h) *Check-in/Check-out report*—(1) *Requirement*—(i) *Check-in report (BEGIN Message*). Before a Catcher/Processor commences harvest of groundfish in Alaska State or Federal waters of any reporting area except 300, 400, 550, or 690 or before a Mothership, Shoreside Processor or Buying Station commences receipt of groundfish from Alaska State or Federal waters of any reporting area except 300, 400, 550, or 690, the operator or manager must answer each question on the Check-in/Check-out report in the manner set forth under paragraphs (h)(3), (h)(4), and (h)(6) of this section; and must submit the Check-in/Check-out report in the manner set forth under paragraph (h)(2) of this section.

(ii) *Check-out report (CEASE Message*). (A) If a Catcher/Processor departs a reporting area or moves between Alaska State and Federal waters in a reporting area, and gear retrieval is complete from that area, the operator or manager must answer each question on a Check-out report in the manner set forth in paragraphs (h)(3), (h)(5), and (h)(6) of this section and must submit the Check-in/Check-out report in the manner set forth under paragraph (h)(2) of this section;

(B) If a Mothership or Shoreside Processor, and groundfish receipt and processing are completed, the operator or manager must answer each question on a Check-out report in the manner set forth in paragraphs (h)(3), (h)(5), and (h)(6) of this section and must submit the Check-in/Check-out report in the manner set forth under paragraph (h)(2) of this section;

(iii) *Transit between reporting areas.* If a vessel is transiting through a reporting area and is not fishing or receiving fish, a Check-in or Check-out report is not required from that area;

(iv) *Multiple vessel operations categories.* If a Catcher/Processor is functioning simultaneously as a Mothership in the same reporting area, the operator must submit a separate Check-in report for each vessel operations category. Upon completion of each activity, the operator must submit a Check-out report for each vessel operations category.

(2) *Time limits and submittal*—(i) *Check-in report.* (A) The operator of a Catcher/Processor must submit by fax a Check-in report (BEGIN message) to the Regional Director at fax number 907–586–7131 before commencing any harvest of groundfish.

(B) The operator or manager of a Mothership, Shoreside Processor, or Buying Station must submit by fax a Check-in report (BEGIN message) to the Regional Director at fax number 907–586–7131 before commencing any receipt of groundfish.

(ii) *Check-out report.* (A) If a Catcher/Processor, Mothership, or Buying Station, the operator must submit by fax a Check-out report (CEASE message) to the Regional Director at fax number 907–586–7131 within 24 hours after leaving either the Alaska State or Federal part of a reporting area.

(B) If a Shoreside Processor, the manager must submit by fax a Check-out report (CEASE message) to the Regional Director at fax number 907–586–7131 within 48 hours after the end of the applicable weekly reporting period that a Shoreside Processor ceases to process groundfish for the fishing year or has not processed groundfish for more than one weekly reporting period;

(3) The operator or manager must record on each page;

(i) Whether an original or revised report as defined at paragraph (a)(6) of this section;

(ii) Participant identification information as defined at paragraph (a)(4) of this section;

(iii) Representative identification information as defined at paragraph (a)(5) of this section;

(iv) If a Mothership or Catcher/Processor, the processor type and gear type used to harvest the groundfish. If groundfish are received by a Mothership in the same reporting area from more than one gear type, or if groundfish are caught by a Catcher/Processor in the same reporting area using more than one gear type, the operator must submit a separate form for each gear type;

(v) Whether harvest is under a CDQ Program; if yes, the CDQ number;

(vi) If a Buying Station, the number of crew on the last day of the reporting week.

(4) *BEGIN Message.* The operator or manager must record:

(i) If a Catcher/Processor, date and time that gear is deployed. If a

Mothership, date and time that receipt of groundfish begins;

(ii) If a Catcher/Processor, position coordinates where gear is set. If a Mothership, position coordinates where groundfish receipt is begun;

(iii) If a Catcher/Processor, the reporting area code of gear deployment and whether gear deployment was in Federal or Alaska State waters. If a Mothership or Buying Station, the reporting area code where groundfish receipt begins and whether receipt of groundfish occurred in Federal or Alaska State waters;

(iv) If a Shoreside Processor, the date receipt of groundfish will begin; whether checking in for first time in fishing year or checking in to restart receipt and processing of groundfish after filing a Check-out report;

(v) If a Mothership or Catcher/Processor, the primary and secondary species expected to be harvested. If a Buying Station, the intended primary target expected to be harvested. A change in intended target species within the same reporting area does not require a new BEGIN message.

(5) *CEASE Message*. The operator or manager must report:

(i) If a Mothership or Catcher/Processor, the date, time and position coordinates where the vessel departed the reporting area or moved to Federal waters from Alaska State waters within a reporting area, or vice versa;

(ii) If a Shoreside Processor or Buying Station, the date that receipt of groundfish ceased.

(6) *Fish or fish product held at plant*. If a Shoreside Processor, the weight of the fish or fish products in pounds or to the nearest 0.01 mt by species and product codes.

(i) *Weekly production report (WPR)*—(1) *Requirement*. (i) The operator or manager of a Mothership, Catcher/Processor, or Shoreside Processor must answer each question on the WPR in the manner set forth in paragraphs (i)(3) through (i)(7) of this section for any week the Mothership, Catcher/Processor, or Shoreside Processor is checked in pursuant to paragraph (h)(1)(i) of this section and must submit a WPR in the manner set forth in paragraph (i)(2) of this section.

(ii) *Multiple vessel operations categories*. The operator of a vessel that is authorized to conduct operations as both a Catcher/Processor and as a Mothership must submit separate WPRs to report production and discard as a Catcher/Processor and production and discard as a Mothership.

(2) *Time limits and submittal*. The operator or manager must submit a WPR to the Regional Director at fax number 907–586–7131 by 1200 hours, A.l.t., on Tuesday, following the end of the applicable weekly reporting period.

(3) The operator or manager must record on each page:

(i) Whether an original or revised report, defined at paragraph (a)(6) of this section;

(ii) Participant identification information as defined at paragraph (a)(4) of this section;

(iii) Representative identification information as defined at paragraph (a)(5) of this section and date WPR was completed;

(iv) If a Mothership or Catcher/Processor, the processor type and gear type used to harvest the groundfish;

(v) Whether harvest is under a CDQ Program; if yes, the CDQ number;

(vi) The week-ending date;

(vii) The primary and secondary target codes for next week;

(viii) If a Mothership or Catcher/Processor, the number of crew on last day of reporting week.

(4) *Landings information*. If a Shoreside Processor, see landings information requirement at paragraph (a)(8) of this section.

(5) *Discarded/Donated Species Information (Part ID)*. For discard/donate information requirement, see paragraph (a)(10) of this section.

(6) *Product information*. For product information requirement, see at paragraph (a)(9) of this section.

(7) *Catcher Vessel delivery information*. If ADF&G fish tickets are issued by the Mothership or Shoreside Processor, list the fish ticket numbers issued to Catcher Vessels for the weekly reporting period.

(j) *Daily Production Report (DPR)*—(1) *Notice*. If the Regional Director determines that DPRs are necessary to avoid exceeding a groundfish TAC or prohibited species bycatch allowance, NMFS may require submission of DPRs for reporting one or more specific species, in addition to a WPR. NMFS will publish a document in the **Federal Register** specifying the fisheries that require DPRs and the effective dates that submittal of DPRs is required.

(2) *Requirement*. (i) If a Catcher/Processor, Mothership, or Shoreside Processor is checked-in to the specified reporting area and is harvesting, receiving, processing, or discarding the specified species, or is receiving reports from a Catcher Vessel of discard at sea of the specified species, the operator or manager must submit a DPR.

(ii) The operator of a Mothership or Catcher/Processor or manager of a Shoreside Processor must:

(A) Answer each question on the DPR in the manner set forth in paragraphs (j)(4) through (7) of this section;

(B) Submit the DPR in the manner set forth in paragraph (j)(3) of this section;

(C) Use a separate DPR for each gear type, processor type, and CDQ number.

(3) *Time limit and submittal*. The operator or manager must submit a DPR by fax to the Regional Director at fax number 907–586–7131 by 1200 hours, A.l.t., the day following each day of landings, discard, or production.

(4) The operator or manager must record on each page:

(i) Whether an original or revised report as defined at paragraph (a)(6) of this section;

(ii) Participant identification information as defined at paragraph (a)(4) of this section and processor type;

(iii) Representative identification information as defined at paragraph (a)(5) of this section;

(iv) The gear type used to harvest the groundfish, date received landings, and Federal reporting area where landings were harvested;

(v) Whether harvest is under a CDQ Program; if yes, the CDQ number.

(5) *Landing information*. If a Shoreside Processor, see landings information requirement at paragraph (a)(8) of this section.

(6) *Product information*. If a Mothership or Catcher/ Processor, see product information requirement at paragraph (a)(9) of this section.

(7) *Discard/donate information*. For discard/donate information requirement, see paragraph (a)(10) of this section.

(k) *U.S. Vessel Activity Report (VAR)*—(1) *Requirement*. The operator of a Catcher Vessel, a Catcher/Processor, or a Mothership regulated under this part that crosses the seaward boundary of the EEZ off Alaska or crosses the U.S./Canada international boundary between Alaska and British Columbia must answer each question on the VAR in the manner set forth in paragraphs (k)(3) and (4) of this section and must submit a VAR in the manner set forth in paragraph (k)(2) of this section.

(2) *Time limits and submittal*. The operator must submit a VAR by fax to NMFS Alaska Enforcement Division at fax number 907–586–7313 before the vessel crosses the seaward boundary of the EEZ off Alaska or the U.S./Canada international boundary between Alaska and British Columbia.

(3) The operator must record on each page:

(i) Whether an original or revised report as defined at paragraph (a)(6) of this section;

(ii) Participant identification information as defined at paragraph (a)(4) of this section;

(iii) Representative identification information as defined at paragraph

(a)(5) of this section and date VAR was completed;

(iv) If vessel is crossing into the seaward boundary of the EEZ off Alaska or crossing the U.S./Canada International boundary between Alaska and British Columbia, the operator must indicate return report. If vessel is crossing out of the seaward boundary of the EEZ off Alaska or crossing the U.S./Canada International boundary between Alaska and British Columbia into Canadian waters, the operator must indicate depart report.

(v) Port of landing;

(vi) Whether vessel is returning from fishing or departing to fish in the Russian Zone;

(vii) Date and time vessel will cross the EEZ off Alaska or the U.S./Canada international boundary between Alaska and British Columbia;

(viii) Latitude and longitude at the point of crossing the EEZ off Alaska or U.S./Canada international boundary between Alaska and British Columbia.

(4) *Fish or fish product on board the vessel when crossing the EEZ off Alaska or U.S./Canada international boundary*. (i) The Harvest Zone code of the area in which groundfish were harvested as defined in Table 8 of this part;

(ii) The species code and product code for each species on board as defined in Tables 1 and 2 of this part;

(iii) The fish product weight of products on board in pounds or to the nearest 0.01 mt.

7. In § 672.7, paragraphs (p) and (q) are added to read as follows:

§ 672.7 Prohibitions.

* * * * *

(p) Fail to comply with or fail to ensure compliance with requirements at § 672.5.

(q) Use a Catcher Vessel or Catcher/Processor as a Tender Vessel before offloading all groundfish or groundfish product harvested or processed by that vessel.

Subpart B—Management Measures

8. Section 672.20, paragraphs (a)(1), (e)(1), and the headings for paragraphs (c)(1), (c)(2)(i), (c)(2)(ii), and (h)(2), and paragraphs (i)(4), and (j) are revised; headings for paragraphs (c)(1)(i)(A), (i)(1), (i)(2), (i)(3), and (i)(6) are added; paragraphs (g)(1) and (g)(3) are amended by revising the words, "Table 2 to this section" to read "Table 10 of this part"; and tables 1 and 2 to the section are removed. The revised and added text reads as follows:

§ 672.20 General limitations.

(a) * * * (1) *Optimum yield (OY)*. The OY for the fishery regulated by this section and by § 611.92 of this chapter is a range of 116,000 to 800,000 mt for target species and the "other species" category in the GOA, to the extent this amount can be harvested consistently with this part and part 611 of this chapter, plus the amounts of "non-specified species" taken incidentally to the harvest of target species and the "other species" category. The species categories are defined in Table 1 of the specifications as provided in paragraph (c)(1) of this section.

* * * * *

(c) * * * (1) *Proposed specifications, interim harvest limits, and final specifications*.

(i) * * *

(A) *Proposed specifications*. * * *

(2) * * * (i) *Directed fishing allowance—Applicable after December 31, 1995*. * * *

(ii) *Directed fishing allowance—Applicable through December 31, 1995*. * * *

* * * * *

(e) * * *

(1) Prohibited species, for the purpose of this part, means any of the species of Pacific salmon (*Oncorhynchus* spp.), steelhead trout (*Oncorhynchus mykiss*), Pacific halibut (*Hippoglossus stenolepis*), Pacific herring (*Clupea harengus pallasi*), king crab (*Paralithodes* spp. and *Lithodes* spp.), and Tanner crab (*Chionoecetes* spp.) caught by a vessel regulated under this part while fishing for groundfish in the GOA, unless retention is authorized by other applicable laws, including the Pacific Halibut Fishery Regulations (part 301 of this title).

* * * * *

(h) * * *

(2) *Fishing trip*. * * *

* * * * *

(i) * * *

(1) *Pollock roe*. * * *

(2) *Primary product*. * * *

(3) *Pollock product recovery rates*. * * *

(4) *Fishing trip*. For purposes of this paragraph, a fishing trip is defined as set forth under paragraph (h)(2) of this section.

* * * * *

(6) *Primary pollock product*. * * *

* * * * *

(j) *Standard product types and standard product recovery rates (PRR's)*—(1) *Calculating round-weight equivalents from standard PRRs*. Round-weight equivalents for groundfish products are calculated using the product codes and standard PRRs specified in Table 3 of this part.

(2) *Adjustments to Table 3 of this part*. The Regional Director may adjust standard PRRs and product types specified in Table 3 of this part if he determines that existing standard PRRs are inaccurate or if new product types are developed.

(3) *Procedure*. Adjustments to any standard PRR listed in Table 3 of this part that are within and including 15 percent of that standard PRR may be made without providing notice and opportunity for prior public comment. Adjustments of any standard PRR during a calendar year, when aggregated with all other adjustments made during that year, will not exceed 15 percent of the standard PRR listed in Table 3 of this part at the beginning of that calendar year, and no new product type will be announced until NMFS publishes the proposed adjustment and/or new product type in the **Federal Register** and provides the public with at least 30 days opportunity for public comment. Any adjustment of a PRR that acts to further restrict the fishery will not be effective until 30 days after the date of publication in the **Federal Register**. If NMFS makes any adjustment or announcement without providing a prior notice and opportunity for prior public comment, the Regional Director will receive public comments on the adjustment or announcement for a period of 15 days after its publication in the **Federal Register**.

9. Section 672.23 is revised to read as follows:

§ 672.23 Seasons.

(a) *Fishing year*. Fishing for groundfish is authorized from 0001 hours, A.l.t., January 1, through 2359 hours, A.l.t., December 31, subject to the other provisions of this part, except as provided in paragraphs (c) through (f) of this section.

(b) *Time of openings and closures*. The time of all openings and closures of fishing seasons other than the beginning and end of the calendar fishing year is 1200 hours A.l.t.

(c) *Directed fishing for trawl rockfish*. Directed fishing for rockfish of the genera *Sebastes* and *Sebastolobus* with trawl gear is authorized from 1200 hours, A.l.t., on the first day of the third quarterly reporting period of a fishing year, through 2359 hours, A.l.t. December 31, subject to other provisions of this part.

(d) *Opening date for trawl groundfish*. Notwithstanding other provisions of this part, fishing for groundfish with trawl gear in the Gulf of Alaska is prohibited from 0001 hours, A.l.t. on January 1 through 1200 hours, A.l.t., January 20.

(e) *Directed fishing for pollock*. Subject to other provisions of this part, directed fishing for pollock in the Western and Central Regulatory Areas is authorized: From 0001 hours, A.l.t., January 1, through 1200 hours, A.l.t., April 1; from 1200 hours, A.l.t., June 1, through 1200 hours, A.l.t., July 1; from 1200 hours, A.l.t., July 1, through 1200 hours A.l.t., October 1; and from 1200 hours A.l.t., October 1, through 2359 hours, A.l.t., December 31.

10. In § 672.24, paragraphs (d)(3) and (d)(4) are redesignated as paragraphs (d)(4) and (d)(5), respectively; headings for paragraphs (c)(4), newly redesignated (d)(4), newly redesignated (d)(5), and (f)(3) are added; paragraph (d)(3) is added; headings of paragraphs (a) and (b) are revised; and the heading of paragraph (d), and paragraphs (d)(1), (d)(2), (e), (f)(4), and (f)(5) are revised to read as follows:

§ 672.24 Gear limitations.

(a) *Marking of gear—longline marker buoys.* * * *

(b) *Gear restrictions—pots.* * * *

(c) * * *

(4) *Longline pot gear.* * * *

(d) *Trawls other than pelagic trawls—Kodiak Island*—(1) *Type I Closures.* No person may trawl in waters of the EEZ within the vicinity of Kodiak Island, as shown in Figure 5 of this part as Type I areas, from a vessel having any trawl other than a pelagic trawl either attached or on board.

(2) *Type II Closures.* From February 15 to June 15, no person may trawl in waters of the EEZ within the vicinity of Kodiak Island, as shown in Figure 5 of this part as Type II areas, from a vessel having any trawl other than a pelagic trawl either attached or on board.

(3) *Type III Closures.* Type III areas are open to any trawl other than a pelagic trawl gear year round.

(4) *Net-sounder device.* * * *

(5) *Footrope of the trawl.* * * *

(e) *Steller sea lion protection areas*—(1) *Year-round closures.* Trawling is prohibited in the GOA within 10 nm of the 14 Steller sea lion rookeries designated in Table 6a of this part.

(2) *Seasonal closures.* During January 1 through April 15, or a date earlier than April 15, if adjusted under § 675.20(a)(8) of this chapter trawling is prohibited in the GOA within 20 nm of each of the three Steller sea lion rookeries presented in Table 6b of this part.

(f) * * *

(3) *Test area criteria.* * * *

(4) *Kodiak Test Area.* Trawl gear testing is allowed in an area (Figure 7 of this part) bounded by straight lines connecting the following coordinates in the order listed at all times:

W. longitude	*N. latitude*
152° 02′	57° 37′
151° 25′	57° 37′
151° 25′	57° 23′
152° 02′	57° 23′
152° 02′	57° 37′

(5) *Sand Point Test Area.* Trawl gear testing is allowed in an area (Figure 7 of this part) bounded by straight lines connecting the following coordinates in the order listed at all times:

W. longitude	*N. latitude*
161° 00′	54° 50′
160° 30′	54° 50′
160° 30′	54° 35′
161° 00′	54° 35′
161° 00′	54° 50′

11. Part 672 is amended by adding a new heading and Tables 1 through 11 at the end of the part preceding the figures to part 672 to read as follows:

Tables—Part 672

TABLE 1.—PRODUCT CODES

Fish product code/description
1. Whole fish/food fish.
2. Whole fish/bait. Processed for bait.
3. Bled only. Throat, or isthmus, slit to allow blood to drain.
4. Gutted only. Belly slit and viscera removed.
6. Head and gutted, with roe.
7. Headed and gutted, Western cut. Head removed just in front of the collar bone, and viscera removed.
8. Headed and gutted, Eastern cut. Head removed just behind the collar bone, and viscera removed.
10. Headed and gutted, tail removed. Head removed usually in front of collar bone, and viscera and tail removed.
11. Kirimi. Head removed either in front or behind the collar bone, viscera removed, and tail removed by cuts perpendicular to the spine, resulting in a steak.
12. Salted and split. Head removed, belly slit, viscera removed, fillets cut from head to tail but remaining attached near tail. Product salted.
13. Wings. On skates, side fins are cut off next to body.
14. Roe. Eggs, either loose or in sacs, or skeins.
15. Pectoral girdle. Collar bone and associated bones, cartilage and flesh.
16. Heads. Heads only, regardless where severed from body.
17. Cheeks. Muscles on sides of head.
18. Chins. Lower jaw (mandible), muscles, and flesh.
19. Belly. Flesh in region of pelvic and pectoral fins and behind head.
20. Fillets with skin and ribs. Meat and skin with ribs attached, from sides of body behind head and in front of tail.
21. Fillets with skin, no ribs. Meat and skin with ribs removed, from sides of body behind head and in front of tail.
22. Fillets with ribs and no skin. Meat with ribs with skin removed, from sides of body behind head and in front of tail.
23. Fillets, skinless/boneless. Meat with both skin and ribs removed, from sides of body behind head and in front of tail.
24. Deep-skin fillet. Meat with skin, adjacent meat with silver lining, and ribs removed from sides of body behind head and in front of tail, resulting in thin fillets.
30. Surimi. Paste from fish flesh and additives.
31. Minced. Ground flesh.
32. Fish meal. Meal from fish and fish parts, including bone meal.
33. Fish oil. Rendered oil.
34. Milt. (in sacs, or testes).
35. Stomachs. Includes all internal organs.
36. Octopus/squid mantles. Flesh after removal of viscera and arms.
37. Butterfly, no backbone. Head removed, belly slit, viscera and most of backbone removed; fillets attached.
39. Bones (if meal, report as 32).
86. Donated Salmon. Includes salmon retained and donated under Salmon Donation Program.
97. Other retained product.

TABLE 1.—PRODUCT CODES—Continued

Fish product code/description
Discard Product Codes
92. Discard, bait. Whole fish used as bait on board vessel.
94. Discard, consumption. Fish or fish products eaten on board or taken off the vessel for personal use.
96. Previously discarded fish (decomposed) taken with trawl gear in current fishing efforts. Discarded.
98. Discard, at sea. Whole groundfish and prohibited species discarded by catcher vessels, Catcher/Processors, Motherships, or Buying Stations delivering to Motherships.
99. Discard, dockside. Discard after delivery and before processing; Discard, at plant. In-plant discard of whole groundfish and prohibited species by Shoreside Processors and Buying Stations delivering to Shoreside Processors before and during processing.
M99 Discard, off site meal reduction plant. Discarded fish that are transferred to any off site facility for reduction to fish meal, fish oil and/or discard at sea.
Product Designation
A Ancillary. Product made in addition to a primary product from the same fish.
P Primary. Product made from each fish with the highest recovery rate.
R Reprocessed. Product that results from processing a previously reported product.

TABLE 2—SPECIES CODES

Code	Species
110	Pacific cod.
120	Miscellaneous flatfish (all flatfish without separate codes).
121	Arrowtooth flounder and/or Kamchatka flounder.
122	Flathead sole.
123	Rock sole.
124	Dover sole.
125	Rex sole.
126	Butter sole.
127	Yellowfin sole.
128	English sole.
129	Starry flounder.
131	Petrale sole.
132	Sand sole.
133	Alaska Plaice flounder.
134	Greenland turbot.
135	Greenstripe rockfish.
136	Northern rockfish.
137	Bocaccio rockfish.
138	Copper rockfish.
141	Pacific ocean perch (*S. alutus* only).
142	Black rockfish.
143	Thornyhead rockfish (all *Sebastolobus* species).
145	Yelloweye rockfish.
146	Canary rockfish.
147	Quillback rockfish.
148	Tiger rockfish.
149	China rockfish.
150	Rosethorn rockfish.
151	Rougheye rockfish.
152	Shortraker rockfish.
153	Redbanded rockfish.
154	Dusky rockfish.
155	Yellowtail rockfish.
156	Widow rockfish.
157	Silvergray rockfish.
158	Redstripe rockfish.
159	Darkblotched rockfish.
160	Sculpins.
166	Sharpchin rockfish.
167	Blue rockfish.
175	Yellowmouth rockfish.
176	Harlequin rockfish.
177	Blackgill rockfish.
178	Chilipepper rockfish.
179	Pygmy rockfish.
181	Shortbelly rockfish.
182	Splitnose rockfish.
183	Stripetail rockfish.
184	Vermilion rockfish.
185	Aurora rockfish.
193	Atka mackerel.

TABLE 2—SPECIES CODES—Continued

Code	Species
270	Pollock.
510	Smelt.
511	Eulachon.
516	Capelin.
689	Sharks.
700	Skates.
710	Sablefish.
870	Octopus.
875	Squid.
Group Codes. These group codes may be used if individual species cannot be identified.	
144	Slope rockfish (aurora, blackgill, Bocaccio, redstripe, silvergray, chilipepper, darkblotched, greenstriped, harlequin, pygmy, shortbelly, splitnose, stripetail, vermillion, yellowmouth, sharpchin).
168	Demersal shelf rockfish (china, copper, quillback, rosethorn, tiger, yelloweye, canary).
169	Pelagic shelf rockfish (blue, dusky, yellowtail, widow).
171	Shortraker/rougheye rockfish.
Prohibited Species Coees	
000	Unspecified salmon.
200	Pacific halibut.
235	Pacific herring.
410	Salmon, Chinook.
420	Salmon, Sockeye.
430	Salmon, Coho.
440	Salmon, Pink.
450	Salmon, Chum.
540	Steelhead trout.
920	Unspecified king crab.
921	Red king crab.
922	Blue king crab.
923	Gold/brown king crab.
930	Unspecified tanner crab.
931	Bairdi tanner crab.
932	Opilio tanner crab.

TABLE 7.—COMMUNITIES DETERMINED TO BE ELIGIBLE TO APPLY FOR COMMUNITY DEVELOPMENT QUOTAS

[Other communities may also be eligible, but do not appear on this table.]

Aleutian Region:
  1. Atka.
  2. False Pass.
  3. Nelson Lagoon.
  4. Nikolski.
  5. St. George.
  6. St. Paul.

Bering Strait:
  1. Brevig Mission.
  2. Diomede/Inalik.
  3. Elim.
  4. Gambell.
  5. Golovin.
  6. Koyuk.
  7. Nome.
  8. Savoonga.
  9. Shaktoolik.
  10. St. Michael.
  11. Stebbins.
  12. Teller.
  13. Unalakleet.
  14. Wales.
  15. White Mountain.

Bristol Bay:
  1. Alegnagik.
  2. Clark's Point.
  3. Dillingham.
  4. Egegik.
  5. Ekuk.
  6. Manokotak.
  7. Naknek.
  8. Pilot Point/Ugashi.
  9. Port Heiden/Meschick.
  10. South Naknek.
  11. Sovonoski/King Salmon.
  12. Togiak.
  13. Twin Hills.

Southwest Coastal Lowlands:
  1. Alakanuk.
  2. Chefornak.
  3. Chevak.
  4. Eek.
  5. Emmonak.
  6. Goodnews Bay.
  7. Hooper Bay.
  8. Kipnuk.
  9. Kongiganak.
  10. Kotlik.
  11. Kwigillingok.
  12. Mekoryuk.
  13. Newtok.
  14. Nightmute.
  15. Platinum.
  16. Quinhagak.
  17. Scammon Bay.
  18. Sheldon's Point.
  19. Toksook Bay.
  20. Tununak.
  21. Tuntutuliak.

TABLE 8.—HARVEST ZONE CODES FOR USE WITH PRODUCT TRANSFER REPORTS AND VESSEL ACTIVITY REPORTS

Harvest zone	Description
A	EEZ of Alaska.
D	Donut Hole.
F	Foreign Waters Other than Russia.
I	International Waters other than Donut Hole and Seamounts.
R	Russian waters.
S	Seamounts in International waters,
U	U.S. EEZ other than Alaska.

TABLE 9.—REQUIRED LOGBOOKS, REPORTS AND FORMS FROM PARTICIPANTS IN THE FEDERAL GROUNDFISH FISHERIES

BSAI Statistical and Reporting Areas Map

Figure 1a—BSAI Statistical and Reporting Areas; Map

FIGURE 1B.—BSAI STATISTICAL AND REPORTING AREAS; COORDINATES OF REPORTING AREAS

Code	Description
300	*Russian waters.* Those waters inside the Russian 200 mile limit as described in the current editions of NOAA chart INT 813 Bering Sea (Southern Part) and NOAA chart INT 814 Bering Sea (Northern Part).
400	*Chukchi Sea.* North of a diagonal line between 66°00′ N, 169°42.5′ W (Cape Dezhneva, Russia); and 65°37′ N, 168°7.5° W (Cape Prince of Wales, Alaska) and to the limits of the U.S. EEZ as described in the current edition of NOAA chart INT 814 Bering Sea (Northern Part).
508	South of 58°00′ N between the intersection of 58°00′ North lat with the Alaska Peninsula and 160°00′ W long.
509	South of 58°00′ N lat between 163°00′ W long and 165°00′ W long.
512	South of 58°00′ N lat, north of the Alaska Peninsula between 160°00′ W long and 162°00′ W long.
513	Between 58°00′ N lat and 56°30′ N. lat, and between 165°00′ W long and 170°00′ W long.
514	North of 58°00′ N to the southern boundary of the Chukchi Sea, area 400, and east of 170°00′ W long.
516	South of 58°00′ N lat, north of the Alaska Peninsula, and between 162°00′ and 163°00′ W long.
517	South of 56°30′ N lat, between 165°00′ W long and 170°00′ W long; and north of straight lines between: 54°30′ N lat, 165°00′ W long, 54°30′ N lat, 167°00′ W long, and 55°46′ N lat, 170°00′ W long.
518	*Bogoslof District:* South of a straight line between 55°46′ N lat, 170°00′ W long and 54°30′ N lat, 167°00′ W long, and between 167°00′ W long and 170°00′ W long, and north of the Aleutian Island and straight lines between the islands connecting the following coordinates in the order listed: 52°49.2′ N, 169°40.4′ W. 52°49.8′ N, 169°06.3′ W. 53°23.8′ N, 167°50.1′ W. 53°18.7′ N, 167°51.4′ W.
519	South of a straight line between 54°30′ N lat, 167°00′ W long and 54°30′ N lat, 164°54′ W long; east of 167°00′ W long; west of Unimak Island; and north of the Aleutian Islands and straight lines between the islands connecting the following coordinates in the order listed: 53°59.0′ N, 166°17.2′ W. 54°02.9′ N, 166°03.0′ W. 54°07.7′ N, 165°40.6′ W. 54°08.9′ N, 165°38.8′ W. 54°11.9′ N, 165°23.3′ W. 54°23.9′ N, 164°42.0′ W.
521	The area bounded by straight lines connecting the following coordinates in the order listed: 55°46′ N, 170°00′ W, 59°25′ N, 179°20′ W, 60°00′ N, 179°20′ W, 60°00′ N, 171°00′ W, 58°00′ N, 171°00′ W, 58°00′ N, 170°00′ W, 55°46′ N, 170°00′ W,
523	The area bounded by straight lines connecting the following coordinates in the order listed: 59°25′ N, 179°20′ W; 55°46′ N, 170°00′ W; 55°00′ N, 170°00′ W; 55°00′ N, 180°00′ W; and north to the limits of the US EEZ as described in the current edition of NOAA chart INT 813 Bering Sea (Southern Part).
524	The area west of 170°00′ W bounded south by straight lines connecting the following coordinates in the order listed: 58°00′ N, 170°00′ W 58°00′ N, 171°00′ W; 60°00′ N, 171°00′ W; 60°00′ N, 179°20′ W; 59°25′ N, 179°20′ W and to the limits of the US EEZ as described in the current edition of NOAA chart INT 813 Bering Sea (Southern Part).
530	The area north of 55°00′ N lat and west of 180°00′ W long to the limits of the US EEZ as described in the current edition of NOAA chart INT 813 Bering Sea (Southern Part)
541	*Eastern Aleutian District.* The area south of 55°00′ N lat, west of 170°00′ W long, and east of 177°00′ W long and bounded on the south by the limits of the US EEZ as described in the current editions of NOAA chart INT 813 Bering Sea (Southern Part) and NOAA chart 530 (San Diego to Aleutian Islands and Hawaiian Islands).
542	*Central Aleutian District.* The area south of 55°00′ N lat, west of 177°00′ W long, and east of 177°00′ E long and bounded on the south by the limits of the US EEZ as described in the current editions of NOAA chart INT 813 Bering Sea (Southern Part) and NOAA chart 530 (San Diego to Aleutian Islands and Hawaiian Islands)
543	*Western Aleutian district.* The area south of 55°00′ N lat and west of 177°00′ E long, and bounded on the south and west by the limits of the US EEZ as described in the current editions of NOAA chart INT 813 Bering Sea (Southern Part) and NOAA chart 530 (San Diego to Aleutian Islands and Hawaiian Islands)
550	*Donut Hole.* International waters of the Bering Sea outside the limits of the EEZ and Russian economic zone as depicted on the current edition of NOAA chart INT 813 Bering Sea (Southern Part).
	Statistical Area. A statistical area is the part of a reporting area contained in the EEZ.

Code	Description
610	*Western Regulatory Area, Shumagin District.* Along the south side of the Aleutian Islands and straight lines between the islands and the Alaska Peninsula connecting the following coordinates in the order listed: 52°49.2′ N, 169°40.4′ W; 52°49.8′ N, 169°06.3′ W; 53°23.8′ N, 167°50.1′ W; 53°18.7′ N, 167°51.4′ W; 53°59.0′ N, 166°17.2′ W; 54°02.9′ N, 166°03.0′ W; 54°07.7′ N, 165°40.6′ W; 54°08.9′ N, 165°38.8′ W; 54°11.9′ N, 165°23.3′ W; 54°23.9′ N, 164°44.0′ W; and southward to the limits of the US EEZ as described in the current editions of NOAA chart INT 813 (Bering Sea, Southern Part) and NOAA chart 500 (West Coast of North America, Dixon Entrance to Unimak Pass), between 170°00′ W long and 159°00′ W long.
620	*Central Regulatory Area, Chirikof District.* Along the south side of the Alaska Peninsula, between 159°00′ W long and 154°00′ W long, and southward to the limits of the US EEZ as described in the current edition of NOAA chart 500 (West Coast of North America, Dixon Entrance to Unimak Pass).
630	*Central Regulatory Area, Kodiak District.* Along the south side of continental Alaska, between 154°00′ W long and 147°00′ W long, and southward to the limits of the US EEZ as described in the current edition of NOAA chart 500 (West Coast of North America, Dixon Entrance to Unimak Pass). Excluding area 649.
640	*Eastern Regulatory Area, West Yakutat District.* Along the south side of continental Alaska, between 147°00′ W long and 140°00′ W long, and southward to the limits of the US EEZ, as described in the current edition of NOAA chart 500 (West Coast of North America, Dixon Entrance to Unimak Pass). Excluding area 649.
649	*Prince William Sound.* Includes those waters of the State of Alaska inside the base line as specified in Alaska State regulations at 5 AAC 28.200.
650	*Eastern Regulatory Area, Southeast Outside District.* East of 140°00′ W long and southward to the limits of the US EEZ as described in the current edition of NOAA chart 500 (West Coast of North America, Dixon Entrance to Unimak Pass). Excluding area 659.
659	*Southeast Inside District.* As specified in Alaska State regulations at 5 AAC 28.105 (a)(1) and (2).
690	*Gulf of Alaska outside the U.S. EEZ* as described in the current editions of NOAA chart INT 813 (Bering Sea, Southern Part) and NOAA chart 500 (West Coast of North America, Dixon Entrance to Unimak Pass).
	Statistical Area. A statistical area is the part of a reporting area contained in the EEZ.

PART 675—GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

13. The authority citation for part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

Subpart A—General

14. In § 675.1, paragraph (a) is revised to read as follows:

§ 675.1 Purpose and scope.

(a) Regulations in this part, along with parts 620, 672, 676, and 677 of this chapter implement the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Area.

* * * * *

15. Section 675.2 is revised to read as follows:

§ 675.2 Definitions.

Definitions for this section are located in § 672.2 of this chapter.

16. Section 675.3 is revised to read as follows:

§ 675.3 Relation to other laws.

Regulations for this section are located in § 672.3 of this chapter.

17. Section 675.4 is revised to read as follows:

§ 675.4 Permits.

Fisheries permit requirements for vessels fishing for groundfish in the BSAI are located at § 672.4 of this chapter.

18. Section 675.5 is revised to read as follows:

§ 675.5 Recordkeeping and reporting.

Recordkeeping and reporting requirements regulated under this part and § 672.4 of this chapter are located at § 672.5 of this chapter.

19. In § 675.7, paragraph (a) is revised, and paragraphs (q) and (r) are added to read as follows:

§ 675.7 Prohibitions.

* * * * *

(a) Fish for groundfish in the BSAI with a vessel of the United States that does not have on board a valid permit issued under § 672.4 of this chapter.

* * * * *

(q) Fail to comply with or fail to ensure compliance with requirements at § 672.5 of this chapter.

(r) Use a Catcher Vessel or Catcher/Processor as a Tender Vessel before offloading all groundfish or groundfish product harvested or processed by that vessel.

Subpart B—Management Measures

20. In § 675.20, paragraphs (a)(1) and (c)(1) are revised; headings for paragraphs (a)(8) through (a)(12), (d), (j)(1), and (j)(2) are added; heading for paragraph (i)(2) is revised; paragraphs (h)(1) and (h)(3) are amended by revising the words, "Table 1 to this section" to read "Table 11 of part 672," and Table 1 to § 675.20 is removed. The revised and added text reads as follows:

§ 675.20 General limitations.

(a) * * *

(1) *Optimum yield (OY).* The OY for the fishery regulated by this section and by § 611.93 of this chapter is a range of 1.4 to 2.0 million mt for target species and the "other species" category in the BSAI, to the extent this amount can be harvested consistently with this part and part 611 of this chapter, plus the amounts of "non-specified species" taken incidentally to the harvest of target species and the "other species" category. The species categories are defined in Table 1 of the specifications as provided in paragraph (a)(7) of this section.

* * * * *

(8) *Directed fishing allowance.* * * *

(9) *Prohibited species closure.* * * *

(10) *Overfishing closure.* * * *

(11) *JVP or TALFF prohibitions.* * * *

(12) *Factors to be considered.* * * *

* * * * *

(c) * * * (1) Prohibited species, for the purpose of this part, means any of the species of Pacific salmon (*Oncorhynchus* spp.), steelhead trout (*Oncorhynchus mykiss*), Pacific halibut (*Hippoglossus stenolepis*), Pacific herring (*Clupea harengus pallasi*), king crab (*Paralithodes* spp. and *Lithodes* spp.), and Tanner crab (*Chionoecetes* spp.) caught by a vessel regulated under this part while fishing for groundfish in the BSAI, unless retention is authorized by other applicable law, including the Pacific Halibut Fishery Regulations (part 301 of this title).

* * * * *

(d) *Winter Halibut Savings Area.* * * *

* * * * *

(i) * * *

(2) *Fishing trip.* * * *

* * * * *

(j) * * *

(1) *Pollock roe.* * * *

(2) *Primary product.* * * *

* * * * *

21. In § 675.21, headings are added to paragraphs (a)(1) through (a)(6), and (b)(4), to read as follows:

§ 675.21 Prohibited species catch (PSC) limitations.

(a) * * *

(1) *Red king crab, Zone 1.* * * *

(2) *Tanner crab, Zone 1.* * * *

(3) *Tanner crab, Zone 2.* * * *

(4) *Pacific halibut, trawl.* * * *

(5) *Pacific herring.* * * *

(6) *Pacific halibut, non-trawl.* * * *

(b) * * *

(4) *Bycatch allowances and seasonal apportionments.* * * *

* * * * *

22. In § 675.22, paragraph (a) is revised and headings are added to paragraphs (b) through (f) to read as follows:

§ 675.22 Time and area closures.

(a) *Year-round closures, Area 512.* No fishing with trawl gear is allowed at any time in that part of Zone 1 in the Bering Sea subarea that is south of 58°00′ N. lat. and between 160°00′ W. long. and 162°00′ W. long. (see Figure 1 of part 672), except as described in paragraph (c) of this section.

(b) *Seasonal closures, Area 516.* * * *

(c) *Partial closures, Area 512.* * * *

(d) *Partial closures, Area 516.* * * *

(e) *Red king crab closures.* * * *

(f) *Walrus Protection Areas.* * * *

* * * * *

23. In § 675.23, paragraph (a) and (d) are revised and headings are added to paragraphs (b) and (c) to read as follows:

§ 675.23 Seasons.

(a) *Fishing year.* Fishing for groundfish in the subareas and statistical areas of the BSAI is authorized from 0001 hours, A.l.t., January 1, through 2359 hours, A.l.t., December 31, subject to the other provisions of this part, except as provided in paragraphs (c) through (e) of this section.

(b) *Time of openings and closures.* * * *

(c) *Directed fishing for arrowtooth flounder and Greenland turbot.* * * *

(d) *Trawl gear prohibition, BSAI.* Notwithstanding other provisions of this part, fishing for groundfish with trawl gear in the BSAI is prohibited from 0001 hours, A.l.t. on January 1, through 1200 hours, A.l.t., January 20.

* * * * *

24. In § 675.24, paragraph (a) is revised; paragraph (e) is removed; paragraphs (f) through (h) are redesignated as paragraphs (e) through (g), respectively; headings are added to paragraphs (c)(1), (c)(2), (c)(3), (d)(1), (d)(2), and newly redesignated paragraphs (f)(2) and (f)(3); the heading for paragraph (b) is revised; and newly designated paragraphs (e) and (f)(4) are revised to read as follows:

§ 675.24 Gear limitations.

(a) *Marking of gear.* (1) All longline marker buoys carried on board or used by vessels regulated under this part shall be marked with at least one of the following:

(i) The vessel's name; and

(ii) The vessel's fisheries permit number; or

(iii) The vessel's registration number.

(2) Marking shall be in characters at least 4 inches (10.2 cm) in height and one-half inch (1.3 cm) in width, in a contrasting color visible above the water line, and shall be maintained in good condition.

(b) *Gear restrictions—pots.*

* * * * *

(c) * * *

(1) *Sablefish.* * * *

(2) *Pollock.* * * *

(3) *Longline pot gear.* * * *

(d) * * *

(1) *Directed fishing closures.* * * *

(2) *PSC closures.* * * *

* * * * *

(e) *Steller sea lion protection areas*—(1) *Bering Sea Subarea and Bogoslof District*—(i) *Year-round closures.* Trawling is prohibited within 10 nm of each of the eight Steller sea lion rookeries shown in Table 4a of part 672 of this title.

(ii) *Seasonal closures.* During January 1 through April 15, or a date earlier than April 15 if adjusted under § 675.20(a)(8), trawling is prohibited within 20 nm of each of the six Steller sea lion rookeries shown in Table 4b of part 672 of this title.

(2) *Aleutian Islands Subarea*—(i) *Year-round closures.* Trawling is prohibited within 10 nm of each of the 19 Steller sea lion rookeries shown in Table 5a of part 672 of this chapter.

(ii) *Seasonal closures.* During January 1 through April 15, or a date earlier than April 15 if adjusted under § 675.20(a)(8), trawling is prohibited within 20 nm of each of the two Steller sea lion rookeries shown in Table 5b of part 672 of this chapter.

(f) *Trawl gear testing areas.* * * *

(2) *Test area conditions.* * * *

(3) *Test area criteria.* * * *

(4) *Bering Sea Testing Area.* Trawl gear testing is allowed in an area (Figure 7 of part 672 of this chapter) bounded by straight lines connecting the following coordinates in the order listed, at all times:

W. longitude	*N. latitude*
167° 00′	55° 00′
166° 00′	55° 00′
166° 00′	54° 40′
167° 00′	54° 40′
167° 00′	55° 00′

* * * * *

25. Section 675.27 is amended by removing table 1 at the end of § 675.27; revising paragraph (d)(2) introductory text and paragraph (g); and by adding headings to paragraphs (a)(1), (a)(2), (c)(1), (c)(2), (e)(1) through (e)(4), and (f)(1) through (f)(3) to read as follows:

§ 675.27 Western Alaska Community Development Quota Program (applicable through December 31, 1995).

(a) * * *

(1) Compliance. * * *

(2) Public hearing. * * *

* * * * *

(c) * * *

(1) *Consistent with criteria.* * * *

(2) *Not consistent with criteria.* * * *

(d) *Evaluation criteria.* * * *

(2) Prior to approval of a CDP recommended by the Governor, NMFS will review the Governor's findings to determine that each community that is part of a CDP is listed on Table 7 of part 672 of this chapter or meets the following criteria for an eligible community:

* * * * *

(e) * * *

(1) *Annual reports.* * * *

(2) *Increase in CDQ allocation.* * * *

(3) *Amendment to a CDP.* * * *

(4) *Reaching CDQ allocation.* * * *

(f) * * *

(1) *Recommendation of Governor.* * * *

(2) *Non-compliance.* * * *

(3) *Review of allocation.* * * *

(g) *CDQ fishing requirements.* Recordkeeping and reporting requirements are set out at § 672.5 of this chapter.

* * * * *

PART 675—[AMENDED]

26. Part 675 is amended by removing the heading "Figures—Part 675" and the figures at the end of the part.

Part IV

Department of Agriculture

Agricultural Marketing Service

7 CFR Part 51

Onions (Bermuda-Granex-Grano) and Other Onions; Grade Standards; Final Rule

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 51

[Docket Number FV–94–302]

Bermuda-Granex-Grano Type Onions and Onions (Other Than Bermuda-Granex-Grano and Creole Type); Grade Standards

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule revises the United States Standards for Grades of Bermuda-Granex-Grano Type Onions and United States Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Type). The revision sets a minimum sample size for consumer size packages, provides a "Colossal" size classification and eliminates Export size classifications. It also includes other technical revisions to update the standards in accord with current handling and marketing practices.

EFFECTIVE DATE: October 10, 1995.

FOR FURTHER INFORMATION CONTACT: Frank O'Sullivan, Fresh Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, P.O. Box 96456, Room 2049 South Building, Washington, DC 20090–6456, (202) 720–2185.

SUPPLEMENTARY INFORMATION: The U.S. Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (5 U.S.C. 601 et. seq.), the Administrator of the Agricultural Marketing Service (AMS) has determined that this action will not have a significant economic impact on substantial number of small entities. This final rule for the revision of U.S. Standards for Grades of Bermuda-Granex-Grano Type Onions and U.S. Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Type) will not impose substantial direct economic cost, recordkeeping, or personnel workload changes on small entities, and will not alter the market share or competitive position of these entities relative to large businesses. In addition, under the Agricultural Marketing Act of 1946, the use of these standards is voluntary.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of this rule.

Agencies periodically review existing regulations. An objective of the review is to ensure that the grade standards are serving their intended purpose, the language is clear, and the standards are consistent with AMS policy and authority.

The United States Standards for Grades of Bermuda-Granex-Grano Type Onions was last revised February 20, 1985, and the United States Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Types) was last revised October 1, 1971. In general, the Bermuda-Granex-Grano Type (BGG) standard is applied to southern grown onions that have thin papery outer scales, are harvested in the spring and summer and are not typically kept in storage. The Other Than Bermuda-Granex-Grano and Creole Types (Other Than) standard is generally applied to northern grown onions that have thick outer papery scales, are harvested in the fall and are more commonly stored. The major distinction between the two standards for grades of these onions is the lot tolerances; 10 percent for BGG and 5 percent for Other Than. Although separated by type and tolerances, many similarities exist in the grading of these onions. The different types of onions are affected by most of the same defects. The procedures for sampling and performing grading activities are essentially the same regardless of which standard is being applied. The standards were established and have been revised separately over the years to reflect the needs of their respective industries.

A broad spectrum of growers and shippers of onions who utilize both standards, represented by The National Onion Association (NOA), requested that the minimum sample size for consumer size packages be designated at 20 pounds in each standard. While considering the NOA's request the Agency, through a periodic review, decided to take the opportunity to bring the standards into closer uniformity with each other and conformity to current harvesting, handling and marketing practices by proposing additional revisions including a grade for peeled onions, an additional size designation for colossal onions and technical revisions to promote uniformity and clarity wherever possible.

The proposed rule, United States Standards for Grades of Bermuda-Granex Grano Type Onions and United States Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Type), was published in the **Federal Register** on February 16, 1995, (60, FR 8973–8981). The 60 day comment period ended April 17, 1995, and a total of eleven comments were received from six individual growers/packers/shippers, four associations and committees and one from an individual consumer.

Three of these comments, which included two growers/packers/shippers and the NOA, were in full support of the proposal. One commentor expressed that, "Since we market onions of both types, we feel the changes to (the) standard are needed and will make the inspection and marketing of onions much easier." The NOA agreed with the agency's effort to modernize and update the standards because it would encourage improved marketing practices and business conditions for U.S. onion producers, shippers, and handlers. Another comment simply stated agreement with the proposed rule.

Three comments were received which were in general support of the proposed changes but which expressed some disagreement on one or two of the specific revisions.

A grower/packer/shipper suggested that the medium size designation be changed from 2 inch minimum to 2¼ inch minimum and be called large/medium or medium/large. In regards to the new colossal size designation this commentor also stated that "colossal in the trade is generally 4″ and larger not 3¾." Size designations in the standards are not requirements of the grades but provide reasonable guidelines that may be specified in connection with the grades. These guidelines provide the basis for a common trading language. However, industry members may specify any size qualifications they agree to in their contracts. AMS believes that the consolidation of the separate size classifications from each standard into one has achieved the intended purpose of uniformity and clarity. The colossal size designation provides specifications (3¾ inches minimum) that would allow for a lot of onions that are packed to 4 inches minimum yet still maintains a reasonable distinction from the next smaller size designation. Therefore, AMS has decided to leave the sizes as designated in the proposal.

Two produce organization groups sent in identical comments in regards to the proposed U.S. No. 1 Peeled grade. They suggested the grade be substantially rewritten as a "U.S. Peeled grade" and

specified basic requirements, free from defects, free from serious damage defects and other requirements. The comments suggested a grade for peeled onions that was substantially different than the one proposed. Having considered these comments and other comments that give general agreement to the proposal as written or make no specific comment to this issue, AMS has decided to not include the proposed U.S. No. 1 Peeled grade in this standard change. AMS believes further investigation of the need for a peeled onion grade and what requirements would best serve the industry should be undertaken based on these comments.

Two comments were received that addressed specific points they wished to see changed from the proposal.

One grower/packer/shipper commented that "we would like to see the tolerance for decay increased to 4% and total defects allowed to 7% for the other than Bermuda-Grano-Granex type onions. This would save millions of dollars in food claims each year that would go to the farmers and not adversely affect the ultimate return to the receiver with consumer prices eventually falling." The tolerances in the "Other Than" standard have been in place since the inception of the standard in 1920. Changes to the tolerances were not included in the proposed rule because there was no request to do so and AMS saw no need to change that which has been working successfully for the life of this standard. Accordingly, AMS will not be changing any tolerance percentages in this final rule.

A grower/packer/shipper of pearl and boiler onions had some comments in regards to the proposed 20 pound minimum sample size for consumer size packages. In the proposal, Samples for grade and size determination (sections 51.3201 in "BGG" and 51.2839 in "Other Than") states in part "When individual packages contain less than 20 pounds, a sufficient number of adjoining packages are opened to provide at least a twenty pound sample." This commentor pointed out that for the very small pearl or boiler onions which are packed in packages from 10 to 16 ounces this minimum sample size would impose severe hardship. The commentor points out that "the proposed minimum sampling requirement of twenty pounds will necessitate the opening and examination of 32 packages of pearl onions and 20 packages of boiler onions per sample * * * Therefore, for a full semi-trailer load of these consumer size packages, a minimum of 256 packages (approximately *9,600* bulbs) of pearls and a minimum of 160 packages (approximately *3,025* bulbs) of boilers would need to be examined under this proposed sampling requirement. We believe this is an excessively large number of bulbs, and the cost of inspection would be prohibitive." AMS believes that this comment has merit. There would be an unnecessary burden to both industry and the inspection service to sample and inspect as many packages as needed for these smaller size onions under the proposed sampling guidelines. Therefore, AMS has decided to provide an exemption from the 20 pound sample size for onions packed to meet 2¼ inch and smaller maximum size. For these onions the samples may consist of either 20 pounds or the individual package. Samples for grade and size determination will now read: "Individual samples shall consist of at least 20 pounds for onions packed to meet larger than 2¼ inches maximum diameter. When individual packages contain 20 pounds or more and the onions are packed for Large or Jumbo size or larger the package shall be the sample. When individual packages contain less than 20 pounds, a sufficient number of adjoining packages are opened to provide at least a 20 pound sample, except that for onions packed to meet 2¼ inches maximum diameter or smaller, the sample may consist of either 20 pounds or the individual package."

One comment received from a major receiver's association was opposed to the proposal in general. They recommend that AMS retain the existing standards unchanged citing that "Increasing the tolerance of any grade and/or condition factors as well as increasing the defect percentage of any specific grade and/or condition factors or a combination thereof will result in a reduction of the existing quality standards." However, no tolerance changes are included in this standard revision. Further, the revisions to these onion standards are strictly for clarification, uniformity and conformity to current harvesting, handling, and marketing practices. Accordingly, no changes to the proposed standards are being made based on this comment.

Two comments received did not address the provisions of the proposal. One was from an individual consumer and the other was from a grower/packer/shipper.

A copy of the proposed rule was provided to the Agricultural Research Service (ARS) for help in identifying studies, data collection or other information relevant to the possible effect of the proposed revision on pesticide use. ARS reported that they were unable to find much information on the subject. The information that was found by ARS proved not to be relevant.

The Agricultural Marketing Service (AMS) develops and improves standards of quality, condition, grade, and packaging to enhance the marketing of agricultural commodities by fostering consistency in commercial practices. The Agency has determined this final rule will enhance the marketing of onions. The provisions of this final rule are the same as those in the proposed rule except for the changes noted above in response to the comments received, and several minor editorial changes made for clarity.

Accordingly, this revision shall become effective 30 days after publication in the **Federal Register**.

PART 51—[AMENDED]

For reasons set forth in the preamble, 7 CFR Part 51 is amended as follows:

1. The authority citation for 7 CFR Part 51 continues to read as follows:

Authority: 7 U.S.C. 1622, 1624.

2. In Part 51, Subpart—United States Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Types) is revised to read as follows:

Subpart—United States Standards for Grades of Onions (Other Than Bermude-Granex-Grano and Creole Types)

Grades

§ 51.2830 U.S. No. 1.

U.S. No. 1 consists of onions which meet the following requirements:

(a) Basic requirements:
(1) Similar varietal characteristics;
(2) Mature;
(3) Fairly firm; and,
(4) Fairly well shaped.
(b) Free from:
(1) Decay;
(2) Wet sunscald;
(3) Doubles;
(4) Bottlenecks; and,
(5) Scallions.
(c) Free from damage caused by:
(1) Seedstems;
(2) Splits;
(3) Tops;
(4) Roots;
(5) Dry sunken areas;
(6) Sunburn;
(7) Sprouts;
(8) Freezing;
(9) Peeling;
(10) Cracked fleshy scales;
(11) Watery scales;
(12) Dirt or staining;
(13) Foreign matter;
(14) Mechanical;
(15) Translucent scales;
(16) Disease;
(17) Insects; and,
(18) Other means.
(d) For tolerances see § 51.2837.

(e) Size. Unless otherwise specified the diameter shall be not less than 1½ inches, and yellow, brown, or red onions shall have 40 percent or more, and white onions shall have 30 percent or more, by weight, of the onions in any lot 2 inches or larger in diameter.

(f) When a percentage of the onions is specified to be of any certain size or larger, no part of any tolerance shall be allowed to reduce the specified percentage, but individual packages in a lot may have as much as 25 percentage points less than the percentage specified, except that individual packages containing 10 pounds or less shall have no requirements as to percentage of a certain size or larger: *Provided*, that any lot, regardless of package size, shall average within the percentage specified. (See §§ 51.2836 and 51.2837)[1]

§ 51.2831 U.S. Export No. 1.

U.S. Export No. 1 consists of onions which meet the following requirements:

(a) Basic requirements:
(1) Similar varietal characteristics;
(2) Mature;
(3) Dormant;
(4) Fairly firm; and,
(5) Fairly well shaped.
(b) Free from:
(1) Decay;
(2) Wet sunscald;
(3) Doubles;
(4) Bottlenecks; and,
(5) Scallions.
(c) Free from damage caused by:
(1) Seedstems;
(2) Splits;
(3) Tops;
(4) Roots;
(5) Dry sunken areas;
(6) Sunburn;
(7) Sprouts;
(8) Freezing;
(9) Peeling;
(10) Cracked fleshy scales;
(11) Watery scales;
(12) Dirt or staining;
(13) Foreign matter;
(14) Mechanical;
(15) Translucent scales;
(16) Disease;
(17) Insects; and,
(18) Other means.

(d) Unless otherwise specified onions are packed in accordance with Export Packing Requirements set forth in § 51.2840. (See § 51.2837.)

§ 51.2832 U.S. Commercial.

U.S. Commercial consists of onions which meet the following requirements:

(a) Basic requirements:
(1) Similar varietal characteristics;
(2) Mature;
(3) Not soft or spongy; and,
(4) Not badly misshapen.
(b) Free from:
(1) Decay;
(2) Wet sunscald;
(3) Doubles;
(4) Bottlenecks; and,
(5) Scallions.
(c) Free from damage caused by:
(1) Seedstems;
(2) Tops;
(3) Roots;
(4) Dry sunken areas;
(5) Sunburn;
(6) Sprouts;
(7) Freezing;
(8) Cracked fleshy scales;
(9) Watery scales;
(10) Mechanical;
(11) Translucent scales;
(12) Disease;
(13) Insects; and,
(14) Other means.
(d) Free from serious damage caused by:
(1) Staining;
(2) Dirt; and,
(3) Other foreign matter.
(e) For tolerances see § 51.2837.

(f) Size. Unless otherwise specified, the diameter shall be not less than 1½ inches. (See §§ 51.2836 and 51.2837.)

§ 51.2833 U.S. No. 1 Boilers.

U.S. No. 1 Boilers consists of onions which meet all the requirements for the U.S. No. 1 grade except for size. (See § 51.2830.) Size: The diameter of onions of this grade shall be not less than 1 inch nor more than 1⅞ inches. (See § 51.2837.)

§ 51.2834 U.S. No. 1 Picklers.

U.S. No. 1 Picklers consists of onions which meet all the requirements for the U.S. No. 1 grade except for size. (See § 51.2830.) Size: The maximum diameter of onions of this grade shall be not more than 1 inch. (See § 51.2837.)

§ 51.2835 U.S. No. 2.

U.S. No. 2 consists of onions which meet the following requirements:

(a) Basic requirements:
(1) One type;
(2) Mature; and,
(3) Not soft or spongy.
(b) Free from:
(1) Decay;
(2) Wet sunscald; and,
(3) Scallions.
(c) Free from serious damage caused by:
(1) Watery scales;
(2) Dirt or Staining;
(3) Foreign Matter;
(4) Seedstems;
(5) Sprouts;
(6) Mechanical;
(7) Dry sunken areas;
(8) Disease;
(9) Freezing;
(10) Insects; and,
(11) Other means.
(d) For tolerances see § 51.2837.

(e) Size. Unless otherwise specified, the diameter shall not be less than 1½ inches. (See §§ 51.2836 and 51.2837.)

Size Classifications

§ 51.2836 Size classifications.

The size of onions may be specified in accordance with one of the following classifications.

---

[1] Any lot of onions quoted as being of size smaller than 1½ inches minimum, such as "U.S. No. 1, 1¼ inches min." is not required to meet the percentages which shall be 2 inches or larger as specified in the U.S. No. 1 grade.

Size designation	Minimum diameter		Maximum diameter	
	Inches	Millimeters	Inches	Millimeters
Small	1	25.4	2¼	57.2
Repacker/Prepacker [1]	1¾	44.5	3	76.2
Medium	2	50.8	3¼	82.6
Large or Jumbo	3	76.2	(2)	
Colossal	3¾	95.3	(2)	

[1] In addition to the sizes specified, a lot of onions designated as Repacker or Prepacker shall contain at least 60 percent or more 2 inches or larger in diameter.

[2] No requirement.

Tolerances

§ 51.2837 Tolerances.

In order to allow for variations incident to proper grading and handling in each of the foregoing grades the following tolerances, by weight, are provided as specified:

(a) For defects:

(1) *U.S. No. 1, U.S. Export No. 1, U.S. No. 1 Boilers and U.S. No. 1 Picklers grades.*

(i) Not more than 10 percent of the onions in a lot may be damaged by peeling; and,

(ii) Not more than 5 percent of the onions in a lot may be below the remaining requirements of these grades, but not more than two-fifths of this tolerance, or 2 percent, may be allowed for onions which are affected by decay or wet sunscald (see § 51.2839.)

(2) *U.S. Commercial and U.S. No. 2 grades.*

(i) Not more than 5 percent of the onions in a lot may be below the requirements of these grades, but not more than two-fifths of this tolerance, or 2 percent, may be allowed for onions which are affected by decay or wet sunscald. (See § 51.2839.)

(b) For off-size:

(1) *U.S. No. 1, U.S. No. 1 Boilers, U.S. Commercial, and U.S. No. 2 grades.* Not more than 5 percent of the onions in a lot may be below the specified minimum size, and not more than 10 percent may be above any specified maximum size. (See § 51.2839.)

(2) *U.S. No. 1 Pickler grade.* Not more than 10 percent of the onions in a lot may be above the maximum size specified for this grade. (See § 51.2839.)

Samples for Grade and Size Determination

§ 51.2838 Samples for grade and size determination.

Individual samples shall consist of at least 20 pounds for onions packed to meet larger than 2¼ inches maximum diameter. When individual packages contain 20 pounds or more and the onions are packed for Large or Jumbo size or larger the package shall be the sample. When individual packages contain less than 20 pounds, a sufficient number of adjoining packages are opened to provide at least a 20 pound sample, except that for onions packed to meet 2¼ inches maximum diameter or smaller, the sample may consist of either 20 pounds or the individual package.

Application of Tolerances

§ 51.2839 Application of tolerances.

Individual samples are subject to the following limitations:

(a) Samples which contain more than 20 pounds shall have not more than one and one half times a specified tolerance of 10 percent or more, and not more than double a specified tolerance of less than 10 percent, except that at least one defective and one off-size onion may be permitted in any sample: *Provided*, that en-route or at destination when onions in containers of 50 pounds or more are packed to a minimum size of 3 inches or larger not more than three onions or more than 4 percent (whichever is the larger amount) may be affected by decay or wet sunscald: *And provided further*, that the averages for the entire lot are within the tolerances specified for the grade; and,

(b) Samples which contain 20 pounds or less shall have not more than double the tolerance specified, except that at least one defective and one off-size onion may be permitted in any sample: *Provided*, that the averages for the entire lot are within the tolerances specified for the grade.

Export Packing Requirements

§ 51.2840 Export packing requirements.

Onions specified as meeting Export Packing Requirements shall be packed in containers having a net capacity of 25 kilograms (approximately 56 pounds).

Definitions

§ 51.2841 Mature.

Mature means well cured. Midseason onions which are not customarily held in storage shall be considered mature when harvested in accordance with good commercial practice at a stage which will not result in the onions becoming soft or spongy.

§ 51.2842 Dormant.

Dormant means that at least 90 percent of the onions in any lot show no evidence of growth as indicated by distinct elongation of the growing point or distinct yellow or green color in the tip of the growing point.

§ 51.2843 Fairly firm.

Fairly firm means that the onion may yield slightly to moderate pressure but is not appreciably soft or spongy.

§ 51.2844 Fairly well shaped.

Fairly well shaped means having the shape characteristic of the variety, but onions may be slightly off-type or slightly misshapen.

§ 51.2845 Wet sunscald.

Wet sunscald means sunscald which is soft, mushy, sticky or wet.

§ 51.2846 Doubles.

Doubles means onions which have developed more than one distinct bulb joined only at the base.

§ 51.2847 Bottlenecks.

Bottlenecks are onions which have abnormally thick necks with only fairly well developed bulbs.

§ 51.2848 Scallions.

Scallions are onions which have thick necks and relatively small and poorly developed bulbs.

§ 51.2849 Damage.

Damage means any specific defect described in this section; or any equally objectionable variation of any one of these defects, any other defect, or any combination of defects, which materially detracts from the appearance, or the edible or marketing quality of the onions. The following specific defects shall be considered as damage:

(a) Seedstems which are tough or woody, or which are more than ¼ inch in diameter;

(b) Splits when onions with two or more hearts are not practically covered by one or more outer scales;

OL
60
SS
1
7
4
SE
8
995
UMI

(c) Tops when more than 30 percent of the onions in a lot have tops 3 inches or more in length;

(d) New roots when most roots on an individual onion have grown to a length of 1 inch or more in length;

(e) Dry roots when more than 20 percent of the onions in a lot have practically all roots 2 inches or more in length;

(f) Dry sunken areas when the affected areas exceed the equivalent to that of a circle ½ inch in diameter on an onion 2¾ inches in diameter which does not have the outer papery scale covering the affected areas or when the affected areas exceed the equivalent to that of a circle ¾ inch in diameter on an onion 2¾ inches in diameter which has the outer papery scale covering the affected areas. Correspondingly lesser or greater areas are allowed on smaller or larger onions;

(g) Sunburn when more than 33 percent of the onions in a lot have a medium green color on one-third of the surface;

(h) Sprouts when visible, or when concealed within the dry top and more than ¾ inch in length on an onion 2 inches or larger in diameter, or proportionately shorter on smaller onions;

(i) Peeling when more than one-half of the thin papery skin is missing, leaving the underlying fleshy scale unprotected;

(j) Cracked fleshy scales when one or more of the fleshy scales are cracked;

(k) Watery scales when more than the equivalent of the entire outer fleshy scale is affected by an off-color, watersoaked condition. The off-color must be of some shade of brown or yellow;

(l) Dirt, staining or other foreign matter when more than 20 percent of the onions in a yellow, brown or red lot, or more than 15 percent of the onions in a white lot are appreciably stained. Onions with adhering dirt or other foreign matter shall be judged on the same basis as stained onions;

(m) Mechanical when any cut extends deeper than one fleshy scale, or when any bruise breaks a fleshy scale; and,

(n) Translucent scales when more than the equivalent of two entire outer fleshy scales have a watersoaked condition.

§51.2850 Diameter.

Diameter means the greatest dimension measured at right angles to a straight line running from the stem to the root.

§51.2851 Badly misshapen.

Badly misshapen means that the onion is so misshapen that its appearance is seriously affected.

§51.2852 Serious damage.

Serious damage means any specific defect described in this section; or any equally objectionable variation of any one of these defects, any other defect, or any combination of defects, which seriously detracts from the appearance, or the edible or marketing quality of the onions. The following specific defects shall be considered as serious damage:

(a) Watery scales when more than the equivalent of two entire outer fleshy scales are affected by an off-colored, watersoaked condition. The off-color must be of some shade of brown or yellow;

(b) Dirt, staining or other foreign matter when more than 25 percent of the onions in a lot are badly stained. Onions with adhering dirt or other foreign matter shall be judged on the same basis as stained onions;

(c) Seedstems when more than ½ inch in diameter;

(d) Sprouts when the visible length is more than ½ inch;

(e) Mechanical when any cut extends deeper than two fleshy scales, or when cuts seriously damage the appearance of the onion; and,

(f) Dry sunken areas when extending deeper than one fleshy scale, or when affecting an area equivalent to that of a circle 1 inch in diameter on an onion 2¾ inches in diameter, or correspondingly lesser or greater areas on smaller or larger onions.

§51.2853 One type.

One type means that the onions are within the same general color category.

Subpart—United States Standards for Grades of Bermuda-Granex-Grano Type Onions

Grades

§51.3195 U.S. No. 1.

U.S. No. 1 consists of onions which meet the following requirements:

(a) Basic requirements:
(1) Similar varietal characteristics;
(2) Mature;
(3) Fairly firm; and,
(4) Fairly well shaped.
(b) Free from:
(1) Decay;
(2) Wet sunscald;
(3) Doubles; and,
(4) Bottlenecks.
(c) Free from damage caused by:
(1) Seedstems;
(2) Splits;
(3) Dry sunken areas;
(4) Sunburn;
(5) Sprouting;
(6) Staining;
(7) Dirt or foreign material;
(8) Mechanical;
(9) Tops;
(10) Roots;
(11) Translucent scales;
(12) Watery scales;
(13) Moisture;
(14) Disease;
(15) Insects; and,
(16) Other means.

(d) For size and tolerances see §§ 51.3198 and 51.3199.

§51.3196 U.S. Combination.

U.S. Combination consists of a combination of U.S. No. 1 and U.S. No. 2 onions: *Provided*, That at least 50 percent, by weight, of the onions in each lot meet the requirements of U.S. No. 1 grade. (See §§ 51.3198 and 51.3199.)

§51.3197 U.S. No. 2.

U.S. No. 2 consists of onions which meet the following requirements:

(a) Basic requirements:
(1) Similar varietal characteristics; and,
(2) Not soft or spongy.
(b) Free from:
(1) Decay;
(2) Wet sunscald; and,
(3) Bottlenecks.
(c) Free from serious damage caused by:
(1) Seedstems;
(2) Dry sunken areas;
(3) Sprouting;
(4) Staining;
(5) Dirt or other foreign material;
(6) Mechanical;
(7) Watery scales;
(8) Insects;
(9) Disease; and,
(10) Other means.
(d) For size and tolerances see §§ 51.3198 and 51.3199.

Size Classifications

§51.3198 Size classifications.

Size shall be specified in connection with the grade in terms of minimum diameter, range in diameter, minimum diameter with a percentage of a certain size or larger, or in accordance with one of the size classifications listed below: *Provided*, that unless otherwise specified, onions shall not be less than 1½ inches in diameter, with 60 percent or more 2 inches or larger in diameter.

Size designation	Minimum diameter		Maximum diameter	
	Inches	Millimeters	Inches	Millimeters
Small	1	25.4	2¼	57.2
Repacker/Prepacker[1]	1¾	44.5	3	76.2
Medium	2	50.8	3¼	82.6
Large or Jumbo	3	76.2	(2)	....
Colossal	3¾	95.3	(2)	....

[1] In addition to the sizes specified, a lot of onions designated as Repacker or Prepacker shall contain at least 60 percent or more 2 inches or larger in diameter.

[2] No requirement.

Tolerances

§51.3199 Tolerances.

In order to allow for variations incident to proper grading and handling in each of the foregoing grades the following tolerances, by weight, are provided as specified:

(a) For defects:

(1) *U.S. No. 1 and U.S. No. 2 grades.* Not more than 10 percent of the onions in a lot may fail to meet the requirements of these grades, but not more than one-fifth of this tolerance, or 2 percent, may be allowed for onions which are affected by decay or wet sunscald.

(2) *U.S. Combination grade.* When applying the foregoing tolerances to this grade no part of any tolerance shall be allowed to reduce, for the lot as a whole, the 50 percent of onions of the U.S. No. 1 grade, but individual containers shall have not less than 40 percent of the U.S. No. 1 grade.

(b) For size:

(1) Not more than 5 percent of the onions in a lot may be smaller than the minimum diameter specified. In addition, not more than 10 percent of the onions in a lot may be larger than the maximum diameter specified.

(2) When a percentage of the onions is specified to be a certain size and larger, individual packages containing more than 10 pounds may have not less than one-half of the percentage specified: *Provided*, that the entire lot averages within the percentage specified.

Samples for Grade and Size Determination

§51.3200 Samples for grade and size determination.

Individual samples shall consist of at least 20 pounds for onions packed to meet larger than 2¼ inches maximum diameter. When individual packages contain 20 pounds or more and the onions are packed for Large or Jumbo size or larger the package shall be the sample. When individual packages contain less than 20 pounds, a sufficient number of adjoining packages are opened to provide at least a 20 pound sample, except that for onions packed to meet 2¼ inches maximum diameter or smaller, the sample may consist of either 20 pounds or the individual package.

Application of Tolerances

§51.3201 Application of tolerances.

Individual samples are subject to the following limitations:

(a) Samples which contain more than 20 pounds shall have not more than one and one half times a specified tolerance of 10 percent or more, and not more than double a specified tolerance of less than 10 percent, except that at least one defective and one off-size onion may be permitted in any sample: *Provided*, that en-route or at destination when onions in containers of 50 pounds or more are packed to a minimum size of 3 inches or larger not more than three onions or more than 4 percent (whichever is the larger amount) may be affected by decay or wet sunscald: *And provided further*, that the averages for the entire lot are within the tolerances specified for the grade; and,

(b) Samples which contain 20 pounds or less shall have not more than double the tolerance specified, except that at least one defective and one off-size onion may be permitted in any sample: *Provided*, that the averages for the entire lot are within the tolerances specified for the grade.

Definitions

§51.3202 Similar varietal characteristics.

Similar varietal characteristics means that the onions in any container are similar in color, shape and character of growth.

§51.3203 Mature.

Mature means that the onion is fairly well cured, and at least fairly firm.

§51.3204 Fairly firm.

Fairly firm means that the onion may yield slightly to moderate pressure but is not appreciably soft or spongy.

§51.3205 Fairly well shaped.

Fairly well shaped means that the onion shows the characteristic shape, not appreciably three-, four- or five-sided, thick necked or badly pinched.

§51.3206 Wet sunscald.

Wet sunscald means any sunscald which is soft, mushy, sticky or wet.

§51.3207 Doubles.

Doubles means onions which have developed more than one distinct bulb joined only at the base.

§51.3208 Bottlenecks.

Bottlenecks means onions which have abnormally thick necks with only fairly well developed bulbs.

§51.3209 Damage.

Damage unless otherwise specifically defined in this section, means any defect which materially affects the appearance, or the edible or shipping quality of the onions. Any one of the following defects, or combination of defects the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Seedstems which are tough or woody, or which are more than ¼ inch in diameter;

(b) Splits when well cured onions are not practically covered by an outer scale, or when fairly well cured onions are not completely covered by one outer scale;

(c) Dry sunken areas when the affected areas exceed the equivalent to that of a circle ½ inch in diameter on an onion 2¾ inches in diameter which does not have the outer papery scale covering the affected areas or when the affected areas exceed the equivalent to that of a circle ¾ inch in diameter on an onion 2¾ inches in diameter which has the outer papery scale covering the affected areas. Correspondingly lesser or greater areas are allowed on smaller or larger onions;

(d) Sunburn when dark green in color and affecting an area equivalent to that of a circle 1 inch in diameter on an onion 2¾ inches in diameter or correspondingly smaller or larger areas on smaller or larger onions, or when medium to light green in color and affecting more than 10 percent of the surface of the onion;

(e) Sprouting when any sprout is visible, or when concealed within the neck scales and are more than ¾ inch in length on an onion 2 inches or larger in diameter, or proportionately shorter on smaller onions;

(f) Staining, dirt or other foreign material when more than 20 percent of the onions in a yellow, brown or red lot, or more than 15 percent of the onions in a white lot are appreciably stained. Onions with adhering dirt or other foreign matter shall be judged on the same basis as stained onions;

(g) Mechanical when any cut extends deeper than one fleshy scale, or when any bruise breaks a fleshy scale;

(h) Tops when more than 30 percent of the onions in a lot have tops 3 inches or more in length;

(i) New roots when most roots on an individual onion have grown to a length of 1 inch or more;

(j) Dry roots when practically all roots are 2 inches or more in length;

(k) Translucent scales when more than the equivalent of two entire outer fleshy scales have a watersoaked condition; and,

(l) Watery scales when more than the equivalent of the entire outer fleshy scale is affected by an off-color, watersoaked condition. The off-color must be of some shade of brown or yellow.

§51.3210 Serious damage.

Serious damage unless otherwise specifically defined in this section, means any defect which seriously affects the appearance, or the edible or shipping quality of the onions. Any one of the following defects, or any combination of defects the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Seedstems when more than ½ inch in diameter;

(b) Dry sunken areas when extending deeper than one fleshy scale, or when affecting an area equivalent to that of a circle 1 inch in diameter on an onion 2¾ inches in diameter, or correspondingly lesser or greater areas on smaller or larger onions;

(c) Sprouting when any visible sprout is more than ½ in length;

(d) Staining, dirt or foreign material when more than 25 percent of the onions in any lot are badly stained. Onions with adhering dirt or other foreign matter shall be judged on the same basis as stained onions;

(e) Mechanical when any cut extends deeper than two fleshy scales, or when cuts seriously damage the appearance of the onion; and,

(f) Watery scales when more than the equivalent of two entire outer fleshy scales are affected by an off-colored, watersoaked condition. The off-color must be of some shade of brown or yellow.

§51.3211 Diameter.

Diameter means the greatest dimension of the onion at right angles to a line running from the stem to the root.

Metric Conversion Table

§51.3212 Metric conversion table.

Inches	Millimeters *(mm)
⅛	3.2
¼	6.4
⅜	9.5
½	12.7
⅝	15.9
¾	19.1
⅞	22.2
1	25.4
1¼	31.8
1½	38.1
1¾	44.5
2	50.8
2½	63.5
2¾	69.9
3	76.2
3½	88.9
4	101.6

Part V

Department of Labor

Employment and Training Administration

Department of Education

Office of Vocational and Adult Education; School-to-Work Opportunities; Local Partnership Grants; Application Procedures; Notice

DEPARTMENT OF LABOR

Employment and Training Administration

DEPARTMENT OF EDUCATION

Office of Vocational and Adult Education; School-to-Work Opportunities; Local Partnership Grants; Application Procedures

AGENCIES: Employment and Training Administration, Department of Labor; Office of Vocational and Adult Education, Department of Education.

ACTION: Notice of availability of funds, solicitation for grant application (SGA), an administrative cost cap, a definition of administrative costs, and final selection criteria for School-to-Work Opportunities Local Partnership Grants.

SUMMARY: This notice announces the fiscal year (FY) competition for Local Partnership Grants authorized under Title III of the School-to-Work Opportunities Act of 1994 (the Act). This notice contains all of the necessary information and forms needed to apply for grant funding in FY 1995. The Departments also establish final selection criteria to be used in evaluating applications submitted under the Local Partnership Grants competition in FY 1995 and in succeeding years. The Departments also establish a definition for the term "administrative costs," as well as a 10 percent cap on administrative costs incurred by local partnerships receiving grants under Title III of the Act.

DATES: Applications for grant awards will be accepted commencing September 8, 1995. The closing date for receipt of applications is November 7, 1995, at 2 p.m. (Eastern time) at the following address. Telefacsimile (FAX) applications will NOT be accepted.

ADDRESSES: Applications must be mailed to: U.S. Department of Education, Application Control Center, Attention: CFDA #278C, Washington, D.C. 20202–4725.

FOR FURTHER INFORMATION CONTACT: Maria Kniesler, National School-to-Work Office. Telephone: (202) 401–6222. (This is not a toll-free number). Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Section A. Background

The Departments of Labor and Education are reserving funds appropriated for FY 1995 under Pub. L. 103–329 (the Act) for a competition for Local Partnership Grants authorized under Title III of the Act. In accordance with the authority provided in section 5 of the Act, the Departments have determined that the administrative provisions contained in the Education Department General Administrative Regulations (EDGAR) at 34 CFR Parts 74, 75, 77, 79, 80, 82, 85 and 86, will apply to grants awarded to local partnerships under this competition.

This notice contains a definition of the term "administrative costs," a 10 percent cap on administrative costs incurred by local partnerships receiving grants under Title III, and the selection criteria that will be used in evaluating applications submitted in response to this year's competition, and all of the other necessary information and forms needed to apply for grant funding.

Section B. Purpose

Under this competition, the Departments will award grants to local partnerships that have built a sound planning and development base for their school-to-work programs, to begin implementation of School-to-Work Opportunities initiatives that will become part of statewide School-to-Work Opportunities systems. These local initiatives will offer young Americans access to programs designed to prepare them for first jobs in high-skill, high-wage careers, and to increase their opportunities for further education and training.

Section C. Application Process

1. Eligible Applicants

A local entity that meets the definition of "local partnership" in section 4(11) of the Act, is eligible to apply for a Local Partnership Grant. However, local partnerships that are located in the eight States that were awarded School-to-Work Opportunities State Implementation Grants in 1994 are not eligible to apply for a Local Partnership Grant under this competition. These eight States are: Maine, Massachusetts, New York, New Jersey, Kentucky, Wisconsin, Michigan, and Oregon. In addition, it should be noted that local partnerships located in States that are slated to receive School-to-Work Opportunities State Implementation Grants in 1995 are eligible to apply for grants under this competition.

As defined in the Act, an eligible partnership must include employers, representatives of local educational agencies and local postsecondary educational institutions (including representatives of area vocational education schools, where applicable), local educators, representatives of labor organizations or nonmanagerial employee representatives, and students. Other entities appropriate to effective implementation of a local School-to-Work Opportunities initiative should also be included in the partnership.

Under section 302(a) of the Act a local partnership is eligible to receive only one (1) Local Partnership Grant.

2. State Comments

The local partnership must submit its application to the State for review and comment before submitting the application to the Departments, in accordance with section 303(a) of the Act. The application should be submitted to the State's School-to-Work Contact. A list of State School-to-Work Contacts is included in Appendix D of this notice. The Departments expect that the State School-to-Work Contact will provide all members of the State School-to-Work Partnership listed in section 213(b)(4)(A)-(K) of the Act, an opportunity to review and comment on the local partnership's application.

Of particular importance to the Departments are each State's comments on the consistency of the local partnership's planned activities with the State's plan for a comprehensive statewide School-to-Work Opportunities system and the relationship of any proposed activities with other local plans, especially if the grant applicant is not specifically identified as a local partnership within the State system.

In accordance with section 305 of the Act, if a State has an approved State School-to-Work Opportunities plan, the State must confirm that the plan submitted by the local partnership is in accordance with the State plan. The application from the local partnership must contain this confirmation.

Section 303(b)(1) of the Act requires each State to review and comment on a local partnership's application within 30 days from the date on which the State receives the application from the local partnership. Therefore, even though applicants have 60 days to apply for a Local Partnership Grant under this notice, they must provide their application to their State in time for the State to have at least 30 days before the due date to review and comment on their application.

Furthermore, under section 303(c)(2) of the Act, the State's comments must be included in the local partnership's application. However, if the State does not provide review and comment within the 30-day time period described above, the local partnership may submit the application without State comment. In such a case, the local partnership should provide proof that the State received a copy of the local partnership's application at least 30 days prior to the application due date.

3. Period of Performance

The period of performance for Local Partnership Grants is twelve months from the date of award by the Departments.

4. Option to Extend

Local Partnership Grants may be extended up to four additional years, but not beyond the second year of a School-to-Work Opportunities State Implementation Grant for the State in which the partnership is located. Extensions will be based upon availability of funds and the progress of the local partnership towards its objectives as approved in its application and will be subject to the annual approval of the Secretaries of Labor and Education (the Secretaries). It is likely that the amount of Federal funds, if any, that are awarded to local partnerships under this notice in subsequent years will decrease.

5. Available Funds

Approximately $15 million is available for this competition.

6. Estimated Range of Awards

The amount of an award under this competition will depend upon the scope, quality, and comprehensiveness of the proposed initiative and the relative size of the community to be served by the local partnership.

The Departments expect that first-year grant amounts will be about $200,000 for areas with populations under 250,000; $200,000 to $300,000 for areas with populations of 250,000 to 499,999; $300,000 to $500,000 for areas with populations of 500,000 to 749,999; $500,000 to $700,000 for areas with populations of 750,000 to 999,999; $700,000 to $1,000,000 for areas with populations of 1,000,000 to 1,499,999; and upwards of $1,500,000 for areas with populations of 1,500,000 or more. These ranges are provided to assist applicants in developing plans. The exact amounts awarded may exceed or be less than the amounts reflected in these ranges.

7. Estimated Number of Awards

The Departments expect to award 25–35 grants under this competition.

Note: The Departments are not bound by any estimates in this notice.

8. Reporting Requirements/Deliverables

(a) Reporting Requirements

The local partnership will be required, at a minimum, to submit—

- Quarterly Financial Reports (SF 269–A);
- Quarterly Narrative Progress Reports;
- An Annual Continuation Application package, if appropriate, including—
- A revised SF–524 and renewed Assurances and Certifications;
- A narrative report describing progress toward stated goals, and identifying goals and objectives for the coming year;
- Annual financial reports (ED Form 524B, and SF 269);
- Budget Information for Upcoming Years;
- An Annual Performance Report providing data on performance measures; and
- A close-out report at the end of the grant.

(b) Deliverables

The local partnership will be required to—

- Provide information on best practices and innovative school- and work-based curricula suitable for dissemination to States and other stakeholders;
- Participate in two grantee meetings per year sponsored by the National School-to-Work Office;
- Act as a host to outside visitors who are interested in developing and implementing School-to-Work Opportunities initiatives and to other visitors interested in the replication, adaptation or impact of successful program elements; and
- Participate as needed in evaluation and special data collection activities.

9. Application Transmittal Instructions

An application for an award must be mailed or hand-delivered by the closing date.

(A) Applications Delivered by Mail

An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention CFDA # 278C, 600 Independence Avenue, S.W., Washington, D.C 20202–4725.

An application must show proof of mailing consisting of one of the following:

- A legibly dated U.S. Postal Service Postmark.
- A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.
- A dated shipping label, invoice, or receipt from a commercial carrier.
- Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

- A private metered postmark.
- A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office. An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

(B) Applications Delivered by Hand

An application that is hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building 3, 7th and D Streets SW., Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays and Federal Holidays.

Individuals delivering applications must use the D Street entrance. Proper identification is necessary in order to enter the building.

In order for an application sent through a courier service to be considered timely, the courier service must be in receipt of the application on or before the closing date.

Section D. Organization and Content of Applications

Applicants are encouraged to submit an original and four copies of their application. The Departments suggest that the application be divided into five distinct parts: budget and certifications, abstract, State comments, program narrative and appendices. To ensure a comprehensive and expedient review, the Departments strongly suggest that applicants submit an application formatted as seen below:

Table of Contents

I. Budget and Certifications

Part I should contain the Standard Form SF 424, "Application for Federal Assistance," and SF 524, "Budget." All copies of the SF 424 must have original signatures of the designated fiscal agent. In addition, the budget should include—on a separate page or pages—a detailed cost breakout of each line item on SF 524. All assurances and certifications included in this notice should also be included in Part I of the application.

II. Abstract

Part II should consist of a one-page abstract summarizing the essential components and key features of the local partnership's plan.

III. State Comments

Part III should contain the State's comments on the application. Details on this section can be found under State Comments heading of this notice.

IV. Program Narrative

Part IV should contain the application narrative that demonstrates the applicant's plan and capabilities in accordance with the selection criteria contained in section F of this notice. In order to assist applicants in the preparation of their applications and to facilitate expeditious evaluation by the panel, applicants should describe their proposed plan in light of each of the selection criteria. No cost data or reference to price should be included in this part of the application. The Departments strongly request that applicants limit the program narrative section to no more than 40 one-sided, double-spaced pages.

V. Appendices

All applicable appendices, including letters of support, resumes and organizational charts, should be included in this section. The Departments recommend that all appendix entries cross-reference the applicable sections in the program narrative.

Note: Applicants are advised that the peer review panels evaluate each application solely on the basis of the selection criteria contained in this notice, and the School-to-Work Opportunities Act. Appendices may be used to provide supporting information. However, in scoring applications, reviewers are required to take into account only information that is presented in the application narrative, which must address the selection criteria, and requirements of the Act. Letters of support are welcome, but applicants should be aware that support letters contained in the application will strengthen the application only if they contain commitments that pertain to the selection criteria.

Section E. Safeguards

The Departments will apply certain safeguards, as required under section 601 of the Act, to School-to-Work Opportunities programs funded under this notice. The application must include a brief assurance that the following safeguards will be implemented and maintained throughout all program activities:

(a) No student shall displace any currently employed worker (including a partial displacement, such as a reduction in the hours of non-overtime work, wages, or employment benefits).

(b) No School-to-Work Opportunities program shall impair existing contracts for services or collective bargaining agreements, and no program funded under this notice shall be undertaken without the written concurrence of the labor organization and employer concerned.

(c) No student shall be employed or fill a job—

(1) When any other individual is on temporary layoff, with the clear possibility of recall, from the same or any substantially equivalent job with the participating employer; or

(2) When the employer has terminated the employment of any regular employee or otherwise reduced its workforce with the intention of filling the vacancy so created with the student.

(d) Students shall be provided with adequate and safe equipment and safe and healthful workplaces in conformity with all health and safety requirements of Federal, State, and local law.

(e) Nothing in the Act shall be construed so as to modify or affect any Federal or State law prohibiting discrimination on the basis of race, religion, color, ethnicity, national origin, gender, age, or disability.

(f) Funds awarded under the Act shall not be expended for wages of students or workplace mentors.

(g) The grantee shall implement and maintain such other safeguards as the Secretaries may deem appropriate in order to ensure that School-to-Work Opportunities participants are afforded adequate supervision by skilled adult workers, or to otherwise further the purposes of the Act.

Section F. Waivers

Under Title V of the Act the Secretaries may waive certain Federal requirements that impede the ability of a State or local partnership to carry out the purposes of the Act. Only local partnerships in States with approved School-to-Work Opportunities plans may apply for waivers. A local partnership that seeks a waiver should contact its State School-to-Work Contact to determine what documentation is required and to whom it should be sent.

In May, 1995, the National School-to-Work Opportunities Office issued a document entitled "School-to-Work Opportunities Waiver and Plan Approval Process Questions and Answers." This document was sent to every Governor and State School-to-Work Contact. The document contains answers to many of the questions that localities may have when preparing their waiver requests. Local Partnerships interested in applying for waivers should contact the National School-to-Work Opportunities Office or their State School-to-Work Contact for a copy of the waivers document.

Section G. Bidders' Conferences

Bidders' Conferences for interested School-to-Work Opportunities Local Partnership representatives are scheduled from 1:00 p.m. to 4:00 p.m., on the dates and locations listed below:

- September 15, 1995, Bartle Hall, 13th and Broadway, Room 2210, Kansas City, Missouri 64106.
- September 18, 1995, Jackson Federal Building, 915 2nd Avenue, North and South Auditorium, 4th Floor, Seattle, Washington 98174.

Participants at the conferences will receive a detailed description of the School-to-Work Opportunities Act, and the selection criteria and how they will be applied, and will have the opportunity to ask questions of Federal School-to-Work officials.

All partnerships must preregister by faxing the names and addresses of up to three members of the local partnership planning to attend, the name of the local partnership, and a phone number to: Kevin Shelton, Training and Technical Assistance Corporation, 2409 18th, NW., Washington, DC; FAX #: (202) 408–8282.

Questions regarding the solicitation may be submitted in advance. If you are unable to attend the Bidders' Conference, but would like the conference materials and a conference transcript, submit your request via fax to the fax number listed above. All information must be submitted no later than September 13, 1995. Conferees will be sent a confirmation along with hotel accommodation information once their registration has been received.

Local Partnership Grant Competition

Analysis of Comments and Changes

On May 25, 1995, the Departments of Labor and Education published a notice containing proposed selection criteria, a 10 percent cap on administrative costs, and a definition of the term "administrative costs" for this competition and competitions in succeeding years in the **Federal Register** (60 FR 27812–27814). In response to the invitation to comment, 34 parties submitted comments. An analysis of the comments received in response to the publication of that notice and of the changes made to the selection criteria, administrative cost cap, and definition

since publication of the notice of proposed selection criteria and proposed definition, is published as an appendix to this notice.

School-to-Work Local Partnership Grants— Administrative Cost Cap

The Departments are applying the 10 percent cap on administrative costs contained in section 215(b)(6) of the Act to local partnerships receiving grants directly under this competition. Section 215(b)(6) of the Act applies the 10 percent administrative cap to subgrants received by local partnerships from a State. The Departments have concluded that applying the 10 percent cap to local partnerships under Title III of the Act is consistent with the Act's intent and its broader limitations on administrative costs. Further, this limitation is consistent with section 305 of Title III, which requires conformity between School-to-Work Opportunities plans of local partnerships and State School-to-Work Opportunities plans.

Definition

All definitions in the Act apply to local School-to-Work Opportunities systems funded under this and future Local Partnership Grant competitions. Since the Act does not contain a definition of the term "administrative costs" as used in section 217 of the Act, the Departments will apply the following definition to this and future competitions for Local Partnership Grants.

The term "administrative costs" means the activities of a local partnership that are necessary for the proper and efficient performance of its duties under the Local Partnership Grant pursuant to the School-to-Work Opportunities Act and that are not directly related to the provision of services to participants or otherwise allocable to the program's allowable activities listed in section 215(b)(4) and section 215(c) of the Act. Administrative costs may be either personnel or non-personnel costs, and may be either direct and indirect. Costs of administration include those costs that are related to this grant in such categories as—

A. Costs of salaries, wages, and related costs of the grantee's staff engaged in—

- Overall system management, system coordination, and general administrative functions;
- Preparing program plans, budgets, and schedules, as well as applicable amendments;
- Monitoring of local initiatives, pilot projects, subrecipients, and related systems and processes;
- Procurement activities, including the award of specific subgrants, contracts, and purchase orders;
- Developing systems and procedures, including management information systems, for ensuring compliance with the requirements under the Act;
- Preparing reports and other documents related to the Act; and
- Coordinating the resolution of audit findings;

B. Costs for goods and services required for administration of the School-to-Work Opportunities system;

C. Costs of system-wide management functions; and

D. Travel costs incurred for official business in carrying out grants management or administrative activities.

Selection Criteria

Under the School-to-Work Opportunities Local Partnership Grant competition, the Departments will use the following selection criteria in evaluating applications and will utilize a peer review process in which review teams, including peers, will evaluate applications using the selection criteria and the associated point values. The Departments will base final funding decisions on the ranking of applications as a result of the peer review, and such other factors as replicability, sustainability, innovation, geographic balance, and diversity of system approaches.

Selection Criterion 1: Comprehensive Local School-to-Work Opportunities System (40 Points)

Considerations: In applying this criterion, reviewers will consider—

A. *20 Points.* The extent to which the partnership has designed a comprehensive local School-to-Work Opportunities plan that—

- Includes effective strategies for integrating school-based and work-based learning, integrating academic and vocational education, and establishing linkages between secondary and postsecondary education;
- Is likely to produce systemic change that will have substantial impact on the preparation of all students for a first job in a high-skill, high-wage career and in increasing their opportunities for further learning;
- Ensures all students will have a full range of options, including options for higher education, additional training and employment in high-skill, high-wage jobs;
- Ensures coordination and integration with existing school-to-work programs, and with related programs financed from State and private sources, with funds available from Federal education and training programs (such as the Job Training Partnership Act and the Carl D. Perkins Vocational and Applied Technology Education Act); and where applicable, communities designated as Empowerment Zones or Enhanced Enterprise Communities (EZ/EEC);
- Serves a geographical area that reflects the needs of the local labor market, and is able to adjust to regional structures that the State School-to-Work Opportunities plan may identify; and
- Targets occupational clusters that represent growing industries in the partnership's geographic area; and, where applicable, demonstrates that the clusters are included among the occupational clusters being targeted by the State School-to-Work Opportunities system.

B. *20 Points.* The extent to which the partnership's plan demonstrates its capability to achieve the statutory requirements and to effectively put in place the system components in Title I of the School-to-Work Opportunities Act, including—

- A work-based learning component that includes the statutory "mandatory activities" and that contributes to the transformation of workplaces into active learning components of the education system through an array of learning experiences such as mentoring, job-shadowing, unpaid work experiences, school-sponsored enterprises, and paid work experiences;
- A school-based learning component that provides students with high-level academic and technical skills consistent with academic standards that the State establishes for all students, including, where applicable, standards established under the Goals 2000: Educate America Act;
- A connecting activities component to provide a functional link between students' school and work activities, and between workplace partners, educators, community organizations and other appropriate entities;
- Effective processes for assessing skills and knowledge required in career majors, and issuing portable skill certificates that are benchmarked to high-quality standards such as those States will establish under the Goals 2000: Educate America Act, and for periodically assessing and collecting information on student outcomes, as well as a realistic strategy and timetable for implementing the process in concert with the State.
- A flexible School-to-Work Opportunities system that allows students participating in the local

system to develop new career goals over time, and to change career majors; and

- Effective strategies for: providing staff development for teachers, worksite mentors and other key personnel; developing model curricula and innovative instructional methodologies; expanding career and academic counseling in elementary and secondary schools; and utilizing innovative technology-based instructional techniques.

Selection Criterion 2: Quality and Effectiveness of the Local Partnership (20 Points)

Considerations: In applying this criterion, reviewers will refer to section 4(11) of the Act and consider—

- Whether the partnership's plan demonstrates an effective and convincing strategy for continuing the commitment of required partners and other interested parties in the local School-to-Work Opportunities system. As defined by the Act, partners must include employers, representatives of local educational agencies and local postsecondary educational institutions (including representatives of area vocational education schools, where applicable), local educators (such as teachers, counselors, or administrators), representatives of labor organizations or nonmanagerial employee representatives, and students, and may include other relevant stakeholders such as those listed in section 4(11)(B) of the Act, including employer organizations, community-based organizations, national trade associations working at the local levels, industrial extension centers, rehabilitation agencies and organizations, registered apprenticeship agencies, local vocational education entities, proprietary institutions of higher education, local government agencies, parent organizations, teacher organizations, vocational student organizations, private industry councils under JTPA, federally recognized Indian tribes, Indian organizations, and Alaska Native villages, and Native Hawaiian entities.
- Whether the partnership's plan demonstrates an effective and convincing strategy for continuing the commitment of workplace partners and other interested parties in the local School-to-Work Opportunities system;
- The effectiveness of the partnership's plan to include private sector representatives as joint partners with educators in both the design and the implementation of the local School-to-Work Opportunities system;
- The extent to which the local partnership has developed strategies to provide a range of opportunities for workplace partners to participate in the design and implementation of the local School-to-Work Opportunities system, including membership on councils and partnerships; assistance in setting standards, designing curricula, and determining outcomes; providing worksite experiences for teachers; helping to recruit other employers; and providing worksite learning activities for students such as mentoring, job shadowing, unpaid work experiences, and paid work experiences;
- The extent to which the roles and responsibilities of the key parties and any other relevant stakeholders, are clearly defined and are likely to produce the desired changes in the way students are prepared for the future.
- The extent to which the partnership demonstrates the capacity to build a quality local School-to-Work Opportunities system;
- Whether the partnership has included methods for sustaining and expanding the partnership, as the program expands in scope and size.

Selection Criterion 3: Participation of All Students (15 Points)

Considerations: In applying this criterion, reviewers will refer to the definition of the term "all students" in section 4(2) of the Act, and consider—

- The extent to which the partnership will implement effective strategies and systems: to provide all students with equal access to the full range of program components specified in sections 102 through 104 of the Act and related activities such as recruitment, enrollment and placement activities; and to ensure that all students have meaningful opportunities to participate in School-to-Work Opportunities programs;
- Whether the partnership has identified potential barriers to the participation of any students, and the degree to which it proposes effective ways of overcoming these barriers;
- The degree to which the partnership has developed realistic goals and methods for assisting young women to participate in School-to-Work Opportunities programs leading to employment in high-performance, high-paying jobs, including non-traditional jobs;
- The partnership's methods for ensuring safe and healthy work environments for students, including strategies for encouraging school to provide students with general awareness training in occupational safety and health as part of the school-based learning component, and for encouraging workplace partners to provide risk-specific training as part of the work-based learning component, as well the extent to which the partnership has developed realistic goals to ensure environments free from racial and sexual harassment;
- The extent to which the partnership's plan provides for the participation of a significant number or percentage of students in School-to-Work Opportunities activities listed under Title I of the Act.

Selection Criterion 4: Collaboration With State (15 Points)

Considerations: In applying this criterion, reviewers will consider—

- The extent to which the local partnership has effectively consulted with its State School-to-Work Opportunities Partnership, and has established realistic methods for ensuring consistency of its local strategies with the statewide School-to-Work Opportunities system being developed by that State Partnership;
- Whether the local partnership has developed a sound strategy for integrating its plan, as necessary, with the State plan for a statewide School-to-Work Opportunities system;
- The extent to which the local partnership has developed effective processes through which it is able to assist and collaborate with the State in establishing the statewide School-to-Work system, and is able to provide feedback to the State on their system-building process.
- Whether the plan includes a feasible workplan that describes the steps that will be taken in order to make the local system part of the State School-to-Work Opportunities System, including a timeline that includes major planned objectives during the grant period.

Selection Criterion 5: Management Plan (10 Points)

Considerations: In applying this criterion, reviewers will consider—

- The feasibility and effectiveness of the partnership's strategy for using other resources, including private sector resources, to maintain the system when Federal resources under the School-to-Work Opportunities Act are no longer available.
- The extent to which the partnership's management plan anticipates barriers to implementation and proposes effective methods for addressing barriers as they arise.
- Whether the plan includes feasible measurable goals for the School-to-Work Opportunities system, based on performance outcomes established under section 402 of the Act, and an effective method for collecting information relevant to the local partnership's progress in meeting its goals.
- Whether the plan includes a regularly scheduled process for improving or redesigning the School-to-Work Opportunities system based on performance outcomes established under section 402 of the Act.
- The extent to which the resources requested will be used to develop information, products and ideas that will assist other States and local partnerships as they design and implement local systems.
- The extent to which the partnership will limit equipment and other purchases in order to maximize the amounts spent on delivery of services to students.

Dated: September 1, 1995.

Tim Barnicle,

Assistant Secretary for Employment and Training, Department of Labor.

Patricia McNeil,

Acting Assistant Secretary for Vocational and Adult Education, Department of Education.

Appendix—Analysis of Comments and Changes—Administrative Costs

10 Percent Cap on Administrative Costs

Comment: Eleven commenters suggested that the proposed 10 percent cap on administrative costs was too low. Several of the commenters felt that the cap should be set at a higher level, such as 15 percent or 20 percent. Other commenters felt that the cap should be set on a flexible scale that would fluctuate according to the size of the grant award. Many commenters felt that the 10 percent cap on administrative costs would ultimately undermine local efforts to build and sustain a strong school-to-work implementation effort, and that it would sacrifice the quality and effectiveness of the local partnerships. Finally, one commenter felt that School-to-Work Opportunities systems in rural areas would have an especially difficult time being able to stay within the 10 percent cap on administrative costs.

Discussion: The Departments have concluded that applying the 10 percent cap to Title III grants awarded to local partnerships is consistent with the Act's broader limitations on administrative costs, with the 10 percent cap imposed on local partnerships receiving School-to-Work Opportunities subgrants from States, and with section 305 of Title III, which requires conformity between School-to-Work Opportunities plans of local partnerships and State School-to-Work Opportunities plans.

Changes: None.

Definition of Administrative Costs

Comment: Twelve commenters suggested that changes be made to the definition of the term "administrative costs." Some of these commenters felt that evaluation and monitoring are functions so central to the local partnerships' ability to implement systemic change that they should be excluded from the definition of administrative costs. One of these commenters also felt that language should be added that would specifically outline allowable activities. Another commenter felt that the definition of the term "administrative costs" under EDGAR should be used.

Discussion: The Departments chose to create a new definition of administrative costs rather than use a generic definition such as the one contained in EDGAR in order to address the unique nature of the Act. This definition was established as part of the 1995 School-to-Work Opportunities State Implementation grant process. It should be noted that activities that are directly related to the provision of services to participants or otherwise allocable to the program's allowable activities under the grant are not defined as administrative costs. The Departments believe that since the definition specifically states that activities under section 215(b)(4) and 215© of the Act are not administrative costs, there is no need to mention specific activities such as the provision of technical assistance or developing model curriculum. The Departments believe that the independent evaluation function is especially critical because of the need for an ongoing process of measuring system effectiveness and therefore have not included it in the definition of the term "administrative costs." The Departments believe, however, that monitoring and establishing compliance systems are activities appropriately charged to the administrative cost category.

Changes: None.

Equipment Cost as an Administrative Cost

Comment: Three commenters asked for clarification as to whether equipment cost is an administrative cost, especially in relation to the last bullet point under selection criterion 5, which asks reviewers to consider the extent to which a local partnership will limit equipment purchases in order to maximize the amounts spent on direct delivery of students.

Discussion: The Departments believe that equipment purchased for the purpose of administering the School-to-Work Opportunities system is an administrative cost, and therefore is subject to the 10 percent cap. However, equipment purchased for classroom instructional use would not be subject to the 10 percent cap.

Changes: None.

Suggested Changes to the Structure of the Notice

Need to Include Sections of the Act in the Notice

Comment: One commenter believed that the selection criteria should more exactly reiterate key components contained in the Act in Title I, sections 101–104 ("General Program Requirements" and basic program components).

Discussion: While the Departments concur with the commenter on the importance of these provisions, they do not believe it is necessary to restate in the notice most of the legislative language emphasized by the commenter. The notice advises local partnerships that applications must meet all the requirements of the Act, reiterates that all definitions in the Act apply to systems funded under the Local Partnership Grant competitions, and emphasizes, under Criterion 1, the need for local partnership plans to demonstrate consistency with all statutory requirements and with all system components in Title I of the Act. Therefore, the Departments strongly encourage applicants to refer to the Act as well as the criteria in developing School-to-Work Opportunities plans that reflect the full intent of the law. The Departments wish to assure the commenter that panelists reviewing the applications are selected for their understanding of the School-to-Work Opportunities Act, are required to participate in a carefully designed orientation, and will be directed to score applications based on the criteria, in conjunction with the requirements of the Act.

Changes: None.

Distribution of Points

Comment: One commenter questioned the distribution of points in this section, and believed that Criterion 1 B, under Comprehensive Local School-to-Work Opportunities System, should receive more weight than 20 out of 100 points. This commenter also indicated that Criterion 3, "Participation of All Students," should receive more than 15 points. Another commenter recommended making Criterion 3 a "threshold criterion". This commenter felt that unless this component was adequately addressed, no local partnership should be considered for funding.

Discussion: In response to this comment, the Departments gave careful consideration to the distribution of points among the selection criteria, and have concluded that the distribution provided for in the notice results in the most appropriate balance among the criteria. The Departments are committed to assisting partnerships develop and implement school-to-work systems that provide opportunities to all students, but they do not agree that Criterion 3 should be replaced with a threshold criterion or an eligibility requirement, or that either of these would be consistent with the Act. Criterion 3 requires that a partnership describe its strategies for effectively ensuring opportunities for all students to participate in the school-to-work system, and to identify ways of overcoming barriers to the participation of any students. This criterion now states that the partnership's strategies must address equal access to the full range of components for all students. The Departments again wish to emphasize that to receive the maximum points for Criterion 3, applicants must not neglect the needs of any students, and must convincingly describe how the School-to-Work Opportunities system will provide the same options and produce the same results for all participating students, while recognizing that groups of students have different needs and, therefore, that specific strategies may be required for the various groups listed in the definition of "all students." Applications that fail to address the critical needs of any category of student and fail to develop effective strategies in response to identified student barriers will not be as competitive as those that have comprehensive and effective strategies for all students. To be competitive, partnerships that have not fully implemented all components of the strategies devised for all students should at least have established a timetable for putting these components in place within a reasonable period of time.

Changes: None.

Restructuring Criteria

Comments: Several commenters recommended adding or restating key concerns under several criteria, changing the order of the bullets under a given criterion, or moving bullets from under one criterion heading to another. One commenter suggested moving the first bullet under Selection Criterion 3 concerning strategies for ensuring that all students have effective and meaningful opportunities to participate in the local School-to-Work Opportunities system to Selection Criterion 1(B). Another commenter suggested reordering the bullets under Selection Criterion 2 in order to enhance the continuity of the section. This commenter also felt that Selection Criterion 1(A) should be made a part of Selection Criterion (2) since geographic coverage is more closely related to the quality and effectiveness of the local partnership.

Discussion: The Departments recognize that there are certain key elements that have a direct bearing on several aspects of local School-to-Work Opportunities systems. The notice has been carefully developed to weave these issues throughout the notice while still capturing the major points most germane to each specific criterion. However, the Departments do not believe it is always necessary to restate these issues as bullet points under multiple criteria. As discussed in response to another comment, applicants are encouraged to refer to the Act as well as the notice in order to develop School-to-Work Opportunities plans that fully implement the law. In response to suggested changes in sequence and placement, the order of importance, or that a greater percentage of the maximum points for that criterion is to be assigned to any particular bullet, all bullets under each selection criterion will be duly considered by the reviewers. The Departments again wish to emphasize that all applications are subject to a thorough review. Panelists are selected for their expertise in school-to-work, receive a thorough orientation, and are grouped in carefully balanced teams representing a range specializations and interests, to ensure that decisions reflect the full intent of the Act.

Changes: None.

Selection Criterion 1: Comprehensive Local School-to-Work Opportunities System (A)

Coordination and Integration With Existing School-to-Work Programs

Comment: Four commenters felt that language should be added that would ensure coordination with Federal systems change grants authorized under the Individuals with Disabilities Education Act (IDEA). One commenter felt that specific reference should not be made to the Job Training Partnership Act (JTPA) and the Carl D. Perkins Vocational and Applied Technology Education Act.

Discussion: Achieving comprehensive reform will require local partnerships to coordinate and integrate a great number and variety of initiatives having training and education related goals. The Departments agree that the lessons learned from initiatives and programs that are related to School-to-Work should be incorporated in the local partnership's plan. The fourth bullet under Selection Criterion 1(A) is intended to encourage local partnerships to review the many Federal, State and local programs and initiatives and to develop plans for creating mutually supportive strategies.

Changes: None.

Difficulty of Rural Areas in Targeting High-wage, High-skill Jobs

Comment: One commenter was concerned that the emphasis placed throughout the notice on high-wage, high-skill jobs would favor urban partnerships over rural partnerships, which may be unable to offer paid work experiences or match metropolitan pay schedules. This commenter pointed out that rural communities have limited access to such paid jobs due to geographic isolation, slow economic growth, and comparatively lower wages for most employees. The commenter suggested that points be awarded for plans developed by rural School-to-Work consortia to allow employees to live in their home community while commuting to high-wage, high-skill jobs in neighboring communities.

Discussion: The Departments are committed to a fair and equitable review of all applications, and recognize that, in order to be successful, a local School-to-Work system must respond to the needs and conditions of the community for which it has been developed. While the Departments recognize the unique challenges faced by rural areas, they do not feel that developing School-to-Work systems tailored to rural locations is incompatible with the emphasis on preparing students for high-skill, high wage jobs as given in the Act. They encourage local partnerships in these areas to design School-to-Work systems that enable young people to explore as broad a range of career options as possible, and develop the skills to compete in a global economy, wherever they ultimately reside and work. The Departments are also interested in applications that link innovative education strategies with local workforce development and economic development strategies. The Departments wish to clarify that this emphasis on high-wage, high-skill jobs should not place rural partnerships at a disadvantage, since reviewers rank each application against the criteria, not against other applications. While the notice will not reserve specific points for rural strategies such as the one suggested by the commenter, reviewers will consider the quality of the partnership's plan in light of what is feasible for that community, as described in the application. Therefore, the extent to which an application describes what is possible and appropriate for the partnership, as well as the partnership's strategies to provide students with opportunities to explore a range of occupational clusters and acquire skills relevant to high-wage, high-skill jobs, will determine the number of points awarded. Rural partnerships that present this information thoroughly and convincingly will score as highly against the criteria as partnerships with a greater range of opportunity due to higher concentrations of business and industry.

Changes: None.

Selection Criterion 1: Comprehensive Local School-to-Work Opportunities System (B)

Need to More Broadly Define Entities to be Linked in the Connecting Activities Component

Comments: Two commenters felt that this criterion described the connecting activities component too narrowly. The commenters pointed out that, while building links with employers (as highlighted in the third bullet) is necessary to successful school-to-work transitions, this group is not the only one that must be linked in a successful system. The commenters urged that this bullet be broadened to emphasize the need for links with all workplace partners, as well as community organizations.

Discussion: The Departments agree with the commenters that a successful connecting activities component maintains a continuous feedback loop between the school and work communities, and that work communities include labor organizations and non-managerial employees as well as employers. The Departments also agree that the connecting activities component should assist students with access to a range of support services, provided through entities like community-based organizations and one-stop career centers.

Changes: The third bullet of Selection Criterion 1(B) has been changed to read: "A connecting activities component to provide a functional link between students' school and work activities, and between workplace partners, educators, community organizations and other appropriate entities."

Providing All Students with a Full Range of Options:

Comment: Four commenters suggested that Selection Criteria 1 A and 3 be changed to reflect the language in section 101(5) of the Act regarding the partnership's plan for providing all students with equal access to the full range of program components (including the school-based and work-based learning components) and related activities, such as recruitment, enrollment, and placement activities.

Discussion: The Departments agree with the commenter on the importance of emphasizing the need for strategies to provide all students equal access to the full range of program components, rather than offering any student an abbreviated menu of options.

Changes: The third bullet under Selection Criterion 1(A) has been changed to recognize the importance of all students having equal access to a full range of options. An additional reference has been added to bullet 6 under Selection Criterion 3.

Consistency with Other Initiatives

Comment: One commenter noted references in the notice to the Goals 2000 and Empowerment Zones/Enhanced Enterprise Communities (EZ/EEC) initiatives, and expressed concern that applications from local partnerships in States not currently participating in the Goals 2000 initiative might be less competitive than applications from partnerships in States that are.

Discussion: References in the notice to these and other initiatives are intended to stress the need for coordination of related efforts in the areas of education reform, workforce development, and economic development. A major purpose of the School-to-Work initiative is to unify categorical programs into coherent and comprehensive systems, and to avoid duplication of effort across various agencies and funding streams. The EZ/EEC initiative, for which the Department of Housing and Urban Development and the Department of Agriculture are the lead agencies, is an economic development initiative targeting urban and rural areas, with a major focus on rebuilding inner cities. Partnerships are funded against an approved strategic plan, and all proposals include an education component. Similarly, the Goals 2000: Educate America Act provides a broad vehicle for education reform supportive of the objectives of School-to-Work. Where these initiatives coincide at the local level, it is important that they be coordinated. However, participation in activities under both Goals 2000 and School-to-Work is strictly voluntary, and a State's participation in Goals 2000 is in no way a condition for award of a School-to-Work Local Partnership Grant. By including references to Goals 2000, the Departments intend to emphasize the need for local systems to incorporate high-quality academic and skill standards consistent with any standards developed by the State as part of education reform or restructuring, and for local partnership activities to coincide with the State or region's overall vision for improving education and employment opportunities.

Changes: None.

Selection Criterion 2: Quality and Effectiveness of the Local Partnership

Key Stakeholders

Comment: Several commenters felt this section focused too narrowly on the role of employers, and did not adequately convey the range of required partners and other interested parties that are given in the Act. Commenters were particularly concerned about the comparative lack of emphasis on union representatives and frontline workers, teachers, and community-based organizations as members of local partnerships. The commenters felt that these groups should be explicitly identified in this criterion, since their involvement is as vital to system development and implementation as that of employers. Various suggestions were made as to how the bullets under this criterion could be amended to be more inclusive of key stakeholders. One commenter noted that students, also listed as required members of local partnerships in the Act, are unlikely to be involved as partners in decision-making, and recommended specific language emphasizing their participation.

Discussion: This criterion immediately refers reviewers to the definitions of local partners given in the Act. However, the Departments agree that it would be useful to list in Selection Criterion 2 all the parties referred to in sections 4(11)(A) and (B). In this way, the criterion will not appear to omit any of the entities that have important contributions to make to a comprehensive local School-to-Work system. It is vitally important to the success of local School-to-Work systems that key local groups, including those highlighted by the commenters, be involved at every stage of system development and implementation. The Departments wish to emphasize that only those applications that involve all key parties substantively and continuously, effectively incorporating their perspectives and strengths in the system plan, will be competitive.

Changes: The first bullet of Criterion 2 now lists the required members of local partnerships as given in section 4(11)(A) of the Act, including representatives of organized labor or nonmanagerial employees, teachers, and students. This first bullet also lists the examples of interested parties noted in section 4(11)(B), including community-based organizations. Subsequent bullets refer to the lists given in the first bullet, and where appropriate, the term "workplace partners" has been substituted for "employers". Similar clarifications were included in the final notice for the State Implementation Grants competition.

Role of Private Industry Councils

Comment: Three commenters suggested that it should not be necessary to form a new local partnership when the Private Industry Councils are able to perform the function. They commented that not including the Private Industry Councils would be detrimental to the School-to-Work Opportunities system.

Discussion: The Departments agree that the Private Industry Councils, as established under section 102 of the Job Training Partnership Act, are key partners in the School-to-Work Opportunities initiative. The Departments believe that Private Industry Councils can play many important roles in local School-to-Work systems, and encourage their participation in local partnerships. However, in order to be eligible for a grant under this notice, a local partnership must include all of the entities included in section 4(11)(A) of the Act, and may include other parties such as those listed in section 4(11)(B). The Departments believe that it is up to each local community to determine which parties are the most appropriate for their local partnership, and that the Act is structured in a way that allows them such flexibility. The Departments believe that the criteria as written adequately allow for the inclusion of the Private Industry Councils in local School-to-Work Opportunities system-building activities.

Changes: None.

Selection Criterion 3: Participation of All Students

Define "All Students"

Comment: Several commenters suggested that a definition of the term "all students" be added to the notice or that the specific student categories be defined.

Discussion: Although all definitions and requirements of the Act apply, the Departments agree that it would be helpful to remind applicants that the Act's definition of the term "all students" applies to this competition.

Changes: A reference to the definition of "all students" in Section 4(2) of the Act has been included in Criterion 3. Inclusion of Safety Skills in the Work-based and School-based Components.

Comment: One commenter recommended that specific language be added to the first and second bullets in this section, requiring the acquisition of skills relating to safety as elements of the school-based and work-based learning components.

Discussion: The Departments strongly agree that issues of health and safety are important to any School-to-Work system. In the fourth bullet under Criterion 3, "Participation of All Students," reviewers will consider the partnership's methods for ensuring safe and healthy work environments for students. Many activities may be a part of strategies for ensuring that students are provided with such environments. The Departments believe that work-based and school-based modules that inform students of safety issues, as well as their rights and responsibilities at the workplace, are among the methods that would appropriately address this criterion. For example, the work-based component could include risk-specific training for students participating in learning experiences at the work site. Outcomes of this training could include a student's being able to demonstrate an understanding of: specific tasks or operations associated with the learning experience that pose risks; proper use of tools, devices, and equipment provided to control identified risks; procedures for responding to any potential hazards the youth identifies; and procedures for reporting illness and injury. The school-based learning component can provide students with general awareness training in occupational safety and health. Outcomes of this training might include a student's being able to describe the general nature and types of work-related health problems, describe the risk factors associated with the most common jobs held by young workers, describe the concept of hazard control strategies and give examples, list the jobs prohibited to young workers by applicable local, State, and Federal laws, and describe the procedures and policies regarding the reporting of work-related diseases and injuries.

Changes: While the Departments do not believe it is appropriate for them to define the strategies that all partnerships must use to ensure safe and healthy work environments, the fourth bullet has been modified to clarify that these strategies should include both the school-based and work-based components, making the Local Partnership notice consistent with the State Implementation Grant notice published in the **Federal Register** of May 18.

Environments Free From Harassment

Comment: One commenter suggested that partnerships be required to describe how they will ensure that student environments are free from racial and sexual harassment.

Discussion: The Departments agree with the commenter on the importance of provisions to ensure that School-to-Work activities take place in atmospheres conducive to learning, and free from racial and sexual harassment. In response to public comment, similer changes were madè to the State Implementation Grants notice published in the **Federal Register** on May 18, 1995. Requiring reviewers to consider whether applications present strategies for harassment-free environments will emphasize the importance of this issue and ensure consistency between the "Participation of All Students" sections of the Local Partnership and State notices.

Changes: Under the fourth bullet of Criterion 3, reviewers will consider the extent to which a partnership has developed realistic goals to ensure environments free from racial and sexual harassment, as well as to guarantee safe and healthy work environments.

Selection Criterion 4: Collaboration With State

State Ability to Sustain Local Partnership

Comment: One commenter suggested that a section be added to this criterion related to the ability of the State School-to-Work Opportunities system to sustain a local partnership once Federal funding to that local partnership has ended. The commenter suggested that a long term sustainability plan that would include the integration of a variety of Federal, State, and local funding streams should be included in this criterion.

Discussion: The Departments expect a State School-to-Work Opportunities System to sustain local partnerships funded under section 302(a) of the Act once Federal funding to that local partnership has ended. However, the Departments are not in a position to prescribe at what level the partnership shall be sustained.

Changes: None.

Selection Criterion 5 Management Plan:

Evaluation

Comments: Three commenters suggested that the bullets under Selection Criterion 1 and 4, regarding performance outcomes, should be more specific. One commenter suggested that language be added stating that performance outcomes should include measures of the extent to which special populations are included. Two commenters felt that it was important to require that both individual and aggregate data be collected.

Discussion: The Departments believe that States and local partnerships should have the flexibility to design evaluations appropriate to their own needs and goals and encourage local partnerships to work closely with their State when developing performance outcomes and evaluation plans. Section 402 of the Act describes the overall framework and emphasis of the performance measurement and evaluation systems for the School-to-Work Opportunities initiative.

Changes: None.

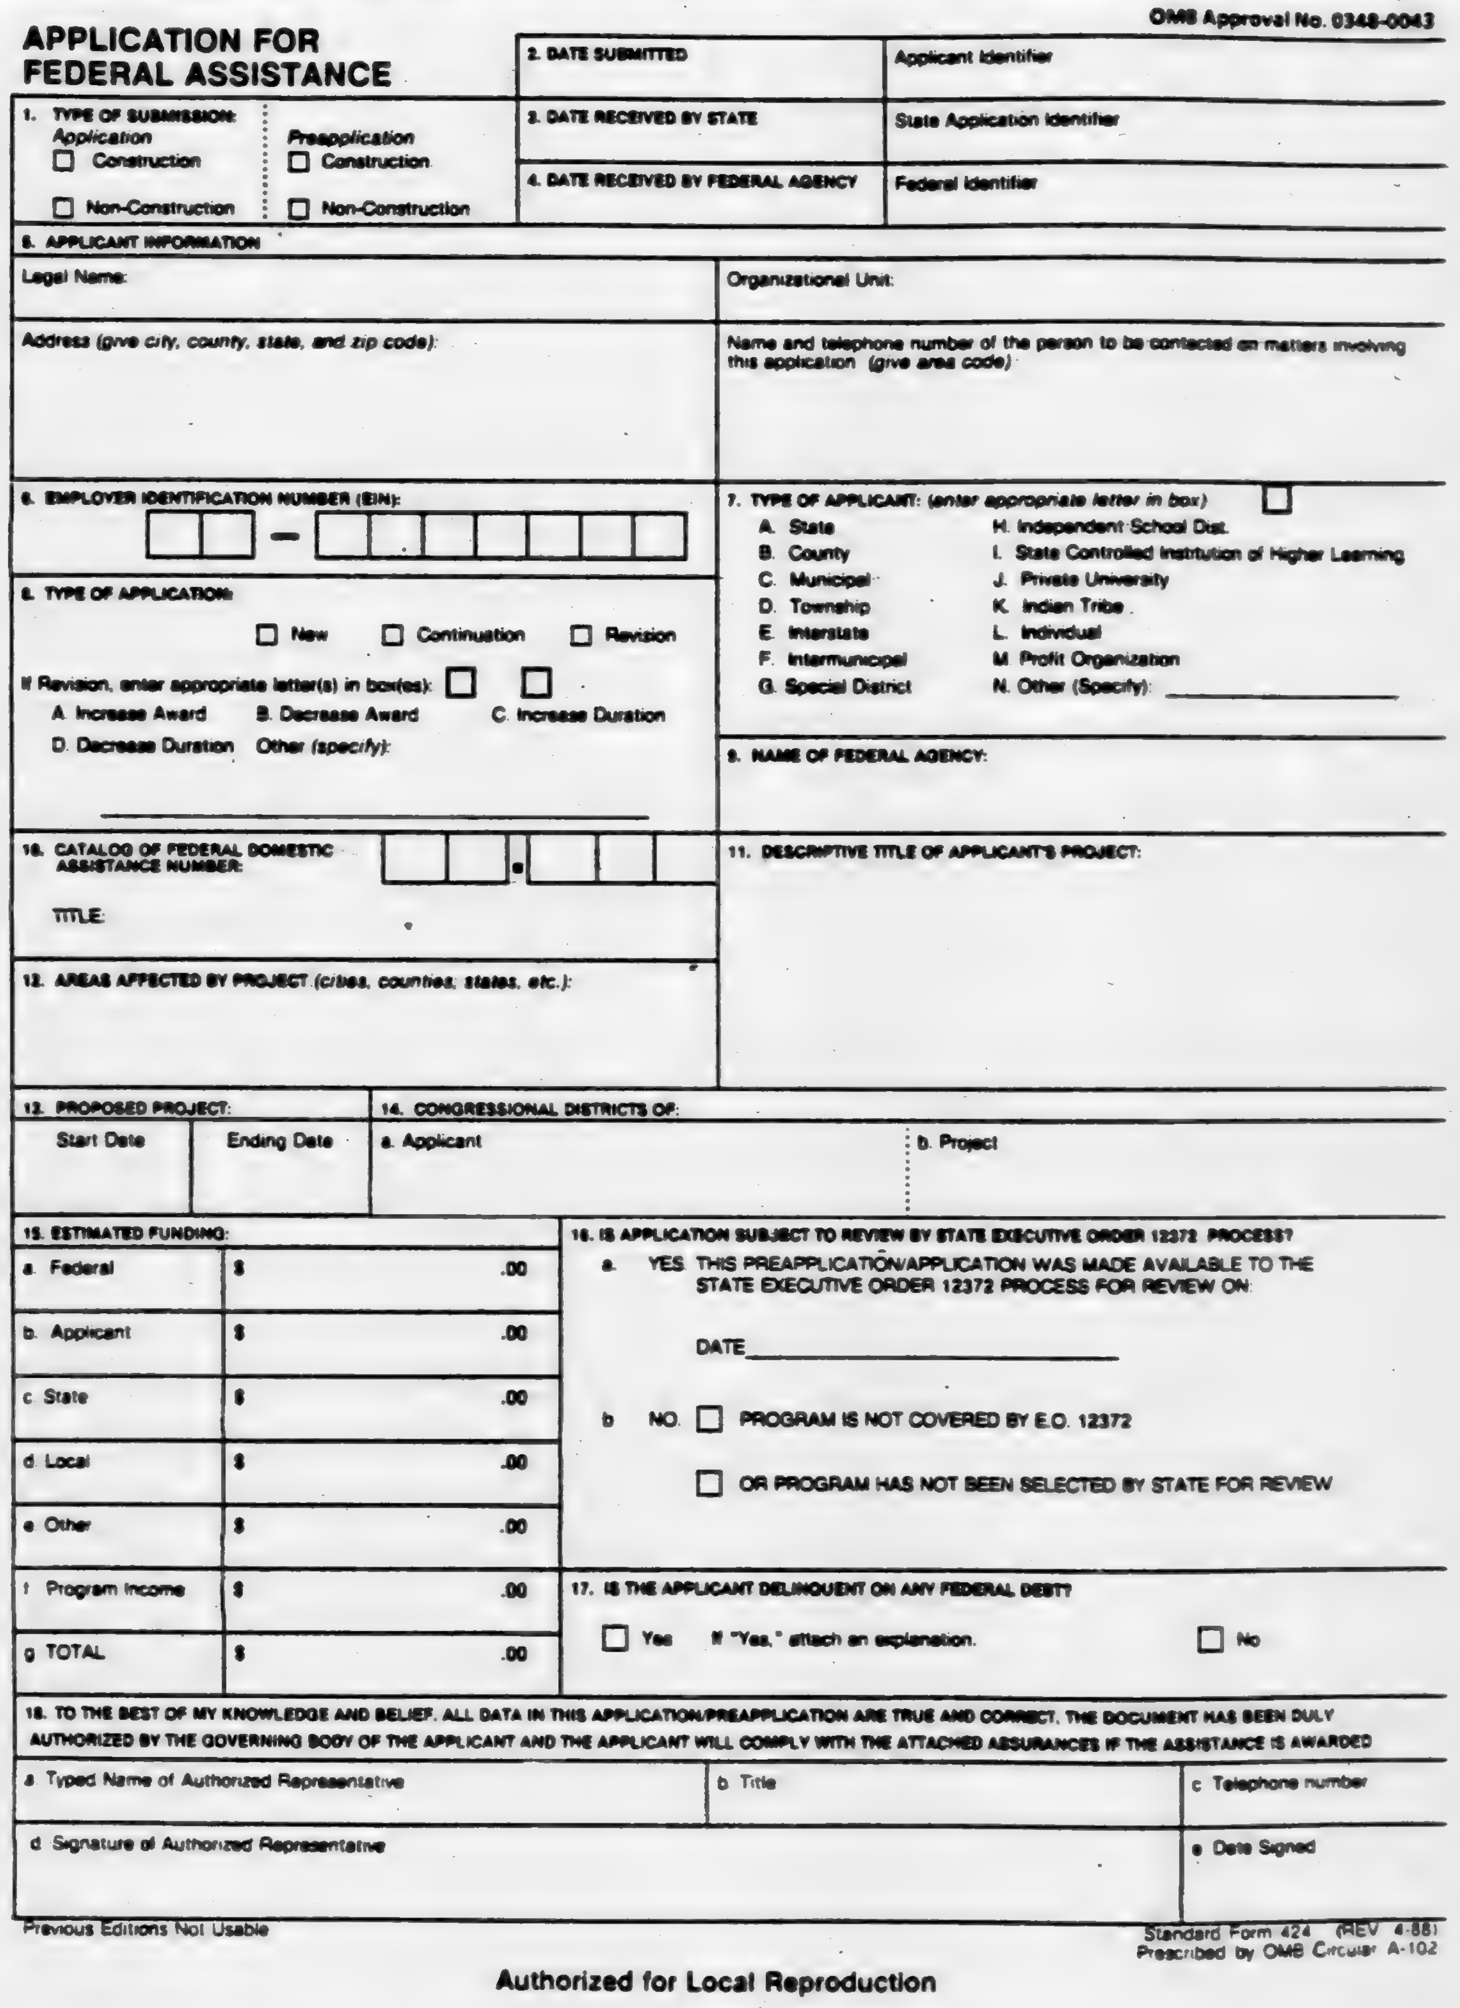
Limit on Equipment Purchases

Comment: One commenter felt that the bullet point under Criterion 4 regarding the limitation of equipment purchases would keep rural partnerships from purchasing distance learning equipment which can often play a critical role in the implementation School-to-Work Opportunities systems in rural areas.

Discussion: The Departments agree that distance learning technology can play a key role in the implementation of local School-to-Work systems in rural areas. Bullet six under Criterion 1(B) states that the Departments are looking for effective strategies for utilizing innovative technology-based instructional techniques such as distance learning. However, applicants are reminded that their overall goal should be to maximize direct services to students. Applicants proposing equipment purchases such as distance learning systems should be sure that such purchases clearly link back to the overall purpose and design of the proposed local School-to-Work Opportunities system. Applicants should also be aware that such purchases would be seen by the Departments as one-time expenditures and would not be refunded in any future years of funding.

Changes: None.

BILLING CODE 4000-01-P



OMB Approval No. 0348-0043

APPLICATION FOR FEDERAL ASSISTANCE

	2. DATE SUBMITTED	Applicant Identifier
1. TYPE OF SUBMISSION: *Application* ☐ Construction ☐ Non-Construction *Preapplication* ☐ Construction ☐ Non-Construction	3. DATE RECEIVED BY STATE	State Application Identifier

INSTRUCTIONS FOR THE SF 424

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item:	Entry:
1.	Self-explanatory.
2.	Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3.	State use only (if applicable).
4.	If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.
5.	Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6.	Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7.	Enter the appropriate letter in the space provided.
8.	Check appropriate box and enter appropriate letter(s) in the space(s) provided: —"New" means a new assistance award. —"Continuation" means an extension for an additional funding/budget period for a project with a projected completion date. —"Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.
9.	Name of Federal agency from which assistance is being requested with this application.
10.	Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11.	Enter a brief descriptive title of the project. if more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.
12.	List only the largest political entities affected (e.g., State, counties, cities).
13.	Self-explanatory.
14.	List the applicant's Congressional District and any District(s) affected by the program or project.
15.	Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16.	Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17.	This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18.	To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

ED FORM NO. 524

INSTRUCTIONS FOR ED FORM NO. 524

General Instructions

This form is used to apply to individual U.S. Department of Education discretionary grant programs. Unless directed otherwise, provide the same budget information for each year of the multi-year funding request. Pay attention to applicable program specific instructions, if attached.

Section A - Budget Summary
U.S. Department of Education Funds

All applicants must complete Section A and provide a breakdown by the applicable budget categories shown in lines 1-11.

Lines 1-11, columns (a)-(e):
For each project year for which funding is requested, show the total amount requested for each applicable budget category.

Lines 1-11, column (f):
Show the multi-year total for each budget category. If funding is requested for only one project year, leave this column blank.

Line 12, columns (a)-(e):
Show the total budget request for each project year for which funding is requested.

Line 12, column (f):
Show the total amount requested for all project years. If funding is requested for only one year, leave this space blank.

Instructions for ED Form 524 (cont.)

Section B - Budget Summary
Non-Federal Funds

If you are required to provide or volunteer to provide matching funds or other non-Federal resources to the project, these should be shown for each applicable budget category on lines 1-11 of Section B.

Lines 1-11, columns (a)-(e):
For each project year for which matching funds or other contributions are provided, show the total contribution for each applicable budget category.

Lines 1-11, column (f):
Show the multi-year total for each budget category. If non-Federal contributions are provided for only one year, leave this column blank.

Line 12, columns (a)-(e):
Show the total matching or other contribution for each project year.

Line 12, column (f):
Show the total amount to be contributed for all years of the multi-year project. If non-Federal contributions are provided for only one year, leave this space blank.

Section C - Other Budget Information
Pay attention to applicable program specific instructions, if attached.

1. Provide an itemized budget breakdown, by project year, for each budget category listed in Sections A and B.
2. If applicable to this program, enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period. In addition, enter the estimated amount of the base to which the rate is applied, and the total indirect expense.
3. If applicable to this program, provide the rate and base on which fringe benefits are calculated.
4. Provide other explanations or comments you deem necessary.

BILLING CODE 4000-01-C

Estimated Public Reporting Burden

Under terms of the Paperwork Reduction Act of 1980, as amended, and the regulations implementing that Act, the Department of Education invites comment on the public reporting burden in this collection of information. Public reporting burden for this collection of information is estimated to average 90 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. You may send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, Information Management and Compliance Division, Washington, D.C. 20202–4651; and to the Office of Management and Budget, Paperwork Reduction Project 1830–0530, Washington, D.C. 20503.

(Information collection approved under OMB control number 1830–0530, Expiration date: 6/30/98.)

ASSURANCES — NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C.§§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.
7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally assisted construction subagreements.

Standard Form 424B (4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program andto purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.
11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93-205).
12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.
13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).
14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.
15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.
16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.
17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.
18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

CERTIFICATIONS REGARDING LOBBYING; DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS; AND DRUG-FREE WORKPLACE REQUIREMENTS

Applicants should refer to the regulations cited below to determine the certification to which they are required to attest. Applicants should also review the instructions for certification included in the regulations before completing this form. Signature of this form provides for compliance with certification requirements under 34 CFR Part 82, "New Restrictions on Lobbying," and 34 CFR Part 85, "Government-wide Debarment and Suspension (Nonprocurement) and Government-wide Requirements for Drug-Free Workplace (Grants)." The certifications shall be treated as a material representation of fact upon which reliance will be placed when the Department of Education determines to award the covered transaction, grant, or cooperative agreement.

1. LOBBYING

As required by Section 1352, Title 31 of the U.S. Code, and implemented at 34 CFR Part 82, for persons entering into a grant or cooperative agreement over $100,000, as defined at 34 CFR Part 82, Sections 82.105 and 82.110, the applicant certifies that:

(a) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the making of any Federal grant, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal grant or cooperative agreement;

(b) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form - LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;

(c) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subgrants, contracts under grants and cooperative agreements, and subcontracts) and that all subrecipients shall certify and disclose accordingly.

2. DEBARMENT, SUSPENSION, AND OTHER RESPONSIBILITY MATTERS

As required by Executive Order 12549, Debarment and Suspension, and implemented at 34 CFR Part 85, for prospective participants in primary covered transactions, as defined at 34 CFR Part 85, Sections 85.105 and 85.110 –

A. The applicant certifies that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a three-year period preceding this application been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application had one or more public transactions (Federal, State, or local) terminated for cause or default; and

B. Where the applicant is unable to certify to any of the statements in this certification, he or she shall attach an explanation to this application.

3. DRUG-FREE WORKPLACE (GRANTEES OTHER THAN INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 –

A. The applicant certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an on-going drug-free awareness program to inform employees about–

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling, rehabilitation, and employee assistance programs; and

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will–

(1) Abide by the terms of the statement; and

(2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency, in writing, within 10 calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office

Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted–

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e), and (f).

B. The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant:

Place of Performance (Street address, city, county, state, zip code)

Check ☐ if there are workplaces on file that are not identified here.

DRUG-FREE WORKPLACE (GRANTEES WHO ARE INDIVIDUALS)

As required by the Drug-Free Workplace Act of 1988, and implemented at 34 CFR Part 85, Subpart F, for grantees, as defined at 34 CFR Part 85, Sections 85.605 and 85.610 –

A. As a condition of the grant, I certify that I will not engage in the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance in conducting any activity with the grant; and

B. If convicted of a criminal drug offense resulting from a violation occurring during the conduct of any grant activity, I will report the conviction, in writing, within 10 calendar days of the conviction, to: Director, Grants and Contracts Service, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 3124, GSA Regional Office Building No. 3), Washington, DC 20202-4571. Notice shall include the identification number(s) of each affected grant.

As the duly authorized representative of the applicant, I hereby certify that the applicant will comply with the above certifications.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion – Lower Tier Covered Transactions

This certification is required by the Department of Education regulations implementing Executive Order 12549, Debarment and Suspension, 34 CFR Part 85, for all lower tier transactions meeting the threshold and tier requirements stated at Section 85.110.

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.

2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.

5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.

6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion–Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.

8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Certification

(1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Standard Form - LLL

INSTRUCTIONS FOR COMPLETION OF SF-LLL, DISCLOSURE OF LOBBYING ACTIVITIES

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF-LLL-A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.
2. Identify the status of the covered Federal action.
3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.
4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.
5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.
6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.
7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.
8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP-DE-90-001."
9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.
10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

    (b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).
11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.
12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.
13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.
14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.
15. Check whether or not a SF-LLL-A Continuation Sheet(s) is attached.
16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 mintues per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0046), Washington, D.C. 20503.

Department of Transportation

Federal Aviation Administration

Proposed Policy Regarding Airport Rates and Charges; Notice

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. 27782]

RIN 2120–AF90

Proposed Policy Regarding Airport Rates and Charges

AGENCY: Department of Transportation (DOT), Federal Aviation Administration (FAA).

ACTION: Supplemental notice of proposed policy; reopening of comment period.

SUMMARY: This document proposes a significant revision of the Policy Regarding Airport Rates and Charges published with request for comment on February 3, 1995. The proposed policy retains the structure and basic approach of the February 3 policy statement, but the strict requirement for equality of fees and costs based on historic cost valuation of assets would be limited to the airfield portion of an airport, and the policy would permit substantial flexibility in the establishment of fees for other aeronautical facilities. The revision reflects public comments received on the February 3 policy statement. This notice announces two public meetings on the proposed policy and reopens the comment period until October 23, 1995.

DATES: Comments must be received by October 23, 1995.

ADDRESSES: Comments should be mailed, in quadruplicate, to: Federal Aviation Administration, Office of Chief Counsel, Attention: Rules Docket (AGC–10), Dockets No. 27782, 800 Independence Avenue SW., Washington, DC 20591. All comments must be marked: "Docket No. 27782." Commenters wishing the FAA to acknowledge receipt of their comments must include a preaddressed, stamped postcard on which the following statement is made: "Comments to Docket No. 27782." The postcard will be date stamped and mailed to the commenter.

Comments on this Notice may be examined in room 915G on weekdays, except on Federal holidays, between 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: John Rodgers, Director, Office of Aviation Policy, Plans and Management Analysis, Federal Aviation Administration, 800 Independence Ave. SW., Washington, DC 20591, telephone (202) 267–3274; Barry Molar, Manager, Airports Law Branch, Office of the Chief Counsel, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, telephone (202) 267–3473.

SUPPLEMENTARY INFORMATION: Section 113 of the FAA Authorization Act of 1994, Public Law 103–305 (1994 Authorization Act) signed into law on August 23, 1994, 49 U.S.C. 47129, required the Secretary of Transportation to issue standards or guidelines for use in determining the reasonableness of an airport fee. After notice and opportunity for public comment, on January 30, 1995, the Office of the Secretary of Transportation (OST) and the FAA issued a "Policy Regarding Airport Rates and Charges," and requested further public comment on the interim policy as published. Docket No. 27782 (60 FR 6906, February 3, 1995). The comment period on the interim policy closed on May 4.

Comments Received

More than 125 comments were received in response to the February 3 request for comment, including comments received after the close of the comment period. The Department considered all comments, including the late-filed comments. Because the Department is proposing a substantially revised policy statement and publishing the statement for an additional comment period, the Department will include in this supplemental notice only a brief discussion of public comments received on the February 3 policy statement, and will not address the comments in detail at this time. When a final policy statement is published in the **Federal Register**, the Department will include a comprehensive response to public comments received on both the February 3 interim policy and this proposed revision.

Summary of Proposed Changes and Response to Significant Issues Raised

1. Valuation of Assets for Ratesetting Purposes.

The interim policy requires valuation of all airport land and airfield assets at historic cost to the original airport proprietor (Para. 2.4.1). The airport proprietor may use other valuation methods for other assets, but total aeronautical revenue may not exceed total aeronautical cost, based on historic cost asset (HCA) valuation, absent agreement (Para 2.4.1(a)).

Aeronautical users filing comments supported the interim final policy's approach to asset valuation.

Airport operators uniformly criticized the treatment of asset valuation. They argued that, *inter alia,* the combination of the HCA valuation requirement and the total cost cap will disrupt their current practices in leasing nonairfield facilities; will underfinance smaller airports that are unable to use debt-financing to fund capital replacement and improvement; and will cause signatory carriers to pay more than non-signatory carriers under certain residual lease and use agreements. They also argued that the HCA requirement is inconsistent with § 47129's prohibition on setting rates; is inconsistent with Departmental policies on financial self-sustainability of airports; and is inconsistent with an airport proprietor's Constitutional right to earn a reasonable return on investment.

While airport commenters prefer elimination of the HCA valuation requirement for all assets, most (the City of Los Angeles being the primary exception) stated that retention of the HCA valuation requirement for the airfield would be acceptable, because HCA valuation for the airfield reflects common industry practice.

The Department proposes to revise the policy by limiting the HCA valuation requirement in proposed Para. 2.5.1 to airfield assets and by eliminating the total HCA cost cap for aeronautical facilities (Para. 2.4.1(a) of the interim policy). Airfield assets would be defined in the applicability section of the policy statement to include runways, taxiways, nonexclusively leased aprons, land associated with these facilities, and land acquired and held to assure compatibility with airfield operations. If the latter land were developed for compatible, nonairfield uses, the land would be removed from the airfield rate base.

In addition, further guidance would be given on the way airfield land may be included in the rate base (proposed Para. 2.5.1(a)). The cost of land acquired with debt could be included in the rate base by charging all debt service expenditures to the airfield cost center. The cost of land acquired with internally generated funds or donated by the airport proprietor could be recovered by amortization. A new paragraph 2.5.1(b) is proposed to clarify that, while HCA valuation must be used to establish total airfield costs, airport operators may, to enhance the efficient use of the airfield, allocate costs using a reasonable and not unjustly discriminatory methodology that departs from a pro rata division of HCA costs.

A new paragraph 2.6 would be added, providing that fees for other aeronautical services and facilities could be established by any reasonable methodology. As discussed below, the policy would provide for FAA scrutiny

of accumulation of surplus funds attributable to aeronautical revenues, however. The Department does not intend this possible scrutiny to function as an indirect reinstatement of the HCA cost cap.

The proposed revision to the policy is intended to carry out the Department's mandate to adopt a policy that assures that airport fees are reasonable while avoiding unnecessary disruption to long-standing, well-accepted pricing practices, especially for nonairfield assets.

For nonairfield facilities, which may be priced according to any reasonable method, our experience suggests that effective competition generally exists. Fees for such facilities are generally established by agreement between the airport proprietor and aeronautical user based on negotiations. Formal administrative complaints over fees for nonairfield facilities have in almost all instances involved allegations of unjust discrimination—not allegations that nonairfield fees were excessive. Moreover, since 1989, all of those complaints not still pending have been dismissed following investigation. Based on these considerations, we propose to rely on the discipline of competition, in the first instance, rather than detailed prescriptions of permissible charging practices to assure that fees for nonairfield facilities meet the requirements of reasonableness contained in statutes, grant agreements and applicable international aviation agreements. However, the policy would explicitly preserve the authority of the FAA to investigate the accumulation of aeronautical surpluses.

For airfield assets—runways and taxiways—there is greater risk that airport proprietors may enjoy locational monopoly power. The HCA requirement for these assets would guard against any abuse of monopoly power and would conform to general industry practice.

The HCA valuation requirement does not conflict with the statutory prohibition on setting the airport fee. The valuation of airfield assets is but one element in setting a fee. Even with the HCA valuation requirement, the airport proprietor has substantial latitude with respect to those other elements.

Further, the HCA valuation requirement does not amount to a regulatory taking of property. The HCA valuation requirement allows the airport proprietor to fully recover its costs of providing airfield facilities. HCA valuation is one of the methods that has been found reasonable, and hence constitutional, by the courts.

Finally, many of the arguments against the HCA requirement for the airfield were considered and rejected by the Department in its decision on the Los Angeles International Airport (LAX) landing fee dispute. See pages 19–26, Order 95–6–36 (June 30, 1995).

2. Applicability to Airfield and Non-Airfield Assets

As noted above, the Department proposes to modify the interim policy to eliminate the total HCA cap on aeronautical revenues and to permit nonairfield fees to be set according to any reasonable method. In keeping with this change, the provision in the policy requiring that aeronautical revenues not exceed aeronautical costs (Para. 2.1 of the interim policy) would be narrowed to apply to airfield revenues and costs (Proposed para. 2.2). Similarly, the provision specifying in detail the costs that may be included in the rate base (Proposed Para. 2.4) would be modified by adding an exception for nonaeronautical fees determined by other reasonable means as provided in proposed Para. 2.6. The Department relies on market forces in the leasing of nonairfield facilities to assure that aeronautical revenues, averaged over time, will approximate costs, including the airport's capital investment needs. However, it is unrealistic to expect the market to produce fees that exactly equal costs for each particular user during every accounting period.

3. Charging Imputed Interest on Investment of Surplus Aeronautical Revenues

The interim policy provides that airport proprietors could include in the aeronautical rate base the implicit cost of capital (imputed interest) of funds generated from nonaeronautical sources and invested in capital assets for aeronautical use (par. 2.3.1). The interim policy further provides that the Department considers it reasonable to use the rate of interest prevailing at the time of the expenditure on bonds issued by the airport proprietor or another airport with a similar bond rating.

Airport commenters objected to this provision on a number of grounds. They argued that by precluding interest on surpluses generated from aeronautical revenues, the policy creates an incentive to invest such aeronautical surpluses in nonaeronautical assets. They further argued that it will be difficult, if not impossible, in most cases to trace a surplus to nonaeronautical sources. In addition, they argue that an interest rate based on their borrowing costs is unreasonably low, and that a reasonable rate of interest should be based on what the airport proprietor could earn on alternative investments.

Airport users did not object to this provision.

After reviewing the comments and in light of the other revisions to the policy relating to fees for nonairfield services and facilities, the Department proposes to modify the provision on imputed interest. The new provision would permit the airport proprietor to include in the rate base imputed interest on all funds invested in aeronautical facilities except those generated from airfield operations and funds acquired through issuance of debt when debt service costs are also included in the rate base. In addition, the policy would no longer specify a particular interest rate as reasonable. This approach is consistent with our decision to provide greater flexibility in establishing nonairfield fees. As promulgated, the interim policy could be read as limiting the assessment of an imputed interest charge on nonairfield assets such as terminals and hangars. With the additional flexibility proposed in this supplemental notice for nonairfield fees, it is possible that fees could include an element of imputed interest that would be inconsistent with the interim policy's limitation on imputed interest. By narrowing the scope of the provision on imputed interest (Proposed Para. 2.4.1) to funds generated by the airfield, the Department would avoid a potential internal conflict in the policy. In addition, the new approach would reduce the potential disincentives to investing funds in aeronautical, rather than nonaeronautical assets.

Under the revised proposal, the airport proprietor could not charge imputed interest on funds generated from fees charged for the use of the airfield. The policy and legal considerations for this limitation are discussed below, in connection with the issue of allowing a return on investment.

With respect to commenters' concerns over the ability to trace the source of funds, we note that in the recent decision on LAX landing fees, the Department stated that, under the Administrative Procedure Act, a carrier complaining about inclusion of imputed interest in the rate base would bear the burden of proving that the airport proprietor was claiming imputed interest on aeronautical surpluses. Under this ruling, an airport proprietor need not trace the source of internally generated funds to claim imputed interest. However, if the airport proprietor has data available that would enable a complainant to trace the funds, that data should be disclosed during fee negotiations or in connection with a fee dispute resolution proceeding.

4. Return on Investment.

The interim policy does not provide for the inclusion of a separate return on investment in the aeronautical rate base.

Airport commenters generally objected to this omission. They argued that a return on investment represents the cost of providing capital for the airport and retaining that investment in use as an airport. They further argued that the failure to allow a rate of return would amount to an unconstitutional taking of property. In addition, they argued that by not allowing a rate of return in the aeronautical rate base, the policy provides incentives for airports to invest internally generated funds in nonaeronautical assets. They also argued that a rate of return is necessary to assure that airport proprietors have adequate revenue to meet debt service coverage obligations and maintain adequate cash reserves to protect against contingencies and unexpected declines in activity and revenue.

Airport users do not object to the approach of the interim policy statement on this issue.

The proposed revisions would permit airport proprietors to use any reasonable, not unjustly discriminatory method to establish nonairfield fees. Fees established by negotiation, for example, may well include a reasonable profit margin for the airport proprietor.

With respect to a publicly-owned airfield, no separate rate of return would be allowed, although imputed interest might be included in the rate base in some circumstances. This treatment of the airfield is justified by the nature of the airfield asset and by the Federal government's historic role and interest in airport development.

A publicly-owned airfield is a public asset operated for the benefit of the general public. Moreover, since the enactment of the first Federal airport aid program in 1946, the overwhelming preponderance of Federal assistance has been applied to finance airfield development. The purpose of this assistance has been to promote and assure the growth, safety and efficiency of the national air transportation system, not to assist airport sponsors in developing profit-making facilities. In this regard, we note that the AAIA specifically prohibits an airport proprietor from including the Federal share of projects in the airport's rate base. The Department considers this prohibition to reflect a Congressional intent to limit the public airport proprietor's ability to employ facilities financed in part with Federal assistance as a means to generate a profit. Finally, with the exception of Los Angeles, whose landing fees were found to be unreasonable in part, we are not aware of any public airport operator that has sought to include a rate of return in its airfield rate base.

In contrast, nonairfield assets such as hangars and terminal gates, are usually leased on an exclusive-use basis. The lease rates reflect the value to the tenant of having an exclusive right to use the particular facility leased. In addition, hangars are ineligible for Federal funding. Eligible terminal development is limited to public use, nonrevenue producing areas—not those which would typically be the subject of an exclusive, or even preferential use lease. In addition, terminal development has constituted a relatively small share of overall Federal airport assistance over the years. Thus, for nonairfield aeronautical facilities, the possibility of earning a profit from Federally financed assets is a *de minimis* concern.

Finally, under the proposed policy, a public airport proprietor may recover its full costs, including the cost of its actual investment in the airfield. In addition, the policy allows the airport proprietor to add the cost of meeting debt-service coverage requirements and reasonable reserves to the rate base. Therefore, a separate rate of return allowance is not needed to meet these requirements for publicly owned airports. A private owner could earn a reasonable return on investment.

5. Applicability to General Aviation Airports

Airport commenters generally objected to the application of the policy to general aviation airports. They argued that § 47129 precludes the Department from adopting airport fee policies applicable to general aviation airports, since that section directs the Secretary to establish policies to be applied in disputes between air carriers and airports. They also argued that the total HCA cap would pose a hardship for most general aviation airports, where nonaeronautical revenues are insignificant and cannot be relied on to generate surplus funds to finance replacement and improvement of airport assets.

Airport users did not specifically address this issue.

The Department does not propose to exclude general aviation airports from the scope of the policy. However, we propose to modify the policy statement to clarify that in situations not covered by § 47129, the policy would be applied by the FAA in its role as administrator of the AIP program, under which the agency must satisfy itself that an applicant for grants is in compliance with its assurances, but does not provide a forum for adjudicating disputes between private parties.

While § 47129 mandates the promulgation of standards relating to airport fees charged to air carriers, it does not prohibit the development of airport fee policies for other airports. Section 511 of the AAIAct, 49 U.S.C. 47107(a) requires the Department to receive satisfactory assurances that, *inter alia*, each airport receiving a grant will be available for public use on reasonable terms without unjust discrimination. This provision is not limited to air carrier airports. Moreover, § 519(a) of the AAIAct, 49 U.S.C. 47122 authorizes the Department to take action we "consider necessary to carry out" the AAIA. Under these provisions, the Department has authority to issue a policy on reasonable and nondiscriminatory airport fees applicable to general aviation airports.

The Department is aware of the differences between general aviation airports and airports receiving extensive air carrier services. As we noted in publishing the interim policy, we will take these differences into account in applying the policy. Moreover, the potential adverse impact on general aviation airports of the revenue cap would be eliminated by our proposal to eliminate that cap.

6. Applicability Where an Agreement Exists

Airport commenters generally requested that we modify the policy to exclude fees established by agreements with users. They argued that the limitations in § 47129 (e)(1) and (f)(1) preclude the application of the policy to fees established by agreement. They also argued that fees established by agreement generally represent a mutual exchange of benefits to both parties. A determination of unreasonableness by the Department would disturb this exchange and provide a windfall to the airport user who challenged the fee.

The Department does not intend to fully exclude fees set by agreement from the scope of the policy. However, we propose to modify the policy statement to clarify that if the FAA reviews a fee set by agreement, the FAA will not act as a forum for adjudication of contract disputes between private parties.

As noted above, the AAIA provides authority for establishing a policy that applies to all airport fees imposed on aeronautical users, including fees established by agreement. In addition, many bilateral aviation agreements include a commitment by the United

States that airport fees charged to foreign airlines will be reasonable. An airport and individual aeronautical user or users cannot by private agreement waive the obligations of the AIP grant assurances, which are designed to protect the public, not just private interests. Similarly, they cannot waive the United States' obligations to foreign governments. Moreover, it is possible that an agreement that is reasonable, and even beneficial in its impact on the parties could have an unreasonable or unjustly discriminatory impact on nonparty airport users.

7. Applicability to Users Other Than U.S. Air Carriers

Airport commenters generally request us to limit the applicability of the policy to U.S. air carriers and foreign air carriers. A few commenters also request that we exclude fees charged to foreign air carriers from the scope of the policy and from the applicability of the expedited hearing procedures in 14 CFR Part 302, subpart F. They argue that § 47129 by its terms precludes us from adopting policies and procedures to determine the reasonableness of fees other than those fees charged to air carriers that are not otherwise excluded from § 47129 by its terms. They further argue that the methods used to establish fees to non-carrier aeronautical users do not readily lend themselves to application of the policy.

The Department does not propose to limit the applicability of the policy to fees imposed on U.S. and foreign air carriers. However, we propose to modify the policy statement to clarify that in situations not covered by § 47129, the policy would be applied by the FAA in its role of administrator of the AIP program in carrying out the agency's obligation to satisfy itself that an applicant for grants is in compliance with its assurances, not in the role of a forum for adjudicating a dispute between private parties. The Department also intends to apply the procedures mandated by § 47129, including the procedures governing refunds, to foreign air carriers in the same way we apply it to U.S. air carriers.

As noted above, the AAIA provides authority for establishing a policy that applies to all airport fees imposed on aeronautical users, including fees imposed on foreign air carriers and noncarrier aeronautical users. In addition, many bilateral aviation agreements include a commitment by the United States that airport fees charged to foreign airlines will be reasonable.

The Department recently considered the applicability of § 47129 to foreign air carriers in the decision on the reasonableness of LAX landing fees. The Department concluded that § 47129 allows foreign airlines to obtain retrospective relief and to file complaints. The Department pointed out that the United States' obligations to give nondiscriminatory treatment to foreign carriers generally precluded us from denying foreign air carriers a remedy available to U.S. carriers absent a bar to granting foreign air carriers that remedy. Order 95–6–36 at 53–56. For the reasons stated in its consideration of the issue in the LAX case, the Department will continue to consider complaints filed by foreign air carriers under the terms of § 47129.

8. Limits on Aeronautical Surplus

The Department proposes to modify the policy to eliminate the total HCA cap on aeronautical revenue and to provide that nonairfield fees may be established by any reasonable means. In providing this flexibility, the Department is in no respect waiving the requirements in statute, AIP grant assurances and, where applicable, international aviation agreements. The use of negotiated rates or rates based on an objective determination of fair market value creates the opportunity for the generation of surplus aeronautical revenues in any given year. The Department proposes to rely generally on market discipline to prevent the generation of aeronautical revenues that, over time, exceed aeronautical costs. Based on this reliance, we are not proposing an alternative cap on fees imposed for aeronautical services and facilities other than the airfield. However, to address the remote chance that the market mechanism may break down, we propose to add a provision on revenue generation specifying that the accumulation of surpluses attributable to aeronautical revenue may warrant an inquiry into the reasonableness of the aeronautical fees (proposed Para. 4.2.1).

Public Meetings

In order to facilitate the submission of public and industry comment, and to ensure that agency staff has the best opportunity to understand the positions of commenters and the scope of industry practice on this complex subject, the Department will hold at least two informal public meetings on the proposed policy. The meetings will be structured to permit informal discussion among the various interested parties rather than simply delivery of prepared comments for the record. Notice of the time, date, and location of the meetings will be published separately in the **Federal Register**.

Proposed Policy

Accordingly, the OST and the FAA propose to revise the Policy Regarding Airport Rates and Charges as follows:

Policy Regarding the Establishment of Airport Rates and Charges

Introduction

It is the fundamental position of the Department that the issue of rates and charges is best addressed at the local level by agreement between users and airports. By providing guidance on standards applicable to airport fees imposed for aeronautical use of the airport, the Department intends to facilitate direct negotiation between the proprietor and aeronautical users and to minimize the need to seek direct Federal intervention to resolve differences over airport fees.

Applicability of the Policy

A. Scope of Policy

Under the terms of grant agreements administered by the FAA for airport improvement, all aeronautical users are entitled to airport access on fair and reasonable terms without unjust discrimination. Therefore, the Department considers that the principles and guidance set forth in this policy statement apply to all aeronautical uses of the airport. The Department recognizes, however, that airport proprietors may use different mechanisms and methodologies to establish fees for different facilities, *e.g.*, for the airfield and terminal area, and for different aeronautical users, *e.g.*, air carriers and fixed-base operators. Various elements of the policy reflect these differences. In addition, the Department will take these differences into account if we are called upon to resolve a dispute over aeronautical fees or otherwise consider whether an airport sponsor is in compliance with its obligation to provide access on fair and reasonable terms without unjust discrimination.

B. Aeronautical Use and Users

The Department considers the aeronautical use of an airport to be any activity that involves, makes possible, is required for the safety of the operations of, or is otherwise directly related to, the operation of aircraft. Aeronautical use includes services provided by air carriers related directly and substantially to the movement of passengers, baggage, mail and cargo on the airport. Persons, whether individuals or businesses, engaged in aeronautical uses involving the operation of aircraft, or providing flight support directly related to the operation of aircraft, are considered to be aeronautical users.

Conversely, the Department considers that the operation by air carriers or foreign air carriers of facilities such as a reservations center, headquarters office, or flight kitchen on an airport does not constitute an aeronautical activity subject to the principles and guidance contained in this policy statement with respect to reasonableness and unjust discrimination. Such facilities need not be located on an airport. A carrier—s decision to locate such facilities is based on the negotiation of a lease or sale of property. Accordingly, the Department relies on the normal forces of competition for commercial or industrial property to assure that fees for such property are not excessive.

C. Applicability of Section 113 of the FAA Authorization Act of 1994

Section 113 of the Federal Aviation Authorization Act of 1994 ("Authorization Act"), 49 U.S.C. § 47129, directs the Secretary of Transportation to issue a determination on the reasonableness of certain fees imposed on air carriers in response to carrier complaints or a request for determination by an airport proprietor. Section 47129 further directs the Secretary to publish final regulations, policy statements, or guidelines establishing procedures for deciding cases under § 47129 and the standards to be used by the Secretary in determining whether a fee is reasonable. Section 47129 also provides for the issuance of credits or refunds in the event that the Secretary determines a fee is unreasonable after a complaint is filed. Section 47129(e) excludes from the applicability of § 47129 a fee imposed pursuant to a written agreement with air carriers, a fee imposed pursuant to a financing agreement or covenant entered into before the date of enactment of the statute (August 23, 1994), and an existing fee not in dispute on August 23, 1994. Section 47129(f) further provides that § 47129 shall not adversely affect the rights of any party under existing air carrier/airport agreements or the ability of an airport to meet its obligations under a financing agreement or covenant that is in effect on August 23, 1994.

The Department does not interpret § 47129 to repeal or narrow the scope of the basic requirement that fees imposed on aeronautical users be reasonable and not unjustly discriminatory or to narrow the obligation on the Secretary to receive satisfactory assurances that, *inter alia,* airport sponsors will provide access on reasonable terms before approving AIP grants. Moreover, the Department does not interpret sections 47129 (e) and (f) to preclude the Department from adopting policy guidance to carry out the Department's statutory obligation to assure that aeronautical fees are being imposed at AIP-funded airports in a manner that is consistent with the obligation to provide airport access on reasonable terms. Likewise, in the case of airports receiving international service, these provisions do not preclude us from carrying out any international obligations for assuring that airport fees charged to foreign airlines are reasonable.

Therefore, the Department will apply the policy guidance in all cases in which we are called upon to determine if an airport sponsor is carrying out its obligation to make the airport available on reasonable terms, including instances covered in § 47129 (e) and (f).

However, as the statute provides, a dispute over matters described by § 47129 (e) and (f) will not be processed under the procedures mandated by § 47129. Rather those disputes will be processed under procedures applicable to airport compliance matters in general. In addition, the Department will take into account the existence of an agreement between air carrier and airport operator, if one exists, in making a determination.

D. Components of Airfield

The Department considers the airfield assets to consist of runways, taxiways, ramps or aprons not leased on an exclusive use basis and land associated with these facilities. The Department also considers the airfield to include land acquired for the purpose of assuring land-use compatibility with the airfield, if the land is included in the rate base associated with the airfield under the provisions of this policy.

Principles Applicable to Airport Rates and Charges

1. In general, the Department relies upon airport proprietors, aeronautical users, and the market and institutional arrangements within which they operate, to ensure compliance with applicable legal requirements. Direct Federal intervention will be available, however, where needed.

2. Rates, fees, rentals, landing fees, and other service charges ("fees") imposed on aeronautical users for aeronautical use of airport facilities ("aeronautical fees") must be fair and reasonable.

3. Aeronautical fees may not unjustly discriminate against aeronautical users or user groups.

4. Airport proprietors must maintain a fee and rental structure that in the circumstances of the airport makes the airport as financially self-sustaining as possible.

5. In accordance with relevant Federal statutory provisions governing the use of airport revenue, airport proprietors may expend revenue generated by the airport only for statutorily allowable purposes.

Local Negotiation and Resolution

1. In general, the Department relies upon airport proprietors, aeronautical users, and the market and institutional arrangements within which they operate, to ensure compliance with applicable legal requirements. Direct Federal intervention will be available, however, where needed.

1.1 The Department encourages direct resolution of differences at the local level between aeronautical users and the airport proprietor. Such resolution is best achieved through adequate and timely consultation between the airport proprietor and the aeronautical users. Airport proprietors should engage in adequate and timely consultation with aeronautical users about airport fees.

1.1.1 Airport proprietors should consult with aeronautical users well in advance, if practical, of introducing significant changes in charging systems and procedures or in the level of charges. The proprietor should provide adequate information to permit aeronautical users to evaluate the airport proprietor's justification for the change and to assess the reasonableness of the proposal. For consultations to be effective, airport proprietors should give due regard to the views of aeronautical users and to the effect upon them of changes in fees. Likewise, aeronautical users should give due regard to the views of the airport proprietor and the financial needs of the airport.

1.1.2 To further the goal of effective consultation, Appendix 1 of this policy statement contains a description of information that the Department considers would be useful to the carriers and other aeronautical users to permit meaningful consultation and evaluation of a proposal to modify fees.

1.1.3 Airport proprietors should consider the public interest in establishing airport fees, and aeronautical users should consider the public interest in consulting with airports on setting such fees.

1.1.4 Airport proprietors and aeronautical users should consult and make a good-faith effort to reach agreement. Absent agreement, airport proprietors are free to act in accordance with their proposals, subject to review by the Secretary or the Administrator on complaint by the user or, in the case of fees subject to 49 U.S.C. 47129, upon request by the airport operator, or, in unusual circumstances, on the Department's initiative.

1.1.5 To facilitate local resolution and reduce the need for direct Federal intervention to resolve differences over aeronautical fees, the Department encourages airport proprietors and aeronautical users to include alternative dispute resolution procedures in their lease and use agreements.

1.1.6 Any newly established fee or fee increase that is the subject of a complaint under 49 U.S.C. 47129 that is not dismissed by the Secretary must be paid to the airport proprietor under protest by the complainant. Unless the airport proprietor and complainant agree otherwise, the airport proprietor will obtain a letter of credit, or surety bond, or other suitable credit instrument in accordance with the provisions of 49 U.S.C. 47129(d). Pending issuance of a final order determining reasonableness, an airport proprietor may not deny a complainant currently providing air service at the airport reasonable access to airport facilities or services, or otherwise interfere with that complainant's prices, routes, or services, as a means of enforcing the fee, if the complainant has complied with the requirements for payment under protest.

1.2 Where airport proprietors and aeronautical users have been unable, despite all reasonable efforts, to resolve disputes between them, the Department will act to resolve the issues raised in the dispute.

1.2.1 In the case of a fee imposed on one or more air carriers or foreign air carriers, the Department will issue a determination on the reasonableness of the fee upon the filing of a written request for a determination by the airport proprietor or, if the Department determines that a significant dispute exists, upon the filing of a complaint by one or more air carriers or foreign air carriers, in accordance with 49 U.S.C. § 47129 and implementing regulations. Pursuant to the provisions of 49 U.S.C. § 47129, the Department may only determine whether a fee is reasonable or unreasonable, and may not set the level of the fee.

1.2.2 The Department will first offer its good offices to help parties reach a mutually satisfactory outcome in a timely manner. Prompt resolution of these disputes is always desirable since extensive delay can lead to uncertainty for the public and a hardening of the parties' positions. Air carriers and foreign air carriers may request the assistance of the Department in advance of or in lieu of the formal complaint procedure described in 1.2.1.; however, the 60-day period for filing a complaint under § 47129 shall not be extended or tolled by such a request.

1.2.3 In the case of fees imposed on other aeronautical users, where negotiations between the parties are unsuccessful and a complaint is filed alleging that airport fees violate an airport proprietor's federal grant obligations, the Department will, where warranted, exercise the agency's broad statutory authority to review the legality of those fees and to issue such determinations and take such actions as are appropriate based on that review.

1.3 Airport proprietors must retain the ability to respond to local conditions with flexibility and innovation. An airport proprietor is encouraged to achieve consensus and agreement with its airline tenants before implementing a practice that would represent a major departure from this guidance. However, the requirements of any law, including the requirements for the use of airport revenue, may not be waived, even by agreement with the aeronautical users.

Fair and Reasonable Fees

2. Rates, fees, rentals, landing fees, and other service charges ("fees") imposed on aeronautical users for the aeronautical use of the airport ("aeronautical fees") must be fair and reasonable.

2.1 Federal law does not require a single approach to airport financing. Rates may be set according to a "residual" or "compensatory" rate-setting methodology, or any combination of the two, or according to a new rate-setting methodology, as long as the methodology used is applied consistently to similarly situated aeronautical users and as otherwise required by this policy. Airport proprietors may set rates for aeronautical use of airport facilities by ordinance, statute or resolution, regulation, or agreement.

2.1.1 Aeronautical users may receive a cross-credit of nonaeronautical revenues only if the airport proprietor agrees. Agreements providing for such cross-crediting are commonly referred to as "residual agreements" and generally provide a sharing of nonaeronautical revenues with aeronautical users. The aeronautical users may in turn agree to assume part or all of the liability for non-aeronautical costs, or an airport proprietor may cross-credit nonaeronautical revenues to aeronautical users even in the absence of such an agreement, but an airport proprietor may not require aeronautical users to cover losses generated by nonaeronautical facilities except by agreement.

2.1.2 In other situations, an airport proprietor assumes all liability for airport costs and retains all airport profits for its own use in accordance with Federal requirements. This approach to airport financing is generally referred to as the compensatory approach.

2.1.3 Airports frequently adopt charging systems that employ elements of both approaches.

2.2 Revenues from fees imposed for use of the airfield (airfield revenues) may not exceed the costs to the airport proprietor of providing airfield services and airfield assets currently in aeronautical use (airfield costs) unless otherwise agreed to by the affected aeronautical users.

2.3 The "rate base" is the total of all aeronautical costs that may be recovered from aeronautical users through fees charged for providing aeronautical services and facilities (aeronautical fees). Airport proprietors must employ a reasonable, consistent, and "transparent" (i.e., clear and fully justified) method of establishing the rate base and adjusting the rate base on a timely and predictable schedule.

2.4 Except as provided in paragraph 2.6 below or by agreement with aeronautical users, costs that may be included in the rate base (allowable costs) are limited to all operating and maintenance expenses directly and indirectly associated with the provision of aeronautical facilities and services (including environmental costs, as set forth below); all capital costs associated with the provision of aeronautical facilities and services currently in use, as set forth below; and current costs of planning future aeronautical facilities and services. In addition, a private, equity owner of an airport can include a reasonable return on investment.

2.4.1 The airport proprietor may include in the aeronautical rate base, at a reasonable rate, imputed interest on funds used to finance capital investments for aeronautical use, except to the extent that the funds are generated by fees charged for the use of airfield assets and airfield services. However, the airport proprietor may not include in the rate base imputed interest on funds obtained by debt financing if the debt-service costs of those funds are also included in the rate base.

2.4.2 Airport proprietors may include reasonable environmental costs in the rate base to the extent that the airport proprietor incurs a corresponding actual expense. All revenues received based on the inclusion of these costs in the rate base are subject to Federal requirements on the use of airport revenue. Reasonable environmental costs include, but are not necessarily limited to, the following:

(a) the costs of investigating and remediating environmental contamination caused by aeronautical operations at the airport at least to the extent that such investigation or remediation is required by or consistent with local, state or federal environmental law, and to the extent such requirements are applied to other similarly situated enterprises;

(b) the cost of mitigating the environmental impact of an airport development project (if the development project is one for which costs may be included in the aeronautical users' rate base), at least to the extent that these costs are incurred in order to secure necessary approvals for such projects, including but not limited to approvals under the National Environmental Policy Act and similar state statutes;

(c) the costs of aircraft noise abatement and mitigation measures, both on and off the airport, including but not limited to land acquisition and acoustical insulation expenses, to the extent that such measures are undertaken as part of a comprehensive and publicly-disclosed airport noise compatibility program; and

(d) the costs of insuring against future liability for environmental contamination caused by current aeronautical activities. Under this provision, the costs of self-insurance may be included in the rate base only to the extent that they are incurred pursuant to a self-insurance program that conforms to applicable standards for self-insurance practices.

2.4.3 Airport proprietors are encouraged to establish fees with due regard for economy and efficiency.

2.4.4 The airport proprietor may include in the rate base amounts needed to fund debt service and other reserves and to meet cash flow requirements as specified in financing agreements or covenants (for facilities in use), including but not limited to debt-service coverage; to fund cash reserves to protect against the risks of cash-flow fluctuations associated with normal airport operations; and to fund reasonable cash reserves to protect against other contingencies.

2.4.5 The airport proprietor may include in the rate base capital costs in accordance with the following guidance, which is based on the principle of cost causation:

(a) Costs of facilities directly used by the aeronautical users may be fully included in the rate base, in a manner consistent with this policy. For example, the capital cost of a runway may be included in the rate base used to establish landing fees.

(b) Costs of airport facilities used for both aeronautical and nonaeronautical uses (shared costs) may be included in a particular aeronautical rate base if the facility in question supports the aeronautical activity reflected in that rate base. The portion of shared costs allocated to aeronautical users should not exceed an amount that reflects the aeronautical purpose and proportionate aeronautical use of the facility in relation to nonaeronautical use of the facility, unless the affected aeronautical users agree to a different allocation. Aeronautical users may not be allocated all costs of facilities that are used by both aeronautical and nonaeronautical users unless they agree to that allocation.

2.5 Airport proprietors must comply with the following practices in establishing the rate base, provided, however, that one or more aeronautical users may agree to a rate base that deviates from these practices in the establishment of those users' fees.

2.5.1 In determining the total costs that may be recovered from fees for the use of airfield assets, public use roadways, and associated land in the rate base, the airport proprietor must value them according to their historic cost to the original airport proprietor. Subsequent airport proprietors generally shall acquire the cost basis of such assets at the original airport proprietor's historic cost, adjusted for subsequent improvements.

(a) Where the land associated with airfield facilities and public use roadways was acquired with debt-financing, the airport proprietor may include such land in the rate base by charging all debt service expenditures incurred by the airport proprietor, including principal, interest and debt service coverage. If such land was acquired with internally generated funds or donated by the airport proprietor the airport proprietor may include the cost of the land by amortization. Upon retirement of the debt or completion of the amortization, the land may no longer be included in the rate base.

(b) The airport proprietor may use a reasonable and not unjustly discriminatory methodology to allocate the total airfield costs among individual segments of the airfield to enhance the efficient use of the airfield, even if that methodology results in fees charged for a particular segment that exceed that segment's pro rata share of costs based on HCA valuation.

2.5.2 Where comparable assets, e.g., two runways or two terminals, were built at different times and have different costs, the airport proprietor may, at its option, combine the cost basis of the comparable assets to develop a single cost basis applicable to all such facilities.

2.5.3 The costs of facilities not yet built and operating may not be included in the rate base. However, the debt-service and other carrying costs incurred by the airport proprietor during construction may be capitalized and amortized once the facility is put in service. The airport proprietor may include in the rate base the cost of land that facilitates the current operations of the airport.

2.5.4 The rate base of an airport may include costs associated with another airport currently in use only if: (1) The proprietor of the first airport is also the proprietor of the second airport; (2) the second airport is currently in use; and (3) the costs of the second airport to be included in the first airport's rate base are reasonably related to the aviation benefits that the second airport provides or is expected to provide to the aeronautical users of the first airport.

(a) Element no. 3 above will be presumed to be satisfied if the second airport is designated as a reliever airport for the first airport in the FAA's National Plan of Integrated Airport Systems (NPIAS).

(b) If an airport proprietor closes an operating airport as part of an approved plan for the construction and opening of a new airport, reasonable costs of disposition of the closed airport facility may be included in the rate base of the new airport, to the extent that such costs exceed the proceeds from the disposition.

2.6 For other facilities and land not covered by Paragraph 2.5.1, the airport proprietor may use any reasonable methodology to determine fees, so long as the methodology is justified and applied on a consistent basis to comparable facilities, subject to the provisions of paragraph 4.2.1 below.

2.6.1 Reasonable methodologies may include, but are not limited to, historic cost valuation, direct negotiation with prospective aeronautical users, or objective determinations of fair market value.

2.7 At all times, airport proprietors must comply with the following practices:

2.7.1 Indirect costs may not be included in the rate base unless they are based on a reasonable, transparent cost allocation formula calculated consistently for other units or cost centers within the control of the proprietor.

2.7.2 The costs of airport development or planning projects paid for with federal government grants and contributions and passenger facility charges (PFCs) may not be included in the rate base.

(a) In the case of a PFC-funded project for terminal development, for gates and related areas, or for a facility that is occupied by one or more carriers on an exclusive or preferential use basis, the fees paid to use those facilities shall be no less than the fees charged for similar facilities that were not financed with PFC revenue.

Prohibition on Unjust Discrimination

3. Aeronautical fees may not unjustly discriminate against aeronautical users or user groups.

3.1 Unless aeronautical users agree, aeronautical fees imposed on any aeronautical user or group of aeronautical users may not exceed the costs allocated to that user or user group under a cost allocation methodology adopted by the airport proprietor that is consistent with this guidance.

3.1.1 The prohibition on unjust discrimination does not prevent an airport proprietor from making reasonable distinctions among aeronautical users (such as signatory and non-signatory carriers) and assessing higher fees on certain categories of aeronautical users based on those distinctions (such as higher fees for non-signatory carriers, as compared to signatory carriers).

3.2 A properly structured peak pricing system that allocates limited resources using price during periods of congestion will not be considered to be unjustly discriminatory. An airport proprietor may, consistent with the policies expressed in this policy statement, establish fees that enhance the efficient utilization of the airport.

3.3 Relevant provisions of the Convention on International Civil Aviation (Chicago Convention) and many bilateral aviation agreements specify, inter alia, that charges imposed on foreign airlines must not be unjustly discriminatory, must not be higher than those imposed on domestic airlines engaged in similar international air services and must be equitably apportioned among categories of users. Charges to foreign air carriers for aeronautical use that are inconsistent with these principles will be considered unjustly discriminatory or unfair and unreasonable.

3.4 Allowable costs—costs properly included in the rate base—must be allocated to aeronautical users by a transparent, reasonable, and not unjustly discriminatory rate-setting methodology. The methodology must be applied consistently and cost differences must be determined quantitatively, when practical.

3.4.1 Common costs (costs not directly attributable to a specific user group or cost center) must be allocated according to a reasonable, transparent and not unjustly discriminatory cost allocation formula that is applied consistently, and does not require any air carrier, foreign air carrier or other aeronautical user group to pay costs properly allocable to other users.

Requirement to be Financially Self-Sustaining

4. Airport proprietors must maintain a fee and rental structure that in the circumstances of the airport makes the airport as financially self-sustaining as possible.

4.1 If market conditions or demand for air service do not permit the airport to be financially self-sustaining, the airport proprietor should establish long-term goals and targets to make the airport as financially self-sustaining as possible.

4.1.1 Airport proprietors are encouraged, when entering into new or revised agreements or otherwise establishing rates, charges, and fees, to undertake reasonable efforts to make their particular airports as self sustaining as possible in the circumstances existing at such airports.

(a) Absent agreement with aeronautical users, the obligation to make the airport as self-sustaining as possible does not permit the airport proprietor to establish fees for the use of the airfield that exceed the airport proprietor's airfield costs.

(b) For those facilities for which this policy permits the use of fair market value, the Department does not construe the obligation on self-sustainability to compel the use of fair market value to establish fees.

4.1.2 At some airports, market conditions may not permit an airport proprietor to establish fees that are sufficiently high to recover aeronautical costs and sufficiently low to allow commercial aeronautical services to operate at a profit. In such circumstances, an airport proprietor's decision to charge rates that are below those needed to achieve self-sustainability in order to assure that services are provided to the public is not inherently inconsistent with the obligation to make the airport as self-sustaining as possible in the circumstances.

4.2 In establishing new fees, and generating revenues from all sources, airport owners and operators should not seek to create revenue surpluses that exceed the amounts to be used for airport system purposes and for other purposes for which airport revenues may be spent under 49 U.S.C. 47107(b)(1), including reasonable reserves and other funds to facilitate financing and to cover contingencies. While fees charged to nonaeronautical users may exceed the costs of service to those users, the surplus funds accumulated from those fees must be used in accordance with § 47107(b).

4.2.1 The Department assumes that the limitation on the use of airport revenue and effective market discipline for aeronautical services and facilities other than the airfield will be effective in holding aeronautical revenues, over time, to the airport proprietor's costs of providing aeronautical services and facilities, including reasonable capital costs. However, the progressive accumulation of substantial amounts of surplus aeronautical revenue may warrant an FAA inquiry into whether aeronautical fees are consistent with the airport proprietor's obligations to make the airport available on fair and reasonable terms.

Requirements Governing Revenue Application and Use

5. In accordance with relevant Federal statutory provisions governing the use of airport revenue, airport proprietors may expend revenue generated by the airport only for statutorily allowable purposes.

5.1 Additional information on the statutorily allowed uses of airport revenue is contained in separate guidance published by the FAA pursuant to § 112 of the FAA Authorization Act of 1994, which is codified at 49 U.S.C. § 47107(l).

5.2. The progressive accumulation of substantial amounts of airport revenues may warrant an FAA inquiry into the airport proprietor's application of revenues to the local airport system.

Issued in Washington, DC, on August 21, 1995.

Federico Peña,

Secretary of Transportation.

David R. Hinson,

Administrator, Federal Aviation Administration.

Appendix 1—Information for Aeronautical User Charges Consultations

The Department of Transportation ordinarily expects the following information to be available to aeronautical users in connection with consultations over changes in airport rates and charges:

1. HISTORIC FINANCIAL INFORMATION covering two fiscal years prior to the current year including, at minimum, a profit and loss statement, balance sheet and cash flow statement for the airport implementing the charges.

2. JUSTIFICATION. Economic, financial and/or legal justification for changes in the charging methodology or in the level of aeronautical rates and charges at the airport. Airports should provide information on the aeronautical costs they are including in the rate base.

3. TRAFFIC INFORMATION. Annual numbers of terminal passengers and aircraft movements for each of the two preceding years.

4. PLANNING AND FORECASTING INFORMATION

(a) To the extent applicable to current or proposed fees, the long-term airport strategy setting out long-term financial and traffic forecasts, major capital projects and capital expenditure, and particular areas requiring strategic action. This material should include any material provided for public or government reviews of major airport developments, including analyses of demand and capacity and expenditure estimates.

(b) Accurate, complete information specific to the airport for the current and the forecast year, including the current and proposed budgets, forecasts of airport charges revenue, the projected number of landings and passengers, expected operating and capital expenditures, debt service payments, contributions to restricted funds, or other required accounts or reserves.

(c) To the extent the airport uses a residual or hybrid charging methodology, a description of key factors expected to affect commercial or other nonaeronautical revenues and operating costs in the current and following years.

Logging Operations; Final Rule

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. S–048]

Logging Operations

ACTION: Final rule; corrections and technical amendments.

SUMMARY: This notice corrects and amends the final rule on Logging Operations which was published by OSHA on October 12, 1994 (59 FR 51672). In response to questions raised about certain provisions in the rule, OSHA is clarifying language in the regulatory text so it most accurately expresses the Agency's intent with respect to the provisions in question and to provide additional information with regard to some of the provisions.

EFFECTIVE DATE: September 8, 1995.

FOR ADDITIONAL INFORMATION: Ms. Anne Cyr, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, Room N–3637, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210, (202)–219–8148.

SUPPLEMENTARY INFORMATION:

Background

On October 12, 1994, OSHA published a revised standard providing protection for workers performing logging operations (59 FR 51672). The final rule (29 C.F.R. 1910.266) had an effective date of February 9, 1995.

After the final rule was published, the Equipment Manufacturers Institute (EMI), the Portable Power Equipment Manufacturers Association (PPEMA), and Homelite, a manufacturer of chain saws, filed timely petitions with the court seeking judicial review of the standard. The deadline for filing a petition for judicial review was December 12, 1994. After the deadline had passed, the Associated California Loggers, the Associated Oregon Loggers, Inc., the Montana Logging Association, and the Washington Contract Loggers Association also filed objections to the final rule.

These parties and organizations raised questions about certain provisions of the final rule. After consideration of their questions, OSHA published a **Federal Register** notice (60 FR 6447, February 8, 1995) staying enforcement of 12 provisions of the standard for six-months, until August 9, 1995. The other provisions of the final rule were not affected by the partial stay and became effective on February 9, 1995.

In the February 8 notice, OSHA explained that the partial stay would give the Agency time to clarify language in the regulatory text and preamble so it most accurately expressed the Agency's intent with respect to the provisions in question and to provide additional information with regard to some of the provisions. The provisions OSHA stayed were: (d)(1)(v)—insofar as it requires foot protection to protect the employee against chain-saw penetration; (d)(1)(vii)—insofar as it requires face protection; (d)(2)(iii)—annual review and approval of first-aid kits by a health care provider; (f)(2)(iv)—machine operation on slopes; (f)(2)(xi)—machine shutdown procedures; (f)(3)(ii)—ROPS specifications; (f)(3)(vii) and (viii)—machine cab enclosures; (f)(7)(ii)—machine parking brakes; (g) (1) and (2)—maintenance and inspection of employee-owned vehicles; (h)(2)(vii)—location of the backcut in Humboldt cutting.

PPEMA and Homelite also requested OSHA to stay enforcement of the requirement that chain saws be equipped with chain brakes. OSHA denied their request. Thereafter, PPEMA withdrew its petition for judicial review. Homelite filed a motion for a stay pending review of the chain-brake requirement with the U.S. Court of Appeals for the Fourth Circuit. OSHA opposed Homelite's motion and American Pulpwood Association (APA) filed an amicus opposing the stay. OSHA also filed a motion to dismiss Homelite's petition for lack of standing. The court denied both Homelite's and OSHA's motions. Homelite continues to challenge the chain brake provision of the final rule in the Fourth Circuit. EMI withdrew its petition for review pursuant to a settlement.

During the six-month stay of enforcement, OSHA received other inquiries about the final rule. In addition, OSHA met with representatives of various logging associations such as APA and the Western Logging Council (WLC), equipment manufacturers such as EMI and PPEMA, and other individuals in order to discuss the stayed provisions as well as other questions they had regarding the final rule.

On August 9, 1995, OSHA published a **Federal Register** notice extending the partial stay for 30 days, until September 8, 1995, in order to complete its reconsideration of the issues, to complete corrections and clarifications in the regulatory text and preamble, and to revise its compliance directive to reflect those changes (60 FR 40457). This notice corrects and amends the final rule, and provides information and clarification regarding the stayed provisions and other issues.

Stayed Provisions

Paragraph (d)(1)(v)—Cut-Resistant Foot Protection

The final rule requires that the employer assure that each employee wears foot protection, covering and supporting the foot and ankle, which is waterproof or water repellant. OSHA stayed one aspect of the foot protection provision which required that logging boots provide protection from penetration by chain saws. Some parties requested OSHA to drop the chain-saw penetration requirement, contending that rubber and calk-soled logging boots providing employees protection from penetration by chain saws were neither necessary nor available.

The rulemaking record strongly supports the need for logging footwear which protects chain-saw operators against penetration by chain saws. As OSHA discussed in the preamble to the final rule, 10 percent of injuries reported in the WIR survey were to the foot and ankle (Ex. 2–1). In addition, APA submitted to the record an injury report where a chain-saw operator who was not wearing protective footwear cut off his foot when the bar went through the soft spot of a tree trunk and into his foot (Ex. 26A).

Reports of foot injuries resulting from chain saws led several commenters to recommend that OSHA require foot protection be cut-resistant (Tr. W1 148, 195; Tr. W2 139). For example, Mr. Joseph William, owner of Jayfor Logging, said he provides and requires employees to wear cut-resistant logging boots (Tr. W1 195). In addition, Mr. Williams said all employers that are members of the Nortim program, a logging workers' compensation insurance group, must assure that employees wear cut-resistant foot protection (Tr. W1 158, 195).

Based on its reconsideration of the record, OSHA maintains that an employee operating a chain saw needs to wear logging boots which will provide protection against penetration by the saw. However, based on discussions during the stay, OSHA is correcting the language of this requirement to express more clearly the Agency's intent regarding the type of chain-saw protection that is required for the foot. In the final rule, OSHA intended by the language "protect the employee from penetration by chain saws" to mean that foot protection worn by employees be equipped with material that is *cut-resistant* to chain saws. That is, OSHA intended that foot protection prevent the chain saw from cutting the employee before the employee is able to react, or before the protective material jams the chain saw. The language in the final rule was not intended to require that the protective material itself must be totally impervious to penetration by a chain saw. Rather, the available protective clothing and footwear is equipped with multiple layers of protective material, such as but not limited to ballistic nylon, Kevlar, or the layered-material in heavy-duty logging boots; which provide cut resistance as follows: the protective material must either provide enough resistance to the saw chain to give the operator time to react and pull the saw away from the foot before the saw chain penetrates through all the layers, or jam the flywheel and chain, thereby stopping the saw. OSHA is revising the regulatory text to indicate that leg protection must be made of material that is cut-resistant, as OSHA has defined it above. OSHA stresses that this change is merely adoption of terminology which is used in the industry, but the use of this term does not change the meaning or intention of the final rule.[1]

Some parties also said that rubber and calk-soled boots which are needed in working in the steep terrain of the northwest were not manufactured with chain-saw cut-resistant material. However, the rulemaking record shows that such boots are available and have been available for a considerable period of time (Ex. 4–103, 5–30). Specifically, E. I. du Pont de Nemours & Company, the manufacturer of Kevlar, told OSHA in 1989 that rubber logging boots were available that contain Kevlar, and which du Pont "feel[s] offers adequate protection against chain saw injuries, based on European test standards" (Ex. 5–30). In addition, an article from the June 1987 *The Logger and Lumberman* said that a cut-resistant rubber boot, which had been successfully tested by the U.S. Forest Service, was available (Ex. 4–103). Moreover, in discussions with other manufacturers and distributors of personal protective equipment during the six-month stay, OSHA has confirmed its original conclusion that a variety of companies currently manufacture logging boots, including rubber and calk-soled boots, which are equipped with material to protect against chain saw cuts. Therefore, OSHA is lifting the stay of this requirement. Effective September 8, 1995, employers shall assure that foot protection worn by each employee who operates a chain saw, including rubber, calk-soled and other slip-resistant boots, is chain-saw cut-resistant.

OSHA has also clarified the final rule to indicate that the cut-resistant foot protection requirement applies only to employees who operate a chain saw. OSHA notes and is specifying in the revised compliance directive that this applies to *any operation* of a chain saw, whether as a regular part of the employee's job or incidental to the job. There is nothing in the records that indicates chain-saw accidents involve only those who operate chain saws on a regular basis. OSHA believes that those who operate chain saws only infrequently may be at particular risk because they may be less familiar with the chain saw and less experienced in managing the hazards associated with its operation. Based upon the hazards to employees when they use a chain saw and the ready availability of the protective equipment to minimize such hazards, OSHA believes that all employees who use a chain saw must be protected against foot injury regardless of the frequency of the chain saw usage. Logging employees who do not operate chain saws at all need not have foot protection that is chain-saw cut-resistant.

OSHA also stresses that the foot protection requirement in the final rule is expressed in performance terms. For example, nothing in the final rule requires that employees wear steel-toed logging boots in order to meet the cut-resistance requirement. Steel-toed boots meeting the ANSI foot protection requirements do provide adequate protection against chain-saw cuts for the *toe*. However, if such boots do not have material to protect the rest of the foot from chain-saw cuts they do not comply with the final rule. The final rule requires that logging boots for chain-saw operators must provide cut-resistant protection for the foot, not just the toe. The record indicates that there is available supplemental cut-resistant foot protection which can be attached to logging boots to provide the needed protection (Ex. 5–14).

After publication of the final rule, OSHA was requested by some parties to clarify the rule to indicate from what type of material logging boots must be constructed. They recommended that OSHA specify that logging boots be made of industrial grade or top grain leather or other material. Instead of specifying the type of material which must be used, OSHA has expressed the requirement in performance terms. For example, OSHA has specified that foot protection cover and provide support to the ankle. The purpose of this requirement is to help reduce the significant number of ankle and foot injuries (sprains and fractures) (Ex. 2–1). OSHA is confident that employers and employees will be able to select logging boots that provide adequate ankle support because various logging associations already recognize that hiking and other light duty boots do not provide sufficient protection.[2]

Paragraph (d)(1)(vii)—Face Protection

In the final rule, OSHA required that employers provide and pay for protection for the eyes and face for any employee where there is a potential for injury due to falling or flying objects. After publication of the final rule, OSHA was requested by some parties to stay the face protection requirement in order to clarify the following concerns.

First, these parties requested OSHA to clarify in what logging operations face protection is required. The rulemaking record shows that some employees do need protection for the face as well as the eyes (e.g., chipper operators) (Ex. 2–1). In the WIR survey 42 face injuries were reported during the three-month survey period which involved other than the eye (Ex. 2–1). OSHA believes that chipper operators, employees cutting limbs, branches or spring poles, and employees moving through dense underbrush are among those for whom the risk of facial lacerations from wood, wood chips, needles or splinters is most likely. OSHA is revising the final rule to indicate that where employees are at risk of facial injury they must wear protection meeting the requirements of subpart I of Part 1910 (29 CFR 1910.133).

For other employees, however, eye protection alone may be adequate to protect them from the hazards present. For example, an employee performing machine maintenance may only require eye protection. For these employees, the most likely hazards are dirt, particles or other substances flying or splashing into the eyes. For example, maintenance employees need eye protection where they are using metal cut-off or grinding tools. Subpart I requires employers to assess the hazards in the workplace to what personal protective equipment is necessary. OSHA is revising the final rule to emphasize that where the assessment indicates a risk of facial injury exists, face protection must also be provided and worn.

---

[1] OSHA notes that the most important aspect of the protective material is not that it be made specifically of ballistic nylon, but that it is comparably cut-resistant. OSHA intended its use of the term "ballistic nylon" in the final rule to be consistent with the industry's generic use of the term as shorthand for cut-resistant materials in general. Indeed, in the preamble to the final rule, OSHA discussed several types of materials which are currently available to provide protection against chain-saw cuts.

[2] OSHA notes that the final rule does not require the employer to provide logging boots for employees. The cost of providing logging boots may be borne by employees. The employer, however, must assure that logging boots which are worn by an employee are in serviceable condition and meet the requirements of paragraph (d)(1)(vi) of the final rule.

Second, these parties requested that OSHA clarify whether the final rule requires employees to wear both eye and face protection simultaneously. It was OSHA's intention that of face protection would adequate protection for both the eyes and the face. Therefore, OSHA is adding a note to the final rule to clarify that where the employer determines that protection against eye and face injury is necessary and provides the employee with a device that protects both the eyes as well as the face, the final rule does not also require the employee to wear separate eye protection.

Finally, these parties said that face protection should not be required because it may interfere with the logger's vision, thereby creating additional hazards. They said optical characteristics of face shields made of solid transparent material, as required by subpart I, could distort peripheral vision. However, they did not provide evidence to this effect during the rulemaking and they have not identified any data in the rulemaking record that would support this contention. There is nothing in the record that would lead the Agency to believe that potential distortion of peripheral vision by face shields creates a greater hazard than lack of face protection. Of the injuries reported in the WIR survey, obstructed vision was not identified as the cause of any injury (Ex. 2–1).

They also said that the logger's vision could be reduced in wet weather because of wood chips or sawdust sticking to the face shield or the transparent material fogging up. Once again, the record does not indicate that this is a significant problem. In any event, the final rule allows flexibility in selecting face protection for employees working in different conditions. Specifically, with the exception of chipping operations, the final rule expressly permits logger-type mesh screens to be used for face protection. Such screens provide protection from penetration by branches, limbs and saplings, yet do not restrict vision in wet weather or fog up. Information in the record indicates that face protection comprised of mesh screens is readily available in the industry. In fact, many types of safety headgear manufactured for the logging industry are equipped with mesh screen face protection.

OSHA notes, however, that most logger-type mesh face screens do not meet the literal requirements of Subpart I because they do not comply with the referenced ANSI standards, ANSI Z87.1–1989 or ANSI Z87.1–1968. Mesh face screens are not constructed with impervious transparent material and do not necessarily meet the impact resistance requirements of the ANSI standards. For this reason, they may not be used in chipping operations where impact resistance is needed to prevent injury from wood, wood chips, needles, or splinters being propelled from chipping machines at great speed. For chipping operations, therefore, eye and face protection must meet the requirements of subpart I.

However, for other logging operations such as chain-saw operation, OSHA believes that logger-type mesh screens will provide adequate protection. In these operations there is not the same hazard of objects hitting the face screen at a high speed or penetrating through the mesh openings. Mesh screens provide adequate protection to keep small limbs, branches, and saplings from poking the employee's eye or cutting the employee's face when the employee is moving through the woods. Therefore, OSHA is revising the final rule and compliance directive to indicate that an employer who provides and requires chain saw operators performing felling, limbing and bucking activities to use a logger-type mesh face screen would be deemed to be in compliance with this paragraph. Additionally, logger-type mesh face screens may also be used by those employees performing yarding operations. For all other logging tasks (e.g., machine and vehicle maintenance, cutting winch cables, drilling, grinding, and welding during equipment repair) for which the hazard assessment indicates eye and face protection are necessary, the employer must provide protection which meets the requirements of subpart I.

Paragraph (d)(2)(iii)—First-Aid Kits

Paragraph (d)(2) of the final rule requires that employers provide and maintain first-aid kits. In addition, this paragraph specifies the minimum content requirements for first-aid kits (Appendix A). These provisions became effective February 9, 1995.

OSHA stayed the requirement that the number and contents of first-aid kits be reviewed and approved annually by a health care provider. Some parties told OSHA that annual approval of first-aid kits by health care providers would be burdensome for employers. Because the final rule already contains a list of minimum contents for the first-aid kit, OSHA is persuaded that eliminating the requirement of annual health care provider review will not reduce protection for logging employees.

The minimum first-aid kit and first-aid training requirements provided in the final rule were developed in consultation with the OSHA offices of occupational medicine and occupational health nursing. This careful review of the minimum contents of the required first-aid kits makes it unnecessary for OSHA to require employers to have the kits reviewed annually by a health care provider. Therefore, OSHA is correcting the final rule accordingly.

At the same time, however, OSHA encourages logging employers to conduct an annual review of the contents of first-aid kits, including engaging in consultation with a health care provider regarding approval of those contents. Such review can help to ensure that the contents are adequate for the number of employees and conditions of the particular logging worksite, and that first-aid kits contain the latest first-aid innovations and technologies which would be useful to the logging work environment. Because of the remoteness of logging worksites from professional medical services, OSHA believes that for some logging sites, additional attention should be given to the contents of first-aid kits. Annual health care provider review is clearly permitted in these circumstances, and the final rule provides for such review as a "best practice" recommendation for employers.[3]

Paragraph (f)(2)(iv)—Machine Operation on Slopes

OSHA stayed the provision requiring that logging machines not be operated on any slope greater than the maximum slope recommended by the manufacturer after learning that logging machine manufacturers do not specify a maximum slope on which particular logging machines can be safely operated. The intent of this requirement was to ensure that machines used on sloping terrain are operated in a manner that will prevent the machine from tipping or rolling over. As OSHA explained in the preamble to the final rule, injuries and fatalities resulting from tipping and rollover accidents are prevalent in the logging industry because of the rough terrain on which logging machines operate (Ex. 2–1).

---

[3] OSHA notes that the employer does not need to take the actual first-aid kits themselves to the health care provider for review and approval. Rather, the health care provider may review the list of the items contained in the first-aid kits, along with a description of the conditions of the particular worksite.

The maximum slope of operation varies depending on the conditions under which the machine is being operated. These conditions include the terrain (e.g., wet, muddy, dry, compacted, rocky), the direction of the machine operation (e.g., cross-slope, uphill, downhill, diagonally across the slope), and the operation being performed. OSHA is revising the final rule to require that employers assure that machine operators follow the instructions, directions and limitations described by the manufacturer in the operating and maintenance manuals.

There are many ways in which an employer can accomplish this obligation. Manufacturers' operating instructions can be incorporated into operator training programs. Compliance with these operating instructions can be reinforced during regular safety and health meetings, and through spot checks on employees' operating performance.

Paragraph (f)(2)(xi)—Machine Shutdown Procedures

The final rule specifies procedures which must be followed when a machine is shut down. These include applying brakes and grounding or securing moving elements (paragraph (f)(2)(x)), and discharging pressure and stored energy (paragraph (f)(2)(xi)). With regard to the discharge requirements, this provision is intended to prevent moving elements, such as blades, buckets, saws and shears from being unexpectedly or inadvertently activated or engaged after the machine has been shut down. Such activation has resulted in severe injury or death to logging operators, maintenance personnel or others in the vicinity of the machine (Ex. 2–1, 4–61, 4–63, 4–64, 26A).

OSHA stayed the discharge provision (paragraph (f)(2)(xi)) in order to reconsider whether the provision could be misinterpreted to require unnecessary discharging of pressure and stored energy. For example, OSHA was concerned whether employers might misinterpret the provision as requiring the discharge of pressure and stored energy not related to moving elements of the machine, such as bleeding machine brakes, a result which OSHA had not intended.

OSHA is therefore correcting this provision so it more accurately identifies and addresses the hazards OSHA intended to control in the final rule. Revised paragraph (f)(2)(xi) requires that the hydraulic and pneumatic storage devices which can move the moving elements of a logging machine after machine shut down and expose employees to serious hazards must be discharged as specified by the manufacturer.

OSHA is also correcting paragraph (f)(2)(x) to require that any time the operator leaves the machine cab, the parking brakes must be applied, the moving elements must be grounded or secured, and the transmission must be placed in park. A further review of the record indicates that such a correction is necessary since the hazard of unexpected or inadvertent activation of logging machines is present any time an operator leaves the machine cab, whether to perform another logging operation or to stop work for the day. The record includes several reports of machine operators and others who died or were severely injured when they failed to engage the parking brakes and lower moving elements to the ground before dismounting from the machine (Ex. 4–61, 4–64, 26A).

OSHA has addressed the hazard of inadvertent machine engagement in other rules as well (e.g., 29 CFR 1910.147, 29 CFR 1910.178). OSHA believes the same hazard addressed by those rules is present in logging operations. Therefore, OSHA is correcting the final rule and compliance directive to indicate that braking, grounding and parking procedures must be followed any time the operator leaves the machine cab.

Paragraph (f)(3)(ii)—ROPS Specifications

The final rule requires that logging machines be equipped with rollover protective structures (ROPS) that are tested, installed and maintained in accordance with the Society of Automotive Engineers (SAE) J1040, April 1988, performance criteria for ROPS. OSHA stayed this requirement for six months and is now amending the ROPS requirement to state that only machines manufactured after August 1, 1996 must have ROPS which meet the 1988 SAE standard.

OSHA is making this change because, while many machines currently manufactured do meet the 1988 SAE ROPS standard, other machines currently manufactured or in use do not. These machines do have ROPS for the most part. However, the ROPS on these machines meet the 1979 SAE standard instead. While machines that meet the 1988 standard have additional protection (e.g., protection for longitudinal rollover), machines meeting the 1979 standard do provide protection for the most frequently occurring hazard: horizontal rollover. As such, OSHA believes that permitting an exception for machines already in service should not reduce significantly the level of protection provided to machine operators. Therefore, OSHA is revising the compliance directive to indicate that machines manufactured on or before August 1, 1996, which comply with the 1979 SAE ROPS standard are appropriate for use, provided the ROPS is maintained at its designed level of effectiveness (See paragraph (f)(1)(i)—machine general maintenance requirement).[4]

In addition, EMI has agreed to use its best efforts to provide OSHA with a list of the model numbers of the last logging machines manufactured on August 1, 1996. OSHA will use this list to update its logging compliance directive as to which logging machines must meet the 1988 SAE ROPS standard.

Paragraph (f)(3) (vii) and (viii)—Machine Cab Enclosures

OSHA stayed two provisions in the final rule dealing with cab enclosures.[5] Paragraph (f)(3)(vii) required that the lower portion of machine cabs, up to the top of the instrument panel or 24 inches, be enclosed with solid material, except at entrances. Paragraph (f)(3)(viii) required that the upper portion of cabs be enclosed with mesh material (no greater than 2 inches at its least dimension) or with other material(s) that provide equivalent protection and visibility. The intention of these provisions was to ensure that the cab enclosure provided the machine operator with protection from objects penetrating the cab, without impeding the operator's vision.

OSHA stayed these provisions because it was concerned that this language could be misconstrued in ways that would reduce protection for machine operators. OSHA is revising the final rule to require that logging machines manufactured after August 1, 1996, have cabs which are completely enclosed, including at entrances (paragraph (f)(3)(vii)). The revised provision also clarifies that the enclosure must be constructed with mesh material (with openings no greater than 2 inches at its least dimension), or with other material(s) which the employer demonstrates will provide equivalent visibility and protection from penetrating objects.[6]

---

[4] The final rule also provides that ROPS and FOPS required on logging machines placed into initial service after the effective date must also meet the requirements of SAE J397, April 1988, "Deflection Limiting Volume—ROPS/FOPS Laboratory Evaluation." The 1988 standard updated a 1979 SAE standard on deflection limiting volume. OSHA notes that there is no functional difference between the criteria of the 1988 and 1979 SAE standards. Therefore, ROPS and FOPS certified to meet the requirements of either the 1988 or 1979 SAE standards shall be deemed to be in compliance with the final logging standard. OSHA is revising the compliance directive to reflect this.

[5] OSHA intends the term "cab" to include any machine operator station, even if it is not a total enclosure providing weather and other protection.

While some logging machines currently manufactured do meet this requirement, others do not. For those logging machines manufactured on or before August 1, 1996, OSHA is clarifying in paragraph (f)(3)(viii) that such machines may either comply with revised paragraph (f)(3)(vii) or continue to meet the protective canopy requirements specified in the 1971 pulpwood logging standard.[7]

Paragraph (f)(7)(ii)—Machine Brakes

In the final rule, OSHA required that logging machines be equipped with service brakes (primary brakes) (paragraph (f)(7)(i)), and a secondary braking system, such as emergency brakes or parking brakes (paragraph (f)(7)(ii)). The final rule specified that the secondary braking system be sufficient to stop the machine, in the event that the service brakes fail, and to maintain parking performance.

OSHA stayed paragraph (f)(7)(ii) insofar as it implied that parking brakes were adequate secondary brakes for stopping a moving logging machine if the service brakes failed. Primary brakes (service brakes), secondary stopping brakes (backup brakes), and parking brakes are all necessary devices for logging machines. OSHA is correcting paragraph (f)(7)(ii) to clarify that logging machines placed into initial service after September 8, 1995, must be equipped with three braking systems—service brakes, secondary brakes and parking brakes.

Some older machines were manufactured with primary brakes, but without secondary or backup brakes, and OSHA has learned that retrofitting these machines may not be feasible. OSHA is permitting these older machines to remain in use, provided that the employer assures the service brakes are inspected and maintained at their designed level of effectiveness. Therefore, OSHA is correcting paragraph (f)(7)(ii) to specify that only machines placed into initial service on or after September 8, 1995 must be equipped with secondary and parking brakes.[8]

Paragraph (g) (1) and (2)—Maintenance and Inspection of Employee-Owned Vehicles

The revised logging rule required employers to assure that any vehicle used off public roads to perform any logging operation, including transporting employees, be maintained in a serviceable condition and be inspected before it is used during a work shift. OSHA agreed to reconsider the maintenance and inspection requirements as they pertained to employee-owned vehicles and stayed the requirements for six months.

OSHA explained in the preamble to the final rule that it was aware that logging employees operate vehicles on private roads or on private property where there may be no roads or only rugged trails. The WIR survey shows that vehicle operators and employees riding in such vehicles are being injured in vehicle accidents where employees are being asked to drive vehicles over terrain that may be quite hazardous (e.g., extremely muddy, steep, and unlevel). For example, according to the WIR survey, there were 33 mobile equipment accidents resulting in employee injury during the three-month survey period (Ex. 2–1). Of these, 24 (72 percent) occurred during other than skidding or yarding operations (Ex. 2–1). In addition, the WIR survey reported 34 injuries on employer-built roads during the same period (Ex. 2–1).

Based on the record evidence, OSHA determined that it was important that logging employees on and between logging sites only drive vehicles that are in proper condition and of the appropriate type for the terrain in question. Because many employers require or permit employees to drive their own vehicles over this terrain to reach the logging work site, OSHA applied the inspection and maintenance requirements to these vehicles as well. However, OSHA is also aware, and others have pointed out, that most States do have periodic vehicle inspection requirements. These inspections are more detailed and comprehensive than the inspection contemplated by the logging rule. As such, OSHA believes that such inspections are adequate, at least with regard to employee-owned vehicles, and that imposing additional vehicle inspection requirements on logging employers is unnecessary. Therefore, OSHA is revising the final rule to apply the vehicle inspection and maintenance requirements only to vehicles which the employer owns, rents or leases. OSHA has done this by revising the definition of "vehicle" covered by the final rule. OSHA also notes that the employer has the duty to provide safe access to the worksite.[9]

With regard to inspections of vehicles, as well as other equipment covered by the final rule such as personal protective equipment, tools, and machines; OSHA never intended that the employer must conduct the actual inspection of such equipment. The compliance directive clarifies that employers may delegate to others, including employees using the items, the performance of inspection and maintenance tasks; but ultimately the employer remains responsible for safe equipment at the workplace. There are different ways in which the employer can assure that equipment is properly maintained and inspected. Employers can inform employees of maintenance and inspection procedures during training, reinforce the requirements during regular safety and health meetings, and conduct spot checks of equipment.

Finally, OSHA notes in the compliance directive that equipment inspection requirements in the final rule apply only if the equipment is used during the work shift. If it is not to be used, it does not need to be inspected.

Paragraph (h)(2)(vii)—Backcuts

The final rule requires that backcuts be placed above the horizontal face cut

---

[6] OSHA is noting in the revised compliance directive that material(s) that satisfy the performance criteria of the Society of Automotive Engineers SAE J1084, April 1980, "Operator Protective Structure Performance Criteria for Certain Forestry Equipment" are deemed to comply with the revised provision.

[7] OSHA notes and is clarifying the compliance directive to indicate that extended compliance time and exceptions to compliance apply only where specifically indicated. With regard to all other provisions, the extensions and exceptions do not apply for machinery already in use. The employer must assure that any machine used for logging operations is in compliance with the other provisions of paragraph (f)(3). For example, all machines used in logging operations, whether initially placed in service before or after the effective date, must have two means of egress. To the extent that any machine in service does not have a second means of egress, the machine must be retrofitted (e.g., replacing the stationary windowshield with a hinged window to allow egress) or removed from service.

[8] OSHA is noting in the revised compliance directive that logging machines with braking systems meeting the Society of Automotive Engineers standards for forestry (SAE J1178, June 1987, "Braking Performance—Rubber Tired Skidders") or earthmoving (SAE J1026, April 1990, "Brake Performance—Crawler Tractors and Crawler Loaders") equipment are deemed to be in compliance with the final rule, provided that the employer assures that such braking systems are maintained in a serviceable condition.

[9] OSHA is deleting from revised paragraphs (g)(1) and (g)(2) specific reference to application of vehicle maintenance and inspection requirements to vehicles used to transport employees. Since transportation of employees to, from and between logging sites off public roads is included in the definition of logging operations, OSHA believes it is not necessary to repeat the reference in these provisions.

in all felling except tree pulling operations. OSHA was requested to clarify whether the requirement in paragraph (h)(2)(vii) applies to Humboldt cutting and open face felling. OSHA stayed for six months the backcut requirement in paragraph (h)(2)(vii) as it applied to felling trees using the Humboldt cutting method. OSHA also explained that it would use the six months to further clarify the backcut requirement as it applies to both cutting methods.

Open face felling. After OSHA published the final rule, the Agency was requested to clarify whether the backcut requirement applied to open face felling. In brief, the backcut requirement does not apply to open face felling, and OSHA is clarifying the final rule and compliance directive accordingly.

In open face felling, two facecuts are made diagonally into the stem so there is no horizontal face cut. The backcut requirement applies only where a horizontal face cut has been made. Where a horizontal face cut is used, there is a greater potential that the notch (or wedge) is not as open or that very little or no hinge wood will be left if the backcut is made at the same level. This may result in the tree kicking back or falling in the wrong direction.

In open face felling, the notch is much more open than in conventional felling. As such, there is little or no danger that placing the backcut at the level of the notch will result in the notch closing (i.e., the falling tree hitting the stump) too soon and the tree kicking back off the stump. This is because the openness of the notch permits the tree to fall in the intended direction for a greater interval before the notch closes and the hinge breaks. Either the tree is on the ground or almost parallel to the ground, and thus committed to falling in the intended direction, before the hinge breaks. In addition, there is little danger that no hinge wood will be left to help direct the falling of the tree.

Humboldt cutting. In the Humboldt cutting method a horizontal cut is made into the face of the tree and a notch is cut below the horizontal cut at an angle. By contrast, in conventional felling, the notch is cut at a diagonal above the horizontal face cut.

In several regions the Humboldt cutting method has replaced the conventional method. The Humboldt cutting method is heavily used in the western States and is also used on high quality trees, such as veneer logs and redwoods. Loggers have switched from the conventional to the Humboldt method primarily for productivity reasons. In Humboldt cutting, the notch is made into the stump rather than the log (Ex. 9–15). Thus, if properly done, the cutting of the notch does not result in the loss of useable wood. OSHA is aware that some fellers who use the Humboldt cutting method prefer to make the backcut at the level of the horizontal face cut, but the record indicates their preference is due to these production rather than safety reasons (Ex. 9–15). Some contractors and mills want log butts to be smooth. By placing the backcut at the same level as the face cut, these loggers do not have to make an additional cut after the tree is felled in order to smooth out the log butt. In some cases, to make the additional cut might require walking down a hill where the felled tree has rolled or the additional cut might have to be made by the employee bucking the tree.

In logging operations where the Humboldt method is most heavily used, fellers most often only cut a notch that is no greater than 45 degrees, making the openness of the notch similar to that of conventional felling. Fellers do this in order to keep the stump as short as possible and thereby reduce the lost of useable wood. At 45 degrees, the face notch alone does not fully address both the hazards of misdirected falling and kickback.

Proper backcuts that provide sufficient hinge wood are critical. Sufficient hinge wood helps to hold the tree to the stump during most of its fall and thereby allows the hinge to steer the falling tree in the right direction. If the hinge is inadequate or if pressure is placed on the hinge, it will break too soon and the tree will be left without a steering mechanism. Without the hinge wood, the tree may twist and bend, and fall in the wrong direction. (OSHA is revising paragraph (h)(2)(vi) to expressly state that this requirement is intended to address the hazard of misdirected falling.)

Placing the backcut above the horizontal face cut is also necessary to provide a platform to block the tree from kicking back once the hinge does break. Where there is a potential that the face notch will close before the tree hits the ground, which is the case with most cutting using the conventional and Humboldt methods, this platform is necessary to prevent kickback. Where the backcut is at the same level as the horizontal cut, there is no platform to block the backward movement of the tree should kickback start to occur. (OSHA is revising paragraph (h)(2)(vii) to expressly state that this requirement is intended to address the hazard of tree kickback.)

In both, misdirected falling and kickback, the feller or other team member could be hit by the tree. The risks of such injury are further increased if other conditions are present, such as wind, sloping terrain, or tree lean.

To address these risks, most State logging safety rules require that backcuts be above the face cut in all felling, including Humboldt cutting. For example, in Oregon, a State-plan State, the backcut requirement applies to any tree with an 8-inch or larger diameter base height. Only the State of Montana, which has advisory criteria, permits the backcut to be level with the face cut in Humboldt cutting.

After reviewing the record in this rulemaking, OSHA reaffirms that the record supports the necessity of applying the backcut requirement specified in paragraph (h)(2)(vii) to Humboldt cutting (Ex. 2–1, 4–61, 4–64, 26A; 59 FR 51675). The record clearly shows that manual felling is the single most dangerous occupation in logging. The BLS Census of Fatal Occupational Injuries indicates that more than one-half of all logging employees killed in 1992 were felling trees at the time of their accident (59 FR 51675). In addition, the WIR survey indicated that almost one quarter of all employees reporting injuries were felling trees at the time they were injured, and that the most frequently reported cause of their injuries was being hit by a tree (Ex. 2–1). The record also shows that tree kickback and misdirected falling are two of the major reasons why employees are hit by falling trees. For example, the record contains many reports of employee injuries and deaths due to misdirected falling and tree kickback (Ex. 4–61, 4–64, 26A).[10]

Proper backcuts where adequate hinge wood and a platform are left will reduce the potential for such injuries (Ex. 4–5, 21D, 22, 38I). In fact, manual felling training materials entered into the record instruct fellers, for safety reasons, to place the backcut above the horizontal face cut (Ex. 4–5, 4–6, 4–10, 4–19, 4–169, 4–173, 5–1, 5–29, 8–18, 21, 29). Moreover, the record demonstrates that the primary reason that fellers prefer to place backcuts at the same level as the face cut is not because of safety, but rather because they do not want to have to make an additional cut to trim the log butt. However, there is no evidence in the record which indicates that making an additional cut would have any significant impact on productivity.

---

[10] It has been argued by some parties that placing the backcut above the horizontal face cut is only necessary in selective cutting operations, and not in clear cut operations. The reason they give is that in clear cut felling trees are felled into the downhill side of the slope and there is no danger the tree will kick back or fall against gravity in the wrong direction. However, the injury data in the rulemaking record do not support this position. According to the WIR survey, 62 percent of all injuries reported occurred in clear cut operations.

The purposes of this standard are best realized by requiring that the backcut provide sufficient hinge wood to direct the fall of the tree, and that the backcut be above the horizontal face cut so a platform is formed. These safe manual felling practices will help to ensure the tree falls in the intended direction and does not kick back off the stump when the notch closes. OSHA is revising the final rule and compliance directive to more clearly reflect OSHA's intent that these work practices be followed.[11]

OSHA has not specified in the final rule how far above the face cut the backcut must be placed. By contrast, the Washington and Michigan logging standards require that the backcut be approximately 2 inches above the face cut to provide adequate hinge wood. On the other hand, the Oregon logging rule does not specify a minimum vertical distance. OSHA believes that a backcut placed at least one inch above the face cut should provide an adequate platform to prevent kickback and to allow the hinge to help steer the falling of the tree in the intended direction. OSHA believes that a one-inch platform would provide an adequate margin of safety for the feller while still providing the contractor with a fairly square-end log.[12]

Other Corrections and Clarifications

Paragraph (c)—Definitions

Logging operations. The definition of "logging operations" in the final rule includes "marking" operations. OSHA is revising this definition to clarify the type of marking operations covered by the logging standard. OSHA intended that marking include operations that are done attendant to and at the same time as felling, cutting and moving trees in a particular logging work site. Such marking operations include marking danger trees, and sizing and marking felled trees to be cut to length. These particular marking operations inform loggers working in the area or on that tract whether and how to cut trees.

OSHA did not intend marking operations to include those operations that are done independently of or in advance of cutting trees in a particular logging site. These preparatory operations include marking of tracts of land to determine the order in which tracts will be logged, and marking and designating boundaries of tracts of land that will be bid upon for harvesting. Harvesting of trees does not take place on the tracts while these marking operations are being done. These preparatory operations do not involve the hazards of logging operations, and the record indicates that the high injury and fatality rates in the logging industry are not associated with these activities (e.g., Ex. 2–1). Therefore, OSHA is revising the compliance directive to indicate that marking activities which take place in advance of and separate from tree harvesting are not covered by the final logging rule.

For the same reasons, OSHA is also revising the compliance directive to specify that incidental marking of danger trees or wildlife trees at the same time tracts of land are being marked also is not covered by the final rule if no tree harvesting is undertaken in the area at this time.

OSHA is also revising the definition of logging operation to more accurately express its intention about what transportation activities the Agency considers to be logging operations covered by the final rule. The final rule had stated that logging operations include transport of machines, equipment and personnel from one logging site to another. The Agency had intended the definition to include transportation of machines, equipment and personnel to and from as well as between logging sites. As discussed above, with regard to transportation of employees, the revised rule includes only their transportation in vehicles owned, rented or leased by the employer.

OSHA has been requested to clarify what loading and unloading operations are covered by the final rule. OSHA is revising the compliance directive to indicate more clearly that loading of trees at the logging work site and loading/unloading of trees at transshipment points such as satellite wood yards are covered by the final rule. With regard to unloading logs at pulp, paper and paperboard mills (hereafter pulp mills) and sawmills, OSHA has other standards which address some of the hazards associated with such unloading (*See*, Pulp, Paper and Paperboard Mills, 29 CFR 1910.261, and Sawmills, 29 CFR 1910.265). To the extent that hazards associated with unloading trees at these worksites are addressed by these other standards, they apply instead of the final logging rule. For example, both the pulp mill and sawmill standards include provisions specifying how binders and stakes are to be released from the load of logs. As such, the similar provision contained in the logging final rule does not apply. However, to the extent that the final logging rule addresses hazards not covered by the pulp and saw mill standards, the logging rule applies if it is a logging operation. For example, neither the pulp mill or sawmill standards address the hazards faced by log truck operators who remain in their cabs during unloading. Thus, paragraph (h)(6)(iii) applies to loading and unloading of trees at pulp mills and sawmills as well as at logging sites and satellite log yards.

Machine. In the final rule OSHA included a definition of the machines covered by the logging rule. The definition included material handling equipment that is operated off-road. OSHA was asked to clarify whether the definition of logging machine includes aircraft, such as helicopters. OSHA never intended that logging machines include airplanes or helicopters and is clarifying its intention by expressly excluding airplanes and helicopters from the definition of machines covered by the final rule.

Paragraph (d)(1)(iii)—Gloves

The final rule specified that all loggers who handle wire rope must wear cotton gloves or other hand protection that the employer demonstrates provides equivalent protection. The proposed rule would have required employees to wear heavy-duty puncture resistant gloves such as leather. Many commenters said that such gloves would pose additional hazards and urged OSHA to permit employees to wear cotton gloves (Ex. 5–17, 5–29, 5–54, 5–74 through 5–92; Tr. OR 104). They said that during winching leather gloves would not tear away when caught on a "jagger" (i.e., broken wires of a wire rope) and would forcibly pull the logger's hand. This could result in a more severe laceration of the hand, or could cause the employee to be dragged into the machinery or to fall. Thus, they said the leather glove could turn a minor injury into a more serious injury. Based on this, in the final rule OSHA specified that cotton gloves must be worn.

OSHA is correcting the final rule to indicate that it was not the Agency's intention, in specifying cotton gloves, that employees be permitted to have their hands on wire rope when winching is started or underway. OSHA emphasizes that employees are not permitted to be handling the winching line when the yarding machine is in operation. The final rule requires that they must be clear of the choked log *before* the yarding machine operator begins to winch the choked trees. Paragraph (h)(5)(i) of the final rule clearly requires that before any log is moved that employees must be in the clear. In addition, paragraph (h)(5)(v) requires that employees who assist with yarding (i.e., choking logs) must signal the machine operator that they are in the clear and the machine operator must not begin winching the load until he has clearly understood the received signal that other employees are in the clear (paragraph (h)(5)(v)). OSHA included these requirements because employees have been injured where logs being winched hit obstacles, causing them to swing suddenly and strike an employee (Ex. 2–1, 4–63, 4–64).

OSHA is making clear in the revised provision what hazards hand protection are intended to address—puncture wounds, cuts and lacerations that could occur from handling wire rope, especially rope with broken wires. Employers are free to use cotton gloves, provided they adequately address the hazards of handling wire rope. Employers are also free to use rubber gloves with cotton liners or leather gloves that protect employees from the hazards associated with handling wire rope as well as from extreme environmental conditions.

Paragraph (d)(1)(iv)—Leg Protection

Some parties requested OSHA to exempt from the leg protection requirement the incidental use of chain saws. However, OSHA has not made such an exemption because the record clearly does not support it.

As OSHA explained in the preamble of the final rule, the risk of injury from chain saw is present whenever a chain saw is being used (59 FR 51702). The WIR survey showed that 20 percent of injuries reported were chain-saw injuries (Ex. 2–1). Chain-saw kickback and sudden cut-through, which are major causes of chain-saw injuries, are not dependent on whether the chain saw is used frequently or regularly by the operator. There is no evidence in the record that employees who only occasionally operate chain saws are not subject to these risks. OSHA believes that a feller, who operates a chain saw as a regular part of the job, and a logging truck operator, who may operate a chain saw occasionally or incidentally to operating a vehicle, both face a significant risk of injury when using a chain saw. As such, OSHA believes that leg and foot protection are needed whenever an employee is operating a chain saw. The revised compliance directive notes that the leg protection requirement applies to any employee who operates a chain saw for any amount of time.

OSHA realizes that protective material may be damaged or destroyed in the process of stopping a chain saw. Because of this, OSHA is revising the compliance directive to indicate that when the outer covers of the protective equipment have been penetrated it does not necessarily mean that the equipment is no longer serviceable. However, where there are also cuts or tears in the protective material of the leg protection or logging boot, such equipment is no longer in serviceable condition. OSHA agrees with manufacturer warning labels that such cuts and tears in the protective material compromise the ability of the PPE to provide the level of protection which is necessary. OSHA is revising the compliance directive to specify that in such situations footwear and leg protection cannot be repaired and must be replaced with serviceable PPE.

Paragraph (d)(2)(i)—Location of First-Aid Kits

In the final rule, OSHA required that employers provide first-aid kits at each landing, on each employee transport vehicle, and at each worksite where felling is being conducted. After the final rule was published, OSHA was requested to clarify whether first-aid kits must be provided at both active and inactive landings. It was not OSHA's intention to require employers to provide first-aid kits at landings which are not currently in use. OSHA is correcting the final rule to clarify that the provision of first-aid kits at landings refers to only "active" landings.

OSHA was also requested to clarify at what point a felling work site is considered separate or remote from another work site, thus triggering the requirement for an additional first-aid kit. In the revised compliance directive, OSHA has indicated that where employees are cutting trees more than one-half mile from an active landing or an employee transport vehicle, a first-aid kit also must be provided at that work site. In these situations, the first-aid kits which are at the landing or on the vehicle are too distant to be considered immediately accessible.

The compliance directive also indicates that where conditions are not optimal, such as steep or mountainous terrain, very muddy terrain, heavy brush, or snowy and icy conditions, first-aid kits cannot be as far as one-half mile from a cutting area and still be considered immediately accessible. Traveling under such conditions is likely to take far longer than under optimal conditions, thus rendering the first-aid kit too isolated to be of any prompt use. Where such conditions exist or are reasonably anticipated, the employer will have to evaluate their severity in determining whether cutting operations need first-aid kits to be located closer to the worksite.

Finally, OSHA is also correcting the final rule to clarify which felling work sites need first-aid kits. In the final rule, OSHA stated that first-aid kits must be provided "at each work site where felling is being conducted." It was OSHA's intention that felling work sites include any work site where trees are being cut; that includes limbing, bucking, and trimming as well as felling. The rulemaking record clearly shows there are a significant number of injuries wherever trees are being cut. For example, the WIR survey indicated that 23 percent of employees reporting injuries were felling trees and 27 percent were limbing and bucking felled trees (Ex. 2–1). Injuries to these employees are primarily due to chain saws or being hit by a falling or rolling tree. Because of the significant risk of injury, employees performing all of these logging operations need to have immediate access to a first-aid kit.

A further review of the record indicates that in many situations limbing and bucking are not done at the landing, but rather, at the place where the tree is felled (e.g., Ex. 4–63, 4–64, 26A). In addition, in-forest limbing and bucking is not always done near felling operations. For example, felling operations may be far from limbing and bucking crews. To the extent that a limbing or bucking work site is more than one-half mile from the nearest first-aid kit (i.e., felling area, active landing, or employee transport vehicle), OSHA is clarifying that a first-aid kit must also be provided for that limbing or bucking work site.

---

[11] OSHA notes that one safe technique for making the backcut is to start the backcut with a plunge cut/bore cut to establish the hinge. The backcut should then be moved toward the back of the tree. This backcut method provides for two holding points until the tree is finally released. This backcutting method will prevent the tree from releasing too soon or moving before the feller has moved to a point of safety. The record shows that this backcutting method is a safe technique for felling (Ex. 9–20), and OSHA suggests this technique when conditions such as, but not limited to, tree lean, slope, and large tree size indicate that felling the particular tree may present additional hazards.

[12] OSHA's decision to require that backcuts in Humboldt cutting be above the horizontal face is based in part on the fact that most loggers currently using this method are making the notch the same size as in conventional felling—45 degrees. A 45-degree notch is generally not open enough to control for both misdirected falling and kickback hazards. However, where a notch of 70 degrees or greater is cut, the notch in Humboldt cutting acts as it does in open face felling. As discussed above, in open face felling, because of the 70- to 90-degree notch, it is unlikely that the tree will fall in the wrong direction or kick back. OSHA stresses that this is due to the openness of the notch rather than the type of cutting method being employed. As such, OSHA is clarifying the compliance directive to indicate that where the notch is at least 70 degrees, it is not as critical that the backcut be above the horizontal face cut or the notch of the face cut, regardless of whether the open face or Humboldt method is being used.

Paragraph (d)(5)—Environmental Conditions

The final rule requires that employees terminate work and move to a safe location where environmental conditions may endanger them in that work or at a given location. While OSHA cannot specify every environmental condition that might necessitate employees moving to a place of safety, OSHA did provide a list of certain types of conditions that would create hazards for employees working in the area.

After publication of the final rule, OSHA was told that the provision was too broad and did not provide adequate instruction for compliance officers because it included conditions which did not pose a real possibility of danger for logging employees. However, OSHA believes that the final rule included clear examples of environmental conditions which would be considered dangerous for an exposed employee. Paragraph (d)(5) specifies that work stop and employees move to a place of safety in electrical storms (as opposed to rainy weather), dense fog (as opposed to pocket fog), heavy rain and snow (as opposed to wet weather), extreme cold (as opposed to cold weather), and mudslides (as opposed to muddy conditions). OSHA believes this list of extreme environmental conditions does identify hazardous conditions and provides adequate guidance for compliance officers.

It was also requested that OSHA revise these provisions to require that employees be moved to a place of safety only if winds were "gale force." Gale force winds are defined as those which are at least 40 miles per hour. OSHA is aware, however, that even winds of less than gale force can significantly affect the fall of a tree, particularly if other adverse conditions are present (e.g., leaning tree, steep terrain, large tree, lodged tree, tree under pressure). As such, OSHA does not believe one specific wind speed is an appropriate indicator of whether an environmental hazard is present. However, OSHA is revising the final rule to more fully express the type of wind conditions it believes create a hazard for an employee working in the area. The final rule and compliance directive are being revised to indicate that all work must terminate and each employee shall move to a place of safety when strong winds which may adversely affect the fall of a tree are present.

OSHA also included fires among hazardous environmental conditions. Some parties have interpreted this example as requiring employees to leave the area any time a fire starts rather than putting out the fire. However, the final rule, viewed in its entirety, does not support that interpretation. For example, paragraph (d)(4), directly preceding the environmental conditions provision, requires employers to provide fire extinguishers on each machine and vehicle. This requirement contemplates that an employee may be called upon to put out a small fire which has started. However, if a fire were to start in an area where there is no fire extinguisher or other equipment or supplies which would allow the employee to safely suppress it, the employer would be responsible for assuring that the employee is moved out of the area of danger. Likewise, where a fire, because of its size, intensity or the conditions of the area, creates a hazard for an employee who remains in the area, either to work or attempt to suppress the fire, the employer must also assure that employee is moved from the area of danger. OSHA notes that the standards on fire protection in subpart L of Part 1910, and not the revised logging standard, govern the fighting and suppression of fires at logging worksites.

Paragraph (d)(6)(iii)—Working Within Visual or Audible Contact

In the final rule, OSHA requires that each employee work within visual or audible contact of another employee. OSHA was requested to clarify whether this requirement applies only to employees working at a logging site or also to employees working away from logging work sites (e.g., logging vehicle operators transporting a load of logs off the logging site on public roads).

OSHA intended that this provision of the final rule apply to each employee working at a logging work site, including watchmen and other employees performing logging operations at remote logging work sites. OSHA did not intend the requirement to apply to vehicle operators who are not at the logging site, but rather driving vehicles miles away. However, this provision does apply to vehicle operators while they are at a logging work site. OSHA is revising the final rule to clarify its intention and to provide the exception for vehicle operators working away from the logging work site.

Paragraph (d)(6)(iv)—End of Workshift Accounting of Employees

The final rule requires that the employer account for each employee at the end of each workshift. OSHA was requested to provide additional clarification of this requirement in the revised compliance directive.

First, the employer need not personally conduct the actual end of shift accounting of each employee. The employer may delegate this task, but the employer remains ultimately responsible under the standard for assuring that employees are not inadvertently left in the woods, especially an employee who may be injured.

Second, this provision does not require employers to prohibit employees from remaining at the work site after the end of the work shift to engage in personal activities, such as hunting, camping, or cutting fire wood for personal use. Rather, OSHA's intent was to assure that no employee, particularly an injured employee, be inadvertently left in the woods without assistance. The rulemaking record includes several reports of accidents in which employees were not discovered in a timely fashion and died (Ex. 4–64, 26A). The revised compliance directive also makes clear that after the workshift has ended and the employer has ascertained that the employee is done with work, including overtime work, and is safely accounted for, the final rule does not prohibit the employer from allowing the employee to remain in the area for personal reasons. OSHA is revising the compliance directive to reflect this.

Paragraph (d)(9)(i)—Storage and Handling of Flammable and Combustible Liquids

The final rule requires that flammable and combustible materials be stored, handled and transported (hereafter stored) in accordance with the requirements of subpart H of Part 1910. OSHA was requested to provide an exception from subpart H to allow logging machine operators to carry plastic cans of chain-saw fuel for refueling away from fueling stations, when necessary. Some parties have interpreted paragraph (d)(9) as prohibiting machine operators from storing and transporting logging machine fuel in 5-gallon plastic containers which are approved by Underwriters Laboratories (UL) or meet U.S. Department of Transportation (DOT) requirements. For the reasons discussed below, OSHA does not believe that an exception to subpart H

is necessary to allow the practice that these parties seek to authorize.

First, Subpart H permits Class IB liquids, which OSHA interprets as including chain-saw fuels, to be carried in 5-gallon plastic safety cans approved by UL or Factory Mutual (FM). Subpart H permits Class IB fuels to be carried in "safety cans" that have a maximum allowable size of 5 gallons (29 CFR 1910.106(d)). Safety cans are defined as containers approved by a nationally recognized testing laboratory (NRTL) and otherwise meeting the requirements of the definition. This requirement is broad enough to encompass plastic safety cans, provided that such containers are approved by a NRTL as meeting all the requirements of the definition. In response to concerns raised, OSHA also notes that UL and FM are recognized by the Agency as NRTLs for testing and listing equipment meeting the requirements of subpart H.

Second, subpart H also permits flammable and combustible liquids to be stored in containers meeting the requirements of regulations issued by the Hazardous Materials Regulations Board, Department of Transportation (*See*, 49 CFR 171–178). These regulations permit flammable liquids such as chain-saw fuel to be stored in plastic jerricans holding up to 5 gallons which meet DOT specifications for non-bulk packaging (*See*, 49 CFR 193.202(c) and 178.502).

Therefore, read in its entirety, the logging standard does not prohibit plastic safety containers under the conditions described above, and an exception is not necessary. OSHA is including this discussion in the revised compliance directive.

Paragraph (d)(9)(iii)—Machine Fueling

The final rule requires that tools, machines and vehicles be shut off during fueling. The purpose of this provision is to eliminate potential sources of ignition when handling flammable and combustible liquids in order to prevent a fire from erupting.

OSHA is revising the rule to permit diesel-powered machines and vehicles to be fueled while at idle, provided that continued operation is intended and that the employer follows safe fueling and operating procedures. OSHA believes this exception is warranted because the hazard which this provision seeks to address, sudden flash fires, is typically not present during fueling of diesel-powered engines. This is because diesel fuel has a higher flash point than that of gasoline, and unlike gasoline its vapors do not evolve as suddenly. In fact, in many cases diesel fuel must be heated before it will give off sufficient vapors to ignite. As such, there is little potential for fire if a diesel-powered engine is running during fueling.

At the same time, however, OSHA is requiring that other safe fueling and operating procedures be followed during fueling of diesel-powered machines and vehicles. OSHA is revising the compliance directive to indicate that employers must train employees in safe practices during fueling. These include vapor containment, spill prevention, and other procedures the operator must follow when leaving the machine cab to fuel the engine.

Paragraph (d)(9)(iv)—Starting Fires

The final rule required that flammable and combustible liquids not be used to start fires. The purpose of this provision was to prevent fires being started by employees from erupting and burning them and others.

After publication of the rule, OSHA was requested to allow fires to be started with chain-saw fuel, which is a flammable liquid, provided that the fuel was not used in an unsafe manner or in a situation which might create a hazard for any employee. OSHA agrees that the rulemaking record does not identify the use of chain-saw fuel to start fires as a major cause of accidents and injuries in the logging industry (e.g., Ex. 2–1). However, the record does indicate that using chain-saw fuel can create a hazard in certain situations. For example, a Forest Products Accident Prevention Association (FPAPA) Industry Alert reported that employees suffered third-degree burns when a fire in a warming hut was reignited with chain-saw fuel and caused an explosion (Ex. 4–64). In that case, an employee had added wood and chain-saw fuel to a woodstove which had been started earlier in the day. The coals left over from the earlier fire vaporized the fuel and then ignited it. The action that the employer could have taken to prevent the accident included prohibiting the use of chain-saw fuel to start a fire in an enclosure. In addition, according to FPAPA, the accident could have been prevented if the employer had trained the workers about the hazards of improper fuel handling.

OSHA is revising the final rule to allow flammable and combustible liquids, such as chain-saw and diesel fuel, to be used to start a fire. OSHA believes that this flexibility will allow piles of wood or slash to be burned when permitted by forestry officials. However, the revised provision does not permit flammable and combustible liquids to be used whenever a fire is needed. The revised provision only permits such liquids to be used where the employer assures that their use does not create a hazard for an employee. OSHA agrees with FPAPA that employers must train employees to know under what conditions it is safe to start a fire with chain-saw fuel and those situations in which using fuel may create a hazard for an employee. In the compliance directive OSHA is indicating particular situations in which starting a fire with chain-saw fuel would not be safe. For example, using chain-saw fuel to start a fire in an enclosure is not safe. There is a greater chance that fuel vapors may collect in the enclosed area and ignite or cause an explosion. The record shows there are other ways to start fires where chain-saw fuel may create a hazard. For example, light-weight fire starters made of sawdust and wax are available.

Paragraph (e)(2)(iv)—Refueling Chain Saws

The final rule required that chain saws be fueled at least 20 feet from any open flame or other source of ignition and started at least 10 feet from the fueling area. The purpose of these provisions is to assure that chain-saw fuel was kept a minimum safe distance from any potential source of ignition.

After publication of the final rule, some parties pointed out that OSHA had established two different minimum safe distances between fuel and ignition sources—20 feet between fueling areas and ignition sources, and 10 feet between fueling areas and chain saw startup, which is another potential source of ignition. They urged OSHA to establish a uniform safe distance and recommended that OSHA adopt a 10-foot minimum safe distance. While OSHA believes that an open fire is a much more likely source of ignition than a chain saw being started, nonetheless OSHA believes that a 10-foot distance is adequate in both situations. This is because in the out-of-doors, where constant air movement dissipates vapors, it would be unlikely there could be a concentration of flammable vapors sufficient to cause an increased potential for fire at a distance greater than 10 feet. Therefore OSHA is revising the final rule and compliance directive to establish a 10-foot minimum safe distance between fueling areas and potential sources of ignition.

Paragraph (e)(2)(vi)—Starting Chain Saws

The final rule requires that chain saws be started on the ground or where otherwise firmly supported. OSHA was requested to clarify expressly in the regulatory text whether "drop starting" a chain saw is prohibited under the final rule, and whether operators are allowed to start the chain saw while standing in an upright stance.

In the preamble to the final rule, OSHA explained that the purpose of this requirement was to assure that employees did *not* attempt to drop start chain saws. As noted in that discussion, an employee could lose his grip when drop starting a chain saw and the saw could fly upward and cut the employee. Nonetheless, OSHA is amending the final rule to emphasize the Agency's intention that drop starting of chain saws is prohibited.

With regard to employee position during chain-saw start up, nothing in the final rule prohibits an employee from standing in upright when starting a chain saw, provided that the employee has firmly supported or secured the chain saw. For example, a chain saw operator would be in compliance with the final rule if he rested the chain saw firmly on a log or other stationary item and started the chain saw while standing upright. OSHA notes that such a starting position is a safe technique because it provides protection both from chain saw kickback and from overexertion of the back.

Paragraph (e)(2)(xii)—Carrying Chain Saws

The final rule requires that chain saws be carried in a manner that will prevent operator contact with the cutting chain and muffler. OSHA's intention is to assure that chain-saw operators are not cut by the saw or burned by the hot muffler when carrying the chain saw between felling points.

The record indicates there are certain devices currently available and used in the logging industry to prevent cuts and burns (Ex. 5–21, 5–36, 5–63), including leather and felt shoulder pads. By citing these examples, OSHA did not intend to imply that these particular devices are required by the final rule. In fact, OSHA expressly stated in the preamble that "any other method of carrying the chain saw that prevents these hazards would also meet this requirement" (59 FR 51713). OSHA is including this clarification in the revised compliance directive.

Paragraph (e)(2)(xiii)—Retreating With Chain Saws

The final rule required that after cutting a tree the feller must shut off or idle the chain saw before beginning his retreat. OSHA's intention was to help assure that employees are not cut by a running chain saw when they are moving quickly to a safe distance from the falling tree. As discussed in the preamble, a significant number of chain-saw injuries result from falling on the saw or losing the grip on a running saw (Ex. 2–1). As a result, any time a feller moves with a chain saw, precautions must be taken to prevent contact with the moving chain. These precautions include shutting off the saw, engaging the chain brake, or idling the engine by releasing pressure on the throttle and grasping the front handle.

It has been pointed out to OSHA that it takes a moment's delay for a saw to idle down once the throttle is released. As was noted in the rulemaking record "[t]he cutter may lose precious seconds worrying about compliance with the * * * standard, meanwhile a life could be in danger" (Ex. 5–50). It is not OSHA's intention that the feller be required to remain next to the tree waiting for the chain saw to idle down before retreating a safe distance from the falling tree. Rather, OSHA's intention is that as soon as the feller releases the throttle, placing the machine into idle, he should immediately move on the retreat path a safe distance from the falling tree. Once the throttle is released, it should only take a brief moment a properly maintained chain saw to stop. OSHA is revising the final rule and compliance directive to more accurately express OSHA's intention.

Paragraph (f)(3)(i)—Protective Structures for Logging Machines

The final rule requires that the following logging machines placed into initial service after February 9, 1995, have FOPS and/or ROPS: tractors, skidders, swing yarders, log stackers and mechanical felling devices. OSHA intended that the term "log stackers" be viewed as a general term covering any logging machine that stacks logs during loading and unloading. However, the more common term used in the industry to refer to machines that load and unload logs is "log loader." OSHA is therefore revising the final rule to clarify that paragraph (f)(3)(i) covers log loaders.

Paragraph (h)(1)(ii)—Unfamiliar or Unusually Hazardous Conditions

This section requires that the immediate supervisor be consulted for approval when unfamiliar or unusually hazardous conditions are encountered before cutting is commenced. OSHA included this provision in the final rule because the record indicates that many injuries occur when inexperienced employees encounter unfamiliar situations, and even when experienced loggers believe they can handle particularly hazardous situations on their own (Ex. 2–1, 4–63, 4–64, 26A).

OSHA was requested to clarify the situations which are intended to be covered by this provision. While OSHA cannot provide an exhaustive list of the situations which may necessitate the employee consulting with a supervisor, there are certain situations which are clearly covered by this paragraph. These situations include worsening weather conditions (e.g., weather changes which begin to impair the logger's vision); deepening snow or mud which begins to affect a logger's mobility; felling very large or very tall trees; cutting trees whose lean, structure, or location make it difficult to fell in the desired or safest direction; and using a driver tree to fell a danger tree. These are situations in which loggers have been killed or severely injured because the conditions caused unexpected results during felling (Ex. 2–1, 4–63, 4–64, 26A). When these conditions arise, adding the supervisor's knowledge, training, and experience to the decisionmaking process should help minimize the hazards to which the logger may be exposed.

In addition to such consultation, it is also important in training for employers to train their new employees that when they encounter situations with which they have not dealt before, they need to work with the supervisor to safely handle the situation. This concept should also be reinforced in regular safety and health meetings.

Paragraph (h)(1)(iii)—Felling Distances

The final rule requires that while manual felling is in progress, yarding machines must not be operated within two tree lengths of the trees being manually felled. OSHA's intention was to assure that neither the yarding machine operator nor the manual feller is injured because of the independent actions of the other. For example, the feller may not be conscious of the fact that the yarding machine operator has entered the area to remove the tree which the feller has just cut. This work practice requirement helps to assure that yarding machine operators are not hit by other trees the feller or felling team has begun to cut.

After the final rule was published, OSHA was requested to clarify whether this provision prohibits tree pulling by teams of employees. Tree pulling was not intended to be prohibited under paragraph (h)(1)(iii). Indeed, paragraph (h)(1)(iv) addresses tree harvesting by employee teams, and sets forth procedures which must be followed where a team is necessary to fell a tree. In any event, OSHA is correcting the final rule to provide an explicit exception to paragraph (h)(1)(iii) for tree pulling operations. OSHA is also

revising the compliance directive to indicate that the procedures governing team felling also apply in tree pulling operations.

Paragraph (h)(1)(ix)—Domino Felling

The final rule prohibits domino felling. OSHA defined domino felling in the final rule as "[t]he partial cutting of *multiple* trees which are left standing and then *pushed over with a pusher tree.*" In the preamble OSHA explained that domino felling was a method of attempting to fell a line or row of trees by partially cutting the trees and then pushing the end tree into the others, thereby creating a domino falling effect. (59 FR 51699, 51724). There was considerable evidence in the rulemaking record that such a method of felling a group of trees is extremely dangerous because there is greater likelihood the line of trees will not fall in the intended direction or may not fall completely, thereby creating even greater hazards (Ex. 5–42, 5–46; Tr. W2 231, OR 659). The hazards associated with domino felling are further increased where a danger tree is among the line or row of trees to be felled using this chain reaction method. Therefore, OSHA emphasized that danger trees also could not be felled using domino felling.

After publication, OSHA was requested to further clarify whether the felling of a single danger tree by felling another single tree into it is prohibited under the final rule. The final rule does not prohibit this practice in all cases, since the definition of domino felling in the final rule does not include the felling of a *single* tree with another tree. The domino felling that is prohibited in the final rule is the felling of *multiple* trees with a pusher tree. OSHA is revising the final rule to identify practices which are not considered to be domino felling, and therefore, are not prohibited by the standard.

However, the practice of felling a danger tree by felling another one into it, while it is not prohibited, is not automatically permitted to be used whenever a danger tree is felled. Paragraph (h)(1)(vii) of the final rule also requires that where a danger tree is felled or removed, the feller must use a technique that minimizes employee exposure to the hazard. In some cases, felling a danger tree by felling another tree into it will not minimize employee exposure to the hazards, and may even increase the risk the feller faces in removing the danger tree. As OSHA pointed out in the preamble, commenters told OSHA that felling a danger tree by felling another one into it is a safe technique when used by an experienced feller, but only "in certain situations" (Ex. 5–74 through 5–92). Other commenters told OSHA that this technique is generally not considered safe practice (Ex. 5–42, 5–46). In clarifying that this technique is not prohibited under the final rule, OSHA is permitting that a danger tree be felled in this manner only where a careful examination of mechanical techniques is first made and where it is also determined that the hazards felling the danger tree in this manner can be sufficiently minimized. The revised compliance directive notes that felling a danger tree by this method does not always minimize employee exposure to the hazard under paragraph (h)(1)(vii), and emphasizes that a safer method to remove a danger tree is to pull the tree down with a skidder or mechanical feller (Ex. 5–43).

Paragraph (h)(2)(i)—Retreat Paths

The final rule requires that a feller must plan and clear a retreat path before he begins cutting a tree. This provision assures that the feller has an accessible path for moving away from the falling tree, especially if the tree falls in an unintended direction. The rulemaking record indicates that a significant number of injuries have resulted from not having a clear retreat path. For example, the WIR survey indicates that almost 15 percent of logging injuries reported resulted from loggers misjudging the time and distance required to move to a safe place (Ex. 2–1).

It has been pointed out to OSHA that while this provision requires employees to plan and clear a retreat path, it does not expressly state that the feller must take that retreat path a safe distance from the falling tree once the tree is cut. While OSHA is confident that the vast majority of employers and fellers understand the purpose of the retreat path, OSHA is correcting the final rule to make the retreat requirement explicit.

Paragraph (h)(3)(i)—Limbing and Bucking

The final rule requires that whenever rolling or sliding of the tree is reasonably foreseeable, limbing and bucking must be done on the uphill side of the tree. While it is possible to limb and buck from the uphill side in almost all situations, the Agency provided an exception for those cases where the employer demonstrated that it was not feasible to limb or buck from the uphill side. In those limited cases, the provision required that the tree be secured with chocks to prevent rolling, sliding or swinging.

After publication of the final rule, OSHA was told by various parties that they knew of no cases where manual bucking and limbing from the uphill side would be infeasible. They also said that the procedure of setting chocks itself would put the employee in a dangerous position. Therefore, they told OSHA that the exception allowing work on the downhill side should be deleted from the final rule.

A review of the rulemaking record supports these comments. There were no comments or hearing testimony identifying any situations in which it would be infeasible to buck or limb a tree from the uphill side. Moreover, the Agency is aware that machines can move trees to a stable position so there is no potential for rolling of the tree during limbing and bucking. Therefore, OSHA agrees that the exception to allow limbing and bucking from the downhill side is unnecessary, and is correcting the final rule to remove it.

Paragraph (h)(5)(v)—Yarding

The final rule requires that yarding lines not be moved unless the yarder operator has clearly received and understood the signal. This provision also specifies that when in doubt, the machine operator must repeat the signal and wait for a confirming signal before moving the line. OSHA intended the term "yarder operator" to be a generic reference to any employee operating a machine used for yarding, including a yarder or skidder. However, since a yarder is also a specific kind of yarding machine, the provision could be read as applying only to the operator of that particular type of machine. Because of the potential for misinterpretation, OSHA is correcting the final rule to more clearly express the Agency's intention that the provision apply to all machines used for yarding felled trees.

Paragraph (h)(5)(viii)—Hazardous Obstructions in Yarding

The final rule requires that yarding machines or vehicles and their loads must be operated with safe clearance from all obstructions. This provision was included in the proposed rule and there were no comments opposing it. However, after publication of the final rule, OSHA received requests for clarification of the language and scope of this provision.

OSHA is revising the final rule and compliance directive to more clearly define the hazards being addressed by this provision. OSHA intended that yarding machines and their loads be operated in a manner that prevents contact with *hazardous* obstructions. The types of obstructions which the record shows to be hazardous include, but are not limited to, boulders, danger trees, stumps, log piles, power lines, and cable rigging (Ex. 2–1, 4–61, 4–64, 26A). OSHA is also revising the compliance directive to include examples of hazardous obstacles that have resulted in employee death and injury.

Paragraph (h)(6)(ii)—Loading

The final rule requires that only the machine operator and other essential personnel be allowed in the work area during loading and unloading. The work area covered by this provision is the immediate loading work area as opposed to the entire logging site (e.g., landing). OSHA is correcting the final rule and compliance directive to express more clearly the Agency's intention.

Paragraph (i)(7)(i)—First-Aid Training

The final logging rule requires the employer to assure that each employee receives or has received first-aid training, including CPR, which meets the minimum requirements set forth in mandatory Appendix B. OSHA was requested by some parties to clarify whether the provision requires employers to provide new employees with first-aid training before they are allowed to begin work, and if so, to permit employers to have a 90-day training phase-in period for new employees.

The final rule does not require employers to provide the first-aid training to their employees. Employers are only required to assure that every employee performing logging operations has a first-aid training certificate which is current. Employers are free to require, as a condition of employment, that new employees have or obtain a first-aid training certificate. As the rulemaking record indicates, there are many organizations, schools, extension services, and others throughout the country which provide first-aid training on a continuous basis.

At the same time, OSHA is aware that some employers do provide first-aid certificate training for new employees who do not have a current first-aid training certificate. Where employers elect to provide such training, the general training requirements of paragraph (i) require that it be provided prior to the employee's initial assignment. It is vital that new and untrained employees not be allowed to begin work until they have been trained.

Remote and isolated locations are typical of logging operations. If employees working in these locations do not have the necessary first-aid training, they would not be able to help themselves or others if an accident were to occur. For example, one fatality report submitted by APA involved a feller being sent to work alone in an isolated area (Ex. 26A). The feller suffered a cut to the upper leg and did not perform any first-aid on himself. Instead, he attempted to walk out of the woods but bled to death before he was found. Teaming an untrained employee with a trained logger would not solve the problem. In case of emergency, the untrained employee would not be able to provide first-aid assistance if it were his trained partner that was injured. Many crews work in pairs in remote areas and each crew member needs to be trained to help his partner.

Therefore, OSHA is not allowing a phase-in period for first-aid training. The employer is responsible for assuring that untrained employees have had first-aid training prior to initial assignment or, in the case of current employees, by the effective date of the final rule. OSHA believes that the logging rule can best reduce the number and severity of logging injuries if employees have a current first-aid training certificate before they begin logging operations.

Paragraph (i)(7) (ii) and (iii)—Frequency of First-Aid Training

The final rule requires employers to assure that each logging employee receives first-aid training at least every three years and CPR training at least annually. The final rule also requires the employer to assure that each employee's first-aid and CPR training certificate remain current. It has been suggested to OSHA that CPR training is only necessary every three years. For the following reasons, OSHA believes that the record does not support such a change.

As OSHA explained in the preamble to the final rule, the American Red Cross first-aid training program, which is the most widely used program in the country, requires first-aid training every three years and annual CPR training in order to maintain a current certificate (Ex. 5–42). The American Heart Association follows the same requirements for maintaining current certification. The American Medical Association also recommends following the training procedures established by the American Red Cross and the American Heart Association. In addition, States have established minimum requirements for first-aid training certification.

While OSHA is aware that some States only require CPR training every two years to maintain a current certificate (e.g., Idaho), there are no States which permit CPR certificates to remain current for three years. OSHA is correcting the final rule to conform its retraining requirements to the requirements established by State regulations and organizations that provide first-aid and CPR certificate training programs. Therefore, as long as the employer assures that each employee has a current first-aid and CPR training certificate which meet State requirements or the requirements of certifying organizations, the employer is in compliance with the final rule. To reflect this clarification, OSHA is deleting paragraph (i)(7)(ii) and redesignating paragraph (i)(7)(iii) as paragraph (i)(7)(ii).

Appendix A to Section 1910.266—First-Aid Kits (Mandatory)

The final rule specifies the minimum contents of first-aid kits that employers must provide. The minimum content list was developed in conjunction with OSHA's offices of occupational medicine and occupational health nursing.

After publication of the final rule, OSHA was requested by some parties to drop tourniquets from the required list of items in first-aid kits. They told OSHA that current first-aid training courses teach people to use direct pressure to stop bleeding and to avoid the use of tourniquets in all but the most severe cases or when no other method will work. They were concerned that if tourniquets were included in logging first-aid kits, their use would be encouraged rather than discouraged. While OSHA is confident that employees trained and certified in proper first-aid techniques will use tourniquets properly, OSHA is also aware that other items commonly present at logging sites could be used as tourniquets (e.g., belts, ropes) if the need arose. Therefore, OSHA is correcting the final rule to delete tourniquets from the mandatory appendix specifying required first-aid contents.

OSHA is also deleting recordkeeping forms from the list of mandatory first-aid kit contents. The recordkeeping forms referred to here were not OSHA 200 accident logs; rather, they were forms that would provide information for the health care provider about the employee's injury and condition if medical attention is necessary and the employee is unable to communicate. Nonetheless, OSHA is removing this requirement to avoid confusion with recordkeeping that is required in accidents and injuries in general. At the same time, OSHA emphasizes that employers should establish a method for communicating to health care providers information concerning injured employees.

OSHA is also deleting the requirement that first-aid kits contain diphenhydramine hydrochloride elixir or capsules (i.e., Benadryl). Even though this over-the-counter medicinal product is frequently used in the logging industry to reduce the effects of insect bites and bee stings, prescribing its use is beyond the scope of first-aid training in this standard.

The requirement that each first-aid kit contain blankets is being revised to indicate that each kit must, at a minimum, contain at least one blanket. OSHA intended the term blankets to be used generically and not to set forth a required number of blankets which must be present.

Finally, OSHA is correcting the splint requirement in Appendix A. In the final rule OSHA had specified that first-aid kits be equipped with wire splints. However, the rulemaking record indicates that other types of splints would be as effective as wire splints and OSHA did not intend to preclude their use. These include, for example, inflatable or air splints. This correction will provide more flexibility for employers in providing first-aid kits that incorporate the latest medical technology and innovations.

Need for Correction

As discussed above, the final rule on Logging Operations published on Oct. 12, 1994 (59 FR 51672) contains errors which may prove to be misleading and are in need of clarification.

Under 5 U.S.C. 553, OSHA finds that there is good cause for making these amendments and corrections to the final logging standard effective upon publication in the **Federal Register**. These amendments represent minor changes and clarifications to the final rule and they do not increase regulatory burdens over those imposed by the final logging standard.

List of Subjects in 29 CFR Part 1910

Chain saw, Forestry, Harvesting, Incorporation by reference, Logging, Occupational safety and health, Pulpwood timber, Safety, Training.

Accordingly, 29 CFR Part 1910 is revised by making the following corrections and technical amendments:

PART 1910—[AMENDED]

1. The authority citation for subpart R of part 1910 continues to read:

Authority: Secs. 4, 6, 8, Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); Secretary of Labor's Order No. 12–71 (36 FR 8754), 8–76 (41 FR 25059), 9–83 (48 FR 35736) or 1–90 (55 FR 9033), as applicable.

Sections 1910.261, 1910.262, 1910.265, 1910.266, 1910.267, 1910.268, 1910.269, 1910.272, 1910.274 and 1910.275 also issued under 29 CFR Part 1911.

2. In paragraph (c) of 1910.266, the definitions of "logging operations," "machine," and "vehicle" are revised to read:

§ 1910.266 Logging Operations.

* * * * *

(c) * * *

Logging operations. Operations associated with felling and moving trees and logs from the stump to the point of delivery, such as, but not limited to, marking danger trees and trees/logs to be cut to length, felling, limbing, bucking, debarking, chipping, yarding, loading, unloading, storing, and transporting machines, equipment and personnel to, from and between logging sites.

* * * * *

Machine. A piece of stationary or mobile equipment having a self-contained powerplant, that is operated off-road and used for the movement of material. Machines include, but are not limited to, tractors, skidders, front-end loaders, scrapers, graders, bulldozers, swing yarders, log stackers, log loaders, and mechanical felling devices, such as tree shears and feller-bunchers. Machines do not include airplanes or aircraft (e.g., helicopters).

* * * * *

Vehicle. A car, bus, truck, trailer or semi-trailer owned, leased or rented by the employer that is used for transportation of employees or movement of material.

* * * * *

§ 1910.266 [Amended]

3. Section 1910.266 is amended by revising paragraph (d)(1)(iii); the first sentence of paragraph (d)(1)(iv); the first sentence of paragraph (d)(1)(v); paragraph (d)(1)(vii); the first sentence of paragraph (d)(2)(i); and paragraphs (d)(2)(iii), (d)(5), (d)(6)(iii), (d)(9)(iii), and (d)(9)(iv) to read:

(d) * * *

(1) * * *

(iii) The employer shall provide, at no cost to the employee, and assure that each employee handling wire rope wears, hand protection which provides adequate protection from puncture wounds, cuts and lacerations.

(iv) The employer shall provide, at no cost to the employee, and assure that each employee who operates a chain saw wears leg protection constructed with cut-resistant material, such as ballistic nylon. * * *

(v) The employer shall assure that each employee wears foot protection, such as heavy-duty logging boots that are waterproof or water repellant, cover and provide support to the ankle. The employer shall assure that each employee who operates a chain saw wears foot protection that is constructed with cut-resistant material which will protect the employee against contact with a running chain saw. * * *

* * * * *

(vii) The employer shall provide, at no cost to the employee, and assure that each employee wears the following:

(A) Eye protection meeting the requirements of subpart I of Part 1910 where there is potential for eye injury due to falling or flying objects; and

(B) Face protection meeting the requirements of subpart I of Part 1910 where there is potential for facial injury such as, but not limited to, operating a chipper. Logger-type mesh screens may be worn by employees performing chain-saw operations and yarding.

Note to paragraph (d)(1)(vii): The employee does not have to wear a separate eye protection device where face protection covering both the eyes and face is worn.

(2) * * *

(i) The employer shall provide first-aid kits at each work site where trees are being cut (e.g., felling, bucking, limbing), at each active landing, and on each employee transport vehicle. * * *

* * * * *

(iii) The employer also may have the number and content of first-aid kits reviewed and approved annually by a health care provider.

* * * * *

(5) *Environmental conditions.* All work shall terminate and each employee shall move to a place of safety when environmental conditions, such as but not limited to, electrical storms, strong winds which may affect the fall of a tree, heavy rain or snow, extreme cold, dense fog, fires, mudslides, and darkness, create a hazard for the employee in the performance of the job.

(6) * * *

(iii) Each employee performing a logging operation at a logging work site shall work in a position or location that is within visual or audible contact with another employee.

* * * * *

(9) * * *

(iii) Each machine, vehicle, and portable powered tool shall be shut off during fueling. Diesel-powered machines and vehicles may be fueled while they are at idle, provided that continued operation is intended and that the employer follows safe fueling and operating procedures.

(iv) Flammable and combustible liquids, including chain-saw and diesel fuel, may be used to start a fire, provided the employer assures that in the particular situation its use does not create a hazard for an employee.

* * * * *

4. Section 1910.266 is amended by revising paragraphs (e)(2)(iv), (e)(2)(vi) and (e)(2)(xiii) to read:

(e) * * *

(2) * * *

(iv) The chain saw shall be fueled at least 10 feet (3 m) from any open flame or other source of ignition.

* * * * *

(vi) The chain saw shall be started on the ground or where otherwise firmly supported. Drop starting a chain saw is prohibited.

* * * * *

(xiii) The chain saw shall be shut off or the throttle released before the feller starts his retreat.

* * * * *

5. Section 1910.266 is amended by revising paragraphs (f)(2)(iv), (f)(2)(x) and (f)(2)(xi); the first sentence of (f)(3)(i); by removing the first sentence of (f)(3)(ii); redesignating the remaining text as paragraph (f)(3)(ii)(C) and adding paragraphs (f)(3)(ii) (A) and (B); and by revising paragraphs (f)(3)(vii), (f)(3)(viii) and (f)(7) (i) and (ii) to read:

(f) * * *

(2) * * *

(iv) To maintain stability, the machine must be operated within the limitations imposed by the manufacturer as described in the operating and maintenance instructions for that machine.

* * * * *

(x) Before the operator leaves the operator's station of a machine, it shall be secured as follows:

(A) The parking brake or brake locks shall be applied;

(B) The transmission shall be placed in the manufacturer's specified park position; and

(C) Each moving element such as, but not limited to blades, buckets, saws and shears, shall be lowered to the ground or otherwise secured.

(xi) If a hydraulic or pneumatic storage device can move the moving elements such as, but not limited to, blades, buckets, saws and shears, after the machine is shut down, the pressure or stored energy from the element shall be discharged as specified by the manufacturer.

* * * * *

(3) * * *

(i) Each tractor, skidder, swing yarder, log stacker, log loader and mechanical felling device, such as tree shears or feller-buncher, placed into initial service after February 9, 1995, shall be equipped with falling object protective structure (FOPS) and/or rollover protective structure (ROPS). * * *

(ii) (A) ROPS shall be tested, installed, and maintained in serviceable condition.

(B) Each machine manufactured after August 1, 1996, shall have ROPS tested, installed, and maintained in accordance with the Society of Automotive Engineers SAE J1040, April 1988, "Performance Criteria for Rollover Protective Structures (ROPS) for Construction, Earthmoving, Forestry, and Mining Machines." * * *

* * * * *

(vii) Each machine manufactured after August 1, 1996, shall have a cab that is fully enclosed with mesh material with openings no greater than 2 inches (5.08 cm) at its least dimension. The cab may be enclosed with other material(s) where the employer demonstrates such material(s) provides equivalent protection and visibility. Exception: Equivalent visibility is not required for the lower portion of the cab where there are control panels or similar obstructions in the cab, or where visibility is not necessary for safe operation of the machine.

(viii) Each machine manufactured on or before August 1, 1996 shall have a cab which meets the requirements specified in paragraph (f)(3)(vii) or a protective canopy for the operator which meets the following requirements:

(A) The protective canopy shall be constructed to protect the operator from injury due to falling trees, limbs, saplings or branches which might enter the compartment side areas and from snapping winch lines or other objects;

(B) The lower portion of the cab shall be fully enclosed with solid material, except at entrances, to prevent the operator from being injured from obstacles entering the cab;

(C) The upper rear portion of the cab shall be fully enclosed with open mesh material with openings of such size as to reject the entrance of an object larger than 2 inches in diameter. It shall provide maximum rearward visibility; and

(D) Open mesh shall be extended forward as far as possible from the rear corners of the cab sides so as to give the maximum protection against obstacles, branches, etc., entering the cab area.

* * * * *

(7) * * *

(i) Service brakes shall be sufficient to stop and hold each machine and its rated load capacity on the slopes over which it is being operated.

(ii) Each machine placed into initial service on or after September 8, 1995 shall also be equipped with: back-up or secondary brakes that are capable of stopping the machine regardless of the direction of travel or whether the engine is running; and parking brakes that are capable of continuously holding a stopped machine stationary.

6. Section 1910.266 is amended by revising paragraphs (g)(1) and (g)(2) to read:

(g) * * *

(1) The employer shall assure that each vehicle used to perform any logging operation is maintained in serviceable condition.

(2) The employer shall assure that each vehicle used to perform any logging operation is inspected before initial use during each workshift. Defects or damage shall be repaired or the unserviceable vehicle shall be replaced before work is commenced.

* * * * *

7. Section 1910.266 is amended by revising paragraphs (h)(1)(iii), (h)(1)(ix), (h)(2)(i), (h)(2)(vi), and (h)(2)(vii); the heading of paragraph (h)(3); and paragraphs (h)(3)(i), (h)(5)(v), (h)(5)(viii), and (h)(6)(ii) to read:

(h) * * *

(1) * * *

(iii) While manual felling is in progress, no yarding machine shall be operated within two tree lengths of trees being manually felled. Exception: This provision does not apply to yarding machines performing tree pulling operations.

* * * * *

(ix) Domino felling of trees is prohibited.

Note to paragraph (h)(1)(ix): The definition of domino felling does not include the felling of a single danger tree by felling another single tree into it.

(2) * * *

(i) Before felling is started, the feller shall plan and clear a retreat path. The retreat path shall extend diagonally away from the expected felling line unless the employer demonstrates that such a retreat path poses a greater hazard than an alternate path. Once the backcut has been made the feller shall immediately move a safe distance away from the tree on the retreat path.

* * * * *

(vi) A backcut shall be made in each tree being felled. The backcut shall leave sufficient hinge wood to hold the tree to the stump during most of its fall so that the hinge is able to guide the tree's fall in the intended direction.

(vii) The backcut shall be above the level of the horizontal facecut in order to provide an adequate platform to

prevent kickback. Exception: The backcut may be at or below the horizontal facecut in tree pulling operations.

Note to paragraph (h)(2)(vii): This requirement does not apply to open face felling where two angled facecuts rather than a horizontal facecut are used.

(3) *Limbing and bucking.* (i) Limbing and bucking on any slope where rolling or sliding of trees or logs is reasonably foreseeable shall be done on the uphill side of each tree or log.

* * * * *

(5) * * *

(v) No yarding line shall be moved unless the yarding machine operator has clearly received and understood the signal to do so. When in doubt, the yarding machine operator shall repeat the signal and wait for a confirming signal before moving any line.

* * * * *

(viii) The yarding machine or vehicle, including its load, shall be operated with safe clearance from all obstructions that may create a hazard for an employee.

* * * * *

(6) * * *

(ii) Only the loading or unloading machine operator and other personnel the employer demonstrates are essential shall be in the loading or unloading work area during this operation.

* * * * *

8. Section 1910.266 is amended by removing paragraph (i)(7)(ii) and redesignating paragraph (i)(7)(iii) as paragraph (i)(7)(ii).

9. Section 1910.266 is amended by revising Appendix A to read:

Appendix A to 1910.266—First-Aid Kits (Mandatory)

The following list sets forth the minimally acceptable number and type of first-aid supplies for first-aid kits required under paragraph (d)(2) of the logging standard. The contents of the first-aid kit listed should be adequate for small work sites, consisting of approximately two to three employees. When larger operations or multiple operations are being conducted at the same location, additional first-aid kits should be provided at the work site or additional quantities of supplies should be included in the first-aid kits:

1. Gauze pads (at least 4×4 inches).
2. Two large gauze pads (at least 8×10 inches).
3. Box adhesive bandages (band-aids).
4. One package gauze roller bandage at least 2 inches wide.
5. Two triangular bandages.
6. Wound cleaning agent such as sealed moistened towelettes.
7. Scissors.
8. At least one blanket.
9. Tweezers.
10. Adhesive tape.
11. Latex gloves.
12. Resuscitation equipment such as resuscitation bag, airway, or pocket mask.
13. Two elastic wraps.
14. Splint.
15. Directions for requesting emergency assistance.

This document was prepared under the direction of Joseph A. Dear, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

Signed at Washington, DC, this 5th day of September, 1995.

Joseph A. Dear,

Assistant Secretary of Labor.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.R. 535/P.L. 104–23

Corning National Fish Hatchery Conveyance Act (Sept. 6, 1995; 109 Stat. 261; 1 page)

H.R. 584/P.L. 104–24

To direct the Secretary of the Interior to convey a fish hatchery to the State of Iowa. (Sept. 6, 1995; 109 Stat. 262; 1 page)

H.R. 614/P.L. 104–25

To direct the Secretary of the Interior to convey to the State of Minnesota the New London National Fish Hatchery production facility. (Sept. 6, 1995; 109 Stat. 263; 1 page)

H.R. 1225/P.L. 104–26

Court Reporter Fair Labor Amendments of 1995 (Sept. 6, 1995; 109 Stat. 264; 2 pages)

H.R. 2077/P.L. 104–27

To designate the United States Post Office building located at 33 College Avenue in Waterville, Maine, as the "George J. Mitchell Post Office Building". (Sept. 6, 1995; 109 Stat. 266; 1 page)

H.R. 2108/P.L. 104–28

District of Columbia Convention Center and Sports Arena Authorization Act of 1995 (Sept. 6, 1995; 109 Stat. 267; 4 pages)

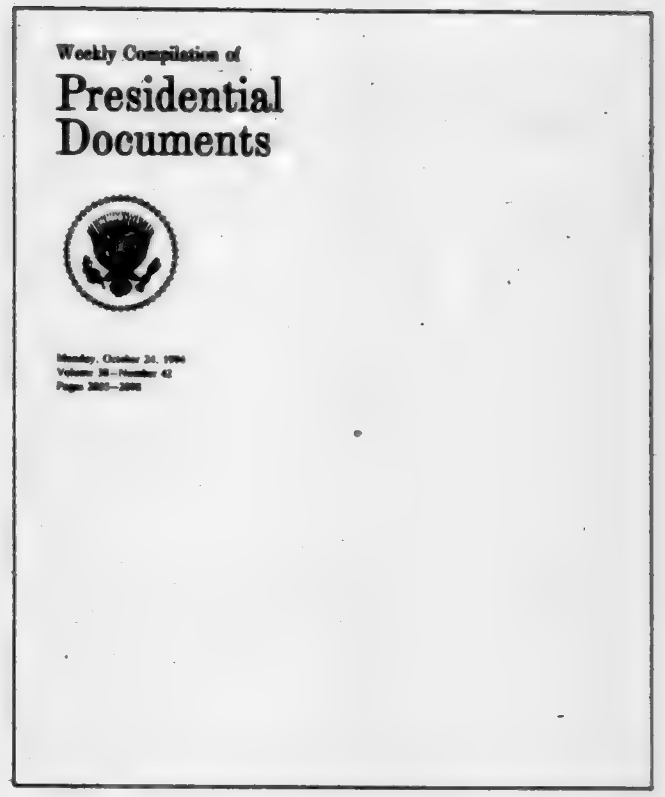
The authentic text behind the news . . .

The Weekly Compilation of Presidential Documents



Weekly Compilation of
Presidential
Documents

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Atlanta, GA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512–1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: October 17 at 9:00 am and 1:30 pm

WHERE: Office of the Federal Register Conference Room, 800 North Capitol Street NW., Washington, DC (3 blocks north of Union Station Metro)

RESERVATIONS: 202–523–4538

ATLANTA, GA

WHEN: September 20 at 9:00 am

WHERE:
Centers for Disease Control
and Prevention
1600 Clifton Rd., NE.
Auditorium A
Atlanta, GA

RESERVATIONS:
404–639–3528
(Atlanta area)
1–800–688–9889
(Outside Atlanta area)

Printed on recycled paper containing 100% post consumer waste

Rules and Regulations

Federal Register
Vol. 60, No. 175
Monday, September 11, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 300, 550, 752, 771, 831 and 842

RIN 3206–AG37

Agency Administrative Grievance System

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The U.S. Office of Personnel Management (OPM) is abolishing regulations at 5 CFR part 771 on the agency administrative grievance system (AGS). However, any AGS established under the current regulations must remain in effect until modified or replaced by the agency with another dispute resolution process. This change implements a human resources management recommendation under the National Performance Review (NPR). The change also is consistent with OPM's initiative under the NPR to sunset the Federal Personnel Manual (FPM), which included abolishing FPM Chapter 771 on the AGS as of December 31, 1993.

EFFECTIVE DATE: October 11, 1995.

FOR FURTHER INFORMATION CONTACT: Gary D. Wahlert (202) 606–2920.

SUPPLEMENTARY INFORMATION: The National Performance Review was issued on September 7, 1993. Appendix C to the NPR is entitled Major Recommendations Affecting Governmental Systems and includes a number of recommendations concerning reinvention of human resource management. One recommendation, HRM08, stated that agencies should "improve processes and procedures establishes to provide workplace due process for employees" and elaborated that "[a]ll agencies should establish alternative dispute resolution [ADR] methods and options for informal disposition of employment disputes." Among other things, the recommendation specifies that OPM should eliminate "all regulations governing internal agency grievance and appeal procedures, thus freeing agencies to tailor ADR techniques to various situations."

Proposed changes to implement this recommendation were published on December 5, 1994 at 59 FR 62353 for public comment. Comments were received from three agencies, two individuals, and two unions. The agencies were generally supportive of the change while the individuals and the unions were concerned that employees might be deprived of a benefit if agencies are not required to have a AGS. These comments are addressed below.

One agency, while supporting the opportunity to develop a grievance procedure that fits their "needs, resources, and particular characteristics," commented that there is a need for "limited" Government-wide regulation. Here the agency recommends that OPM mandate "universal standards" of due process and a minimal avenue for seeking redress of grievances in the interest of equity and fairness to employees. One union comment was that OPM require the maintenance of the AGS absent establishment of some other system. One individual suggested that it is unnecessary for the current regulations to be abolished in order for agencies to experiment with ADR techniques—such experimentation could take place within the parameters of the regulations.

OPM recognizes the concern that the absence of a regulatory requirement to have an AGS could result in some agencies not having one and that this in turn could result in adverse consequences such as leaving some employees without a forum to resolve some types of workplace disputes. OPM concurs with one agency's comment that the unavailability of a forum could lead to loss of morale, increased disaffection, and diminished worker productivity. OPM, however, believes the risk of agencies not having a system is minimal. First, the absence of an agency dispute resolution system would be contrary to the intent of the NPR recommendation. Second, OPM strongly advises agencies to have an administrative review system, and this aspect of human resources management will be subject to OPM's review as part of its oversight program. Third, the negative consequences of not having a system are so clear that they should deter any agency from letting that happen. Nevertheless, as suggested by one of the commenters, OPM is retaining the single requirement that any AGS established under the current regulations must remain in effect until modified or until that AGS is replaced with another system or process for the resolution of workplace disputes. The remainder of the current regulations are abolished as proposed. OPM believes this course of action affords agencies maximum flexibility while at the same time preserving the rights of individual employees.

Here, OPM repeats and emphasizes the comment made when proposing this change—that agencies are not precluded from continuing their AGS procedures established under part 771 to resolve workplace disputes (in fact, agencies *are*required to continue these procedures at least until they are modified or replaced). Again, as noted when OPM proposed this change, agencies, as suggested by the NPR, can take the opportunity to use ADR techniques in helping resolve disputes in the workplace and to do so without the restrictions contained in the current regulations that might negatively affect agency flexibility to design and operate appropriate workplace dispute resolution procedures. OPM's Office of Labor Relations and Workforce Performance will be available upon request to assist agencies in such efforts.

One commenter stated that elimination of the regulations would serve to expand the scope of bargaining on the scope of negotiated grievance procedures. OPM disagrees—the scope of such procedures is dictated by the provisions of Chapter 71 of title 5 of the United States Code. Elimination of part 771 does not expand or in any manner modify the labor-management relations statute.

Conforming Amendments

OPM also is deleting references to part 771 as they appear elsewhere in title 5 of the Code of Federal Regulations. In those cases, the language is modified to refer generically to "administrative" grievances or grievance systems to reflect the fact that agencies may have administrative grievance systems even though they would no longer technically be established under part 771, i.e., 5 CFR §§ 300.104(c)(2), 550.803, 752.203(f), 831.204(e)(2), and 842.106(e)(2). Likewise, other current references to "administrative" grievances in Title 5 (and not also referring to part 771) remain unchanged, i.e., 5 CFR §§ 511.607(a)(1) and 550.804(b)(1).

Executive Order 12866, Regulatory Review

This rule has been reviewed by the Office of Management and Budget in accordance with Executive Order 12866.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it applies only to Federal employees.

James B. King,

Director.

Accordingly, OPM is amending title 5 of the Code of Federal Regulations as follows:

PART 300—EMPLOYMENT (GENERAL)

1. The Authority citation for part 300 continues to read as follows:

Authority: 5 U.S.C. 552, 3301, and 3302; E.O. 10577, 3 CFR 1954–1958 Comp., page 218, unless otherwise noted.

Secs. 300.101 through 300.104 also issued under 5 U.S.C. 7201, 7204, and 7701; E.O. 111478, 3 CFR 1966–1970, Comp., page 803.

Secs. 300.401 through 300.408 also issued under 5 U.S.C. 1302(c), 2301, and 2302.

Secs. 300.501 through 300.507 also issued under 5 U.S.C. 1103(a)(5).

Sec 300.603 also issued under 5 U.S.C. 1104. Secs. 300.801 through 300.802 issued under 5 U.S.C. 1103(c).

2. In § 300.104, paragraph (c)(2) is revised to read as follows:

§ 300.104 Appeals, grievances and complaints.

* * * * *

(c) * * *

(2) Except as provided in paragraph (c)(1) of this section, an employee may file a grievance with an agency when he or she believes that an employment practice which was applied to him or her and which is administered or required by the agency violates a basic requirement in § 300.103. The grievance shall be filed and processed under an agency grievance system, if applicable, or a negotiated grievance system as applicable.

PART 550—PAY ADMINISTRATION (GENERAL)

Subpart H—Back Pay

3. The authority citation for subpart H of part 550 continues to read as follows:

Authority: 5 U.S.C. 5596(c); Pub. L. 100–202, 101 Stat. 1329.

4. In section 550.803, the definition of "grievance" is revised to read as follows:

§ 550.803 Definitions

* * * * *

Grievance has the meaning given that term in section 7103(a)(9) of title 5, United States Code, and (with respect to members of the Foreign Service) in section 1101 of the Foreign Service Act of 1980 (22 U.S.C. 4131). Such a grievance includes a grievance processed under an agency administrative grievance system, if applicable.

* * * * *

PART 752—ADVERSE ACTIONS

5. The authority citation for part 752 continues to read as follows:

Authority: 5 U.S.C. 7504, 7514, and 7543.

6. In section 752.203, paragraph (f) is revised to read as follows:

§ 752.203 Procedures.

* * * * *

(f) *Grievances.* The employee may file a grievance through an agency administrative grievance system (if applicable) or, if the suspension falls within the coverage of an applicable negotiated grievance procedure, an employee in an exclusive bargaining unit may file a grievance only under that procedure. Sections 7114(a)(5) and 7121(b)(3) of title 5 U.S.C., and the terms of any collective bargaining agreement, govern representation for employees in an exclusive bargaining unit who grieve a suspension under this subpart through the negotiated grievance procedure.

* * * * *

PART 771—AGENCY ADMINISTRATIVE GRIEVANCE SYSTEM

7. Part 771 is revised to read as follows:

PART 771—AGENCY ADMINISTRATIVE GRIEVANCE SYSTEM

Sec.

771.101 Continuation of Grievance Systems.

Authority: 5 U.S.C. 1302, 3301, 3302, 7301; E.O. 9830, 3 CFR 1945–1948 Comp., pp. 606–624; E.O. 11222, 3 CFR 1964–1969 Comp., p. 306.

§ 771.101 Continuation of Grievance Systems.

Each administrative grievance system in operation as of October 11, 1995, that has been established under former regulations under this part must remain in effect until the system is either modified by the agency or replaced with another dispute resolution process.

PART 831—RETIREMENT

8. The authority citation for part 831 continues to read as follows:

Authority: 5 U.S.C. 8347: § 831.102 also issued under 5 U.S.C. 8334; § 831.106 also issued under 5 U.S.C. 552a; § 831.108 also issued under 5 U.S.C. 8336(d)(2); § 831.201(b)(6) also issued under 5 U.S.C. 7701(b)(2); § 831.204 also issued under section 7202(m)(2) of the Omnibus Budget Reconciliation Act of 1990, Pub. L. 105–508. 104 Stat. 1388–339; § 831.303 also issued under 5 U.S.C. 8334(d)(2); § 831.502 also issued under 5 U.S.C. 8337; § 831.502 also issued under section 1(3), E.O. 11228, 3 CFR 1964–1965 Comp.; § 831.663 also issued under 5 U.S.C. 8339(j) and (k)(2); §§ 831.663 and 831.664 also issued under section

11004(c)(2) of the Omnibus Budget Reconciliation Act of 1993, Pub. L. 103–66; § 831.682 also issued under section 201(d) of the Federal Employees Benefits Improvement Act of 1986, Pub. L. 99–251, 100 Stat. 23; subpart S also issued under 5 U.S.C. 8345(k); subpart V also issued under 5 U.S.C. 8343a and section 6001 of the Omnibus Budget Reconciliation Act of 1987, Pub. L. 100–203, 101 Stat. 1330–275; § 831.2203 also issued under section 7001(a)(4) of the Omnibus Budget Reconciliation Act of 1990, Pub. L. 101–508; 104 Stat. 1388–328.

9. In section 831.204, paragraph (e)(2) is revised to read as follows:

§ 831.204 Elections of retirement coverage under the Portability of Benefits for Nonappropriated Fund Employees Act of 1990.

* * * * *

(e) * * *

(2) The procedures must not allow review under any employee grievance procedures, including those established by chapter 71 of title 5, United States Code.

* * * * *

PART 842—FEDERAL EMPLOYEES RETIREMENT SYSTEM—BASIC ANNUITY

10. The authority citation for part 842 continues to read as follows:

Authority: 5 U.S.C. 8461(g); Sections 842.104 and 842.106 also issued under 5 U.S.C. 8461(n); § 842.105 also issued under 5 U.S.C. 8402(c)(1) and 7701(b)(2); § 842.106 also issued under sec. 7202(m)(2) of the Omnibus Budget Reconciliation Act of 1990, Pub. L. 101–508, and 5 U.S.C. 8402(c)(1); Sections 842.604 and 842.611 also issued under 5 U.S.C. 8417; Section 842.607 also issued under 5 U.S.C. 8416 and 8417; section 842.614 also issued under 5 U.S.C. 8419; section 842.615 also issued under 5 U.S.C. 8418; § 842.703 also issued under sec. 7001(a)(4) of the Omnibus Budget Reconciliation Act of 1990, Public Law 101–508; section 842.707 also issued under section 6001 of the Omnibus Budget Reconciliation Act of 1987, Pub. L. 100–203; section 842.708 also issued under section 4005 of the Omnibus Budget Reconciliation Act of 1989, Pub. L. 101–239 and section 7001 of the Omnibus Budget Reconciliation Act of 1990, Pub. L. 101–508; subpart H also issued under 5 U.S.C. 1104.

11. In Section 842.106, paragraph (e)(2) is revised to read as follows:

§ 842.106 Elections of retirement coverage under the Portability of Benefits for Nonappropriated Fund Employees Act of 1990.

* * * * *

(e) * * *

(2) The procedures must not allow review under any employee grievance procedures, including those established by chapter 71 of title 5, United States Code.

[FR Doc. 95–22314 Filed 9–8–95; 8:45 am]

BILLING CODE 6325–01–M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 270 and 274

[Release Nos. 33–7208; IC–21332; S7–3–95]

RIN 3235–AG29

Registration Fees for Certain Investment Companies

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of rule amendments and form.

SUMMARY: The Commission is adopting amendments to rule 24f–2 under the Investment Company Act of 1940, the rule that permits certain investment companies to register an indefinite number of securities under the Securities Act of 1933. The Commission is also adopting a new form, Form 24F–2, to provide a standard form for annual notices filed under rule 24f–2. The amendments and the new form are intended to clarify the application of certain provisions of rule 24f–2 and make the rule's filing deadlines more flexible under certain circumstances.

DATES: The amendments are effective October 10, 1995. The rule amendments and Form 24F–2 will apply to filings that cover fiscal periods ending on or after the effective date, and to mergers and reorganizations completed on or after the effective date.

FOR FURTHER INFORMATION CONTACT: Karen J. Garnett, Attorney, or Joseph E. Price, Deputy Chief, (202) 942–0721, Office of Disclosure and Investment Adviser Regulation, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. After the effective date, questions concerning filings should be addressed to Carolyn A. Miller, Senior Financial Analyst, (202) 942–0510, Office of Financial Analysis, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission ("Commission") today is adopting amendments to rules 24f–1 (17 CFR 270.24f–1) and 24f–2 (17 CFR 270.24f–2) under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) ("1940 Act") and a new Form 24F–2 (17 CFR 274.24).

Executive Summary

The Commission is amending rule 24f–2 under the 1940 Act, the rule that permits certain investment companies to register an indefinite number of securities under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*) ("Securities Act"). The amendments provide that annual notices required by rule 24f–2 will be deemed timely filed if the investment company establishes that it timely transmitted the notice to a company or governmental entity that guaranteed delivery to the Commission no later than the filing date. In addition, the amendments modify certain filing periods under rule 24f–2 and clarify the operation of the rule's termination provisions in the case of investment company business combination transactions. The Commission also is adopting Form 24F–2, a standard form for annual notices required by rule 24f–2. Form 24F–2 solicits the information currently required by rule 24f–2 for annual notices and includes a work sheet for calculating filing fees. The form is intended to improve the accuracy of information contained in Rule 24f–2 Notices and improve the Commission's ability to process the notices. Finally, the Commission is adopting conforming amendments to rule 24f–1, the rule that permits certain investment companies to register securities sold in excess of the number of shares included in a registration statement.

I. Background

Section 6(b) of the Securities Act (15 U.S.C. 77f(b)) specifies the fees that must be paid in connection with registering securities with the Commission under the Securities Act. Section 24 of the 1940 Act (15 U.S.C. 80a–24) modifies these provisions for certain investment companies ("funds").[1] Section 24 was intended to address the problem of inadvertent "oversales" of fund securities, *i.e.*, sales in excess of securities registered, which could easily occur with a fund that continually issues and redeems securities.

Rule 24f–2 under the 1940 Act permits funds to register an indefinite number of securities. A fund that makes a declaration to be governed by the rule ("Rule 24f–2 declaration") pays an initial election fee of $500. Once a fund makes its Rule 24f–2 declaration, it must file a notice within six months after the close of each fiscal year ("Rule 24f–2 Notice") and pay a registration fee based upon the number of shares sold during the fiscal year.[2] If the fund files its Rule 24f–2 Notice within two months after the close of its fiscal year, the fund may deduct the value of shares redeemed from the value of shares sold in calculating the amount of fees due.[3] This netting provision can result in substantial savings to funds and their shareholders.

On February 1, 1995, the Commission issued a release ("Proposing Release") proposing for public comment amendments to rule 24f–2 that would modify the method for determining when Rule 24f–2 Notices will be deemed timely filed with the Commission.[4] The proposed amendments would also change the computation of filing deadlines and the operation of rule 24f–2's termination provisions in the case of investment company business combination transactions. In addition, the Commission proposed a standard form for filing Rule 24f–2 Notices, which was intended to improve the accuracy of information contained in the notices. The Commission received six comment letters on the Proposing Release,[5] all of which supported the proposals.[6] The Commission is adopting the amendments and form substantially as proposed.

II. Amendments to Rule 24f–2

A. Delayed Filings

Under rule 24f–2, the consequences of filing a late Rule 24f–2 Notice can be severe.[7] The Commission proposed an amendment to rule 24f–2 to provide a means for funds to ensure that their Rule 24f–2 Notices are timely filed and thus to avoid the consequences of late filings. The proposed amendment to rule 24f–2 provided that a Rule 24f–2 Notice is deemed timely filed, regardless of when it reaches the Commission, if the fund establishes that it timely transmitted the notice to a third party company or governmental entity that guaranteed delivery to the Commission no later than the filing date. All of the commenters supported the amendment, which the Commission is adopting as proposed.

As adopted, new paragraph (f) of rule 24f–2 (17 CFR 270.24f–2(f)) applies to both the deadline for using the rule's netting provision and the deadline for filing Rule 24f–2 Notices.[8] In order to rely on this provision, a fund must retain a receipt or other writing from the third party evidencing timely receipt by the third party for filing with the Commission by the due date.[9] By providing a means for funds to ensure that they are not penalized for the failure of a third party to timely file their Rule 24f–2 Notices, the amendments should eliminate the need for such funds to seek exemptive relief from the requirements of rule 24f–2.[10] Consequently, the Commission does not expect to entertain further exemptive applications from late filers.

B. Dividend Reinvestment Shares

As discussed above, rule 24f–2 permits a fund to calculate the registration fee due by deducting the amount of shares redeemed during the fiscal year from the amount of shares sold during the period. In determining the amount of shares sold during the fiscal year, some funds have excluded shares issued in connection with dividend reinvestment plans ("DRIP shares").[11] These funds, however, also may have included DRIP shares in determining the amount of shares redeemed during the fiscal year.[12] In the Proposing Release, the Commission explained that this method of counting shares is inconsistent with the netting provision of rule 24f–2, which recognizes that a substantial portion of shares being registered under rule 24f–2 were issued to replace redeemed shares that previously had been registered under the Securities Act.[13] To address this inconsistency, the Commission proposed an amendment to rule 24f–2 to require funds taking advantage of the rule's netting provision to include DRIP shares when determining the amount of shares sold and redeemed during the fiscal year.

Five of the six commenters generally supported the proposed amendment. The objecting commenter argued that including DRIP shares in the amount of securities sold during the fiscal year would contradict the Commission's long-standing position that the issuance of DRIP shares is not a "sale" of securities for purposes of registration.[14] This commenter asserted that the proposed amendments could require a fund to pay registration fees on DRIP shares in years that the amount of DRIP shares issued exceeds redemptions. The Commission acknowledges that in some years a fund could pay fees on DRIP shares that would not be offset by redemptions. Those circumstances would occur infrequently, however, and the fees typically would be recaptured when those shares are redeemed in later years and netted against other sales.[15]

---

[1] These companies include face amount certificate companies, open-end management companies, and unit investment trusts.

[2] Rules 24f–2(a)(1), (a)(3), and (b)(1) [17 CFR 270.24f–2(a)(1), (a)(3), and (b)(1)].

[3] Rule 24f–2(c) (17 CFR 270.24f–2(c)).

[4] Investment Company Act Rel. No. 20874 (Feb. 1, 1995) (60 FR 7146 (Feb. 7, 1995)).

[5] The comment letters are available for public inspection and copying in the Commission's public reference room in File No. S7–3–95.

[6] One commenter, who supported the proposed rule amendments and form, suggested further changes to accommodate unit investment trusts ("UITs") under certain circumstances. While such revisions are beyond the scope of the current proposal, the Commission intends to consider revisions to rule 24f–2 for UITs in the future.

[7] Rule 24f–2 currently provides that a fund cannot use the netting provision of paragraph (c) of the rule, which may result in substantially higher filing fees, if the fund's Rule 24f–2 Notice arrives at the Commission more than two months after the end of the fund's fiscal year. In addition, a fund's Rule 24f–2 declaration will terminate if the fund files its Rule 24f–2 Notice more than six months after its fiscal year end.

[8] The amendments change the deadline for filing in order to use the netting provision from two months to 60 days and the deadline for filing Rule 24f–2 Notices from six months to 180 days. *See infra* section II.D ("Calculation of Time Periods").

[9] Funds that file Rule 24f–2 Notices by direct transmission on the Commission's EDGAR system ("electronic filers") will not be affected by this provision, since the timeliness of their filings does not depend upon the mail or courier services. While an electronic filing may be delayed for technical reasons, the rules governing electronic filings contain adequate procedures to address transmission problems. *See* 17 CFR 232.13(b).

[10] The Commission has recently issued exemptive orders pursuant to its authority under section 6(c) of the 1940 Act (15 U.S.C. 80a–6(c)) to allow funds filing after the two month deadline under certain circumstances to use rule 24f–2's netting provision. *See* Proposing Release, *supra* note 4, at n.7 and accompanying text.

[11] DRIP shares generally are not treated as "sales" of stock for purposes of registration requirements under the Securities Act. *See* Securities Act Rel. No. 929 (Jul. 29, 1936). Many funds, therefore, do not include DRIP shares as "sales" for purposes of rule 24f–2.

[12] Funds that do not separately track DRIP shares generally have no means of determining whether shares redeemed during the fiscal year include DRIP shares.

[13] Proposing Release, *supra* note 4, at section II.B.

[14] *See supra* note 11.

[15] Furthermore, in years when the fund has no sales but issues DRIP shares, the fund would not be required to pay registration fees on shares sold, regardless of redemptions in that year. This is because the amendment does not require a fund to include DRIP shares in the total amount of securities sold unless the fund is netting redemptions against sales. *See* Instruction B.7 of Form 24F–2.

The Commission considered alternatives to address the commenter's concern, including requiring funds to track the redemption of DRIP shares and exclude them from the amount redeemed in calculating net sales. Industry commenters supported the proposed approach as being less burdensome. The Commission is adopting the amendment as proposed.[16]

C. Mergers and Other Business Combinations

Paragraph (b)(3) of rule 24f–2 (17 CFR 270.24f–2(b)(3)) requires a fund planning to cease operations to file a post-effective amendment terminating the Rule 24f–2 declaration and file a final Rule 24f–2 Notice "before ceasing operations." In the case of investment company business combination transactions, especially those involving a liquidation, merger, or sale of assets, the operation of the rule has been unclear. While in most cases a fund's operations cease upon consummation of the transaction, it may be impractical for the fund to file a final Rule 24f–2 Notice before the transaction since sales and redemptions may be occurring until the time of the transaction. In addition, paragraph (b)(3) is silent as to the applicability of the netting provision of paragraph (c) when a fund files a Rule 24f–2 Notice in connection with ceasing operations.

To address these issues, the Commission proposed amendments to rule 24f–2 to remove the requirement that a fund file its final Rule 24f–2 Notice prior to ceasing operations and, in its place, provide that if a fund ceases operations, the end of its fiscal year for purposes of rule 24f–2 is the date it ceases operations.[17] Commenters supported the proposal, and the Commission is adopting amendments to paragraph (b)(3) of rule 24f–2 as proposed.

The rule, as amended, provides that the date a fund ceases operations will be deemed the close of its fiscal year.[18] Thus, a fund must file a final Rule 24f–2 Notice within 180 days after ceasing operations and pay registration fees on all shares sold during the fiscal year.[19] If a fund files the Rule 24f–2 Notice within 60 days after ceasing operations, it will be permitted, under paragraph (c), to net redemptions made between the end of the previous fiscal year and the date of ceasing operations against sales during that period.[20] For funds involved in business combination transactions (other than reorganizations described below), revised paragraph (b)(3) specifies that a fund ceases operations for purposes of rule 24f–2 on the date that the fund's assets are distributed in a liquidation, the effective date of a merger, or, when there has been a sale of all or substantially all of the fund's assets, the date those assets are transferred.

As proposed, paragraph (b)(3) also clarified that reorganizations for the purpose of changing the fund's state of incorporation or form of organization would not result in the company ceasing operations for purposes of rule 24f–2. These transactions would be limited under the proposed rule to reorganizations that satisfied the requirements of rule 414 under Regulation C of the Securities Act.[21] Under a rule 414 reorganization, the successor fund succeeds to all assets and liabilities of the acquired fund, including the registration fee liabilities (net of any redemption credits) under rule 24f–2.[22]

Two commenters recommended that the Commission expand the application of paragraph (b)(3) of rule 24f–2 to permit the transfer of redemption credits when the assets and liabilities of an existing fund are merged or otherwise transferred into the portfolio of a newly-created series of another fund.[23] The Commission staff has previously allowed a successor fund to use an acquired fund's redemption credits when the successor fund was a newly-created series of a series company.[24] The Commission has decided to revise paragraph (b)(3) to provide that a fund may transfer redemption credits to a successor fund in the case of either a succession under rule 414 or a transfer of assets to a newly-created series of a series company.

D. Calculation of Time Periods

The Commission proposed amending paragraphs (b)(1) and (c) of Rule 24f–2 to replace the "six month" and "two month" time periods for filing Rule 24f–2 Notices with "180 day" and "60 day" time periods, respectively.[25] The rule's references to "months" has resulted in different filing periods depending upon the months involved and is inconsistent with the timing provisions in other Commission rules.[26] This has, on occasion, caused some confusion among funds about filing deadlines. Only one commenter objected to the proposed revisions, arguing that the proposal to measure time periods in days rather than months would create more confusion among filers about the deadlines for filing Rule 24f–2 Notices. The Commission believes, however, that the proposed amendments, which make rule 24f–2 consistent with other filing requirements under the 1940 Act, will reduce confusion among funds about the time periods for filing annual notices under rule 24f–2. Therefore, the Commission is adopting the amendments as proposed.[27] To further clarify how to calculate time periods, the Commission is also adopting, as proposed, a new paragraph specifying that the first day of the time period is the first calendar day of the fiscal year following the fiscal year for which the Rule 24f–2 Notice is filed.[28]

---

[16] Paragraph (c) of rule 24f–2.

[17] Proposing Release, *supra* note 4, at section II.C.

[18] Rule 24f–2(b)(3).

[19] Rule 24f–2(b)(1).

[20] This approach is similar to that taken in rule 8f–1 under the 1940 Act (17 CFR 270.8f–1), which requires a registered investment company winding up its affairs or being merged into or consolidated with another investment company to file an application for an order declaring that the company has ceased to be a registered investment company after the transaction has occurred.

[21] 17 CFR 230.414. Rule 414 generally provides that the registration statement of a predecessor company will be deemed to be the registration statement of the successor company when the purpose of the reorganization is to change the company's domicile or form of organization, provided certain conditions are satisfied. The Commission staff has stated that rule 414 is applicable to certain fund reorganizations. *See, e.g.*, Lowry Market Timing Fund, Inc. (pub. avail. Jan. 9, 1985); Frank Russell Investment Company (pub. avail. Dec. 3, 1984).

[22] Rule 414(b) (17 CFR 230.414(b)) requires that the succession result in the successor issuer acquiring all of the assets of and assuming all of the liabilities and obligations of the issuer.

[23] This type of transaction would not satisfy the requirements of rule 414 because the successor series would be part of a separately registered series company and would not adopt the predecessor fund's registration statement as its own, as required by rule 414. As a result, the acquired fund *would* cease to do business, unlike the acquired fund in a rule 414 succession.

[24] The Victory Funds (pub. avail. Apr. 24, 1995). In The Victory Funds, the staff stated that when a shell series assumes the assets and liabilities of an acquired fund, the transaction is similar to a reorganization under rule 414 because the successor fund is continuing the acquired fund's business and each shareholder of the acquired fund, following the transaction, owns the same pro rata interest in the same portfolio of securities as the shareholder owned before the transaction.

[25] Proposing Release, *supra* note 4, at section II.D.

[26] *See, e.g.*, rule 30b1–1 under the 1940 Act (17 CFR 270.30b1–1) (requiring funds to file semi-annual reports with the Commission not more than 60 calendar days after the close of each fiscal year and fiscal second quarter); rule 30d–1 under the 1940 Act (17 CFR 270.30d–1) (requiring funds to mail semi-annual reports to stockholders within 60 days after the close of the period for which the report is made); and rule 485 under the Securities Act (17 CFR 230.485) (providing that certain post-effective amendments will become effective on the sixtieth day after filing).

[27] The Commission is adopting similar amendments to rule 24f–1, which permits funds with effective registration statements to file a notification that has the effect of registering shares sold in excess of the number of shares previously registered. The six month time periods referred to in paragraphs (a)(1) and (c) of rule 24f–1 (17 CFR 270.24f–1(a)(1), 270.24f–1(c)) are changed to 180 days.

E. Investment Companies Funding Insurance Company Separate Accounts

Variable insurance contracts typically are offered through two tier arrangements in which contract premiums are pooled in an unmanaged insurance company separate account and invested in an underlying investment company ("Underlying Fund"). Many of the separate accounts are registered as investment companies and organized as unit investment trusts; others are eligible for exemption from the 1940 Act.

Pursuant to an interpretive letter recently issued by the Division of Investment Management, Underlying Funds are not required to pay registration fees on securities they sell to certain separate accounts.[29] These separate accounts are those organized as unit investment trusts and registered as investment companies or separate accounts that are exempt from registration under the 1940 Act but which register their securities under the Securities Act and pay registration fees thereon. The purpose of the interpretive letter was to prevent payment of registration fees under the Securities Act for the same aggregate proceeds from investors in variable insurance products that results in "double counting" of assets on which such fees are paid.

The Commission is codifying this interpretive advice in two instructions to new Form 24F–2.[30] Under these instructions, an Underlying Fund that files a Rule 24f–2 Notice generally is not required to include securities sold to an unmanaged separate account that issues interests therein that are registered under the Securities Act and on which registration fees have been or will be paid.[31] If an Underlying Fund excludes such securities from the amount reported in its Rule 24f–2 Notice, the Underlying Fund is not required to pay a registration fee for those securities. An Underlying Fund relying on this exemption may not include shares redeemed or repurchased from such unmanaged separate accounts for purposes of netting sales under rule 24f–2.[32]

III. Form 24F–2

The Commission is adopting Form 24F–2, substantially as proposed, to provide a standard format for filing information required by Rule 24f–2.[33] All of the commenters generally supported the proposed form. The Commission believes that a standard form for Rule 24f–2 Notices will facilitate the calculation of fees due under rule 24f–2 and reduce errors in the calculation of filing fees. The standard form should also improve the Commission's ability to process Rule 24f–2 Notices and detect errors.

Instructions to the form as adopted specify that an issuer may file a single Rule 24f–2 Notice for more than one class or series of securities, provided each series has the same fiscal year end and each class or series is registered on the same Securities Act registration statement.[34] One commenter objected to limiting the use of a single Form 24F–2 to series with the same fiscal year end. This commenter suggested that series funds with different fiscal year ends be permitted to file a single Form 24F–2 for a specified 12-month period, which would permit series with different fiscal year ends to net sales of all series against redemptions of all series. The Commission believes, however, that the limitation is appropriate. Series having different year ends appear to operate more like separate funds than a single fund and thus should not be treated as a single fund for purposes of aggregating sales and redemptions. The Commission has therefore decided not to expand the circumstances under which a series fund is permitted to file a single Form 24F–2 for series within the fund.[35]

As adopted, Form 24F–2 consists of twelve items and detailed instructions for completing and filing the form. The first four items require basic identifying information: the name and address of the fund; the class of shares or series to which the filing relates; the Securities Act file number of the registration statement on which the shares are registered; and the last day of the fiscal-year for which the Rule 24f–2 Notice is filed.

Items 5 and 6 must be completed only if the fund fails to file its Rule 24f–2 Notice within 180 days after its fiscal year end. In such a case, the fund's declaration to register an indefinite number of shares is terminated on the next business day.[36] As under the current rule, the fund must file a separate Form 24F–2 with respect to sales of securities made pursuant to the declaration during (1) the fiscal year for which the notice was not timely filed, and (2) the period after the close of the fiscal year but before the declaration was terminated. Item 5 requires the fund to indicate whether the form is being filed for purposes of reporting securities sold after the close of the fiscal year but before termination of the fund's Rule 24f–2 declaration. In either case, the fund must report the date of termination of its Rule 24f–2 declaration in Item 6.

Items 7 through 11 require a fund to identify the shares sold during the fiscal year for which registration fees have previously been paid or which must be accounted for in determining the fee payable with the Rule 24f–2 Notice.[37] This information is substantially the same as that currently required for a Rule 24f–2 Notice. The only significant change is that the form reflects amendments to paragraph (c) of rule 24f–2 that require a fund to include all securities issued pursuant to DRIPs in the fund's aggregate sales for purposes of calculating registration fees under the rule's netting provisions.[38]

Item 12 is a work sheet for calculating the fee payable with the notice. The fee calculation is presented in tabular format to facilitate the Commission staff's review of filing fees for purposes of determining whether a fund has paid the appropriate amount. The work sheet contains seven line items:

---

[28] Rule 24f–2(e) (17 CFR 270.24f–2(e)).

[29] American Council of Life Insurance (pub. avail. June 20, 1995).

[30] Instructions B.5 and C.4 to Form 24F–2.

[31] American Council of Life Insurance (pub. avail. June 20, 1995). The letter and the new instructions do not apply to shares sold to separate accounts whose interests are not registered under the Securities Act or to pension plans.

[32] The Commission may, in the future, consider a separate form designed specifically for variable insurance products to report shares sold under rule 24f–2.

[33] Paragraph (b)(1) of the rule currently specifies the information that must appear in a Rule 24f–2 Notice. Because Form 24F–2 solicits the same information, the amendments delete this information from the rule.

[34] Instruction A.3. This instruction does not affect the method of allocating expenses among multiple classes of funds in accordance with existing orders or rule 18f–3 under the 1940 Act. A multiple class fund is permitted to net credits for redemptions of shares of one class against sales of shares of another class if the fund's exemptive order or plan under rule 18f–3 treats federal securities registration fees as a fund expense and does not provide for the allocation of those fees on a class-by-class basis. *See* Investment Company Act Rel. No. 20915 (Feb. 23, 1995) (60 FR 11876 (Mar. 2, 1995)) (adopting rule 18f–3).

[35] This limitation on filing a single Rule 24f–2 Notice for more than one series is not intended to suggest that all series of a series company must have the same fiscal year end.

[36] Rule 24f–2(b)(2) (17 CFR 270.24f–2(b)(2)).

[37] As proposed, Item 7 required funds to report the number and aggregate sale price of securities of the same class or series "sold during the fiscal year" which had been registered under the Securities Act other than pursuant to rule 24f–2 in a prior fiscal year, but which remained unsold at the beginning of the fiscal year. One commenter asserted that it would be more meaningful, for purposes of calculating filing fees due under rule 24f–2, not to limit this item to securities sold during the fiscal year. The Commission agrees and has omitted the limiting phrase from the form as adopted.

[38] Instruction B.7 clarifies that this item should be completed only if the fund is using the netting provision of rule 24f–2(c) to calculate its registration fee. *See supra* section II.B ("Dividend Reinvestment Shares").

(i) The aggregate sale price of securities sold during the fiscal year in reliance on rule 24f–2;[39]

(ii) The aggregate price of DRIP shares (if not included in (i));

(iii) The aggregate price of shares redeemed or repurchased during the fiscal year;

(iv) The aggregate price of shares redeemed or repurchased and previously applied as a reduction to filing fees pursuant to rule 24e–2;[40]

(v) The net aggregate sale price of securities sold during the fiscal year in reliance on rule 24f–2 (line (i), plus line (ii), less line (iii), plus line (iv));

(vi) The multiplier to be used to determine the fee;[41] and

(vii) The fee due (line (i) (if the netting provision is not used) or line (v) (if the netting provision is used) multiplied by line (vi)).[42]

A fund must complete lines (ii), (iii), (iv), and (v) only if it is using the rule's netting provision.

The work sheet provided in Item 12 is similar to the method for reporting the calculation of Rule 24f–2 fees on the EDGAR system. Under the EDGAR system, an electronic filer is required to prepare a header for each Rule 24f–2 Notice. The header contains certain filing fee information that is included in the accompanying Rule 24f–2 Notice. As adopted, Form 24F–2 does not alter the headers for EDGAR filings.[43]

IV. Cost/Benefit Analysis

The rule amendments and new form adopted today are intended to clarify the operation of rule 24f–2 and make the rule's filing deadlines more flexible under certain circumstances. The addition of paragraph (f) to rule 24f–2 provides a means for funds to avoid late filings, which can result in significant costs to the funds. This provision will relieve funds of the cost of preparing applications for exemption from the provisions of the rule and will relieve the Commission of the cost of reviewing such applications. Other revisions to rule 24f–2 adopted today are intended to clarify the operation of the rule when an extraordinary business transaction occurs such as a merger or liquidation. The change to use of days rather than months to measure the filing deadlines under rules 24f–1 and 24f–2 will, in most cases, shorten the period to make required filings by a day or two, and thus could be viewed as a "cost." The Commission believes, however, that this "cost" will be minor and is outweighed by the added certainty and uniformity that such a change brings to the operation of the rule. Form 24F–2 is designed to ensure that funds provide consistent information in their Rule 24f–2 Notices and to facilitate the staff's review of annual notices. The Commission believes that the standard form and the interpretive guidance provided in the form's instructions will reduce the burden of preparing and reviewing Rule 24f–2 Notices.

V. Summary of Regulatory Flexibility Act Analysis

A summary of the Initial Regulatory Flexibility Act Analysis, prepared in accordance with 5 U.S.C. 603, was published in the Proposing Release. No comments were received on this analysis. The Commission has prepared a Final Regulatory Flexibility Analysis, a copy of which may be obtained by contacting Karen J. Garnett, Office of Disclosure and Investment Adviser Regulation, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

Text of Rule Amendments

List of Subjects in 17 CFR Parts 270 and 274

Investment companies, Reporting and recordkeeping requirements, Securities.

For the reasons set out in the preamble, Chapter II, Title 17 of the Code of Federal Regulations is amended as follows:

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

1. The authority citation for Part 270 continues to read in part as follows:

Authority: 15 U.S.C. 80a–1 *et seq.*, 80a–37, 80a–39, unless otherwise noted;

* * * * *

2. The authority citations following §§ 270.24f–1 and 270.24f–2 are removed.

§ 270.24e–2 [Amended]

3. By amending § 270.24e–2, paragraph (a)(1), by revising the reference "Rule 457(c) (17 CFR 230.457(c))" to read "Rule 457(d) (17 CFR 230.457(d))".

§ 270.24f–1 [Amended]

4. By amending § 270.24f–1, paragraphs (a) and (c)(1), by revising the phrase "6 months" to read "180 days".

5. By amending § 270.24f–2 by revising paragraphs (b)(1), (b)(3), and (c) and by adding paragraphs (e) and (f) to read as follows:

§ 270.24f–2 Registration under the Securities Act of 1933 of an indefinite number of certain investment company securities.

* * * * *

(b)(1) If an issuer has filed a registration statement or post-effective amendment with a declaration authorized by paragraph (a)(1) of this section, it shall, with respect to such registration statement and within 180 days after the close of any fiscal year during which such declaration was in effect, file five copies of a notice ("Rule 24f–2 Notice") with the Commission. The Rule 24f–2 Notice shall be filed on Form 24F–2 (17 CFR 274.24) and shall be prepared in accordance with the requirements of the form. The Rule 24f–2 Notice shall be accompanied by an opinion of counsel indicating whether the securities the registration of which the notice makes definite in number were legally issued, fully paid, and non-assessable, and the additional filing fee, if any, specified in paragraph (c) of this section.

---

[39] In the case of a fund with a front-end load, the aggregate sale price includes the sales load.

[40] Section 24(e)(1) of the 1940 Act (15 U.S.C. 80a–24(e)(1)) permits a fund to file a post-effective amendment to its Securities Act registration statement to increase the number of securities registered. Rule 24e–2 (17 CFR 270.24e–2) provides that the fee to be paid at the time of filing such post-effective amendment will be based on the maximum aggregate offering price at which the additional securities will be offered. This filing fee may be reduced by the amount of securities redeemed or repurchased by the issuer in its previous fiscal year, provided the issuer did not use those redemptions or repurchases under the netting provisions of rule 24f–2. Conversely, the issuer may not count redemptions and repurchases used to reduce the filing fee under rule 24e–2 for purposes of netting under rule 24f–2.

[41] In the Act making appropriations for the Commission for fiscal 1994, Congress increased the rate of fees prescribed by section 6(b) of the Securities Act from one fiftieth of one percent to one twenty-ninth of one percent. Pub. L. 103–121 (Oct. 27, 1993). Congress extended the increased fee for fiscal year 1995. Pub. L. 103–352 (Oct. 13, 1994). The current fee rate will be in effect through September 30, 1995, unless further extended by Congress; otherwise, the rate will revert to one fiftieth of one percent. Instruction C.6 to the form reminds funds to determine the current fee rate before filing.

[42] Instruction C.2 specifies that the $100 minimum fee prescribed by section 6(b) of the Securities Act does not apply to fees payable under rule 24f–2. This provision also has been incorporated into paragraph (c) of the rule.

[43] The Proposing Release requested comment whether the Commission should modify its systems to permit computer verification of the fee calculation based on information in the form rather than the header, thus avoiding the need for filers to duplicate information. The only commenter to address this question supported such a modification because it would relieve EDGAR filers of the burden of manually transferring information from Form 24F–2 to the header. The Commission agrees that such a modification could simplify electronic submissions of Form 24F–2. As the staff further develops the EDGAR system, the Commission may propose appropriate modifications relating to Form 24F–2.

* * * * *

(3) For purposes of this section, if a registrant ceases operations, the date the registrant ceases operations shall be deemed to be the close of its fiscal year. In the case of a liquidation, merger, or sale of all or substantially all of the assets of the registrant, the registrant shall be deemed to have ceased operations for purposes of this section on the date all or substantially all of the registrant's assets are distributed, the date the merger becomes effective under state law, or the date the assets are transferred; *provided, however,* that in the case of a merger of a registrant ("Predecessor Fund") with another registrant ("Successor Fund"), or a sale of all or substantially all of a Predecessor Fund's assets and liabilities to a Successor Fund, the Predecessor Fund shall not be deemed to have ceased operations and the Successor Fund shall assume the obligations, fees, and redemption credits of the Predecessor Fund incurred pursuant to this section and § 270.24e–2 if:

(i) The registration statement of the Predecessor Fund is deemed the registration statement of the Successor Fund in a transaction described by § 230.414 of this chapter; or

(ii) The Successor Fund is a series of a series company (as defined in § 270.18f–2), and immediately prior to the transaction the Successor Fund had no assets or liabilities, other than nominal assets or liabilities, and no operating history.

(c) A Rule 24f–2 Notice shall be accompanied by the payment of a filing fee with respect to the securities sold during the fiscal year in reliance upon registration pursuant to this section and shall be based upon the actual aggregate sale price for which such securities were sold. The filing fee shall be calculated in the manner specified in section 6(b) of the Securities Act of 1933 and the rules and regulations thereunder, except that the minimum filing fee required under section 6(b) shall not apply to fees due under this section. When the Rule 24f–2 Notice is filed not later than 60 days after the close of the fiscal year during which such securities were sold pursuant to this section, the filing fee to be paid as to such securities shall be the fee, if any, calculated in the manner specified in Section 6(b) of the Securities Act of 1933 except that, for the purpose of such calculation, such fee shall be based upon the actual aggregate sale price for which securities (including, for this purpose, all securities issued pursuant to a dividend reinvestment plan) were sold during the issuer's previous fiscal year, reduced by the difference between:

(1) The actual aggregate redemption or repurchase price of such securities of the issuer redeemed or repurchased by the issuer during such previous fiscal year; and

(2) The actual aggregate redemption or repurchase price of such redeemed or repurchased securities previously applied by the issuer pursuant to § 270.24e–2(a) in filings made pursuant to section 24(e)(1) of the Investment Company Act of 1940.

* * * * *

(e) To determine the date on which a Rule 24f–2 Notice must be filed with the Commission under paragraph (b)(1) of this section or the date that a Rule 24f–2 Notice must be filed in order to permit the issuer to calculate the fee due in accordance with the second sentence of paragraph (c) of this section, the first day of the 180 day or 60 day period, as the case may be, shall be the first calendar day of the fiscal year following the fiscal year for which the Rule 24f–2 Notice is to be filed.

Note to Paragraph (e): For example, a Rule 24f–2 Notice for a fiscal year ending on June 30 must be filed no later than December 28 or, if the issuer calculates the fee due in accordance with the second sentence of paragraph (c), no later than August 29. If the last day of the period falls on a non-business day (a Saturday, Sunday or federal holiday), the period shall end on the first business day thereafter, as provided by § 270.0–2.

(f) The date of filing of a Rule 24f–2 Notice with the Commission shall be the date on which the Rule 24f–2 Notice is actually received by the Commission; *provided, however,* that other than in the case of a Rule 24f–2 Notice filed by direct transmission (as such term is defined in rule 11 of Regulation S–T (17 CFR 232.11) a Rule 24f–2 Notice received by the Commission after the date due under either paragraph (b)(1) or paragraph (c) of this section shall be deemed to have been timely filed if the issuer establishes that the Rule 24f–2 Notice was transmitted timely to a third party company or governmental entity providing delivery services in the ordinary course of business, which guaranteed delivery of the Notice to the Commission no later than the required filing date.

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

6. The authority citation for Part 274 continues to read as follows:

Authority: 15 U.S.C. 80a–1 *et seq.*, unless otherwise noted.

7. Section 274.24 and Form 24F–2 are added to read as follows:

Note: The text of Form 24F–2 does not appear in the Code of Federal Regulations. A copy of Form 24F–2 is attached as Appendix I to this document.

§ 274.24 Form 24F–2, annual notice of securities sold pursuant to registration of an indefinite number of certain investment company securities.

Form 24F–2 shall be used as the annual report filed by face amount certificate companies, open-end management companies, and unit investment trusts pursuant to § 270.24f–2 of this chapter for reporting securities sold during the fiscal year.

Dated: September 1, 1995.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-P

APPENDIX I.

U.S. SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 24F-2
Annual Notice of Securities Sold Pursuant to Rule 24f-2

Read instructions at end of Form before preparing Form.
Please print or type.

1. Name and address of issuer:

2. Name of each series or class of funds for which this notice is filed:

3. Investment Company Act File Number:

   Securities Act File Number:

4. Last day of fiscal year for which this notice is filed:

5. Check box if this notice is being filed more than 180 days after the close of the issuer's fiscal year for purposes of reporting securities sold after the close of the fiscal year but before termination of the issuer's 24f-2 declaration: ☐

6. Date of termination of issuer's declaration under rule 24f-2(a)(1), if applicable (see Instruction A.6):

7. Number and amount of securities of the same class or series which had been registered under the Securities Act of 1933 other than pursuant to rule 24f-2 in a prior fiscal year, but which remained unsold at the beginning of the fiscal year:

8. Number and amount of securities registered during the fiscal year other than pursuant to rule 24f-2:

9. Number and aggregate sale price of securities sold during the fiscal year:

10. Number and aggregate sale price of securities sold during the fiscal year in reliance upon registration pursuant to rule 24f-2:

11. Number and aggregate sale price of securities issued during the fiscal year in connection with dividend reinvestment plans, if applicable (see Instruction B.7):

12. Calculation of registration fee:

(i) Aggregate sale price of securities sold during the fiscal year in reliance on rule 24f-2 (from Item 10): $__________

(ii) Aggregate price of shares issued in connection with dividend reinvestment plans (from Item 11, if applicable): +__________

(iii) Aggregate price of shares redeemed or repurchased during the fiscal year (if applicable): -__________

(iv) Aggregate price of shares redeemed or repurchased and previously applied as a reduction to filing fees pursuant to rule 24e-2 (if applicable): +__________

(v) Net aggregate price of securities sold and issued during the fiscal year in reliance on rule 24f-2 [line (i), plus line (ii), less line (iii), plus line (iv)] (if applicable): __________

(vi) Multiplier prescribed by Section 6(b) of the Securities Act of 1933 or other applicable law or regulation (see Instruction C.6): x__________

(vii)Fee due [line (i) or line (v) multiplied by line (vi)]: __________

Instruction: *Issuers should complete lines (ii), (iii), (iv), and (v) only if the form is being filed within 60 days after the close of the issuer's fiscal year.* See Instruction C.3.

13. Check box if fees are being remitted to the Commission's lockbox depository as described in section 3a of the Commission's Rules of Informal and Other Procedures (17 CFR 202.3a).

FORM 24F-2

Annual Notice of Securities Sold Pursuant to Rule 24f-2

INSTRUCTIONS

A. Rule as to Use of Form 24F-2

1. This form shall be used for annual notices required by rule 24f-2 under the Investment Company Act of 1940 ("Act") [17 CFR 270.24f-2]. Annual notices on this form shall be filed within 180 days after the close of any fiscal year during which the issuer has in effect a declaration to register an indefinite number of securities pursuant to rule 24f-2(a)(1) of the Act. If the notice is being filed not later than 60 days after the close of the issuer's fiscal year, the fees due with the notice may be reduced. (*See* Instruction C.3.)

2. If the form contains insufficient space for the information required in any item, issuers should attach additional pages as necessary and indicate in the space provided for the item the number of additional pages attached.

3. The issuer named in Item 1 of this form is the face amount certificate company, open-end management company, or unit investment trust that has filed a registration statement under the Securities Act of 1933 ("Securities Act") [15 U.S.C. 77a et seq.] containing a declaration to register an indefinite number of securities under rule 24f-2(a)(1) of the Act. If the issuer has registered more than one class or series on the same Securities Act registration statement, the issuer may file a single Form 24F-2 for those classes or series, provided each series has the same fiscal year end. Issuers electing to calculate filing fees on a class-by-class or series-by-series basis, however, should file a separate Form 24F-2 for each class or series. All classes and series for which the form is filed should be identified in Item 2.

4. The Investment Company Act file number reported in response to Item 3 should be the number of the issuer's registration statement filed under the Act. The Securities Act file number in Item 3 refers to the registration statement filed to register an indefinite number of securities (beginning with either "2-" or "33-").

5. Item 4 requires issuers to report the date of the last day of the fiscal year for which the notice is filed. In the case of an issuer that ceases operations, the date it ceases operations is deemed the last day of its fiscal year for purposes of rule 24f-2.

6. Items 5 and 6 should be completed only if the issuer fails to file its Rule 24f-2 Notice within 180 days after the close of the issuer's fiscal year. In such cases, the issuer's declaration to register an indefinite number of shares will be terminated on the next business day, and the issuer should report the date of termination in Item 6. All such issuers must file a separate Form 24F-2 with respect to sales of securities made pursuant to the declaration during (1) the fiscal year for which the notice was not timely filed, and (2) the period after the close of the fiscal year but before the declaration was terminated. Issuers should check the box in Item 5 only if they are filing the form to report securities sold during the period after the close of the fiscal year but before the declaration was terminated.

B. Computation of Number of Securities

1. In response to Items 7 through 11, issuers may aggregate sales, redemptions, and amounts issued of all classes or series for which the notice is being filed. Issuers must aggregate prices within each class or series. If the issuer charges a front-end sales load on its securities, the aggregate sale price must include the sales load.

2. Item 7 requires the issuer to report the number and amount of securities of the same class or series as those for which the notice is being filed, if any, which were registered under the Securities Act *other than* pursuant to rule 24f-2. This item includes securities registered by post-effective

amendment pursuant to rule 24e-2. Securities reported in Item 7 must have been registered prior to the fiscal year for which the notice is being filed and must remain unsold at the beginning of the fiscal year.

3. Item 8 refers to securities registered during the fiscal year *other than* pursuant to rule 24f-2. This item includes securities registered during the fiscal year by post-effective amendment pursuant to rule 24e-2.

4. Item 9 requires the issuer to report the total number and sale price of securities sold during the fiscal year. This item includes (i) sales of securities registered prior to the fiscal year, (ii) sales of securities registered during the fiscal year, and (iii) securities sold in reliance on registration under rule 24f-2. The issuer may also include shares issued in connection with dividend reinvestment plans ("DRIP shares"), unless the issuer separately reports DRIP shares in Item 11.

5. Securities sold to an unmanaged separate account that offers interests therein that are registered under the Securities Act and on which a registration fee has been or will be paid, may be excluded from the securities reported in Item 9. (*See* Investment Company Act Rel. No 21332 (Sep. 1, 1995).)

6. Item 10 requires the issuer to report the securities sold during the fiscal year in reliance upon registration under rule 24f-2.

7. Item 11 should be completed only if the issuer is using the netting provision of Item 12. In such cases, the issuer should report the number and dollar amount of securities not registered under the Securities Act that were issued during the fiscal year in connection with dividend reinvestment plans. The issuer is not required to complete Item 11 if DRIP shares are included in the securities reported in Item 9.

C. Computation of Registration Fees

1. Item 12 is a work sheet for calculating the filing fee due. Items 12 (i) and (ii) should be the same as the responses provided to Items 10 and 11, respectively.

2. The filing fee due shall be calculated in the manner specified in Section 6(b) of the Securities Act [15 U.S.C. 77f(b)]. Except as provided below, fees shall be based on the actual aggregate sale price, redemption price, or dollar amount at the date on which the securities were sold, redeemed, or issued. The $100 minimum fee prescribed by Section 6(b) does not apply to fees payable under rule 24f-2.

3. Lines (ii), (iii), (iv), and (v) of Item 12 (netting provision) apply only to issuers that file the form not later than 60 days after the close of the fiscal year during which securities were sold. In such cases, the filing fee shall be based upon the net aggregate price for which such securities were sold or issued during the issuer's previous fiscal year. Net aggregate price is the actual aggregate sale price, plus the value of shares issued in connection with dividend reinvestment plans, reduced by the difference between (1) the actual aggregate redemption or repurchase price of such securities of the issuer redeemed or repurchased by the issuer during the fiscal year, and (2) the actual aggregate redemption or purchase price of such redeemed or repurchased securities previously applied by the issuer pursuant to rule 24e-2(a) under the Act.

4. If the issuer excludes from the shares reported in Item 9 securities sold to unmanaged separate accounts pursuant to Instruction B.5, the issuer may not use shares redeemed or repurchased from those unmanaged separate accounts for purposes of determining the number of shares redeemed in Item 12.

5. If the issuer's total redemptions and repurchases during the fiscal year exceed the issuer's sales and amount of DRIP shares issued during the fiscal year, the issuer may report on line (iii) of Item 12 only the amount of redemptions equal to the amount of shares sold and issued during the fiscal year, as reported on lines (i) and (ii). The net aggregate price reported in line (v) of Item 12 cannot be less than zero.

6. The multiplier for calculation of the filing fee required by line (vi) of Item 12 is prescribed by Section 6(b) of the Securities Act. As of October 13, 1994, the multiplier was one twenty-ninth of one percent of the maximum aggregate offering price of the securities being registered. This multiplier is subject to change from time to time, without notice, by act of Congress through appropriations for the Commission or other laws. Issuers should determine the current fee rate prior to the time of filing by reference to Section 6(b) and any law or regulation affecting Section 6(b). Unless otherwise specified by act of Congress, the fee rate in effect at the time of filing applies to all securities sold during the fiscal year, regardless of whether the fee rate changed during the year.

7. The Commission currently calculates fees due under Section 6(b) by dividing the total amount of shares to be registered by 2900. Thus, the multiplier used in line (vi) of Item 12, under current law, should be 1/2900. Use of a decimal factor or some other method to calculate filing fees may result in payment of an incorrect amount. The Commission will not accept any filing that is accompanied by insufficient fees, and no part of the filing fee is refundable. Fees must be paid by United States postal money order, certified bank check, or cash. Issuers should refer to rule 0-8 under the Act [17 CFR 270.0-8] and rule 3a under the Commission's Rules of Informal and Other Procedures [17 CFR 202.3a] for instructions on payment of fees to the Commission. Electronic filers are subject to the fee payment requirements of rule 13(c) under Regulation S-T [17 CFR 232.13(c)].

D. Signature and Filing Form; Exhibit

1. The form shall be signed on behalf of the issuer by an authorized officer of the issuer. The issuer shall file five copies of the completed form, at least one of which has been manually signed, with the Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. In accordance with general rule 8b-11 under the Act [17 CFR 270.8b-11], duplicated or facsimile versions of manual signatures shall be considered manual signatures for the purposes of filings under the Act and the rules and regulations thereunder. Electronic filers are subject to rule 302 of Regulation S-T [17 CFR 232.302] regarding signatures on forms filed electronically.

2. This form must be accompanied by the appropriate filing fee and an opinion of counsel indicating whether the securities were legally issued, fully paid, and non-assessable. (*See* paragraph (b)(1) of rule 24f-2.) A copy of the opinion of counsel should be attached to each copy of the form filed with the Commission.

3. This form will be deemed filed with the Commission on the date on which it is actually received by the Commission. Except in the case of a Rule 24f-2 Notice filed by means of "direct transmission" (as such term is defined in rule 11 of Regulation S-T [17 CFR 232.11], this form shall be deemed to have been timely filed if the issuer establishes that it timely transmitted the form and required fees to a third party company or governmental entity providing delivery services in the ordinary course of business, which guaranteed delivery of the form to the Commission no later than the required filing date. Issuers relying on such third party delivery must retain a receipt or other writing from the third party evidencing timely receipt by the third party for filing with the Commission by the due date. The Commission will not accept for filing any form accompanied by insufficient payment for the filing fee. Forms accompanied by insufficient payment shall be returned to the issuer for proper payment and shall not be deemed filed until receipt by the Commission of proper payment.

BILLING CODE 8010-01-C

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 510, 520, and 558

New Animal Drugs; Change of Sponsor

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect a change of sponsor name from Premiere Agri Technologies, Inc., to ADM Animal Health & Nutrition Div., and a change of sponsor of several new animal drug applications (NADA's) from wholly-owned subsidiaries to ADM Animal Health & Nutrition Div.

EFFECTIVE DATE: September 11, 1995.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Center for Veterinary Medicine (HFV–130), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–1646.

SUPPLEMENTARY INFORMATION: ADM Animal Health & Nutrition Div., P.O. Box 2508, Fort Wayne, IN 46801–2508, has informed FDA of a change of sponsor name in approved NADA 91–582 (Tylosin) from Premiere Agri Technologies, Inc. ADM Animal Health & Nutrition Div., has also informed FDA that it has assumed sponsorship of the following NADA's previously owned by its subsidiaries:

NADA No.	Drug name	Former sponsor name and address
48–480a	Chlortetracycline	Feed Specialties Co., Inc., 1877 NE. 58th Ave., Des Moines, IA 50313.
65–256	Chlortetracycline hydrochloride	Do.
107–957	Tylosin and sulfamethazine	Do.
108–484	Tylosin and sulfamethazine	Do.
110–045	Tylosin	Good-Life, Division of Central Soya Co., Inc., Good-Life Dr., P.O. Box 687, Effingham, IL 62401.
110–439	Hygromycin B	Feed Specialties Co., Inc.
118–877	Pyrantel tartrate	Do.
128–411	Tylosin and sulfamethazine	Good-Life, Division of Central Soya Co., Inc.
131–956	Tylosin and sulfamethazine	MAC–PAGE, Inc., 1600 South Wilson Ave., Dunn, NC 28334.
132–448	Bambermycins	Feed Specialties Co., Inc.
133–490	Pyrantel tartrate	MAC–PAGE, Inc.
140–842	Hygromycin B	Do.

Accordingly, the agency is amending the regulations in 21 CFR 510.600(c)(1) and (c)(2) by removing Feed Specialties, Co., Inc., Good-Life, Division of Central Soya Co., and MAC–PAGE, Inc., because the firms are no longer the sponsors of any approved NADA's. The agency is also amending the drug labeler codes in 21 CFR 520.445b, 558.95, 558.274, 558.485, 558.625, and 558.630 providing for use of the above mentioned veterinary drug products. The sponsor labeler code of Premiere Agri Technologies, Inc., is being retained for the new sponsor.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 520

Animal drugs.

21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR parts 510, 520, and 558 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR part 510 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 503, 512, 701, 721 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 379e).

§ 510.600 [Amended]

2. Section 510.600 *Names, addresses, and drug labeler codes of sponsors of approved applications* is amended in the table in paragraph (c)(1) by removing the entry for "Premiere Agri Technologies, Inc.," and by alphabetically adding a new entry for "ADM Animal Health & Nutrition Div., by removing the entries for "Feed Specialties Co., Inc., Good-Life, Division of Central Soya Co., and MAC–PAGE, Inc."; and in the table in paragraph (c)(2) in the entry for "012286" by removing the sponsor name "Premiere Agri Technologies, Inc.," and adding in its place "ADM Animal Health & Nutrition Div.," and by removing the entries for "017274, 021810, and 047427".

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS

3. The authority citation of 21 CFR part 520 continues to read as follows:

Authority: Sec. 512 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b).

§ 520.445b [Amended]

4. Section 520.445b *Chlortetracycline powder (chlortetracycline hydrochloride or chlortetracycline bisulfate)* is amended in paragraphs (b) and (d)(4)(iii)(C) by removing "017274" and adding in its place "012286".

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

5. The authority citation for 21 CFR part 558 continues to read as follows:

Authority: Secs. 512, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b, 371).

§ 558.95 [Amended]

6. Section 558.95 *Bambermycins* is amended in paragraph (a)(4) by removing the entry for "017274" and numerically adding "012286".

§ 558.274 [Amended]

7. Section 558.274 *Hygromycin B* is amended in paragraph (a)(7) and in the table in paragraphs (c)(1)(i) and (c)(1)(ii) by removing the entry for "047427" and numerically adding "012286".

§ 558.485 [Amended]

8. Section 558.485 *Pyrantel tartrate* is amended in paragraph (a)(11) by removing "017274" and adding in its place "012286".

§ 558.625 [Amended]

9. Section 558.625 *Tylosin* is amended in paragraph (b)(52) by removing "021810" and adding in its place "012286".

§ 558.630 [Amended]

10. Section 558.630 *Tylosin and sulfamethazine* is amended in paragraphs (b)(3) and (b)(8) by removing "017274" and adding "012286" and in paragraph (b)(10) by removing "017274, 021810, and 047427" and numerically adding "012286".

Dated: August 31, 1995.

Robert C. Livingston,

Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine

RIN 1545–AK03

Capitalization of Interest; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correcting amendments.

SUMMARY: This document contains a correction to the final regulations [TD 8584] which were published in the **Federal Register** for Thursday, December 29, 1994 (59 FR 67187). The final regulations relate to the requirement to capitalize interest with respect to the production of property.

EFFECTIVE DATE: January 1, 1995.

FOR FURTHER INFORMATION CONTACT: Jan L. Skelton, (202) 622–4970 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections are under section 263A(f) of the Internal Revenue Code.

Need for Correction

As published, the final regulations contains an error that is misleading and in need of correction.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Accordingly, 26 CFR Part 1 is corrected by making the following correcting amendment:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for Part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. In § 1.263A–9(f)(3), paragraph (v) of *Example 3.*, the last sentence is revised as follows:

§ 1.263A–9 The avoided cost method.

* * * * *

(f) * * *

(3) * * *

Example 3. (i) * * *

(v) * * * For Unit B, this amount is \$775,000 ([\$0 + \$500,000 + \$1,000,000 + \$1,600,000]÷4).

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[T.D. ATF–366; RE: Notice No. 801]

RIN 1512–AA07

The St. Helena Viticultural Area (94F–015P)

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes a viticultural area in Napa County, California, to be known as "St. Helena." The petition was submitted by Mr. Charles A. Carpy, Chairman of the St. Helena Appellation Committee. The establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising will help consumers better identify the wines they may purchase, and will help winemakers distinguish their products from wines made in other areas.

EFFECTIVE DATE: October 11, 1995.

FOR FURTHER INFORMATION CONTACT: Mary Lou Blake, Wine, Beer and Spirits Regulations Branch, Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Avenue, NW, Washington, DC 20226 (202–927–8210).

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF–53 (43 FR 37672, 54624) revising regulations in 27 CFR Part 4. These regulations allow the establishment of definitive viticultural areas. The regulations allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements. On October 2, 1979, ATF published Treasury Decision ATF–60 (44 FR 56692) which added a new Part 9 to 27 CFR, for the listing of approved American viticultural areas.

Section 4.25a(e)(1), Title 27 CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features, the boundaries of which have been delineated in Subpart C of Part 9.

Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area. The petition should include:

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical features (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticultural area, based on the features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. map with the boundaries prominently marked.

Rulemaking Proceeding

Petition

On March 9, 1994, ATF received a petition from Mr. Charles A. Carpy, Chairman of the St. Helena Appellation Committee, proposing to establish a new viticultural area in Napa County. California, to be known as "St. Helena." The St. Helena Appellation Committee is composed of various vineyard and winery owners located throughout the St. Helena area. The proposed St. Helena viticultural area is located approximately 16 miles northwest of the city of Napa. It is located totally within the larger and previously established

Napa Valley viticultural area: The St. Helena viticultural area covers approximately 9,060 acres, and is densely planted to vines. There are over 30 wineries within the area. The petition provided sufficient information to show that the proposed area meets the regulatory requirements discussed previously. This information is shown beginning with the section entitled "Evidence That Viticultural Area Name Is Widely Known." Mr. Charles Sullivan, Napa Valley historian, provided the petitioner with most of the historical information concerning the St. Helena area that is covered in the petition whereas Dr. Deborah Elliott-Fisk of the University of California provided the petitioner with most of the information in the petition concerning soils, geology and physical geography of the St. Helena area.

Notice of Proposed Rulemaking

In response to Mr. Carpy's petition, ATF published a notice of proposed rulemaking, Notice No. 801, in the **Federal Register** on November 4, 1994 (59 FR 55226), proposing the establishment of the St. Helena viticultural area. The notice requested comments from all interested persons by February 2, 1995.

Comments to Notice of Proposed Rulemaking

Six comments were received in response to the notice of proposed rulemaking (Notice No. 801). Three commenters—Mr. W. Andrew Beckstoffer of Beckstoffer Vineyards, Mr. Richard E. Walton of Beaulieu Vineyard, and Mr. Thomas Leonardini of Whitehall Lane Winery—state that a certain portion of the proposed viticultural area should not, at this time, be included within the boundaries of the St. Helena viticultural area. The portion of the proposed St. Helena viticultural area which these three commenters want excluded starts at the intersection of Zinfandel Lane with Highway 29 on the southern boundary of the area, then in a westerly direction along Zinfandel Lane to where it intersects with the north fork of Bale Slough, then in a northwesterly direction along the north fork of Bale Slough to where it intersects with the southwesterly straight line projection of Inglewood Avenue, then in a southwesterly direction along the straight line projection of Inglewood Avenue to the 500 foot contour line on the western side of the area, then along the 500-foot contour line in a northwesterly direction to Sulphur Creek, then in a southeasterly and then a northeasterly direction along Sulphur Creek until it intersects with Highway 29, then in a southeasterly direction along Highway 29 until it intersects with Zinfandel Lane, the point of beginning.

These three commenters feel that there is simply not sufficient precise data or local agreement at this time to justify a choice for this area. They feel that within a relatively short time, say five years, the grapegrowers, winemakers and local residents will so clarify the wine characteristics and local reference for the wine consumer that the viticultural area designation of this area will become clear to all. At this future time, according to these three commenters, the area would either be added to the St. Helena or Rutherford viticultural area depending on what the evidence shows. All three feel that the evidence at that time will show that this area most closely resembles the Rutherford viticultural area.

Mr. Beckstoffer states that as part of the Rutherford viticultural area process, he submitted detailed data regarding the geological features, elevation, soils, rainfall, and geology of this area. Mr. Beckstoffer indicates that he wants this previous data to be included in his petition requesting that this area not be included in any viticultural area until some future time when more information is available.

Mr. Beckstoffer states that prior testimony at the Rutherford viticultural area hearing shows that there are no significant differences in rainfall, elevation or soils in this area from that to the north, St. Helena, or to the south, Rutherford. Mr. Beckstoffer indicates that there was significant controversy, however, regarding the underlying geology of this area and the area to the north and south. Mr. Beckstoffer states that the geological features upon which a delimited grape growing area is defined as a viticultural area do not support the inclusion of this area in either St. Helena or Rutherford to the exclusion of the other. Consequently, Mr. Beckstoffer feels that the features of this area could presently support inclusion in either Rutherford or St. Helena.

Mr. Beckstoffer also states that this area should not be considered a part of the proposed St. Helena viticultural area just because a certain portion of the area in question is within the municipal limits of the city of St. Helena. Mr. Beckstoffer indicates that it is his understanding that the approved Spring Mountain and Howell Mountain viticultural areas include areas within the city of St. Helena. In addition, the proposed St. Helena viticultural area includes areas both within and outside the city of St. Helena. Furthermore, according to Mr. Beckstoffer, the municipal boundaries of the city of St. Helena have recently been amended and will undoubtedly be amended again in the future. Consequently, Mr. Beckstoffer states that the area in question should not be included or excluded from a viticultural area based on whether a portion of the area is located within the municipal limits of the city of St. Helena.

In summary, Mr. Beckstoffer states that the area in question is a very important grapegrowing area of the Napa Valley claimed for both the Rutherford and St. Helena areas. He further states that the geological features, history and local designation of this area are not precise enough at this time to define the area as part of Rutherford or St. Helena. However, Mr. Beckstoffer feels that with sufficient time, the factors identifying this area in question will be sufficient to justify the inclusion of the area in either Rutherford or St. Helena. Mr. Beckstoffer feels that the current consumer awareness and wine characteristics of grapes produced from this area seem to indicate that the area should be included in Rutherford but that additional time should help determine with greater clarity exactly what viticultural area this area in question belongs in. At some future time, according to Mr. Beckstoffer, this area could be assigned to either Rutherford or St. Helena with much more clarity, precision and general acceptance.

Another commenter—Mr. William A. Hayne—states that he has a vineyard in the area in question and that he does not agree with the proposal to exclude this area from the proposed St. Helena viticultural area. Mr. Hayne further states that viticultural areas in the Napa Valley seem to be destined to be divided up more or less by post office regions and that he wishes to be included in the St. Helena viticultural area as is presently provided for in the notice of proposed rulemaking.

Another commenter—Mr. Richard W. Forman of Forman Vineyard—states that he is very close to the eastern boundary of the proposed St. Helena viticultural area and feels that Forman Vineyard should be included within the St. Helena area. In fact, Mr. Forman states that his winery and vineyard are located within the city limits of St. Helena. He further states his property is located on the lower toe slopes of the eastern Howell Mountain range and as such, has an exposure which looks across the Silverado Trail near Meadowood Lane and into the center of St. Helena. Mr.

Forman indicates that his vineyard, originally established on what was called the Stonebridge property, is clearly more closely associated with its near valley floor neighbors physically, climatologically and geologically, than the further removed and proposed fans of Pratt Valley, Deer Park and Spring Valley. He further indicates that he agrees with Mr. Sullivan's statement in the St. Helena petition that it is difficult to differentiate exactly, on a historical basis, between the 400–600 foot contour on the eastern slopes of the proposed St. Helena viticultural area.

Mr. Forman states that Mr. Sullivan indicates in the petition that the actual Howell Mountain influence of differing climatology does not come into effect until one reaches well above the 600 foot elevation. Mr. Forman states that his vineyard property does not extend beyond the 600-foot contour line and therefore has a very similar climate to the valley floor. And finally, Mr. Forman states that, on a geological basis, his soils closely resemble the soils found in the Phelps Home Ranch 3 Corral III vineyard, noted in petition exhibit No. 30 and located in Spring Valley, which is within the proposed boundaries of the St. Helena viticultural area. Mr. Forman states that this close similarity between soils should establish that his vineyard soils are consistent with other St. Helena district soils and therefore his vineyard property should be included as part of the St. Helena viticultural area.

Mr. Forman indicates that the United States Department of Agriculture (USDA) soil map identifies his vineyard property's soil as a Butte Stony Loam and mentions that it is widely found along the lower eastern toe slopes between Deer Park and Rutherford Cross Roads, again suggesting that this would indeed conform as a characteristic soil type of the area. Mr. Forman states that the climate surrounding his property is quite like that found above the Silverado Trail from Howell Mountain Road to Deer Park Road, particularly in so far as his property is situated within one-fourth mile of the Silverado Trail and has an exposure and elevation only moderately different than these adjacent valley floor locations.

In summary, Mr. Forman states that because of his location within the city limits of St. Helena, because of his exposure and proximity to the valley floor, and because of his vineyard's geology, he feels that his property should be included within the St. Helena viticultural area.

The last commenter, Mr. Chuck Carpy, Chairman of the St. Helena Appellation Committee, states that his comment is in response to the two proposed boundary amendments which were submitted. In response to Mr. Forman's proposal to extend the boundary of the St. Helena viticultural area to include his vineyard property, Mr. Carpy states that the St. Helena Appellation Committee does not have any objection to this proposal. Mr. Carpy states that Mr. Forman's vineyard is located within the city limits of St. Helena and, to the best of his knowledge, is split by the proposed 400 foot contour line. Mr. Carpy indicates that the petitioners have reviewed Mr. Forman's data and find the soil types and geology to be consistent with those of the other toe-slopes of the Vaca (or Silverado) Range in the immediate vicinity. Mr. Carpy states that he has received information from Mr. Forman that indicates that Mr. Forman's vineyard property contains large deposits of old, uplifted Napa Riverbed materials, which suggests that the Napa River channel ran through the area historically. In this sense, according to Mr. Carpy, the area proposed for inclusion by Mr. Forman appears to be similar to the area on the eastern toe-slopes of Oakville, which were added to that viticultural area in the final rule establishing the Oakville viticultural area.

In addition, Mr. Carpy states that the petitioners have no objection with the inclusion of Mr. Forman's property in the St. Helena viticultural area since the proposed boundary expansion is small and the current boundary works a hardship on Mr. Forman because his vineyards are split.

In regard to Mr. Beckstoffer's proposed boundary amendment, Mr. Carpy states that the petitioners are opposed to any further change in the boundaries of the proposed St. Helena viticultural area. Mr. Carpy states that the present rulemaking concerns the St. Helena viticultural area and should not be used as an indirect method of appealing ATF's final rule on the Rutherford viticultural area. Mr. Carpy points out that there was no appeal to U.S. District Court of the Bureau's decision to exclude from Rutherford the area north of Zinfandel Lane, west of Highway 29, and south of Sulphur Creek (the area in question). Mr. Carpy states that it is clear from Mr. Beckstoffer's comment that Mr. Beckstoffer did not agree with the decision made regarding the establishment of the boundaries of the Rutherford viticultural area and consequently is trying to delay action on the area in question in hopes of eventually getting this area included within the Rutherford viticultural area.

Mr. Carpy states that ATF made its decision on the Rutherford viticultural area in July of 1993. He states that the argument that this decision should be revisited in the future provides no legitimate basis for opposing the St. Helena viticultural area petition. Mr. Carpy states that under the applicable regulations, ATF is bound to decide whether there is sufficient evidence to establish the St. Helena viticultural area as proposed by the petitioners. Mr. Carpy observes that Mr. Beckstoffer concedes such evidence exists when he states, "The geological features upon which a delimited grape growing area are defined as a viticultural area * * * could support inclusion [of the area in question] in either [the Rutherford or the St. Helena Viticultural] Area."

On behalf of the petitioners, Mr. Carpy states that all the requirements for the establishment of the St. Helena viticultural area have been met in the case of the area in question. Specifically, the name identification requirement has been met not only by the fact that a portion of the area is within city limits of St. Helena but also by numerous citations in the modern wine press, by historical documents pertaining to the so-called St. Helena District of the late 1800s and by local name recognition. According to Mr. Carpy, it is inconceivable to the petitioners that the properties of George Crane, who is widely acknowledged as one of the founding fathers of St. Helena (Crane Park in the city of St. Helena honors him), and John Lewelling, who also was prominently identified with St. Helena, could be considered as part of the Rutherford viticultural area. Mr. Carpy states that the petitioners have met their burden of proof. Mr. Carpy then quotes from ATF's final rule on the Rutherford viticultural area with respect to the area in question:

> Proponents of a northern boundary for Rutherford that is further north than Zinfandel Lane did not submit any evidence that this area between Zinfandel Lane and Sulphur Creek has ever been known, either currently or historically, as Rutherford. The Rutherford and Oakville Appellation Committee, on the other hand, submitted numerous maps and other name evidence which tends to show that this area has always been considered to be part of the greater St. Helena area.

Later in the final rule establishing the Rutherford viticultural area, it was stated that "Most current and historical maps, as well as other name evidence, suggest that Zinfandel Lane is the most appropriate dividing line between Rutherford and St. Helena." Mr. Carpy indicates that to reject Zinfandel Lane as the most appropriate dividing line between Rutherford and St. Helena would belie history and mislead consumers.

Mr. Carpy requests that all testimony and documentation from the Rutherford proceeding which pertain to the area in question be included in the record of the present rulemaking.

Mr. Carpy states that with regard to the required geographic evidence, the petitioners have placed the entire Sulphur Creek alluvial fan in the St. Helena viticultural area. The petitioners' expert geographer and soil scientist, Deborah Elliott-Fisk, describes that fan in the reporter's transcript of the public hearing on Rutherford, on page 48, as the drainage basin of Sulphur Canyon and Heath Canyon, including Spring Mountain, which "extends through the town of St. Helena at least up to the vicinity of where the Beringer Winery is today."

Mr. Carpy states that the area in question splits the Sulphur Creek alluvial fan at Highway 29 (on an east-west axis) and at Sulphur Creek (north-south), thereby including in the St. Helena appellation only a portion of this geomorphic unit. Mr. Carpy indicates that anything less than such artificial bisection of the Sulphur Creek alluvial fan would place historical St. Helena wineries like Louis Martini and Beringer Vineyards in the Rutherford viticultural area. Mr. Carpy states that there is no explanation or evidence of how or why the area in question is viticulturally distinct from the area east of Highway 29 or from any other portion of St. Helena.

Mr. Carpy indicates that both before and during the Rutherford viticultural area proceeding, Ms. Elliott-Fisk conducted extensive field research throughout the Napa Valley, including the area in question. Ms. Elliott-Fisk concluded in her comments on the Rutherford viticultural area that "the Sulphur Canyon Fan should be left for a future St. Helena viticultural area, as it has rocky soils (with a higher percentage of boulders and large cobbles) and is dominated by rhyolite and other volcanic lithologies with a soil matrix of fine sands and secondary clays, providing for moderate to moderately high vine vigor under slightly warmer climates and increased precipitation than in the Rutherford region." Mr. Carpy states that the petitioners now seek to follow through on ATF's decision in the Rutherford proceeding by placing the entire Sulphur Creek alluvial fan in the St. Helena viticultural area.

ATF Boundary Decisions

After thoroughly reviewing all the comments submitted in response to the notice of proposed rulemaking (Notice No. 801) on the St. Helena viticultural area, ATF has made the following decisions concerning the two requests for boundary changes:

1. *Forman Proposal.* ATF agrees that the Forman vineyard property is split by the boundaries proposed in Notice No. 801 and that the property is located within the city limits of St. Helena. In addition, both Mr. Forman and the petitioners agree that the soil types and geology of this vineyard property are consistent with those of other areas located within the proposed St. Helena viticultural area. For these reasons, ATF has determined that the Forman vineyard property should be included within the boundaries of the St. Helena viticultural area. Consequently, Mr. Forman's proposed boundary change is being adopted in the descriptive section of this final rule.

2. *Beckstoffer Proposal.* ATF believes that the St. Helena petitioners have provided adequate historical, name, and geological evidence to include the area in question in the St. Helena viticultural area. As part of the Rutherford viticultural area process, ATF reviewed all the evidence presented during the comment period and the public hearing to determine the best boundaries for the Rutherford viticultural area. As a result of that review, it was determined that the best dividing line between Rutherford and St. Helena, for viticultural purposes, was Zinfandel Lane. Mr. Beckstoffer has not presented any new evidence which would lead us to the conclusion that the area in question should be part of the Rutherford viticultural area. To the contrary, all historical and name evidence which we have reviewed suggests that this area should be considered as part of the St. Helena area. In addition, the northern boundary of the Rutherford viticultural area was largely determined on the basis of where the southern edge of the Sulphur Canyon Fan approximately ends. Since it was determined that the Sulphur Canyon Fan ends somewhere just south of Zinfandel Lane, it was decided that the northern boundary of the Rutherford viticultural should be Zinfandel Lane. Therefore, since the Sulphur Canyon Fan includes the area north of Zinfandel Lane on both the east and west sides of Highway 29, we have determined that the area in question should be included within the St. Helena viticultural area.

In addition, we see no benefit to delaying a decision on this area for 5 years or more. While it is possible that such a delay could produce some evidence that certain wine characteristics and local reference for the wine consumer might point toward a Rutherford designation for some wines from this area, it would appear that such evidence would at most be limited and subject to dispute. In addition, there is no current evidence available which would be a basis for rejecting the petitioners' current southern boundary proposal. Since the petitioners have provided adequate evidence for their boundary proposal and since no new evidence has been submitted which would cause us to find otherwise, we have decided to adopt the petitioners' boundary proposal as specified in Notice No. 801 along with Mr. Forman's proposed boundary change.

Evidence That Viticultural Area Name Is Widely Known

Data prepared by Mr. Charles Sullivan for the petitioners provides the following historical information.

The town of St. Helena was founded by Henry Still, who bought land from the Edward Bale family in 1855. By 1858 there was a school house and a little Baptist church. Four years later Professor William Brewer of the Whitney party called it a "pretty little village with fifty or more houses . . . nestled among grand old oaks." Early winemakers in the St. Helena area included Charles Krug and George Belden Crane. At the end of the 1879 vintage the *San Francisco Post* ran an article on northern California wines which noted the flavor characteristics of Napa clarets. This article was copied by the *St. Helena Star* which predicted that there would be 2,000 acres of grapes planted in the Napa Valley in 1880. According to Mr. Sullivan, the final total was closer to 3,000, and concentrated in the St. Helena area.

As early as 1869, San Francisco's *Alta California* was making reference to a "St. Helena district," as did the *Pacific Rural Press.* These were references to vineyard plantings in the area. In 1872 the *Napa Reporter* made reference to the boom in vineyard land around St. Helena. The *Alta California* ran an article on the area in 1878, treating St. Helena as a specific district with a great reputation. By then Charles Krug, the Beringers, Crane, John Lewelling, H. A. Pellet, and 14 other producers had built cellars in the St. Helena area.

In 1875 Krug and Pellet organized the producers and growers in the district, a move that culminated in the formation of the St. Helena Viticultural Club on January 22, 1876. According to Mr. Sullivan, others outside the district could join, but it was a local St. Helena organization. In 1880 the Club constructed Vintners Hall, a two story building with a reading room, meeting rooms, and a social hall upstairs.

Mr. Sullivan states that by the end of the 1870s there was no question concerning Napa's special reputation as a winegrowing region, or about St. Helena's as a discrete district in that region. As support for this statement, Mr. Sullivan cites the *Alta California* which concluded in an article published in 1880 that "Napa is now the leading wine-growing county of California, and * * * St. Helena has become the center of the most prosperous wine district in the State."

According to Mr. Sullivan, by the turn of the century Napa prices were still higher than those of other districts, but the special position accorded St. Helena wines had ceased to exist. The popular image of the wines of Oakville, Rutherford, Larkmead, and Howell Mountain had ended the perception of St. Helena wines standing above all others. After Prohibition, the regional association of the leading Napa Valley producers was far from foremost in consumers' minds and in the minds of wine writers according to Mr. Sullivan. However, Mr. Sullivan states that more recently there has been a tendency for wine writers to make reference to the St. Helena "district" and to its wines, particularly to its Cabernet Sauvignons.

In addition to the historical name information mentioned above, the "St. Helena" name appears on a U.S.G.S. 7.5 minute series map entitled "St. Helena Quadrangle" which includes the city of St. Helena and much of its surrounding area.

Evidence of Boundaries

According to the petition, there have never been precise historic boundaries for the St. Helena viticultural district. However, the petitioners state that history does provide an imprecise "St. Helena District" within the geographic structure of State winegrowing established by the first Board of State Viticultural Commissioners in the 1880s. According to the petition, the State was divided into districts, one being Napa, which included Napa, Solano, and Contra Costa Counties. Charles Krug was the first commissioner for the district in 1880. Napa County was then divided into administrative districts: Napa (City), Yountville, St. Helena, and Calistoga. These were not considered viticultural districts at the time. The St. Helena District included the vineyards of Howell Mountain, most of Rutherford, and Larkmead. This is discussed in E.C. Priber's report to the Board in 1893. Even Chiles and Conn Valleys were included in the St. Helena District, although Priber gave separate statistics for these areas.

Although the wineries and vineyardists in the Priber report are listed in administrative districts, Priber's man in the field, A. Warren Robinson, asked each where his or her operation was located, and the answer was given as a place, not necessarily a post office. Bernard Ehlers said he lived at Lodi Station. Mrs. Lillie Coit listed Larkmead. According to the petitioner, such data make it possible to make an attempt to draw historically accurate lines.

A more accurate listing of viticultural districts was given by Charles Krug in his report of 1887. He traces the development of each district in Napa County since 1881, by acreage, production, and type of grape vines. Krug listed Yountville, Oakville, Rutherford, St. Helena, Spring Mountain, Howell Mountain, Calistoga and five others. Although he did not include a map, the precision of his statistics indicates that he and others had the limits of these districts in mind.

From the information discussed above, the petitioner has tried to plot the northern and southern boundaries of the St. Helena viticultural area. From a historical point of view, the petitioner states that any one of three landmarks could be used as the northern boundary of the St. Helena viticultural area. These landmarks include Ritchie Creek, Bale Lane, and Big Tree Road. However, from a practical, as well as historical point of view, Bale Lane is the best choice.

The southern boundary of the St. Helena viticultural area was discussed at length during the December 9, 1992, ATF public hearing held in Napa, California, concerning the northern boundary of the Rutherford viticultural area. From the information submitted at that hearing, it was determined that Zinfandel Avenue, known locally as Zinfandel Lane, was the best northern boundary for the Rutherford viticultural area. Consequently, Zinfandel Avenue (Zinfandel Lane) is appropriate as the southern boundary of the adjacent St. Helena viticultural area.

The southeast boundary of the St. Helena appellation includes the Spring Valley area since this area was included in the St. Helena area on the 1895 "Official Map of the County of Napa." On this map, the properties of George Mee and Antonio Rossi (Spring Valley) were listed as being in the St. Helena district whereas Charles Scheggia, just to the south, listed himself as being in Rutherford.

According to the petitioner, the western boundary of the St. Helena viticultural area is not strictly delineated by historical custom. The petitioner states that this western boundary should be dictated by the eastern boundary of the adjacent Spring Mountain District viticultural area which utilizes the 400-foot contour line. The petitioner states that although some people might draw the western boundary of the St. Helena viticultural area at the 500 or 600-foot contour line, the 400-foot contour line defies no historical precedent and prevents the overlapping of the St. Helena viticultural area with the Spring Mountain District viticultural area.

In regard to the eastern boundary, historical records indicate that Conn Valley is a separate area and should not be included in the St. Helena viticultural area. These records indicate, however, that Pratt Valley is clearly part of the St. Helena area from the location of the Pratt and Chabot wine growing properties. In addition, the Crystal Springs Road area and Dago Valley should be included, due more to recent developments there rather than earlier history. However, the petitioner states that the old Rossini property, where the historic Burgess-Souverain Winery is located today, and the Leunenberger property, where the original Sutter Home-Ballantine Winery was located (today Deer Park Winery), should not be included because they are located on the lower slopes of Howell Mountain rather than in the St. Helena area.

The petitioner uses mostly the 400-foot contour line and a short portion of Howell Mountain Road and a longer portion of Conn Valley Road to delineate the eastern boundary of the proposed St. Helena viticultural area.

Geographical Features

Data prepared by Dr. Elliott-Fisk in support of the petition provides the following geographical information.

Climate. The proposed St. Helena viticultural area lies within a relatively narrow and constricted portion of the upper Napa Valley proper. There exists a subtle interaction of climatic factors which affect grapes grown in this valley floor area. These subtle climatic influences are part of a continuum across the entire floor of the Napa Valley.

The Napa Valley proper is classified as a coastal valley. Along the valley floor from Napa to Calistoga, there are pronounced mesoclimatic variations which relate to the penetration of marine influences from San Pablo Bay and, to a lesser extent, to the rise in elevation as one proceeds up Napa

Valley. This marine air incursion is caused by warming of the valley floor and surrounding hillsides during the daylight hours of the growing season. This warming land mass causes the air in the area to rise, creating pressure gradients which draw in marine air off of San Pablo Bay to the south. During the growing season, this phenomenon generally begins in the early afternoon and continues into the evening. Due to proximity to the bay, the areas in the southern portion of the valley receive the most direct impact of these pressure gradient winds. These winds have a cooling effect throughout the Napa Valley.

During the grape growing season, this cooling plays an important role in the development of the grapes by allowing them to better retain their natural acidity which is critical in the production of high quality wines, according to Dr. Elliott-Fisk. In the St. Helena viticultural area, this cooling effect is moderated compared to the areas further south. However, while the St. Helena area has relatively warm conditions, it is the daily maximum extremes, for which the area to the north (Calistoga) is better known, that distinguish the St. Helena and Calistoga areas.

Dr. Elliott-Fisk indicates that traditionally, the dividing line between the area of Calistoga's higher daily extremes and St. Helena's warm coastal climate has been the section of land around Bale Lane. It is at this point that the Napa Valley and Napa River take a pronounced directional change of course from north/northwesterly to more westerly. To the north of Bale Lane, the exposure of the valley floor to the sun also is more directly aligned than to the south where there is more shading.

The area to the north of the St. Helena viticultural area, particularly around the city of Calistoga, is also affected by a secondary marine air incursion, far less dramatic than that off of San Pablo Bay, which penetrates the upper Napa Valley through the Knights Valley area. This marine influence, according to Dr. Elliott-Fisk, does not typically penetrate as far south as the St. Helena viticultural area. When present, these moist, cooling winds serve to moderate the generally hotter temperatures in Calistoga, making this area ideal for growing premium wine grapes.

Dr. Elliott-Fisk also finds that there are significant climatic differences between the St. Helena viticultural area and the surrounding mountains. To the east of St. Helena lies Howell Mountain and to the west is Spring Mountain. These mountain areas range in elevation from 400 to 2,600 feet for Spring Mountain and from 1,400 to 2,400 feet for Howell Mountain. On average, temperatures fall along the valley floor approximately 2.8 degrees Fahrenheit for each 1,000 foot fall in elevation.

The mountain areas with south or southwest slopes, such as those generally found in the Howell Mountain viticultural area, receive approximately 20 percent more solar radiation during the growing season compared to the valley floor. Northeast and northwest slopes, such as those that typically occur in the Spring Mountain District viticultural area, receive approximately 20 percent less solar radiation than those found on the valley floor in the St. Helena viticultural area. In addition to these differences related to aspect, the relative absence of fog in the higher altitudes increases the solar radiation there compared to the valley floor which often is covered by early morning fog.

According to Dr. Elliott-Fisk, precipitation has been more important in the formation of topography and soils in the Napa Valley than in the definition of distinct climate zones. Outside of annual physiological water needs which are almost exclusively augmented by irrigation, precipitation directly affects grape vines during late spring and early fall, which are the critical periods of the growing and harvest seasons. Cooler areas, those generally found to the south of the St. Helena appellation, are more negatively affected by such conditions.

Soils, Geology and Physical Geography

The St. Helena viticultural area is in the northern Napa Valley and is defined by Dr. Elliott-Fisk as the valley floor area and lower mountain slopes (i.e., toe-slopes) from Zinfandel Lane in the south to Bale Lane in the north.

According to Dr. Elliott-Fisk, the geology of the St. Helena area is characterized by steep mountain fronts composed of the (1) Franciscan Formation (largely sandstones, mudstones and various metamorphic inclusions) overlain by the moderate thicknesses of Sonoma Volcanics on the west side in the Mayacamas Range, and (2) deep flows of Sonoma Volcanics, volcanic vents, and volcanic domes over Great Valley sandstones on the east side in the Vaca Range. Both mountain slopes have been faulted and heavily eroded, with much of this activity believed to be synonymous with the formation of the Sonoma Volcanics in the last 2–5 million years.

Dr. Elliott-Fisk further states that the topography of the Napa Valley floor is largely the product of (1) the marine incursion of San Pablo Bay, and consequent marine erosion and deposit, (2) tectonic uplift and land displacement along faults and fold structures (e.g., anticlines), (3) bedrock resistance to erosion, (4) slope stability, and (5) discharge volumes of the Napa River and its tributaries. The St. Helena viticultural area, extending from Bale Lane on the north to Zinfandel Lane on the south, has a fairly uniform, steep gradient (as compared to the entire Napa Valley floor), indicating that it is a zone of erosion of a former more powerful Napa River. The valley in this area is narrow and is almost entirely the product of river erosion, unlike any other stretch of the valley floor. The one break in gradient occurs where the river turns southward near Big Tree Road (just south of Bale Lane) and exerts more force to cut through bedrock. Thus, although alluvial fans extend across the valley floor from their tributary canyons to the Napa River, the fans are small and relatively young compared to the rest of Napa Valley. Sulphur Creek fan is the largest of the group, as it issues from a very large drainage basin. Fans of the eastern side of the proposed appellation are very small, largely due to the resistance of obsidian (i.e., volcanic glass) bedrock here and small tributary basin size.

The topographic uniformity of the St. Helena viticultural area is further substantiated by climatological data and bioclimatic maps. Growing degree-days (i.e., temperature regime), according to Dr. Elliott-Fisk, are very uniform along this stretch of the valley floor and lower slopes, averaging just under 3600 degree-days. Mean annual precipitation is 35–38 inches. Just north of the northern boundary of the St. Helena viticultural area (e.g., around Dunaweal Lane), the vegetation changes from Valley Oak Savanna to Mixed Hardwood Woodland. These gradients of climate and vegetation from south to north up Napa Valley, according to Dr. Elliott-Fisk, further support the designation of viticultural areas, as climate is an important factor influencing vine growth and fruit characteristics, with natural vegetation telling the viticulturalist what vine production will be like.

Soils and Geomorphology of the Napa Valley

Dr. Elliott-Fisk states that soils can be consistently identified and mapped in Napa Valley through knowledge of the geomorphology (i.e., landforms and landform history) of the area. These soil differences are relevant viticulturally and can be used in the delimitation of viticultural areas. This soil and geomorphic mapping, which is based on very detailed field and laboratory studies, produces soil units that are similar to those shown in the Napa County Soil Survey (USDA-Soil Conservation Survey), but with more detail, precision, and most importantly, a different classification scheme, according to the petitioner. The resolution of the mapping of Napa Valley's soils has increased from the 1938 survey (and the old Marbut soil classification scheme) to the newer 1977 survey (using the new 7th Approximation system of soil classification) to a more detailed depiction of Napa Valley's soils based on an increased understanding of (1) the geomorphological history of the Napa Valley, and (2) the importance of soil parent material and time as soil-forming factors. There are many more soil types (or potential soil series) in Napa County than the Napa County Soil Survey depicts according to the petitioner.

Dr. Elliott-Fisk further notes that a geomorphic (landscape) surface of a given age will have soils of the same type across it. This is because soil formation is controlled by five factors (known as the soil-forming factors): climate, biota (plants and animals), parent material, relief (topography) and time. The petitioner states that much of the variation of soil types in Napa County is due to variation in the parent material and time factors. Different soil types will be derived from sedimentary bedrock versus volcanic bedrock, whether or not these soils are upland residual soils (with weathering and soil formation in place or *in situ*) or transportation/depositional soils (with soil formation beginning once river or other sediments are deposited). Alluvial soils of different ages (old versus young) will also differ significantly.

On any particular geomorphic surface (such as the Sulphur Creek fan), the parent material, relief and time factors are held constant, with the soils very similar (if not identical) across this surface. For depositional landforms (e.g., mudflow lobes, river terraces, alluvial fan units, etc.), the older deposits will have more strongly formed soils. If a geomorphic surface is disturbed by erosion or deposition, its soil will be altered (if not destroyed), with a new soil then forming.

In Napa Valley, according to Dr. Elliott-Fisk, distinct differences are seen between hillside soils and valley floor soils, at least in most situations. Hillside soils tend to be formed from bedrock and are shallow, whereas valley floor soils tend to be formed from alluvium, colluvium or bay deposits and are often deep. As Napa Valley has been tectonically active, however, these deeper, depositional soils are occasionally found up on the hillsides, uplifted above the valley floor. It is important to separate these depositional hillside soils from residual bedrock soils. They have much higher water-holding capacities and deeper rooting depths, influencing vine growth significantly.

Dr. Elliott-Fisk further indicates that the floor of Napa Valley (excluding the bedrock "islands" which form small hills) has soils formed on (1) alluvial fans of various lithologies, textures, and sizes emerging from tributary watersheds towards the Napa River, (2) alluvial floodplains of various ages along the Napa River and the lower reaches of its tributaries (such as Sulphur Creek), and (3) bay deposits of various types, formed when San Pablo Bay extended into the valley proper. The alluvial fans in particular show marked contrasts in soil types north-south and east-west in the valley as a function of their (1) watershed or drainage basin geology and (2) stream gradient (i.e., topography). Dr. Elliott-Fisk concludes that the soils scientist then expects to find one soil series on fans derived from sedimentary bedrock and another on fans derived from volcanic bedrock.

Geomorphic Units of the St. Helena Viticultural Area

The valley floor of the St. Helena viticultural area is covered by a series of small fans and contains important areas of Napa River floodplain. Dr. Elliott-Fisk has described the geomorphic units as follows:

North to South on West Side of Valley:

(1) Ritchie Creek Fan (the southern edge of it extending south of Bale Lane into the viticultural area); principally in the area north of St. Helena;

(2) Mill Creek Fan;

(3) Hirsch Creek Fan;

(4) York Creek Fan;

(5) Sulphur Creek Fan; and

(6) Bear Canyon Fan Complex (in approved Rutherford viticultural area).

North to South on East Side of Valley:

(1) Simmons Canyon Fan (north of the St. Helena viticultural area);

(2) Dutch Henry and Biter Creek Fan Complex (north of the St. Helena viticultural area, reaching almost to Bale Lane);

(3) Unnamed Fan west of Bell Canyon Reservoir and Crystal Springs Road;

(4) Base of Pratt Valley (very small fan);

(5) Base of Deer Park (unnamed tributary; small fan);

(6) Base of Spring Valley (very small fan; mostly within Spring Valley); and

(7) Conn Creek Fan Complex (in approved Rutherford viticultural area).

Napa River Floodplain and River Terraces:

(1) Current incised channel of the Napa River;

(2) Current floodplain of the Napa River; and

(3) Older floodplains of the Napa River at higher elevations.

[These landforms follow the channel of the Napa River, except for older terraces along the hillsides, which are largely obscured by dense hillside woodland and forest; these terraces are discovered through intensive field studies.]

Dr. Elliott-Fisk notes that the geomorphic depositional units (i.e., landforms) in the St. Helena viticultural area are composed almost exclusively of volcanic lithologies (around 85–90 percent volcanics typically, occasionally dropping to 70 percent on parts of the Sulphur Creek fan, with the remainder sedimentary and metamorphic inclusions from the bedrock underlying the Sonoma Volcanics). The upper part of the Sulphur Creek Basin contains small units of sandstone and metamorphic lithologies exposed at the surface through faulting and slope failure. Despite this, volcanic rhyolitic tuff, rhyolite, dacite and andesite are by far the dominant surficial geologies, compared to the Bear Canyon Fan Complex to the south which is 30 percent or less volcanics and the remainder sedimentary.

Dr. Elliott-Fisk further observes that although several types of volcanic rocks compose the St. Helena hillside, the most widespread (and as such, ubiquitous) units are volcanic ash-flows, referred to as tuffs, with occasional volcanic mudflows. The matrix is rhyolitic in composition, with incorporated clasts of obsidian, rhyolite, andesite, dacite and tuff. Occasional metamorphic clasts of cobble or smaller size are seen. This geologic parent material is slightly acidic to acidic, with water-holding capacity of tuffaceous bedrock units moderate. This potential soil parent material is brought down both slopes to the west and east of the valley floor by hillside erosion, runoff, and tributary streamflow.

According to Dr. Elliott-Fisk, the Napa River has incised through these fan deposits discharging on the valley floor and migrated as a consequence of the resistance of these deposits versus its own stream power. The Napa River floodplain, and its associated recent terraces, varies in width throughout this section of Napa Valley but has formed important terraces along the eastern valley edge. Distinct breaks in the natural vegetation are seen at the terrace/alluvial fan transition, as the terraces have more fertile soils with a greater water-holding capacity. As the width of the valley floor in the St. Helena area is on the average less (e.g., more narrow) than anywhere else in the

Napa Valley, these terraces form less viticultural acreage than in the southern or middle sections of Napa Valley.

The lower hillside slopes below the 400-foot elevation are difficult to map on a broad scale depicting geomorphic surfaces. This is largely a function of abrupt changes in slope angle and vegetation type, which influence long-term slope stability. Small areas of uplifted depositional surfaces (alluvial fans and stream floodplain terraces) were found across these lower slopes in the St. Helena area, however.

Soils of the St. Helena Viticultural Area

With regard to the soils within the St. Helena viticultural area, Dr. Elliott-Fisk states that the Sonoma Volcanics rim all sides of the valley in the St. Helena area, and as such the depositional valley floor soils (which may be very bouldery deposits across alluvial fans or finer, but still gravelly deposits along the Napa River proper, all principally Xerolls) are volcanic in origin, and deep, very gravelly sandy loams to sandy clay loams to clay loams, with low to moderate water holding capacities. Sediments have been transported relatively short distances from their origins, as this is the headwater area of the Napa River system, and as such the soils contain a higher percentage of coarse clasts (especially boulders), with sand dominating the fine fraction of almost every soil. Dr. Elliott-Fisk notes that small sections of the upper stream basins of Sulphur Canyon and the Spring Mountain region contain the massive Franciscan marine sandstone and conglomerate, with its affiliated volcanic and metamorphic inclusions. The lithology of the fine clasts that compose the alluvial fans in this immediate region (i.e., Sulphur Creek fan) include a higher portion of non-volcanic clasts (up to 15 percent, to occasionally 30 percent) than alluvial fans to the north, such as the Ritchie Creek fan below Diamond Mountain, located largely north of the northern St. Helena viticultural area boundary. However, the percentage of non-volcanic clasts is much higher to the south of the St. Helena viticultural area (i.e., Bear Canyon fan). The lower toe-slopes of the mountain slopes in the St. Helena area (below the 400-foot elevation) contain both Xerolls and Xeralfs, depending on slope stability and age.

Dr. Elliott-Fisk states that she has excavated an additional 17 soil trenches in the process of her scientific investigation in this area. She states that she has done previous soils work in this region and has excavated over 350 soil trenches in Napa Valley. She has provided, as part of the petition, profile drawings, descriptive field, and analytical laboratory data for 17 soils by horizon. Four of these soils are from property outside of the boundaries of the St. Helena viticultural area and were chosen to be representative of those areas.

Soil Summary

The soils of the St. Helena viticultural area, according to Dr. Elliott-Fisk, are deep alluvial soils of moderate age, with well-formed horizonation, textural B horizons, sandy clay loam to clay loam textures, reddish colors, high gravel content (primarily of cobbles), and near neutral pH. In this erosional zone of the valley floor, where the width is restricted, groundwater and the groundwater table have a significant influence, bringing in additional dissolved minerals and increasing the pH (and nutritional content) above the valley floor soils to the north (Calistoga region) and south (Rutherford and Oakville), as well as the hillsides (Spring Mountain, Diamond Mountain, Howell Mountain and Pritchard Hill). The soil drainage in the St. Helena area is typically good since the water table drops in the spring, summer and fall to allow the vines an adequate root zone with free oxygen and carbon dioxide, thus providing vigorous conditions for grape growing. The moderate climate, with warm summer temperature, balances well with this soil environment, and allows the wine grower to manipulate the vines to extract what the winemaker desires from a particular varietal. As such, Dr. Elliott-Fisk concludes that this provides a stable and predictable environment for grape growing, and the physical geography of the region has promoted the production of fine wines in the St. Helena area for many decades.

Conclusion

The St. Helena viticultural area is uniform topographically and can be distinguished from the steeper hillsides to the east (Howell Mountain) and west (Spring Mountain District) as well as from the valley floor areas to the south (Rutherford) and north (Calistoga). This is an area where the valley floor narrows from around 19,000 feet at Oakville Cross Road and 11,000 feet at Zinfandel Lane to around 3,500 feet at Lodi Lane and Bale Lane. The area is marked by a uniform, steep gradient and significant river erosion. The bedrock geology is primarily volcanic, in contrast to the sedimentary soils to the south.

Along the eastern edge of the St. Helena area, geologic and geographic evidence support the inclusion of Spring Valley and Pratt Valley and the exclusion of Conn Valley and the higher mountain slopes.

Viticultural Area Boundary

The boundary of the St. Helena viticultural area may be found on three United States Geological Survey (U.S.G.S.) maps with a scale of 1:24,000. The boundary is described in § 9.149.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Public Law 96–511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this final rule because no requirement to collect information is imposed.

Regulatory Flexibility Act

It is hereby certified that this regulation will not have a significant economic impact on a substantial number of small entities. The establishment of a viticultural area is neither an endorsement nor approval by ATF of the quality of wine produced in the area, but rather an identification of an area that is distinct from surrounding areas. ATF believes that the establishment of viticultural areas merely allows wineries to more accurately describe the origin of their wines to consumers, and helps consumers identify the wines they purchase. Thus, any benefit derived from the use of a viticultural area name is the result of the proprietor's own efforts and consumer acceptance of wines from that region. In addition, no new recordkeeping or reporting requirements are imposed by this regulation. Accordingly, a regulatory flexibility analysis is not required.

Executive Order 12866

It has been determined that this regulation is not a significant regulatory action as defined by Executive Order 12866. Accordingly, this regulation is not subject to the analysis required by this Executive Order.

PART 9—AMERICAN VITICULTURAL AREAS

Par. 1. The authority citation for Part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. 2. Subpart C is amended by adding § 9.149 to read as follows:

Subpart C—Approved American Viticultural Areas

* * * * *

§ 9.149 St. Helena.

(a) *Name.* The name of the viticultural area described in this section is "St. Helena."

(b) *Approved maps.* The appropriate maps for determining the boundary of the St. Helena viticultural area are three U.S.G.S. 7.5 minute series topographical maps of the 1:24,000 scale. They are titled:

(1) "St. Helena Quadrangle, California," edition of 1960, revised 1993.

(2) "Calistoga Quadrangle, California," edition of 1958, photorevised 1980.

(3) "Rutherford Quadrangle, California," edition of 1951, photorevised 1968, photoinspected 1973.

(c) *Boundary.* The St. Helena viticultural area is located in Napa County in the State of California. The boundary is as follows:

(1) Beginning on the Rutherford Quadrangle map at the point of intersection between State Highway 29 and a county road shown on the map as Zinfandel Avenue, known locally as Zinfandel Lane, the boundary proceeds in a southwest direction along Zinfandel Avenue to its intersection with the north fork of Bale Slough (blueline stream) near the 201 foot elevation marker;

(2) Thence in a northwesterly direction approximately 2,750 feet along the north fork of Bale Slough to a point of intersection with a southwesterly straight line projection of a light duty road locally known as Inglewood Avenue;

(3) Thence in a straight line in a southwesterly direction along this projected extension of Inglewood Avenue approximately 2,300 feet to its intersection with the 500 foot contour line in Section 7, Township 7 North (T7N), Range 5 West (R5W);

(4) Thence along the 500 foot contour line in a generally northwesterly direction through Sections 7, 1 and 2, to its intersection of the western border of Section 2, T7N, R6W;

(5) Thence northerly along the western border of Section 2 approximately 500 feet to its intersection with Sulphur Creek in Sulphur Canyon in the northwest corner of Section 2, T7N, R6W;

(6) Thence along Sulphur Creek in an easterly direction approximately 350 feet to its intersection with the 400 foot contour line;

(7) Thence along the 400 foot contour line in a generally easterly, then northwesterly, direction past the city of St. Helena (on the St. Helena Quadrangle map) to a point of intersection with a southwesterly straight line projection of the county road shown as Bale Lane in the Carne Humana Rancho on the Calistoga Quadrangle map;

(8) Thence along the projected straight line extension of Bale Lane in a northeasterly direction approximately 700 feet to the intersection of State Highway 29 and Bale Lane and continuing northeasterly along Bale Lane to its intersection with the Silverado Trail;

(9) Thence in a northwesterly direction along the Silverado Trail approximately 1,500 feet to an unmarked driveway on the north side of the Silverado Trail near the 275 foot elevation marker;

(10) Thence approximately 300 feet northeasterly along the driveway to and beyond its point of intersection with another driveway and continuing in a straight line projection to the 400 foot contour line;

(11) Thence in a northerly and then generally southeasterly direction along the 400 foot contour line through Sections 10 (projected), 11, 12, 13, 24 and 25 in T8N, R6W, Section 30 in T8N, R5W, Sections 25 and 24 in T8N, R6W, Sections 19 and 30 in T8N, R5W to a point of intersection with the city limits of St. Helena on the eastern boundary of Section 30 in T8N, R5W, on the St. Helena Quadrangle map;

(12) Thence north, east and south along the city limits of St. Helena to the third point of intersection with the county road known as Howell Mountain Road in Section 29, T8N, R5W;

(13) Thence in a northeasterly direction approximately 900 feet along Howell Mountain Road to its intersection with Conn Valley Road;

(14) Thence northeasterly and then southeasterly along Conn Valley Road to its intersection with the eastern boundary of Section 28, T8N, R5W;

(15) Thence south approximately 5,200 feet along the eastern boundary of Sections 28 and 33 to a point of intersection with the 380 foot contour line near the southeast corner of Section 33, T8N, R5W, on the Rutherford Quadrangle map;

(16) Thence in a northwesterly direction along the 380 foot contour line in Section 33 to a point of intersection with a northeasterly straight line projection of Zinfandel Avenue;

(17) Thence in a southwesterly direction approximately 950 feet along this straight line projection of Zinfandel Avenue to its intersection with the Silverado Trail;

(18) Thence continuing along Zinfandel Avenue in a southwesterly direction to its intersection with State Highway 29, the point of beginning.

Signed: August 9, 1995.

Daniel R. Black,

Acting Director.

Approved: August 21, 1995.

Dennis M. O'Connell,

Acting Deputy Assistant Secretary (Regulatory, Tariff and Trade Enforcement).

Background

In Executive Order 12613 of October 29, 1987 (3 CFR, 1987 Comp., p. 256, 52 FR 41940), President Reagan imposed import sanctions against Iran, invoking the authority, *inter alia*, of section 505 of the International Security and Development Cooperation Act of 1985, 22 U.S.C. 2349aa–9 ("ISDCA"). In Executive Order 12957 of March 15, 1995 (60 FR 14615, March 17, 1995), President Clinton declared a national emergency with respect to the actions and policies of the Government of Iran and imposed additional sanctions against Iran, invoking the authority, *inter alia*, of the International Emergency Economic Powers Act, 50 U.S.C. 1701–06 ("IEEPA"). The President substantially supplemented and amended the sanctions in those orders in Executive Order 12959 of May 6, 1995 (60 FR 24757, May 9, 1995), invoking the authority, *inter alia*, of IEEPA and ISDCA. In the Executive orders, the President authorized the Secretary of the Treasury, in consultation with the Secretary of State, to take such actions, including the promulgation of rules and regulations, as might be necessary to carry out the purposes of those orders. In implementation of these orders, the Office of Foreign Assets Control is amending in their entirety the Iranian Transactions Regulations (as amended, the "Regulations").

The Regulations continue the prohibitions previously contained in 31 CFR part 560 concerning the importation into the United States, or the financing of such importation, of any goods or services of Iranian origin. The Regulations also expand the prohibitions to (a) the exportation from the United States to Iran or the Government of Iran, or the financing of such exportation, of any goods, technology, or services; (b) the reexportation to Iran of certain goods and technology of U.S. origin; (c) any transaction by a United States person relating to goods or services of Iranian origin or owned or controlled by the Government of Iran; (d) any new investment by a United States person in Iran or in property owned or controlled by the Government of Iran; (e) the approval or facilitation by a United States person of the entry into or performance by a foreign entity owned or controlled by a United States person of a transaction or contract if the United States person is prohibited from engaging directly in such activity; and (f) any transaction by any United States person or within the United States that evades or avoids, or attempts to violate, these prohibitions.

All General Licenses and General Notices issued by the Office of Foreign Assets Control prior to September 11, 1995 (see 60 FR 40881, Aug. 10, 1995), may continue to be relied on to validate actions prior to this date during the period of their validity. Specific licenses issued by OFAC prior to this date continue in effect according to their terms unless modified by the Office of Foreign Assets Control. Authorizations contained in General Licenses issued prior to publication of the Regulations can now be found in the following sections.

General License No.	Date of Issuance	Regulations Section
1	05/19/95	560.515
2	06/01/95	560.516
3	06/01/95	560.517
4	06/13/95	560.518, 560.524
5	06/14/95	560.210, 560.523
6	06/14/95	560.521
7	06/14/95	560.519
8	06/14/95	560.520
9	06/14/95	560.512
10	06/14/95	560.510
11	07/21/95	560.524
12	07/21/95	560.525

Transactions otherwise prohibited by this part may be authorized by a general license contained in subpart E or by a specific license issued pursuant to the procedures described in § 560.801 of subpart H.

The following sections contained in part 560 are removed and reserved and are no longer in force: §§ 560.202, 560.302, 560.309, 560.403, 560.404, 560.405, 560.409, 560.503, 560.504, 560.511, and 560.514.

Because the Regulations involve a foreign affairs function, Executive Order 12866 and the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601–612, does not apply. Wherever possible, however, it is the practice of the Office of Foreign Assets Control to receive written submissions or hold informal consultations with interested parties concerning any rule or other public document.

The collection of information requirements contained in §§ 560.601, 560.602, and 560.801 have been previously approved by the Office of Management and Budget ("OMB") and assigned control number 1505–0106. Because the Regulations are being issued without prior notice and public procedures pursuant to the Administrative Procedure Act, the collection of information requirements contained in §§ 560.603 and 560.704 are being submitted to OMB under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501–3520. Comments concerning the collection of information and the accuracy of estimated average annual burden, and suggestions for reducing this burden should be directed to OMB, Paperwork Reduction Project (1505—0106), Washington, DC 20503, with copies to the Office of Foreign Assets Control, Department of the Treasury, 1500 Pennsylvania Ave., N.W.—Annex, Washington, DC 20220. Notice of OMB action on these requests will be published in the **Federal Register**.

This collection of information is required by the Office of Foreign Assets Control for licensing, compliance, civil penalty, and enforcement purposes. This information will be used to determine the eligibility of applicants for the benefits provided through specific licenses, to determine whether persons subject to the Regulations are in compliance with applicable requirements, and to determine whether and to what extent civil penalty or other enforcement action is appropriate. The likely respondents and recordkeepers are individuals and business organizations.

Estimated total annual reporting and/or recordkeeping burden: 1000 hours.

The estimated annual burden per respondent/recordkeeper varies from 30 minutes to ten hours, depending on the individual circumstances, with an estimated average of 2 hours.

Estimated number of respondents and/or recordkeepers: 500.

Estimated annual frequency of responses: 1 to 4.

List of Subjects in 31 CFR Part 560

Administrative practice and procedure, Agricultural commodities, Banking and finance, Exports, Foreign trade, Imports, Information, Investments, Iran, Loans, Penalties, Reporting and recordkeeping requirements, Services, Specially designated nationals, Transportation.

For the reasons set forth in the preamble, 31 CFR part 560 is revised to read as follows:

PART 560—IRANIAN TRANSACTIONS REGULATIONS

Authority: 50 U.S.C. 1701–1706; 50 U.S.C. 1601–1651; 22 U.S.C. 2349aa–9; 3 U.S.C. 301; E.O. 12613, 52 FR 41940, 3 CFR, 1987 Comp., p. 256; E.O. 12957, 60 FR 14615, March 17, 1995; E.O. 12959, 60 FR 24757, May 9, 1995.

Subpart A—Relation of This Part to Other Laws and Regulations

Sec.
560.101 Relation of this part to other laws and regulations.

Subpart B—Prohibitions

560.201 Prohibited importation of goods and services from Iran.
560.202 [Reserved]
560.203 Evasions; attempts.
560.204 Prohibited exportation of goods, technology, and services to Iran.
560.205 Prohibited reexportation of goods and technology to Iran.
560.206 Prohibited transactions related to Iranian–origin goods or services.
560.207 Prohibited investment.
560.208 Prohibited approval or facilitation.
560.209 Prohibited transactions with respect to the development of Iranian petroleum resources.
560.210 Exempt transactions.

Subpart C—General Definitions

560.301 Effective date.
560.302 [Reserved]
560.303 Iran; Iranian.
560.304 Government of Iran.
560.305 Person; entity.
560.306 Iranian–origin goods and services.
560.307 United States.
560.308 Importation.
560.309 [Reserved]
560.310 License.
560.311 General license.
560.312 Specific license.
560.313 Entity owned or controlled by the Government of Iran.
560.314 United States person.
560.315 Information or informational materials.
560.516 New investment.
560.317 Credits or loans.
560.318 Technology.
560.319 United States depository institution.
560.320 Iranian accounts.

Subpart D—Interpretations

560.401 Reference to amended sections.
560.402 Effect of amendment.
560.403 [Reserved]
560.404 [Reserved]
560.405 [Reserved]
560.406 Transshipments prohibited.
560.407 Transactions related to Iranian–origin goods.
560.408 Importation into and release from a bonded warehouse or foreign trade zone.
560.409 [Reserved]
560.410 Exportation of services.
560.411 Offshore transactions in Iranian–origin goods and services.
560.412 Extensions of credits or loans to Iran.
560.413 Letter of credit payments by Iranian banks in the United States.
560.414 Exports to third countries; reexports.

Subpart E—Licenses, Authorizations and Statements of Licensing Policy

560.501 Effect of license or authorization.
560.502 Exclusion from licenses and authorizations.
560.503 [Reserved]
560.504 [Reserved]
560.505 Certain services relating to participation in various events authorized.
560.506 Importation and exportation of certain gifts authorized.
560.507 Accompanied baggage authorized.
560.508 Telecommunications and mail transactions authorized.
560.509 Certain transactions related to patents, trademarks and copyrights authorized.
560.510 Transactions related to the resolution of disputes between the United States or United States nationals and the Government of Iran.
560.511 [Reserved]
560.512 Iranian Government missions in the United States.
560.513 Importation of Iranian–origin oil.
560.514 [Reserved]
560.515 30–day delayed effective date for pre–May 7, 1995 trade contracts involving Iran.
560.516 Payment and United States dollar clearing transactions involving Iran.
560.517 Exportation of services: Iranian accounts at United States depository institutions.
560.518 Transactions in Iranian–origin and Iranian Government property.
560.519 Policy governing news organization offices.
560.520 Exportation of agricultural commodities.
560.521 Diplomatic pouches.
560.522 Allowable payments for overflights of Iranian airspace.
560.523 Importation of information and informational materials.
560.524 Household goods and personal effects.
560.525 Exportation of certain legal services.
560.526 Commodities trading and related transactions.
560.527 Rescheduling existing loans.
560.528 Aircraft safety.

Subpart F—Reports

560.601 Required records.
560.602 Reports to be furnished on demand.
560.603 Reports on oil transactions engaged in by foreign affiliates.

Subpart G—Penalties

560.701 Penalties.
560.702 Detention of shipments.
560.703 Prepenalty notice.
560.704 Presentation responding to prepenalty notice.
560.705 Penalty notice.
560.706 Referral for administrative collection measures or to United States Department of Justice.

Subpart H—Procedures

560.801 Licensing.
560.802 Decisions.
560.803 Amendment, modification, or revocation.
560.804 Rulemaking.
560.805 Delegation by the Secretary of the Treasury.
560.806 Customs procedures: Goods specified in § 560.201.
560.807 Rules governing availability of information.

Subpart I—Paperwork Reduction Act

560.901 Paperwork Reduction Act notice.

Subpart A—Relation of This Part to Other Laws and Regulations

§ 560.101 Relation of this part to other laws and regulations.

(a) This part is separate from, and independent of, the other parts of this chapter, including part 535, "Iranian Assets Control Regulations." No license or authorization contained in or issued pursuant to those other parts authorizes any transaction prohibited by this part. No license or authorization contained in or issued pursuant to any other provision of law or regulations authorizes any transaction prohibited by this part.

(b) No license or authorization contained in or issued pursuant to this part relieves the involved parties from complying with any other applicable laws or regulations.

Subpart B—Prohibitions

§ 560.201 Prohibited importation of goods and services from Iran.

Except as otherwise authorized, and notwithstanding any contract entered into or any license or permit granted prior to May 7, 1995, the importation into the United States, or the financing of such importation, of any goods or services of Iranian origin, other than Iranian–origin publications and materials imported for news publications or news broadcast dissemination, is prohibited.

§ 560.202 [Reserved]

§ 560.203 Evasions; attempts.

Any transaction by any United States person or within the United States that evades or avoids, or has the purpose of evading or avoiding, or attempts to violate, any of the prohibitions contained in this part is hereby prohibited.

§ 560.204 Prohibited exportation of goods, technology, and services to Iran.

Except as otherwise authorized, and notwithstanding any contract entered into or any license or permit granted prior to May 7, 1995, the exportation from the United States to Iran or the Government of Iran, or the financing of such exportation, of any goods, technology, or services is prohibited.

§ 560.205 Prohibited reexportation of goods and technology to Iran.

Except as otherwise authorized, and notwithstanding any contract entered into or any license or permit granted prior to May 7, 1995, the reexportation to Iran or the Government of Iran of any goods or technology exported from the United States, the exportation of which to Iran was subject to export license application requirements under any United States regulations in effect immediately prior to May 6, 1995, is prohibited, unless the reexportation is of goods that have been substantially transformed outside the United States, or incorporated into another product outside the United States and constitute less than 10 percent by value of that product exported from a third country.

§ 560.206 Prohibited transactions related to Iranian–origin goods or services.

Except as otherwise authorized, and notwithstanding any contract entered into or any license or permit granted prior to May 7, 1995, any transaction, including purchase, sale, transportation, swap, financing, or brokering transactions, by a United States person relating to goods or services of Iranian origin or owned or controlled by the Government of Iran is prohibited.

§ 560.207 Prohibited investment.

Except as otherwise authorized, and notwithstanding any contract entered into or any license or permit granted prior to May 7, 1995, any new investment by a United States person in Iran or in property (including entities) owned or controlled by the Government of Iran is prohibited.

§ 560.208 Prohibited approval or facilitation.

Except as otherwise authorized, and notwithstanding any contract entered into or any license or permit granted prior to May 7, 1995, the approval or facilitation by a United States person of the entry into or performance by an entity owned or controlled by a United States person of a transaction or contract prohibited as to United States persons by §§ 560.205, 560.206, and 560.207, or relating to the financing of activities prohibited as to United States persons by those sections, or of a guaranty of another person's performance of such transaction or contract, is prohibited.

§ 560.209 Prohibited transactions with respect to the development of Iranian petroleum resources.

Except as otherwise authorized, and notwithstanding any contract entered into or any license or permit granted prior to March 16, 1995, the following are prohibited:

(a) The entry into or performance by a United States person, or the approval by a United States person of the entry into or performance by an entity owned or controlled by a United States person, of:

(1) A contract that includes overall supervision and management responsibility for the development of petroleum resources located in Iran, or

(2) A guaranty of another person's performance under such contract; or

(b) The entry into or performance by a United States person, or the approval by a United States person of the entry into or performance by an entity owned or controlled by a United States person, of

(1) A contract for the financing of the development of petroleum resources located in Iran, or

(2) A guaranty of another person's performance under such a contract.

§ 560.210 Exempt transactions.

(a) *Personal communications.* The prohibitions of §§ 560.204 and 560.206 do not apply to any postal, telegraphic, telephonic, or other personal communication, which does not involve the transfer of anything of value.

(b) *Humanitarian donations.* The prohibitions of §§ 560.204 and 560.206 do not apply to donations by United States persons of articles, such as food, clothing, and medicine, intended to be used to relieve human suffering.

(c) *Information and informational materials.*

(1) The prohibitions of §§ 560.204 and 560.206 do not apply to the exportation from the United States to Iran of information and informational materials, as defined in § 560.315, whether commercial or otherwise, regardless of format or medium of transmission, or any transaction of common carriers incident to such exportation.

(2) Paragraph (c)(1) of this section does not authorize transactions related to information and informational materials not fully created and in existence at the date of the transaction, or to the substantive or artistic alteration or enhancement of information or informational materials, or the provision of marketing and business consulting services by a United States person. Such prohibited transactions include, without limitation, payment of advances for information or informational materials not yet created and completed, and provision of services to market, produce or co–produce, create or assist in the creation of information or informational materials.

(3) Paragraph (c)(1) does not authorize transactions incident to the exportation of restricted technical data as defined in part 779 of the Export Administration Regulations, 15 CFR part 779, or to the exportation of goods for use in the transmission of any data. The exportation of such goods to Iran is prohibited, as provided in § 560.204.

(d) *Travel.* The prohibitions contained in this part do not apply to transactions ordinarily incident to travel to or from any country, including importation of accompanied baggage for personal use, maintenance within any country including payment of living expenses and acquisition of goods or services for personal use, and arrangement or facilitation of such travel including nonscheduled air, sea, or land voyages. This exemption extends to transactions with Iranian carriers and those involving group tours and payments in Iran made with cash or traveler's checks for transactions incident to personal travel. The use of currency drafts, charge, debit, or credit cards is not permitted.

(e) *Letters of Credit.* Letters of credit and other financing agreements with respect to trade contracts in force as of May 6, 1995, may be performed pursuant to their terms with respect to underlying trade transactions occurring prior to 12:01 a.m. EDT, June 6, 1995. See § 560.413.

Subpart C—General Definitions

§ 560.301 Effective date.

The term "effective date" means:

(a) 12:01 p.m., Eastern Standard Time, October 29, 1987, for all prohibitions set forth in § 560.201.

(b) 12:01 a.m., Eastern Daylight Time, June 6, 1995, for all prohibitions set forth in §§ 560.204, 560.205, and 560.206 with respect to trade transactions based on contracts in force as of May 6, 1995, and which were authorized pursuant to federal regulations in force immediately prior to May 6, 1995.

(c) 12:01 a.m., Eastern Standard Time, March 16, 1995, for all prohibitions set forth in § 560.209 and the prohibitions set forth in § 560.203 as they apply to the prohibitions set forth in § 560.209.

(d) 12:01 a.m., Eastern Daylight Time, May 7, 1995, for all other prohibitions contained in this part.

§ 560.302 [Reserved]

§ 560.303 Iran; Iranian.

The term "Iran" means the territory of Iran, and any other territory or marine area, including the exclusive economic zone and continental shelf, over which the Government of Iran claims sovereignty, sovereign rights or jurisdiction, provided that the

Government of Iran exercises partial or total *de facto* control over the area or derives a benefit from economic activity in the area pursuant to an international agreement. The term "Iranian" means pertaining to Iran as defined in this section.

§ 560.304 Government of Iran.

The term "Government of Iran" includes:

(a) The state and the Government of Iran, as well as any political subdivision, agency, or instrumentality thereof;

(b) Any entity owned or controlled directly or indirectly by the foregoing;

(c) Any person to the extent that such person is, or has been, or to the extent that there is reasonable cause to believe that such person is, or has been, since the applicable effective date, acting or purporting to act directly or indirectly on behalf of any of the foregoing; and

(d) Any person or entity designated by the Secretary of the Treasury as included within paragraphs (a) through (c) of this section.

§ 560.305 Person; entity.

(a) The term "person" means an individual or entity.

(b) The term "entity" means a partnership, association, trust, joint venture, corporation or other organization.

§ 560.306 Iranian–origin goods and services.

(a) The term "goods or services of Iranian origin" includes:

(1) Goods grown, produced, manufactured, extracted, or processed in Iran;

(2) Goods which have entered into Iranian commerce; and

(3) Services performed in Iran or by the Government of Iran, as defined in § 560.304.

(b) The term "services of Iranian origin" does not include:

(1) Diplomatic and consular services performed by or on behalf of the Government of Iran;

(2) Diplomatic and consular services performed by or on behalf of the Government of the United States; or

(3) Services provided in the United States by an Iranian national resident in the United States.

§ 560.307 United States.

The term "United States" means the United States, including its territories and possessions.

§ 560.308 Importation.

The term "importation" means the bringing of any goods into the United States, except that in the case of goods transported by vessel, "importation" means the bringing of any goods into the United States with the intent to unlade them.

§ 560.309 [Reserved]

§ 560.310 License.

Except as otherwise specified, the term "license" means any license or authorization contained in or issued pursuant to this part.

§ 560.311 General license.

The term "general license" means any license or authorization the terms of which are set forth in this part.

§ 560.312 Specific license.

The term "specific license" means any license or authorization not set forth in this part but issued pursuant to this part.

§ 560.313 Entity owned or controlled by the Government of Iran.

The term "entity owned or controlled by the Government of Iran" includes any corporation, partnership, association, or other entity in which the Government of Iran owns a majority or controlling interest, and any entity which is otherwise controlled by that government.

§ 560.314 United States person.

The term "United States person" means any United States citizen, permanent resident alien, entity organized under the laws of the United States (including foreign branches), or any person in the United States.

§ 560.315 Information or informational materials.

(a) The term "information" or "informational materials" includes, without limitation:

(1) Publications, films, posters, phonograph records, photographs, microfilms, microfiche, tapes, compact disks, CD ROMs, artworks, and news wire feeds.

(2) To be considered "information" or "informational materials", artworks must be classified under chapter subheading 9701, 9702, or 9703 of the Harmonized Tariff Schedule of the United States.

(b) The term "information" and "informational materials" with respect to United States exports does not include items:

(1) That were, as of April 30, 1994, controlled for export pursuant to section 5 of the Export Administration Act of 1979, 50 U.S.C. App. 2401–2420 (the "EAA"), or section 6 of the EAA to the extent that such controls promote the nonproliferation or antiterrorism policies of the United States, including "software" that is not "publicly available" as these terms are defined in 15 CFR parts 779 and 799.1; or

(2) With respect to which acts are prohibited by 18 U.S.C. chapter 37.

§ 560.316 New investment.

The term "new investment" means a transaction after 12:01 EDT, May 7, 1995, that constitutes:

(a) A commitment or contribution of funds or other assets; or

(b) A loan or other extension of credit, as defined in § 560.317.

§ 560.317 Credits or loans.

The term "credits" or "loans" means any transfer or extension of funds or credit on the basis of an obligation to repay, or any assumption or guarantee of the obligation of another to repay an extension of funds or credit, including but not limited to: overdrafts; currency swaps; purchases of debt securities issued by the Government of Iran; purchases of a loan made by another person; sales of financial assets subject to an agreement to repurchase; renewals or refinancings whereby funds or credits are transferred to or extended to a prohibited borrower or prohibited recipient; the issuance of standby letters of credit; and drawdowns on existing lines of credit.

§ 560.318 Technology.

For purposes of §§ 560.204 and 560.205, the term "technology" includes technical data or other information subject to the Export Administration Regulations, 15 CFR parts 768–799.

§ 560.319 United States depository institution.

The term "United States depository institution" means:

(a) Any entity organized under the laws of any jurisdiction within the United States (including its foreign branches), and

(b) Any agency, office, or branch located in the United States of a foreign entity; that is engaged primarily in the business of banking, including accepting deposits and making, granting, transferring, holding, or brokering loans or credits, or purchasing or selling foreign exchange, or procuring purchasers and sellers thereof, as principal or agent. The term includes, among others, banks, savings banks, savings associations, mortgage companies, credit unions, and trust companies and United States holding companies.

§ 560.320 Iranian accounts.

The term "Iranian accounts" means accounts of persons located in Iran or of the Government of Iran maintained on the books of a United States depository institution.

Subpart D—Interpretations

§ 560.401 Reference to amended sections.

Except as otherwise specified, reference to any section of this part or to any regulation, ruling, order, instruction, direction, or license issued pursuant to this part refers to the same as currently amended.

§ 560.402 Effect of amendment.

Any amendment, modification, or revocation of any section of this part or of any order, regulation, ruling, instruction, or license issued by or under the direction of the Director of the Office of Foreign Assets Control does not, unless otherwise specifically provided, affect any act done or omitted to be done, or any civil or criminal suit or proceeding commenced or pending prior to such amendment, modification, or revocation. All penalties, forfeitures, and liabilities under any such order, regulation, ruling, instruction, or license continue and may be enforced as if such amendment, modification, or revocation had not been made.

§ 560.403 [Reserved]

§ 560.404 [Reserved]

§ 560.405 [Reserved]

§ 560.406 Transshipments prohibited.

(a) The prohibitions in § 560.201 apply to the importation into the United States, for transshipment or transit, of Iranian–origin goods which are intended or destined for third countries.

(b) The prohibitions in § 560.204 apply to the exportation from the United States, for transshipment or transit, of goods which are intended or destined for Iran.

(c) The prohibitions in § 560.205 apply to the reexportation of goods described in that section, for transshipment or transit, which are intended or destined for Iran.

(d) The prohibitions in § 560.206 apply to any transaction relating to the transshipment of goods of Iranian origin or owned or controlled by the Government of Iran through any country.

§ 560.407 Transactions related to Iranian–origin goods.

(a) Importation into the United States from third countries of goods containing Iranian–origin raw materials or components is not prohibited if those raw materials or components have been incorporated into manufactured products or substantially transformed in a third country by a person other than a United States person.

(b) Transactions relating to Iranian–origin goods that have not been incorporated into manufactured products or substantially transformed in a third country are prohibited.

(c) Transactions relating to goods containing Iranian–origin raw materials or components are not prohibited if those raw materials or components have been incorporated into manufactured products or substantially transformed in a third country by a person other than a United States person.

§ 560.408 Importation into and release from a bonded warehouse or foreign trade zone.

The prohibitions in § 560.201 apply to importation into a bonded warehouse or a foreign trade zone of the United States. However, § 560.201 does not prohibit the release from a bonded warehouse or a foreign trade zone of Iranian–origin goods imported into a bonded warehouse or a foreign trade zone prior to October 29, 1987.

§ 560.409 [Reserved]

§ 560.410 Exportation of services.

(a) The prohibition on the exportation of services from the United States contained in § 560.204 applies only to services performed on behalf of a person in Iran or the Government of Iran or where the benefit of such services is otherwise received in Iran, if such services are performed:

(1) In the United States, or

(2) Outside the United States by an individual United States person ordinarily resident in the United States, or

(3) Outside the United States by an overseas branch of an entity located in the United States.

(b) The benefit of services performed anywhere in the world on behalf of the Government of Iran is presumed to be received in Iran.

(c) Services provided in the United States or by a United States person to a non–Iranian carrier transporting passengers or goods to or from Iran are not considered to be exported to Iran.

(d) Services provided in a third country by a United States person ordinarily resident outside the United States are not considered to be exported from the United States.

§ 560.411 Offshore transactions in Iranian–origin goods and services.

The prohibitions contained in § 560.206 apply to, among other things, transactions by United States persons in locations outside the United States with respect to goods or services which the United States person knows, or has reason to know, are of Iranian origin or owned or controlled by the Government of Iran, including:

(a) Importing into or exporting from such locations; and

(b) Purchasing, selling, financing, swapping, insuring, transporting, lifting, storing, incorporating, or transforming, or brokering any of the foregoing.

§ 560.412 Extensions of credits or loans to Iran.

(a) The prohibitions contained in § 560.207 apply, among other things, to the unauthorized renewal or rescheduling of credits or loans in existence as of May 6, 1995.

(b) The prohibitions contained in § 560.209 apply, among other things, to the unauthorized renewal or rescheduling of credits or loans in existence as of March 15, 1995.

(c) The prohibitions contained in §§ 560.207 and 560.209 apply, among other things, to credits or loans in any currency.

§ 560.413 Letter of credit payments by Iranian banks in the United States.

(a) For purposes of the exemption in § 560.210(e), payment of letters of credit and other financing agreements according to their terms includes, in the case of payments made by an Iranian bank's branch or agency located in the United States, payments that such branch or agency is:

(1) Legally obligated to make pursuant to the terms of letters of credit and other financing agreements relating to pre–May 7, 1995 trade contracts; or

(2) Licensed to make by the Office of Foreign Assets Control with respect to pre–May 7, 1995 trade contracts.

(b) Payments that are not binding legal obligations of an Iranian bank's branch or agency pursuant to the terms of the letter of credit or other financing agreement are not covered by this exemption.

§ 560.414 Exports to third countries; reexports.

(a) The prohibitions contained in § 560.205 do not apply to the reexportation to Iran by a person who is not a United States person of any item described in that section which was exported from the United States prior to 12:01 a.m. EDT, May 7, 1995, and was not the property of a United States person as of 12:01 a.m. EDT, May 7, 1995, if the reexportation to Iran of such item was not subject to export license application requirements under any United States regulations in effect immediately prior to May 6, 1995.

(b) United States persons are prohibited as of 12:01 a.m. EDT, May 7, 1995, from reexporting any item subject to the prohibitions contained in § 560.205 regardless of when the item was exported from the United States. United States persons are prohibited from approving or facilitating any reexport by an entity owned or controlled by a United States person of any item subject to the prohibitions of § 560.205 of this part regardless of when the item was exported from the United States.

(c) Effective 12:01 a.m. EDT May 7, 1995, the exportation from the United States to any destination of any item that was subject to export license application requirements under any United States regulations in effect immediately prior to May 6, 1995, is subject to the condition that the reexportation to Iran requires a specific license, except as otherwise authorized by this part.

Subpart E—Licenses, Authorizations and Statements of Licensing Policy

§ 560.501 Effect of license or authorization.

(a) No license or other authorization contained in this part, or otherwise issued by or under the direction of the Director of the Office of Foreign Assets Control, authorizes or validates any transaction effected prior to the issuance of the license, unless specifically provided in such license or other authorization.

(b) No regulation, ruling, instruction, or license authorizes a transaction prohibited under this part unless the regulation, ruling, instruction, or license is issued by the Office of Foreign Assets Control and specifically refers to this part. No regulation, ruling, instruction, or license referring to this part authorizes any transactions prohibited by any provision of this chapter unless the regulation, ruling, instruction or license specifically refers to such provision.

(c) Any regulation, ruling, instruction or license authorizing any transaction otherwise prohibited under this part has the effect of removing a prohibition or prohibitions contained in this part from the transaction, but only to the extent specifically stated by its terms. Unless the regulation, ruling, instruction or license otherwise specifies, such an authorization does not create any right, duty, obligation, claim, or interest in, or with respect to, any property which would not otherwise exist under ordinary principles of law.

§ 560.502 Exclusion from licenses and authorizations.

The Director of the Office of Foreign Assets Control reserves the right to exclude any person, property, or transaction from the operation of any license, or from the privileges therein conferred, or to restrict the applicability thereof with respect to particular persons, property, transactions, or classes thereof. Such action is binding upon all persons receiving actual or constructive notice of such exclusion or restriction.

§ 560.503 [Reserved]

§ 560.504 [Reserved]

§ 560.505 Certain services relating to participation in various events authorized.

The importation of Iranian–origin services into the United States is authorized where such services are performed in the United States by an Iranian national who enters the United States on a visa issued by the State Department for the purpose of participating in a public conference, performance, exhibition or similar event, and such services are consistent with that purpose.

§ 560.506 Importation and exportation of certain gifts authorized.

The importation into the United States of Iranian–origin goods, and the exportation from the United States of goods, is authorized for goods sent as gifts to persons provided that the value of the gift is not more than $100.

§ 560.507 Accompanied baggage authorized.

(a) Persons entering the United States directly or indirectly from Iran are authorized to import into the United States Iranian–origin accompanied baggage normally incident to travel.

(b) Persons leaving the United States for Iran are authorized to export from the United States accompanied baggage normally incident to travel.

(c) This authorization applies to accompanied baggage that includes only articles that are necessary for personal use incident to travel, not intended for any other person or for sale, and are not otherwise prohibited from importation or exportation under applicable United States laws.

§ 560.508 Telecommunications and mail transactions authorized.

All transactions of common carriers incident to the receipt or transmission of telecommunications and mail between the United States and Iran are authorized. For purposes of this section, the term "mail" includes parcels only to the extent the parcels contain goods exempted from the prohibitions contained in this part or otherwise eligible for importation from or exportation to Iran under a general or specific license.

§ 560.509 Certain transactions related to patents, trademarks and copyrights authorized.

(a) All of the following transactions in connection with patent, trademark, copyright or other intellectual property protection in the United States or Iran are authorized:

(1) The filing and prosecution of any application to obtain a patent, trademark, copyright or other form of intellectual property protection;

(2) The receipt of a patent, trademark, copyright or other form of intellectual property protection;

(3) The renewal or maintenance of a patent, trademark, copyright or other form of intellectual property protection; and

(4) The filing and prosecution of opposition or infringement proceedings with respect to a patent, trademark, copyright or other form of intellectual property protection, or the entrance of a defense to any such proceedings.

(b) Nothing in this section affects obligations under any other provision of law.

§ 560.510 Transactions related to the resolution of disputes between the United States or United States nationals and the Government of Iran.

(a) Except as otherwise authorized, specific licenses may be issued on a case–by–case basis to authorize transactions in connection with awards, decisions or orders of the Iran–United States Claims Tribunal in The Hague, the International Court of Justice, or other international tribunals (collectively, "tribunals"); agreements settling claims brought before tribunals; and awards, orders, or decisions of an administrative, judicial or arbitral proceeding in the United States or abroad, where the proceeding involves the enforcement of awards, decisions or orders of tribunals, or is contemplated under an international agreement, or involves claims arising before 12:01 a.m. EDT, May 7, 1995, that resolve disputes between the Government of Iran and the United States or United States nationals, including the following transactions:

(1) Importation into the United States of, or any transaction related to, goods and services of Iranian origin or owned or controlled by the Government of Iran;

(2) Exportation or reexportation to Iran or the Government of Iran of any goods, technology, or services, except to the extent that such exportation or reexportation is also subject to export licensing application requirements of another agency of the United States Government and the granting of such a

license by that agency would be prohibited by law;

(3) Financial transactions related to the resolution of disputes at tribunals, including transactions related to the funding of proceedings or of accounts related to proceedings or to a tribunal; participation, representation, or testimony before a tribunal; and the payment of awards of a tribunal; and

(4) Other transactions otherwise prohibited by this part which are necessary to permit implementation of the foregoing awards, decisions, orders, or agreements.

(b) Specific licenses may be issued on a case–by–case basis to authorize payment of costs related to the storage or maintenance of goods in which the Government of Iran has title, and to authorize the transfer of title to such goods, provided that such goods are in the United States and that such goods are the subject of a proceeding pending before a tribunal.

(c)(1) All transactions are authorized with respect to the importation of Iranian–origin goods and services necessary to the initiation and conduct of legal proceedings, in the United States or abroad, including administrative, judicial and arbitral proceedings and proceedings before tribunals.

(2) Specific licenses may be issued on a case–by–case basis to authorize the exportation to Iran or the Government of Iran of goods, and of services not otherwise authorized by § 560.525, necessary to the initiation and conduct of legal proceedings, in the United States or abroad, including administrative, judicial and arbitral proceedings and proceedings before tribunals, except to the extent that the exportation is also subject to export licensing application requirements of another agency of the United States Government and the granting of such a license by that agency would be prohibited by law.

(3) Representation of United States persons or of third country persons in legal proceedings, in the United States or abroad, including administrative, judicial and arbitral proceedings and proceedings before tribunals, against Iran or the Government of Iran is not prohibited by this part. The exportation of certain legal services to a person in Iran or the Government of Iran is authorized in § 560.525.

(d) The following are authorized:

(1) All transactions related to payment of awards of the Iran–United States Claims Tribunal in The Hague against Iran out of the Security Account provided for in paragraph 7 of the Declaration of the Government of the Democratic and Popular Republic of Algeria of January 19, 1981.

(2) All transactions necessary to the payment of awards in a legal proceeding to which the United States Government is a party, or to payments pursuant to settlement agreements entered into by the United States Government in such a legal proceeding.

§ 560.511 [Reserved]

§ 560.512 Iranian Government missions in the United States.

(a) All transactions ordinerily incident to the importation of goods or services into the United States by, the exportation of goods or services from the United States by, or the provision of goods or services in the United States to, the missions of the Government of Iran to international organizations in the United States, and Iranians admitted to the United States under section 101(a)(15)(G) of the Immigration and Nationality Act ("INA"), 8 U.S.C. 1101(a)(15)(G), are authorized, provided that:

(1) The goods or services are for the conduct of the official business of the mission, or for personal use of personnel admitted to the United States under INA section 101(a)(15)(G), and are not for resale; and

(2) The transaction is not otherwise prohibited by law.

(b) All transactions ordinarily incident to the importation of goods or services into the United States by, the exportation of goods or services from the United States by, or the provision of goods or services in the United States to, the Iranian Interests Section of the Embassy of Pakistan (or any successor protecting power) in the United States, are authorized, provided that:

(1) The goods or services are for the conduct of the official business of the Iranian Interests Section, and are not for resale; and

(2) The transaction is not otherwise prohibited by law.

(c) All transactions ordinarily incident to the provision of goods or services in the United States to the employees of Iranian missions to international organizations in the United States, and to employees of the Iranian Interests Section of the Embassy of Pakistan (or any successor protecting power) in the United States, are authorized, provided that the transaction is not otherwise prohibited by law.

§ 560.513 Importation of Iranian–origin oil.

(a) Specific licenses will be issued on a case–by–case basis to permit the importation of Iranian–origin oil in connection with the resolution or settlement of cases before the Iran–United States Claims Tribunal in The Hague, established pursuant to the Declaration of the Government of the Democratic and Popular Republic of Algeria Concerning the Settlement of Claims by the Government of the United States of America and the Government of the Islamic Republic of Iran of January 19, 1981, or where the proceeds are otherwise to be deposited in the Tribunal's Security Account.

(b) License applications submitted pursuant to this section must contain the importer's certification that the oil is of Iranian origin with all relevant supporting documentation, including specification of the production site at which the oil was extracted, and that the sale or transfer of the oil is by or for the account of the Government of Iran. Licenses will not be issued for importations of Iranian–origin oil which is not sold or transferred by or for the account of the Government of Iran. In cases where the oil is being imported either in whole or in part in resolution or settlement of a case pending before the Tribunal, applicants are required to identify the case and submit a copy of the settlement agreement and the Award on Agreed Terms issued by the Tribunal. In cases where any proceeds are generated for the account of the Government of Iran from the importation of Iranian–origin oil, the importer must demonstrate that irrevocable arrangements are in place that will ensure that the proceeds will be deposited in the Tribunal's Security Account.

§ 560.514 [Reserved]

§ 560.515 30–day delayed effective date for pre–May 7, 1995 trade contracts involving Iran.

(a) All transactions necessary to complete performance of a trade contract entered into prior to May 7, 1995, and involving Iran (a "pre–existing trade contract"), including the exportation of goods, services (including financial services), or technology from the United States that was authorized pursuant to Federal regulations in force immediately prior to May 6, 1995, or performance under a pre–existing trade contract for transactions in Iranian–origin or Government of Iran owned or controlled goods or services not involving importation into the United States, are authorized without specific licensing by the Office of Foreign Assets Control if the conditions in paragraph (a)(1) or (a)(2) are met:

(1) If the pre–existing trade contract is for exportation of goods or technology from the United States that was authorized pursuant to Federal regulations in force immediately prior to May 6, 1995, the goods or technology must be exported from the United States prior to 12:01 a.m. EDT, June 6, 1995, and all other activity by U.S. persons that is necessary and incidental to the performance of the pre–existing trade contract (other than payment under a financing contract) must be completed prior to 12:01 a.m. EDT, August 6, 1995; or

(2) If the pre–existing trade contract is for:

(i) The exportation of services from the United States and benefitting a person in Iran or the Government of Iran; or

(ii) The reexportation of goods or technology to Iran, the Government of Iran, or an entity owned or controlled by the Government of Iran that was authorized pursuant to Federal regulations in force immediately prior to May 6, 1995, or

(iii) Transactions relating to goods or services of Iranian origin or owned or controlled by the Government of Iran other than transactions relating to importation into the United States of such goods or services, all obligations under the pre–existing trade contract (other than payment under a financing contract) must be fully completed prior to 12:01 a.m. EDT, June 6, 1995.

(b) In order to complete performance of a pre–existing trade contract, the arrangement or renegotiation of contracts for transactions necessary and incidental to performance of the pre–existing trade contract is authorized. Such incidental transactions may include, for example, financing, shipping and insurance arrangements. Amendments to a pre–existing trade contract for the purpose of accelerating a previously–specified delivery schedule under a contract for a fixed quantity or value of goods, technology or services, or curtailing or canceling required performance, are authorized without specific licensing. Any other alteration of the trade contract must be specifically licensed by the Office of Foreign Assets Control.

(c) The existence of a contract will be determined with reference to the principles contained in Article 2 of the Uniform Commercial Code.

(d) No U.S. person may change its policies or operating procedures in order to enable a foreign entity owned or controlled by U.S. persons to enter into a transaction that could not be entered into directly by a U.S. person located in the United States pursuant to the prohibitions contained in this part.

§ 560.516 Payment and United States dollar clearing transactions involving Iran.

(a) United States depository institutions are authorized to process transfers of funds to or from Iran, or for the direct or indirect benefit of persons in Iran or the Government of Iran, if the transfer is covered in full by any of the following conditions and does not involve debiting or crediting an Iranian account:

(1) The transfer is by order of a foreign bank which is not an Iranian entity from its own account in a domestic bank (directly or through a foreign branch or subsidiary of a domestic bank) to an account held by a domestic bank (directly or through a foreign branch or subsidiary of a domestic bank) for a second foreign bank which is not an Iranian entity. For purposes of this section "foreign bank" includes a foreign subsidiary, but not a foreign branch of a domestic bank;

(2) The transfer arises from an underlying transaction that has been authorized by a specific or general license issued pursuant to this part;

(3) The transfer arises from an underlying transaction that is not prohibited or is exempted from regulation pursuant to Section 203(b) of the International Emergency Economic Powers Act, 50 U.S.C. 1702(b), such as an exportation of information or informational materials to Iran, a travel–related remittance, or payment for the shipment of a donation of articles to relieve human suffering or a third country transaction not involving a United States person nor otherwise prohibited by this part; or

(4) The transfer is a non–commercial remittance to or from Iran, such as a family remittance not related to a family–owned enterprise.

(b) Before a United States depository institution initiates a payment subject to the prohibitions contained in this part on behalf of any customer, or credits a transfer subject to such prohibitions to the account on its books of the ultimate beneficiary, the U.S. depository institution must determine that the transfer is not prohibited by this part.

(c) Pursuant to the prohibitions contained in § 560.208, a United States depository institution may not make transfers to or for the benefit of a foreign-organized entity owned or controlled by it if the underlying transaction would be prohibited if engaged in directly by the U.S. depository institution.

(d) This section does not authorize transactions with respect to property blocked pursuant to part 535.

§ 560.517 Exportation of services: Iranian accounts at United States depository institutions.

(a) United States depository institutions are prohibited from performing services with respect to Iranian accounts, as defined in § 560.320, at the instruction of the Government of Iran or persons located in Iran, except that United States depository institutions are authorized to provide and be compensated for services and incidental transactions with respect to:

(1) The maintenance of Iranian accounts, including the payment of interest and the debiting of service charges;

(2) The processing of transfers arising from underlying transactions that are exempted from regulation pursuant to section 203(b) of the International Emergency Economic Powers Act, 50 U.S.C. 1702(b), such as an exportation of information or informational materials to Iran, a travel–related remittance, or payment for the shipment of a donation of articles to relieve human suffering; and

(3) At the request of the account party, the closing of Iranian accounts and the lump sum transfer only to the account party of all remaining funds and other assets in the account.

(b) Specific licenses may be issued with respect to the operation of Iranian accounts that constitute accounts of:

(1) Foreign government missions and their personnel in Iran; or

(2) Missions of the Government of Iran in the United States.

§ 560.518 Transactions in Iranian–origin and Iranian Government property.

(a) Except for transactions involving the Government of Iran, all domestic transactions with respect to Iranian–origin goods located in the United States are authorized, provided that this paragraph (a) does not affect the status of property blocked pursuant to part 535 or detained or seized, or subject to detention or seizure, pursuant to this part.

(b) All transactions necessary and incidental to a United States person's sale or other disposition of goods or services of Iranian origin or owned or controlled by the Government of Iran that are located or to be performed outside the United States and were acquired by that United States person in transactions not prohibited by part 535 or this part are authorized, provided:

(1) The sale or other disposition does not result in the importation of such goods or services into the United States, and

(2) The sale or other disposition is completed no later than 12:01 a.m. EDT, August 6, 1995.

(c) Except as provided in paragraphs (a) and (b) of this section, United States persons may not deal in goods or services of Iranian origin or owned or controlled by the Government of Iran, except that the following transactions are authorized:

(1) Transactions by a United States person with third–country nationals incidental to the storage and maintenance in third countries of Iranian–origin goods owned prior to May 7, 1995, by that United States person or acquired thereafter by that United States person consistent with the provisions of this part;

(2) Exportation of Iranian–origin household and personal effects from the United States incident to the relocation of United States persons outside the United States; and

(3) Purchase for personal use or consumption in Iran of Iranian–origin goods or services.

(d) In addition to transactions authorized by paragraph (c)(1) of this section, a United States person is authorized after 12:01 a.m. EDT, May 7, 1995, to use or dispose of Iranian–origin household and personal effects that are located outside the United States and that have been acquired by the United States person in transactions not prohibited by part 535 or this part.

§ 560.519 Policy governing news organization offices.

(a) Specific licenses may be issued on a case–by–case basis authorizing transactions necessary for the establishment and operation of news bureaus in Iran by United States organizations whose primary purpose is the gathering and dissemination of news to the general public.

(b) Transactions that may be authorized include but are not limited to those incident to the following:

(1) Leasing office space and securing related goods and services;

(2) Hiring support staff;

(3) Purchasing Iranian–origin goods for use in the operation of the office; and

(4) Paying fees related to the operation of the office in Iran.

(c) Specific licenses may be issued on a case–by–case basis authorizing transactions necessary for the establishment and operation of news bureaus in the United States by Iranian organizations whose primary purpose is the gathering and dissemination of news to the general public.

(d) The number assigned to such specific licenses should be referenced in all import and export documents and in all funds transfers and other banking transactions through banking institutions organized or located in the United States in connection with the licensed transactions to avoid disruption of the trade and financial transactions.

§ 560.520 Exportation of agricultural commodities.

(a) All transactions by United States persons in connection with the exportation from the United States to Iran of any agricultural commodity under an export sales contract are authorized, provided:

(1) Such contract was entered into prior to 12:01 a.m. EDT, May 7, 1995; and

(2) The terms of such contract require delivery of the commodity prior to February 2, 1996.

(b) The performance of letters of credit and other financing agreements with respect to exports authorized by this section is authorized pursuant to their terms.

(c) For purposes of this section, the term "agricultural commodity" means feed grains, rice, wheat, cotton, peanuts, tobacco, dairy products, and oilseeds (including vegetable oil).

(d) Specific licenses may be granted on a case–by–case basis for transactions by United States persons in connection with the exportation of other agricultural articles from the United States to Iran that do not fall within the definition of "agricultural commodity" contained in paragraph (c) of this section, provided such exportation is pursuant to an export sales contract and the conditions contained in paragraphs (a)(1) and (a)(2) of this section are met.

§ 560.521 Diplomatic pouches.

All transactions in connection with the importation into the United States from Iran, or the exportation from the United States to Iran, of diplomatic pouches and their contents are authorized.

§ 560.522 Allowable payments for overflights of Iranian airspace.

Payments to Iran of charges for services rendered by the Government of Iran in connection with the overflight of Iran or emergency landing in Iran of aircraft owned by a United States person or registered in the United States are authorized.

§ 560.523 Importation of information and informational materials.

(a) In addition to transactions relating to information or informational materials that are exempted from regulation under § 560.210, the following are authorized:

(1) The importation of information and informational materials of Iranian origin from any location, whether commercial or otherwise, regardless of format or medium of transmission; and

(2) All financial and other transactions related to the importation of information and informational materials.

(b) Specific licenses may be issued on a case–by–case basis for the exportation of equipment necessary for the establishment of news wire feeds or other transmissions of information or informational materials.

§ 560.524 Household goods and personal effects.

(a) The exportation from the United States to Iran of household and personal effects, including baggage and articles for family use, of persons departing the United States to relocate in Iran is authorized provided the articles included in such effects have been actually used by such persons or by family members accompanying them, are not intended for any other person or for sale, and are not otherwise prohibited from exportation. See also, § 560.518(c)(2).

(b) The importation of Iranian–origin household and personal effects, including baggage and articles for family use, of persons arriving in the United States is authorized; to qualify, articles included in such effects must have been actually used abroad by such persons or by other family members arriving from the same foreign household, must not be intended for any other person or for sale, and must not be otherwise prohibited from importation.

§ 560.525 Exportation of certain legal services.

(a) The provision of the following legal services to the Government of Iran or to a person in Iran, and receipt of payment therefor, are authorized:

(1) Provision of legal advice and counselling on the requirements of and compliance with the laws of any jurisdiction within the United States, provided that such advice and counselling is not provided to facilitate transactions that would violate any of the prohibitions contained in this part;

(2) Representation when a person in Iran or the Government of Iran has been named as a defendant in or otherwise made a party to domestic United States legal, arbitration, or administrative proceedings;

(3) Initiation of domestic United States legal, arbitration, or administrative proceedings in defense of

---

property interests of the Government of Iran that were in existence prior to May 7, 1995, or acquired thereafter in a transaction not inconsistent with the prohibitions contained in this part;

(4) Representation before any federal or state agency with respect to the imposition, administration, or enforcement of United States sanctions against Iran;

(5) Initiation and conduct of legal proceedings, in the United States or abroad, including administrative, judicial and arbitral proceedings and proceedings before international tribunals (including the Iran–United States Claims Tribunal in The Hague and the International Court of Justice):

(i) To resolve disputes between the Government of Iran and the United States or a United States national;

(ii) Where the proceeding is contemplated under an international agreement; or

(iii) Where the proceeding involves the enforcement of awards, decisions, or orders resulting from legal proceedings within the scope of paragraph (a)(5)(i) or (a)(5)(ii) of this section, provided that any transaction, unrelated to the provision of legal services or the payment therefor, that is necessary or related to the execution of an award, decision or order resulting from such legal proceeding, or otherwise necessary for the conduct of such proceeding, and which would otherwise be prohibited by this part requires a specific license in accordance with §§ 560.510 and 560.801;

(6) Provision of legal advice and counselling in connection with settlement or other resolution of matters described in paragraph (a)(5) of this section; and

(7) Provision of legal services in any other context in which prevailing United States law requires access to legal counsel at public expense.

(b) The provision of any other legal services to a person in Iran or the Government of Iran, not otherwise authorized in or exempted by this part, requires the issuance of a specific license.

§ 560.526 Commodities trading and related transactions.

(a) *Trading in Iranian–origin commodities.* With respect to § 560.206, specific licenses may be issued on a case–by–case basis to authorize certain commodities trading by a United States person in Iranian–origin goods, or transactions incidental to such trading, where:

(1) No party to the transaction with the United States person is a person in Iran or the Government of Iran, and

(2) It was impossible for the United States person to determine at the time of entry into the transaction, given all circumstances of the transaction, that the goods would be of Iranian origin or would be owned or controlled by the Government of Iran.

(b) *Trading in commodities destined for Iran or the Government of Iran.* With respect to § 560.204, specific licenses may be issued on a case–by–case basis to authorize certain trading by United States persons in commodities of U.S. or third–country origin destined for Iran or the Government of Iran, or transactions incidental to such trading, where:

(1) It was impossible for the United States person to determine at the time of entry into the transaction, given all circumstances of the transaction, that the goods would be for delivery to Iran or to the Government of Iran;

(2) The United States person did not contract with a person in Iran or the Government of Iran; and

(3) The United States person did not initiate the nomination of the commodity's destination as Iran or the Government of Iran.

§ 560.527 Rescheduling existing loans.

Specific licenses may be issued on a case–by–case basis for rescheduling loans or otherwise extending the maturities of existing loans, and for charging fees or interest at commercially reasonable rates, in connection therewith, provided that no new funds or credits are thereby transferred or extended to Iran or the Government of Iran.

§ 560.528 Aircraft safety.

Specific licenses may be issued on a case–by–case basis for the exportation and reexportation of goods, services, and technology to insure the safety of civil aviation and safe operation of U.S.–origin commercial passenger aircraft.

Subpart F—Reports

§ 560.601 Required records.

Every person engaging in any transaction subject to the provisions of this part must keep a full and accurate record of each such transaction in which that person engages, regardless of whether such transaction is effected pursuant to license or otherwise, and such record must be available for examination for at least 2 years after the date of such transaction.

§ 560.602 Reports to be furnished on demand.

Every person is required to furnish under oath, in the form of reports or otherwise, from time to time and at any time as may be required, complete information relative to any transaction, regardless of whether such transaction is effected pursuant to license or otherwise, subject to the provisions of this part. Such reports may be required to include the production of any books of account, contracts, letters or other papers, connected with any such transaction or property, in the custody or control of the persons required to make such reports. Reports with respect to transactions may be required either before or after such transactions are completed. The Director of Foreign Assets Control may, through any person or agency, conduct investigations, hold hearings, administer oaths, examine witnesses, receive evidence, take depositions, and require by subpoena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to any matter under investigation, regardless of whether any report has been required or filed in connection therewith.

§ 560.603 Reports on oil transactions engaged in by foreign affiliates.

(a) *Requirement for reports.* Reports are required to be filed in the manner prescribed in this section with respect to all reportable transactions, as defined in paragraph (f) of this section, engaged in by the foreign affiliates of a United States person. Reports are due within fifteen days after the end of each calendar quarter. The first report must cover the period beginning June 6, 1995, and ending September 30, 1995. Reports must be filed covering each three–month period thereafter.

(b) *Who must report.* Reports are required to be filed by any United States person whose foreign affiliate engaged in a reportable transaction during the prior calendar quarter. A single United States entity within a consolidated or affiliated group may be designated to report on each foreign affiliate of the United States members of the group. Such centralized reporting may be done by the United States person who owns or controls, or has been delegated authority to file on behalf of, the remaining United States persons in the group.

(c) *What must be reported.*

(1) Part I of the report must include the following information with respect to United States persons with a foreign affiliate:

(i) Its name and address;

(ii) Its principal place of business;

(iii) For entities, its state of incorporation; and

(iv) The name, corporate title, and telephone number of the individual to contact concerning the report.

(2) Part II of the report must include the following information with respect to the foreign affiliate:

(i) Its name and address;

(ii) The country of its incorporation and its principal place of business;

(iii) Its entity type (e.g., corporation, partnership, limited liability company, etc.);

(iv) Its relationship to the reporting United States person, including percentage of direct and indirect ownership;

(v) The name, title, and nationality of principal corporate officers; and

(vi) A description of the manner and degree to which the United States person exercises control over the foreign affiliate's oil–related transactions. The description must include any written or verbal directions or instructions issued by the United States person to the foreign affiliate concerning such transactions, any requirements for prior approval by the United States person concerning such transactions, and the frequency of, and the nature of information contained in, written or verbal reports by the foreign affiliate to the United States person in which these transactions are described, aggregated, or summarized.

(3) Part III of the report must include the following information with respect to each reportable transaction (a separate part III must be submitted for each reportable transaction):

(i) The nature of transaction (e.g., purchase, sale, swap);

(ii) A description of the product, technology, or service involved;

(iii) The name of the Iranian or third country party involved in the transaction;

(iv) The currency and amount of the transaction (and corresponding United States dollar value of the transaction, if not conducted in United States dollars);

(v) The division or branch of the foreign affiliate involved in the negotiating and executing of the transaction;

(vi) The name, corporate title, and nationality of each employee engaged in the transaction; and

(vii) How the transaction is reflected in the report or reports as required by paragraph (c)(2)(vi) of this section. If the transaction is aggregated with other transactions, an explanation must be provided for all the components in the aggregate report.

(d) *Where to report.* Reports must be filed with the Compliance Programs Division, Office of Foreign Assets Control, Department of the Treasury, 1500 Pennsylvania Avenue, NW—Annex, Washington, DC 20220. Reports may be submitted by facsimile transmission at 202–622–1657. A copy must be retained for the reporter's records.

(e) *Whom to contact.* Blocked Assets Division, Office of Foreign Assets Control, Department of the Treasury, 1500 Pennsylvania Avenue, NW—Annex, Washington, DC 20220, telephone: 202–622–2440.

(f) *Definitions.* For the purposes of this section:

(1) The term "foreign affiliate" means a person or entity (other than a United States person as defined in § 560.314) which is organized or located outside of the United States, and which is owned or controlled by a United States person or persons; and

(2) The term "reportable transaction" includes any purchase, sale, or swap, or the provision of services related to such purchase, sale, or swap, such as financing, lifting, transporting, insuring, processing, transforming, or incorporating, related to:

(i) Iranian–origin crude oil or natural gas; or

(ii) Crude oil or natural gas and involving Iran or the Government of Iran.

Subpart G—Penalties

§ 560.701 Penalties.

(a) Attention is directed to § 206 of the International Emergency Economic Powers Act (50 U.S.C. 1705), which provides that a civil penalty of not to exceed $10,000 may be imposed on any person who violates any license, order, or regulation issued under the International Emergency Economic Powers Act, and that whoever willfully violates any license, order, or regulation issued under the International Emergency Economic Powers Act may, upon conviction, be fined not more than $50,000, or, if a natural person, may be imprisoned for not more than 10 years, or both; and any officer, director, or agent of any corporation who knowingly participates in such violation may be punished by a like fine, imprisonment, or both. Section 206 of the International Emergency Economic Powers Act is applicable to violations of any provision of this part and to violations of the provisions of any license, ruling, regulation, order, direction, or instruction issued by or pursuant to the direction or authorization of the Secretary of the Treasury pursuant to this part or otherwise under the International Emergency Economic Powers Act.

(b) Attention is directed to 18 U.S.C. 1001, which provides that whoever, in any matter within the jurisdiction of any department or agency of the United States, knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious or fraudulent statements or representation or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, may be fined not more than $10,000 or imprisoned not more than 5 years, or both.

(c) Violations of this part may also be subject to relevant provisions of the Customs laws and other applicable laws.

§ 560.702 Detention of shipments.

Import shipments into the United States of Iranian–origin goods in violation of § 560.201 and export shipments from the United States of goods destined for Iran in violation of §§ 560.202 or 560.204 shall be detained. No such import, export, or reexport will be permitted to proceed, except as specifically authorized by the Secretary of the Treasury. Unless licensed, such shipments are subject to penalty or seizure and forfeiture action, under the Customs laws or other applicable provisions of law, depending on the circumstances.

§ 560.703 Prepenalty notice.

(a) *When required.* If the Director of the Office of Foreign Assets Control has reasonable cause to believe that there has occurred a violation of any provision of this part or a violation of the provisions of any license, ruling, regulation, order, direction or instruction issued by or pursuant to the direction or authorization of the Secretary of the Treasury pursuant to this part or otherwise under the International Emergency Economic Powers Act, and the Director determines that further proceedings are warranted, he may issue to the person concerned a notice of his intent to impose a monetary penalty. The prepenalty notice may be issued whether or not another agency has taken any action with respect to this matter.

(b) *Contents*—(1) *Facts of violation.* The prepenalty notice will describe the violation, specify the laws and regulations allegedly violated, and state the amount of the proposed monetary penalty.

(2) *Right to make presentations.* The prepenalty notice also shall inform the person of his right to make a written presentation within 30 days of mailing of the notice as to why a monetary penalty should not be imposed, or, if imposed, why it should be in a lesser amount than proposed.

§ 560.704 Presentation responding to prepenalty notice.

(a) *Time within which to respond.* The named person shall have 30 days from the date of mailing of the prepenalty notice to make a written presentation to the Director.

(b) *Form and contents of the written presentation.* The written presentation need not be in any particular form, but shall contain information sufficient to indicate that it is in response to the prepenalty notice. It should contain responses to the allegations in the prepenalty notice and set forth the reasons why the person believes the penalty should not be imposed or, if imposed, why it should be in a lesser amount than proposed.

§ 560.705 Penalty notice.

(a) *No violation.* If, after considering any presentations made in response to the prepenalty notice and any relevant facts, the Director determines that there was no violation by the person named in the prepenalty notice, he shall promptly notify the person in writing of the determination and that no monetary penalty will be imposed.

(b) *Violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was a violation by the person named in the prepenalty notice, he may issue a written notice of the imposition of the monetary penalty to that person.

§ 560.706 Referral for administrative collection measures or to United States Department of Justice.

In the event that the person named does not pay the penalty imposed pursuant to this part or make payment arrangements acceptable to the Director within 30 days of the mailing of the written notice of the imposition of the penalty, the matter may be referred for administrative collection measures or to the United States Department of Justice for appropriate action to recover the penalty in a civil suit in a Federal district court.

Subpart H—Procedures

§ 560.801 Licensing.

(a) *General licenses.* General licenses have been issued authorizing under appropriate terms and conditions certain types of transactions which are subject to the prohibitions contained in this part. All such licenses in effect on the date of publication are set forth in subpart E of this part. It is the policy of the Office of Foreign Assets Control not to grant applications for specific licenses authorizing transactions to which the provisions of an outstanding general license are applicable. Persons availing themselves of certain general licenses may be required to file reports and statements in accordance with the instructions specified in those licenses. Failure to file such reports or statements will nullify the authorization to such person provided by the general license.

(b) *Specific licenses*—(1) *General course of procedure.* Transactions subject to the prohibitions contained in this part which are not authorized by general license may be effected only under specific licenses.

(2) *Applications for specific licenses.* Applications for specific licenses to engage in any transactions prohibited by or pursuant to this part may be filed by letter with the Office of Foreign Assets Control. Any person having an interest in a transaction or proposed transaction may file an application for a license authorizing such transaction, but the applicant for a specific license is required to make full disclosure of all parties in interest to the transaction so that a decision on the application may be made with full knowledge of all relevant facts and so that the identity and location of the persons who know about the transaction may be easily ascertained in the event of inquiry.

(3) *Information to be supplied.* The applicant must supply all information specified by relevant instructions and/or forms, and must fully disclose the names of all the parties who are concerned with or interested in the proposed transaction. If the application is filed by an agent, the agent must disclose the name of his principal(s). Such documents as may be relevant shall be attached to each application as a part of such application except that documents previously filed with the Office of Foreign Assets Control may, where appropriate, be incorporated by reference. Applicants may be required to furnish such further information as is deemed necessary to a proper determination by the Office of Foreign Assets Control. Any applicant or other party in interest desiring to present additional information or discuss or argue the application may do so at any time before or after decision. Arrangements for oral presentation should be made with the Office of Foreign Assets Control.

(4) *Effect of denial.* The denial of a license does not preclude the reopening of an application or the filing of a further application. The applicant or any other party in interest may at any time request explanation of the reasons for a denial by correspondence or personal interview.

(5) *Reports under specific licenses.* As a condition for the issuance of any license, the licensee may be required to file reports with respect to the transaction covered by the license, in such form and at such times and places as may be prescribed in the license or otherwise.

(6) *Issuance of license.* Licenses will be issued by the Office of Foreign Assets Control acting on behalf of the Secretary of the Treasury, or licenses may be issued by the Secretary of the Treasury acting directly or through any specifically designated person, agency, or instrumentality.

(c) *Address.* License applications, reports, and inquiries should be addressed to the appropriate section or individual within the Office of Foreign Assets Control, or to the Director, at the following address: Office of Foreign Assets Control, Department of the Treasury, 1500 Pennsylvania Avenue, NW—Annex, Washington, DC 20220.

§ 560.802 Decisions.

The Office of Foreign Assets Control will advise each applicant of the decision respecting filed applications. The decision of the Office of Foreign Assets Control acting on behalf of the Secretary of the Treasury with respect to an application shall constitute final agency action.

§ 560.803 Amendment, modification, or revocation.

The provisions of this part and any rulings, licenses, whether general or specific, authorizations, instructions, orders, or forms issued hereunder may be amended, modified, or revoked at any time.

§ 560.804 Rulemaking.

(a) All rules and other public documents are issued by the Secretary of the Treasury upon recommendation of the Director of the Office of Foreign Assets Control. In general, rulemaking by the Office of Foreign Assets Control involves foreign affairs functions of the United States, and for that reason is exempt from the requirements under the Administrative Procedure Act (5 U.S.C. 553) for notice of proposed rulemaking, opportunity for public comment, and delay in effective date. Wherever possible, however, it is the practice of the Office of Foreign Assets Control to receive written submissions or hold informal consultations with interested parties before the issuance of any rule or other public document.

(b) Any interested person may petition the Director of the Office of

Foreign Assets Control in writing for the issuance, amendment, or repeal of any rule.

§ 560.805 Delegation by the Secretary of the Treasury.

Any action which the Secretary of the Treasury is authorized to take pursuant to Executive Order 12613, Executive Order 12957, Executive Order 12959, and any further Executive orders relating to the national emergency declared in Executive Order 12957 may be taken by the Director, Office of Foreign Assets Control, or by any other person to whom the Secretary of the Treasury has delegated authority so to act.

§ 560.806 Customs procedures: Goods specified in § 560.201.

(a) With respect to goods specified in § 560.201, and not otherwise licensed or excepted from the scope of that section, appropriate Customs officers shall not accept or allow any:

(1) Entry for consumption or warehouse (including any appraisement entry, any entry of goods imported in the mails, regardless of value, and any informal entries);

(2) Entry for immediate exportation;

(3) Entry for transportation and exportation;

(4) Withdrawal from warehouse;

(5) Admission, entry, transfer or withdrawal to or from a foreign trade zone; or

(6) Manipulation or manufacture in a warehouse or in a foreign trade zone.

(b) Customs officers may accept or allow the importation of Iranian–origin goods under the procedures listed in paragraph (a) if:

(1) A specific license pursuant to this part is presented; or

(2) Instructions authorizing the transaction are received from the Office of Foreign Assets Control.

(c) Whenever a specific license is presented to an appropriate Customs officer in accordance with this section, one additional legible copy of the entry, withdrawal or other appropriate document with respect to the merchandise involved must be filed with the appropriate Customs officers at the port where the transaction is to take place. Each copy of any such entry, withdrawal or other appropriate document, including the additional copy, must bear plainly on its face the number of the license pursuant to which it is filed. The original copy of the specific license must be presented to the appropriate Customs officers in respect of each such transaction and must bear a notation in ink by the licensee or person presenting the license showing the description, quantity and value of the merchandise to be entered, withdrawn or otherwise dealt with. This notation must be so placed and so written that there will exist no possibility of confusing it with anything placed on the license at the time of its issuance. If the license in fact authorizes the entry, withdrawal, or other transaction with regard to the merchandise, the appropriate Customs officer, or other authorized Customs employee, shall verify the notation by signing or initialing it after first assuring himself that it accurately describes the merchandise it purports to represent. The license shall thereafter be returned to the person presenting it and the additional copy of the entry, withdrawal or other appropriate document shall be forwarded by the appropriate Customs officer to the Office of Foreign Assets Control.

(d) If it is unclear whether an entry, withdrawal or other action affected by this section requires a specific license from the Office of Foreign Assets Control, the appropriate Customs officer may withhold any action thereon and shall advise such person to communicate directly with the Office of Foreign Assets Control to request that instructions be sent to the Customs officer to authorize him to take action with regard thereto.

§ 560.807 Rules governing availability of information.

(a) The records of the Office of Foreign Assets Control which are required by 5 U.S.C. 552 to be made available to the public shall be made available in accordance with the definitions, procedures, payment of fees, and other provisions of the Regulations on the Disclosure of Records of the Office of the Secretary and of other bureaus and offices of the Department of Treasury issued pursuant to 5 U.S.C. 552 and published at 31 CFR part 1.

(b) The records of the Office of Foreign Assets Control required by the Privacy Act (5 U.S.C. 552a) to be made available to an individual shall be made available in accordance with the definitions, procedures, requirements for payment of fees, and other provisions of the Regulations on Disclosure of Records of the Departmental Offices and of other bureaus and offices of the Department of the Treasury issued under 5 U.S.C. 552a and published at 31 CFR part 1.

(c) Any form issued for use in connection with the Iranian Transactions Regulations may be obtained in person or by writing to the Office of Foreign Assets Control, Department of the Treasury, 1500 Pennsylvania Avenue, NW—Annex, Washington, DC 20220 or by calling 202/622–2480.

Subpart I—Paperwork Reduction Act

§ 560.901 Paperwork Reduction Act notice.

The information collection requirements in §§ 560.601, 560.602, and 560.801 have been approved by the Office of Management and Budget and assigned control number 1505–0106.

Dated: August 23, 1995.

R. Richard Newcomb,

Director, Office of Foreign Assets Control.

Approved: August 28, 1995.

John P. Simpson,

Deputy Assistant Secretary (Regulatory, Tariff and Trade Enforcement).

BILLING CODE 4810–25–F

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA 137–1–7051a; FRL–5262–2]

Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision, Mojave Desert Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is taking direct final action on revisions to the California State Implementation Plan. The revisions concern negative declarations from the Mojave Desert Air Quality Management District (MDAQMD) for two source categories that emit volatile organic compounds (VOC): Asphalt Air Blowing and Vacuum Producing Devices or Systems. The MDAQMD has certified that these source categories are not present in the District and this information is being added to the federally approved State Implementation Plan. The intended effect of approving these negative declarations is to meet the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). In addition, the final action on these negative declarations serves as a final determination that the finding of nonsubmittal for these source categories has been corrected and that on the effective date of this action, any Federal Implementation Plan (FIP) clock is stopped. Thus, EPA is finalizing the approval of these revisions into the California SIP under provisions of the CAA regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards and plan requirements for nonattainment areas.

DATES: This action is effective on November 13, 1995 unless adverse or critical comments are received by October 11, 1995. If the effective date is delayed, a timely notice will be published in the **Federal Register**.

ADDRESSES: Copies of the submitted negative declarations are available for public inspection at EPA's Region IX office and also at the following locations during normal business hours.

Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105

SUPPLEMENTARY INFORMATION:

Applicability

The revisions being approved as additional information for the California SIP include two negative declarations from the MDAQMD regarding the following source categories: (1) Asphalt Air Blowing and (2) Vacuum Producing Devices or Systems. These negative declarations were submitted by the California Air Resources Board (CARB) to EPA on December 20, 1994 and December 29, 1994, respectively.

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 Act or pre-amended Act), that included the portions of San Bernardino County Air Pollution Control District[1] within the Southeast Desert Air Quality Management Area (AQMA). 43 FR 8964, 40 CFR 81.305. Because this area was unable to meet the statutory attainment date of December 31, 1982, California requested under section 172 (a)(2), and EPA approved, an extension of the attainment date to December 31, 1987. (40 CFR 52.222). On May 26, 1988, EPA notified the Governor of California, pursuant to section 110(a)(2)(H) of the 1977 Act, that the above district's portion of the California SIP was inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Pub. L. 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. In amended section 182(b)(2) of the CAA, Congress statutorily adopted the requirement that nonattainment areas submit reasonably available control technology (RACT) rules for all major sources of VOC and for all VOC sources covered by a Control Techniques Guideline document by November 15, 1992.[2]

Section 182(b)(2) applies to areas designated as nonattainment prior to enactment of the amendments and classified as moderate or above as of the date of enactment. The Southeast Desert AQMA is classified as severe;[3] therefore, this area was subject to the RACT catch-up requirement and the November 15, 1992 deadline.

The negative declaration for Asphalt Air Blowing was adopted on October 26, 1994 and submitted by the State of California on December 20, 1994 and the negative declaration for Vacuum Producing Devices or Systems was adopted on December 21, 1994 and submitted by the State of California for the MDAQMD on December 29, 1994. The submitted negative declarations were found to be complete on January 3, 1995 pursuant to EPA's completeness criteria that are set forth in 40 CFR part 51 Appendix V[4] and are being finalized for approval into the SIP as additional information. This notice addresses EPA's direct-final action for the MDAQMD negative declarations for Asphalt Air Blowing and Vacuum Producing Devices or Systems. The submitted negative declarations certify that there are no VOC sources in these source categories located inside MDAQMD's portion of the Southeast Desert AQMA. VOCs contribute to the production of ground level ozone and smog. These negative declarations were adopted as part of MDAQMD's effort to meet the requirements of section 182(b)(2) of the CAA.

EPA Evaluation and Action

In determining the approvability of a negative declaration, EPA must evaluate the declarations for consistency with the requirements of the CAA and EPA regulations, as found in section 110 of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans).

In Board Resolution No. 94–26, the District rescinded Rule 470, Asphalt Air Blowing. Asphalt Air Blowing Operations are typically conducted at refineries, and there are no refineries located in MDAQMD. MDAQMD's emission inventory has also revealed that there are no sources of VOC emissions from this source category. In Board Resolution No. 94–38, the District rescinded Rule 465, Vacuum Producing Devices or Systems and certified that MDAQMD's emission inventory has revealed that there are no sources of VOC emissions from this source category located within the MDAQMD's jurisdiction.

EPA has evaluated these negative declarations and has determined that they are consistent with the CAA, EPA regulations, and EPA policy. MDAQMD's negative declarations for Asphalt Air Blowing and Vacuum Producing Devices or Systems are being approved under section 110(k)(3) of the CAA as meeting the requirements of section 110(a) and Part D. Therefore, if this direct final action is not withdrawn, on November 13, 1995, any FIP clock is stopped.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

EPA is publishing this notice without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this **Federal Register** publication, the EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 13, 1995, unless, by no later than October 11, 1995, adverse or critical comments are received.

---

[1] On July 1, 1993, the San Bernardino County Air Pollution Control District was renamed the Mojave Desert Air Quality Management District.

[2] Mojave Desert Air Quality Management District did not make the required SIP submittals by November 15, 1992. On January 15, 1993, the EPA made a finding of failure to make a submittal pursuant to section 179(a)(1), which started an 18-month sanction clock. The negative declarations being acted on in this direct final rulemaking were submitted in response to the EPA finding of failure to submit.

[3] Southeast Desert Air Quality Management Area retained its designation of nonattainment and was classified by operation of law pursuant to sections 107(d) and 181(a) upon the date of enactment of the CAA. See 55 FR 56694 (November 6, 1991).

[4] EPA adopted the completeness criteria on February 16, 1990 (55 FR 5830) and, pursuant to section 110(k)(1)(A) of the CAA, revised the criteria on August 26, 1991 (56 FR 42216).

If the EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent notice that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective November 13, 1995.

Regulatory Process

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises and government entities with jurisdiction over population of less than 50,000.

Because this action does not create any new requirements but simply includes additional information into the SIP, I certify that it does not have a significant impact on any small entities. Moreover, due to the nature of the Federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S. Ct. 1976); 42 U.S.C. 7410 (a)(2).

Unfunded Mandates

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector or to State, local, or tribal governments in the aggregate.

Through submission of this state implementation plan or plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under Part D of the Clean Air Act. These rules may bind State, local, and tribal governments to perform certain actions and also require the private sector to perform certain duties. The negative declarations being approved by this action will impose no new requirements because affected sources are already subject to these regulations under State law. Therefore, no additional costs to State, local, or tribal governments or to the private sector result from this action. EPA has also determined that this [proposed or final] action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

The OMB has exempted this action from review under Executive Order 12866.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated July 10, 1995.

Felicia Marcus,

Regional Administrator.

Subpart F of Part 52, Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

Subpart F—California

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

2. Section 52.220 is amended by removing paragraph (c)(198)(ii).

3. Subpart F is amended by adding § 52.222 to read as follows:

§ 52.222 Negative declarations.

(a) The following air pollution control districts submitted negative declarations for volatile organic compound source categories to satisfy the requirements of section 182 of the Clean Air Act, as amended. The following negative declarations are approved as additional information to the State Implementation Plan.

(1) Mojave Desert Air Quality Management District.

(i) Natural Gas and Gasoline Processing Equipment and Chemical Processing and Manufacturing were submitted on July 13, 1994 and adopted on May 25, 1994.

(ii) Asphalt Air Blowing was submitted on December 20, 1994 and adopted on October 26, 1994.

(iii) Vacuum Producing Devices or Systems was submitted on December 29, 1994 and adopted on December 21, 1994.

Approval and Promulgation of Air Quality Implementation Plans—Connecticut; PM10 Attainment Plan and Contingency Measures for New Haven

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the State of Connecticut to satisfy certain federal requirements for the New Haven initial PM10 nonattainment area. The purpose of this action is to bring about the attainment of the national ambient air quality standards (NAAQS) for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM10). EPA is also approving reasonable available control measures (RACM) and contingency measures for the New Haven initial PM10 moderate nonattainment area as established in this SIP revision, since Connecticut has demonstrated implementation of RACM will attain and maintain the PM10 NAAQS. Additionally, EPA is approving Connecticut's adoption of the PM10 NAAQS and emergency episode regulation. This action is being taken under the Clean Air Act.

DATES: This final rule is effective November 13, 1995, unless notice is received by October 11, 1995 that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Comments may be mailed to Susan Studlien, Acting Director, Air, Pesticides and Toxics Management Division, EPA-New England, JFK Federal Building (AAA), Boston, MA 02203–2211. Copies of the documents relevant to this action are available for public inspection by appointment during normal business hours at the Air,

Pesticides and Toxics Management Division, EPA-New England, One Congress Street, 10th floor, Boston, MA; Air and Radiation Docket and Information Center, US Environmental Protection Agency, 401 M Street, SW, (LE–131), Washington, DC 20460; and the Bureau of Air Management, Department of Environmental Protection, State Office Building, 79 Elm Street, Hartford, CT 06106–1630.

SUPPLEMENTARY INFORMATION:

Background

Part D, Subparts 1 and 4 of Title I of the Clean Air Act Amendments of 1990 (hereafter referred to as "the Act") set out air quality planning requirements for moderate PM10 nonattainment areas. The EPA has issued a "General Preamble" describing EPA's preliminary views on how EPA intends to review SIPs and SIP revisions submitted under Title I of the Act, including those State submittals containing moderate PM10 nonattainment area SIP requirements. [See, generally, 57 FR 13498 (April 16, 1992) and 57 FR 18070 (April 28, 1992).] Because EPA is describing its interpretations here only in broad terms, the reader should refer to the General Preamble for a more detailed discussion of the interpretations of Title I advanced in this approval and the supporting rationale.

By November 15, 1991, States containing initial moderate PM10 nonattainment areas were required to submit, among other things, the following items. [See §§ 172(c), 188, and 189 of the Act.]

- Provisions to assure that reasonably available control measures (RACM)—including such reductions in emissions from existing sources in the area as may be obtained through the adoption, at a minimum, of reasonably available control technology (RACT)—shall be implemented no later than December 10, 1993;
- Either a demonstration, including air quality modeling, that the plan will provide for attainment as expeditiously as practicable but no later than December 31, 1994 or a demonstration that attainment by that date is impracticable;
- Quantitative milestones which are to be achieved every 3 years and which demonstrate reasonable further progress (RFP) toward attainment by December 31, 1994; and
- Provisions to assure that the control requirements applicable to major stationary sources of PM10 also apply to major stationary sources of PM10 precursors except where the Administrator determines that such sources do not contribute significantly to PM10 levels which exceed the NAAQS in the area.

Some provisions were due at a later date. States with initial moderate PM10 nonattainment areas were required to submit a permit program for the construction and operation of new and modified major stationary sources of PM10 by June 30, 1992. [See § 189(a).] Such States also must submit contingency measures by November 15, 1993—which become effective without further action by the State or EPA—upon a determination by EPA that the area has failed to achieve RFP or to attain the PM10 NAAQS by the applicable statutory deadline. [See § 172(c)(9) and 57 FR 13543–44.]

Summary of Connecticut's SIP Revision

On March 24, 1994, the State of Connecticut submitted a formal revision to its State Implementation Plan (SIP). This SIP revision consists of 7 consent orders and corresponding compliance plans, which contain enforceable control measures to reduce the re-entrainment of fugitive emissions from roads in New Haven. The implementation of these control measures by the end of 1994 will reduce PM10 emissions by 157 tons below the uncontrolled levels. Accordingly, CT DEP has adopted reasonable available control measures (RACM) for PM10 and through dispersion modeling has demonstrated that these control measures are sufficient to expeditiously attain PM10 NAAQS in New Haven. As required, the road dust control measures implemented through the consent orders also assure maintenance of the 24-hour PM10 NAAQS 3 years beyond the December 31, 1994 statutory attainment date. Additionally, Connecticut's SIP revision provides for the implementation of contingency measures, which were due to EPA by November 15, 1993. CT DEP submitted a supplement on May 20, 1994, which relies on a conservative strategy from one of the consent orders to satisfy the requirements for § 172(c)(9) contingency measures. This submittal demonstrates that the City of New Haven's controls will go beyond RACM and these excess reductions will serve as Connecticut's contingency measures.

These submittals complete the attainment plan and contingency measures for New Haven by meeting the applicable requirements to demonstrate attainment of the PM10 NAAQS by December 31, 1994 and maintenance of those standards for 3 years beyond that. These requirements are outlined in Part D, Subparts 1 and 4 of the Act and elaborated upon in the General Preamble.

Section 110(k) of the Act sets out provisions governing EPA's review of SIP submittals. (See 57 FR 13565–66.) Specific requirements and the rationale for EPA's proposed action are detailed in the Technical Support Document (TSD), dated March 27, 1995, accompanying this approval action and are summarized, but not restated, here in the following paragraphs. Interested parties should consult the TSD or Connecticut's submittals for details on the aspects of the New Haven SIP.

Procedural Background

The Act requires States to observe certain procedural requirements in developing implementation plans and plan revisions for submission to EPA. Section 110(a)(2) of the Act provides that each implementation plan submitted by a State must be adopted after reasonable notice and public hearing. Section 110(l) of the Act similarly provides that each revision to an implementation plan submitted by a State under the Act must be adopted by such State after reasonable notice and public hearing. Section 172(c)(9) of the Act also requires that plan provisions for nonattainment areas meet the applicable provisions of § 110(a)(2).

EPA must also determine whether a submittal is complete and therefore warrants further EPA review and action. (See § 110(k)(1) and 57 FR 13565.) EPA's completeness criteria for SIP submittals are set out at 40 CFR Part 51, Appendix V (1991), as amended by 57 FR 42216 (August 26, 1991). EPA attempts to make completeness determinations within 60 days of receiving a submittal. However, a submittal is deemed complete by operation of law if EPA does not make a completeness determination by 6 months after receipt of the submittal.

The State of Connecticut held public hearings on August, 20, 1993, October 18, 1993, December 29, 1993, and January 28, 1994 to entertain public comment on the various components of the PM10 attainment plan, consent orders, and compliance plans proposed for New Haven. The Commissioner of CT DEP (the Governor's designee) submitted the plans and consent orders to EPA on March 24, 1994 as a proposed revision to the SIP. On May 20, 1994, the Commissioner further submitted proposed PM10 contingency measures for New Haven.

On March 18, 1993, the State of Connecticut held a public hearing to amend its air quality standards and emergency episode regulations

995
MI

concerning PM10. The CT DEP adopted the amendments upon filing with the Secretary of State on April 23, 1993, and the EPA received them as a proposed revision to the SIP on March 16, 1995.

EPA reviewed all submittals to determine completeness in accordance with criteria outlined in 40 CFR Part 51 Appendix V and as amended by 57 FR 42216 (August 26, 1991). In letters dated May 12, 1994, July 2, 1994, and April 5, 1995, EPA-New England informed the Connecticut Governor's designee that the respective submittals were determined complete and explained how the review process would proceed.

Accurate Emissions Inventory

Section 172(c)(3) of the Act requires that nonattainment plan provisions include a comprehensive, accurate, and current inventory of actual emissions from all sources of relevant pollutants in the nonattainment area. The emissions inventory should also include a comprehensive, accurate, and current inventory of allowable emissions in the area. Because such inventories are necessary to an area's attainment demonstration, the emissions inventories must be received with the attainment SIP submission. (See 57 FR 13539.)

CT DEP determined that the PM10 nonattainment problem in New Haven was a local problem in the area around the Stiles Street and Yankee Gas monitoring sites. Mud and dirt from the unpaved areas in their vicinity are chronically dragged out onto area streets and are re-entrained by local traffic, contributing to high levels of airborne PM10 and therefore exceedences at nearby monitors. Corroborating CT DEP's observations and conclusions, Midwest Research Institute (MRI) made an independent general assessment of the Stiles Street area, as presented in a revised final report titled *Recommendations for an Approvable SIP Revision: Revised Final Report* (September 10, 1993).

CT DEP submitted an emissions inventory for baseyear 1990. Due to the localized and unique nature of the complex fugitive dust sources, a micro-scale inventory was developed for this section of New Haven, while the remainder of the inventory was developed on a larger scale from county or town-wide data. Moreover, Connecticut DEP's dispersion modeling confirms what its inventory shows: point sources do not contribute significantly to PM10 NAAQS violations in this airshed. EPA considers control measures which do not expedite attainment, or affect sources that contribute to PM10 levels, unreasonable even though technologically and economically feasible.

Entrainment of dust by vehicular traffic contributed 2407 tons of the 1990 baseyear actual PM10 emissions, which totalled 2990 tons. Point sources contributed 120 tons and area sources added 463 tons more. EPA is satisfied that Connecticut's inventory is sufficiently accurate and comprehensive for determining the adequacy of the New Haven attainment demonstration consistent with the requirements in § 172(c)(3) and § 110(a)(2)(k). Therefore, EPA is approving this emissions inventory, the details of which are embodied in the TSD.

RACM/RACT

As noted, the initial moderate PM10 nonattainment areas were required to submit provisions to assure that RACM/RACT are implemented no later than December 10, 1993. (See §§ 172(c)(1) and 189(a)(1)(C).) The General Preamble contains a detailed discussion of EPA's interpretation of the RACM/RACT requirement. (See 57 FR 13539–45 and 13560–61.)

CT DEP attributed the highest PM10 contributions in the New Haven area to mud and dirt from unpaved areas being dragged out onto area streets and re-entrained by local traffic. Also, frequent travel across private unpaved storage areas and emissions from loading and unloading of shredded scrap metal contribute to excessively high ambient PM10 levels in the area.

Accordingly, CT DEP negotiated and executed a set of 7 consent orders and compliance plans to implement RACM for PM10 area sources in New Haven. These orders and their effective dates are as outlined below.

CONSENT ORDERS FOR NEW HAVEN INITIAL MODERATE PM10 NONATTAINMENT AREA

Order No.	State of Connecticut vs.	Effective date
8073	City of New Haven	September 24, 1993.
8074	Waterfront Enterprises, Inc.	November 5, 1993.
8075	Laydon Construction	September 21, 1993.
8076	United Illuminating Company	December 2, 1993.
8076c	M. J. Metals, Inc.	June 18, 1993.
8078	New Haven Terminal, Inc.	November 15, 1993.
8079	Yankee Gas Services Company	September 24, 1993.

Specifically, the control measures adopted accomplish the following.

- All unpaved private industrial travel lanes and unpaved public roads in the Stiles Street area will be eliminated.
- All paved private travel lanes will be delineated with concrete rails or other effective borders for the purpose of eliminating off-pavement travel and reducing the transfer of exposed soil to adjacent road surfaces.
- Private travel roads will be posted with speed limit and directional signing to reduce additional fugitive emissions and vehicle miles traveled (VMT).
- All open storage lots will be covered with gravel to a minimum depth of 2 inches.
- All areas not used for travel, storage, or parking (or any other active use) will be mulched and vegetated or covered with gravel and rendered inaccessible to vehicular travel.
- Any significant piles of sand, scrap metal, or other erodible materials will be covered, sheltered with a wind break, and/or operated in conjunction with a wet suppression system.
- Segments of some public roads in the area will be lined with guard rails or other barriers to prevent further off-pavement travel.
- All paved private travel lanes and city streets in the Stiles Street area will be put on a maintenance plan, which includes periodic street sweeping.

Each consent order requires a schedule and written plan detailing control measures designed to reduce PM10 emissions for each party's responsibility. CT DEP included these orders and plans in the March 24, 1994 submittal and EPA will incorporate them into Connecticut's SIP. Approval of the SIP will make these consent orders and compliance plans federally enforceable. EPA is therefore approving the control strategy as meeting RACM/RACT requirements.

Demonstration

As noted, initial moderate PM10 nonattainment areas were to submit a demonstration (including air quality modeling) showing that the plan will provide for attainment as expeditiously as practicable but no later than December 31, 1994. [See § 189(a)(1)(B) of the Act.] CT DEP submitted an attainment demonstration based on dispersion modeling in accordance with EPA's "Guideline on Air Quality Modeling (Revised)" (GAQM) (40 CFR Part 51 Appendix W) to model New Haven for a determination of PM10 design concentrations.

The 24-hour PM10 NAAQS is 150 micrograms per cubic meter (μg/m^3), and the standard is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 μg/m^3 is equal to or less than one. [See 40 CFR 50.6.] Based on modeling 5 years of representative meteorological data and projecting growth on a controlled emissions inventory for 1994, the 24-hour design concentration for New Haven was predicted as 135 μg/m^3. This demonstrates that implementation of RACM prescribed for New Haven will attain the 24-hour PM10 NAAQS. The annual PM10 NAAQS is attained when the expected annual arithmetic mean concentration is less than or equal to 50 μg/m^3. The predicted annual design concentration of 46 μg/m^3 demonstrates that New Haven will also attain the annual PM10 NAAQS.

CT DEP's submittal further projected emissions for New Haven inventory to 1997 in order to demonstrate maintenance. Further dispersion modeling indicates that the control strategy, summarized above in the section titled RACT/RACM, will maintain air quality levels less than the PM10 NAAQS at least through December 31, 1997. This demonstration meets the EPA requirement for a minimum 3-year maintenance projection beyond the statutory attainment deadline. The TSD provides more details on EPA's review of the maintenance demonstration and the control strategy used.

PM10 Precursors

The control requirements applicable to major stationary sources of PM10 also apply to major stationary sources of PM10 precursors unless EPA determines such sources do not contribute significantly to PM10 levels in excess of the NAAQS in that area. [See § 189(e) of the Act.]

CT DEP's analysis of air quality and emissions data for New Haven demonstrates that PM10 nonattainment in New Haven is a micro-scale fugitive dust problem. EPA agrees that gaseous emissions, such as VOC, SO_2, and NO_2, do not contribute to PM10 levels above the NAAQS in New Haven. Consequently, stationary sources in New Haven need no further emission controls for possible PM10 precursors. The TSD accompanying this notice contains a further discussion of the data and analyses addressing the contribution of possible precursor sources in this area.

Quantitative Milestones and Reasonable Further Progress

Section 171(1) of the Act defines reasonable further progress (RFP) as such annual incremental reductions in emissions of the relevant air pollutant as are required by Part D or may reasonably be required by the Administrator for the purpose of ensuring attainment of the applicable NAAQS by the applicable date. The PM10 nonattainment area plan revisions demonstrating attainment must contain quantitative milestones which are to be achieved every 3 years until the area is redesignated attainment and which demonstrate RFP toward attainment by December 31, 1994. (See § 189(c) of the Act.)

In implementing RFP for this initial moderate area, EPA has reviewed the attainment demonstration and control strategy for the area to determine whether annual incremental reductions different from those provided in the SIP should be required in order to ensure attainment of the PM10 NAAQS by December 31, 1994. [See § 171(1).] Even though Connecticut's PM10 SIP does not require that all measures required for attainment be fully implemented effective December 1, 1993, CT DEP's dispersion modeling aptly confirms that implementation of RACM will bring about attainment by December 31, 1994, the statutory attainment date for initial moderate PM10 nonattainment areas. (See § 188(c)(1).) EPA keys the first milestone to the SIP revision containing control measures which will result in emission reductions (57 FR 13539) and, since the PM10 attainment date is less than 3 years from the actual submittal date of CT DEP's SIP revision, EPA is accepting CT DEP's SIP revision as its first quantitative milestone for New Haven. Subsequently, until New Haven is redesignated to attainment, Connecticut's SIP commits CT DEP to submit quantitative milestone and RFP reports to EPA every 3 years. EPA is therefore approving Connecticut's approach to quantitative milestones and RFP.

Enforceability Issues

All measures and other elements in the SIP must be enforceable by the State and EPA. (See §§ 172(c)(6) and 110(a)(2)(A) and 57 FR 13556.) The EPA criteria addressing the enforceability of SIPs and SIP revisions were stated in a September 23, 1987 memorandum (with attachments) from J. Craig Potter, Assistant Administrator for Air and Radiation, et al. (See 57 FR 13541.) Nonattainment area plan provisions must also contain a program that provides for enforcement of the control measures and other elements in the SIP. (See § 110(a)(2)(C).)

The particular control measures contained in the SIP are summarized above under the section headed RACM/RACT. These control measures are defined and detailed in the compliance plans required under each negotiated consent order. Approval of this SIP submittal and incorporation by reference will make the consent orders, along with the control measures perscribed and contained therein, for New Haven federally enforceable.

Contingency Measures

As provided in § 172(c)(9) of the Act, all moderate nonattainment area SIPs that demonstrate attainment must include contingency measures. (See generally 57 FR 13543–44.) These measures were required to be submitted by November 15, 1993 for the initial moderate nonattainment areas. These measures must take effect without further action by the State or EPA, upon a determination by EPA that the area has failed to make RFP or attain the PM_{10} NAAQS by the applicable statutory deadline.

Connecticut's May 20, 1994 supplemental submittal for New Haven addressed contingency measures required under § 172(c)(9), since the submittal on March 24, 1994 did not. It relies on a conservative strategy through the consent order and compliance plan for the City of New Haven. This submittal demonstrates that the City of New Haven is controlling PM_{10} emissions beyond RACM. CT DEP did not consider (i.e., take credit for) these additional measures in the 1994 attainment year or 1997 maintenance year modeling demonstrations. Specifically, these measures consist of the following:

- Installing granite curbs along Waterfront Street between Forbes Avenue and Alabama Street;
- Planting vegetation in barren areas between Waterfront Street and the I–95 exit ramp to the east, including new trees to act as permanent barriers from illegal parking;

- Reconstructing Stiles Street, including installation of sewers, catch-basins, curbs, and sidewalks on both sides of the street;
- Installing granite curbing along both sides of Connecticut Avenue from the edge of existing curbing north to Albia Street and south to connect with the existing curbing; and
- Repaving Alabama Street from Waterfront Street to its end at the east, including installation of sewers, catch-basins, curbs, handicapped curb cuts at the corners, and vegetation between curb and lot lines, and fencing where necessary.

Contingency emissions reductions should be approximately equal to the emissions reductions necessary to demonstrate RFP for one year or 25 percent for the initial moderate nonattainment areas. (See 57 FR 13543–4.) CT DEP's contingency measures submittal estimates the emissions reductions due to these measures to be 84 tons per year. Since total emission reductions required to demonstrate attainment for New Haven by December 31, 1994 are 157 tpy, the estimated 84 tpy emissions reduction (or 53.5 percent) from the control measures found in the control plan for the City of New Haven will exceed one year or 25 percent of RFP.

EPA finds that CT DEP's contingency measures for New Haven fulfill § 172(c)(9) requirements.

Other SIP Requirements

CT DEP has amended Sections 22a–174–24(f) and –24(g) "Connecticut primary and secondary ambient air quality standards for particulate matter" and 22a–174–6(a) and –6(b) "Air Pollution" emergency episode procedures." These regulations now reflect the PM_{10} NAAQS and contain the PM_{10} alert, warning and emergency levels that appear in EPA's "Example Regulations for Prevention of Air Pollution Emergency Episodes" (Appendix L to Part 51). There only exist two outstanding definitions which Connecticut should adopt to complete all § 110 requirements: "particulate matter emissions" and "PM_{10} emissions," but their absence here does not preclude EPA's approval of all else detailed above.

Under § 188 of the Act, if an initial moderate nonattainment area does not meet the December 31, 1994 attainment deadline, the area is normally "bumped up" to a serious non-attainment area and must implement additional control measures and must also submit another SIP revision. However, if an area can show, among other things, that the area had no more than one exceedance at any monitoring site in the nonattainment area in the year preceding the extension year, the area may apply for, and obtain a 1-year extension of the attainment date. (EPA may grant a total of two 1-year extensions of the attainment date to a qualifying area.) Based on air quality data for 1992–94, New Haven did not meet the December 31, 1994 attainment deadline, mainly because of a delay in implementing RACM. However, since mid-1994, when the implementation of New Haven's prescribed control measures were mostly underway and in some cases complete, New Haven has not seen further exceedences of the PM_{10} NAAQS. Actually, there has been a dramatic decrease in monitored PM_{10} levels at the Yankee Gas monitor since then. On March 31, 1995, Connecticut DEP applied for a 1-year extension of the attainment deadline for New Haven, and EPA is granting the extension in a separate notice elsewhere in today's **Federal Register**. This, however, does not preclude EPA from approving the attainment plan and contingency measures for New Haven.

Final Action

EPA is approving the SIP revisions submitted to the EPA on March 24 and May 20, 1994. These revisions include 7 consent orders (listed previously in the table in the section titled RACM/RACT) and compliance plans which the CT DEP negotiated and executed to bring about attainment of the PM_{10} NAAQS for the New Haven initial moderate PM10 nonattainment area. These orders and plans impose RACM and delineate contingency measures for New Haven. Among other things, the State of Connecticut has demonstrated that, with the implementation of RACM, the New Haven initial moderate PM10 nonattainment area attains the PM10 NAAQS and will maintain air quality levels below the NAAQS at least through December 31, 1997.

EPA is also approving two amendments to the Regulations of Connecticut State Agencies concerning abatement of air pollution: adoption of the PM10 NAAQS in amended Sections 22a–174–24(f) and –24(g) "Connecticut primary and secondary ambient air quality standards for particulate matter" and emergency episodes for PM10 in amended Sections 22a–174–6(a) and –6(b) "'Air Pollution" emergency episode procedures", both received by EPA on March 16, 1995 and effective in the State of Connecticut on July 7, 1993.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this **Federal Register** publication, EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 13, 1995 unless adverse or critical comments are received by October 11, 1995.

If the EPA receives such comments, this action will be withdrawn before the effective date by simultaneously publishing a subsequent notice that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective on November 13, 1995.

Under the Regulatory Flexibility Act, 5 USC § 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 USC §§ 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

Under §§ 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

Through submission of this State implementation plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under § 110 of the Clean Air Act. These rules may bind State, local and tribal governments to perform certain actions and also require the private sector to perform certain duties. To the extent that the rules being approved by this action will impose no new requirements; such sources are already subject to these regulations under State law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action. EPA has also determined that this action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

SIP approvals under § 110 and subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of State action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *USEPA*, 427 US 246, 256–66 (S.Ct. 1976); 42 USC § 7410 (a)(2).

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by an October 4, 1993, memorandum from Michael H. Shapiro, Acting Assistant Administrator for Air and Radiation. A future notice will inform the general public of these tables. The Office of Management and Budget (OMB) has exempted this action from review under Executive Order 12866.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any State implementation plan. Each request for revision to the State implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under § 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 13, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See § 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Particulate matter, Reporting and recordkeeping requirements.

Note: Incorporation by reference of the State Implementation Plan for the State of Connecticut was approved by the Director of the Federal Register on July 1, 1982.

Dated: May 26, 1995.

John P. DeVillars,

Regional Administrator, EPA-New England.

Part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 USC 7401–7671q

Subpart H—Connecticut

2. Section 52.370 is amended by adding paragraph (c)(68) to read as follows:

§ 52.370 Identification of plan.

* * * * *

(c) * * *

(68) Revisions to the State Implementation Plan submitted by the Connecticut Department of Environmental Protection on March 24, 1994, May 20, 1994, and March 4, 1994.

(i) Incorporation by reference.

(A) Letter from the Connecticut Department of Environmental Protection dated March 24, 1994 submitting a revision to the Connecticut State Implementation Plan.

(B) Letter from the Connecticut Department of Environmental Protection dated May 20, 1994 submitting a supplemental revision to the Connecticut State Implementation Plan.

(C) State Order No. 8073: State of Connecticut vs. City of New Haven (effective September 24, 1993) and attached plan titled "Remedial Action Plan for Prevention of Airborne Particulate Matter and Fugitive Discharge of Visible Emissions in the Alabama Street/East Shore Parkway Area of New Haven."

(D) State Order No. 8074: State of Connecticut vs. Waterfront Enterprises, Inc. (effective November 5, 1993) and attached plan titled "Proposed Operation Plan in Response to Unilateral Order (September 20, 1993)."

(E) State Order No. 8075: State of Connecticut vs. Laydon Construction, (effective September 21, 1993) and attached plan titled "Plan for Control of Fugitive Emissions of PM10 (September 21, 1993)."

(F) State Order No. 8076: State of Connecticut vs. United Illuminating Company (effective December 2, 1993) and attached plan titled "Remediation Plan for Fugitive Emissions: Alabama Street and Connecticut Avenue, New Haven, Connecticut (November 19, 1993)."

(G) State Order No. 8076c: State of Connecticut vs. M. J. Metals, Inc. (effective June 18, 1993).

(H) State Order No. 8078: State of Connecticut vs. New Haven Terminal, Inc. (effective November 15, 1993) and attached plan titled "Fugitive Dust Control Plan (Revised January 19, 1994)."

(I) State Order No. 8079: State of Connecticut vs. Yankee Gas Services Company (effective September 24, 1993) and attached plan titled "Revised Compliance Plan for Consent Order No. 8079 (August 31, 1993)."

(J) Letter from the Connecticut Department of Environmental Protection dated March 4, 1994 (received March 16, 1995) submitting two amendments to the Regulations of Connecticut State Agencies concerning abatement of air pollution: amended Sections 22a–174–24(f) and –24(g) "Connecticut primary and secondary ambient air quality standards for particulate matter" and amended Sections 22a–174–6(a) and –6(b) "'Air Pollution' emergency episode procedures" (both effective July 7, 1993).

(K) Amended Regulations of Connecticut State Agencies: amended Sections 22a–174–24(f) and –24(g) "Connecticut primary and secondary ambient air quality standards for particulate matter" and amended Sections 22a–174–6(a) and –6(b) "'Air Pollution' emergency episode procedures" (both effective July 7, 1993).

(ii) Additional materials.

(A) An attainment plan and demonstration which outlines Connecticut's control strategy and for attainment and maintenance of the PM10 NAAQS, implements and meets RACM and RACT requirements, and provides contingency measures for New Haven.

(B) Nonregulatory portions of the submittal.

Approval and Promulgation of Air Quality Implementation Plans; Delaware, the District of Columbia, Maryland, Pennsylvania, Virginia; Revisions to the State Implementation Plans (SIPs) Addressing Ozone Monitoring

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving a revision to the ozone State Implementation Plans (SIPs) for Delaware, the District of Columbia (the District), Maryland, Pennsylvania and Virginia. This action is based upon revision requests which were submitted by these states to satisfy the requirements of the Clean Air Act (Act), as amended November 15, 1990, and the Photochemical Assessment Monitoring Stations (PAMS) regulations. The PAMS regulations required affected states to provide for the establishment and maintenance of an enhanced ambient air quality monitoring network in the form of PAMS by November 12, 1993.

DATES: This final rule is effective November 13, 1995 unless adverse comments are received by October 11, 1995. If the effective date is delayed, timely notice will be published in the **Federal Register** (FR).

ADDRESSES: Written comments should be addressed to Marcia L. Spink, Associate Director, Air Programs, Mailcode 3AT00, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; and the Delaware Department of Natural Resources & Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, Delaware 19903; District of Columbia Department of Consumer and Regulatory Affairs, 2100 Martin Luther King Avenue, SE., Washington, DC 20020; Maryland Department of the Environment, 2500 Broening Highway, Baltimore, Maryland, 21224; Pennsylvania Department of Environmental Protection, P.O. Box 8468, 400 Market Street, Harrisburg, Pennsylvania 17105; Department of Public Health, Air Management Services, 321 University Avenue, Philadelphia, Pennsylvania 19104; Virginia Department of Environmental Quality, 629 East Main Street, Richmond, Virginia, 23219.

FOR FURTHER INFORMATION CONTACT: Catherine L. Magliocchetti, Ozone/CO & Mobile Sources Section, Mailcode 3AT21, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107, (215) 597–6863.

SUPPLEMENTARY INFORMATION:

I. Summary of State Submittals

SIP revisions incorporating PAMS into the ambient air quality monitoring networks of State or Local Air Monitoring Stations (SLAMS) and National Air Monitoring Stations (NAMS) were submitted to EPA from the following state agencies on the following days:

(1) Delaware's Department of Natural Resources & Environmental Control submitted a PAMS SIP revision on March 24, 1994;

(2) The District of Columbia's Department of Consumer and Regulatory Affairs submitted a PAMS SIP revision on January 14, 1994;

(3) Maryland's Department of the Environment submitted a PAMS SIP revision on March 24, 1994;

(4) Pennsylvania's Department of Environmental Resources (now known as the Pennsylvania Department of Environmental Protection) submitted a PAMS SIP revision on September 23, 1994; and

(5) Virginia's Department of Environmental Quality submitted a PAMS SIP revision on November 23, 1994. These states will establish and maintain PAMS as part of their overall ambient air quality monitoring networks.

Section 182(c)(1) of the Act and the General Preamble (57 FR 13515) require that the EPA promulgate rules for enhanced monitoring of ozone, oxides of nitrogen (NO_X), and volatile organic compounds (VOC) no later than 18 months after the date of the enactment of the Act. In addition, the Act requires that, following the promulgation of the rules relating to enhanced ambient monitoring, states must commence actions to adopt and implement programs based on these rules, to improve the monitoring of ambient concentrations of ozone, NO_X, and VOC; and to improve the monitoring of emissions of NO_X and VOC.

The final PAMS rule was promulgated by the EPA on February 12, 1993 (58 FR 8452). Section 58.40(a) of the revised rule requires states with serious and above areas to submit a PAMS network description, including a schedule for implementation, to the Administrator within six months after promulgation or by August 12, 1993. Further, section 58.20(f) requires these states to provide for the establishment and maintenance of a PAMS network within nine months after promulgation of the final rule or by November 12, 1993.

While EPA recognizes that none of the above states met either of the deadlines, EPA considers this point moot, since these states have since submitted revisions and adopted implementation schedules for PAMS in all affected areas. These submittals have been reviewed by the EPA and are intended to satisfy the requirements of 40 CFR section 58.40(a). Since network descriptions may change annually, they are not part of the SIP as recommended by the Guideline for the Implementation of the Ambient Air Monitoring Regulations 40 CFR 58. However, the network description is negotiated and approved during an annual review as required by 40 CFR section 58.25 and section 58.36, respectively, and the revision codified at 40 CFR section 58.46.

The PAMS SIP revisions outlined above are intended to meet the requirements of section 182(c)(1) of the Act and affect compliance with the PAMS regulations, codified at 40 CFR part 58, as promulgated on February 12, 1993.

Public hearings on the PAMS SIP revisions were held on the following dates:

(1) Delaware—November 18, 1994;
(2) the District—January 4, 1994;
(3) Maryland—November 4, 8, 9 and 10, 1994;
(4) Pennsylvania—August 1, and 9, 1994; and
(5) Virginia—August 15, 1994.

None of the states received comment on the PAMS revisions during the public hearings or public comment periods.

II. Analysis of State Submittals

The PAMS SIP revisions will provide Delaware, the District, Maryland, Pennsylvania, and Virginia with the authority to establish and operate the PAMS sites, secure State funds for PAMS and provide the EPA with the authority to enforce the implementation of PAMS, since their implementation is required by the Act.

The criteria used to review the proposed SIP revision are derived from the PAMS regulations, codified at 40 CFR part 58, the Guideline for the Implementation of the Ambient Air Monitoring Regulations 40 CFR Part 58 (EPA–450/4–79–038, Office of Air Quality Planning and Standards, November 1979), the September 2, 1993 memorandum from G. T. Helms entitled Final Boilerplate Language for the PAMS SIP Submittal (Helms boilerplate memorandum), the Act and the General Preamble. The September 2, 1993 Helms boilerplate memorandum stipulates that the PAMS SIP, at a minimum, must:

(a) Enable the monitoring of non-criteria pollutants (such as NO_X, nitric oxide, and speciated VOC including carbonyls) and meteorological parameters, in addition to the monitoring of criteria pollutants (such as ozone and nitrogen dioxide);

(b) Provide a copy of the approved (or proposed) PAMS network description, including the phase-in schedule, for public inspection during the public notice and/or comment period provided for in the SIP revision or, alternatively, provide information to the public upon request concerning the State's plans for implementing the rules;

(c) Make reference to the fact that PAMS will become a part of the State or local air monitoring stations (SLAMS) network; and

(d) Require revisions to the statement that SLAMS will employ Federal reference methods (FRM) or equivalent methods inasmuch as PAMS sampling will be conducted using methods approved by the EPA which are not FRM or equivalent.

The PAMS SIP revisions for Delaware, the District, Maryland, Pennsylvania, and Virginia provide that each state will implement PAMS as required in 40 CFR Part 58, as amended February 12, 1993. This program is required in all ozone nonattainment areas designated as serious, severe, or extreme. The states will also implement these regulations in any existing ozone nonattainment area reclassified to serious, severe, or extreme, or any newly designated ozone nonattainment areas classified as serious or above. The PAMS stations will become a part of the existing NAMS/SLAMS network and will monitor ambient levels of "criteria pollutants," "non-criteria pollutants," and meteorological parameters.

Each state will develop its PAMS network design and establish monitoring sites pursuant to 40 CFR Part 58 in accordance with an approved network description and as negotiated with the EPA through the 105 grant process on an annual basis. Also, each state has begun implementing its PAMS network as required in 40 CFR Part 58.

All of the PAMS SIP revisions mentioned also include provisions to meet quality assurance requirements as contained in 40 CFR Part 58, Appendix A. All of the states also assure that the PAMS monitors will meet monitoring methodology requirements contained in 40 CFR Part 58, Appendix C. These states' SIP revisions also assure that their PAMS networks will be phased in over a period of five years as required in section 58.44. The states' PAMS SIP submittals and the EPA's technical support document are available for viewing at the EPA Region III Office and the state agencies as outlined under the **ADDRESSES** Section of this FR notice.

III. Final Action

EPA is approving revisions to the ozone SIPs for PAMS in Delaware, the District of Columbia, Maryland, Pennsylvania and Virginia. The EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in the FR publication, the EPA is proposing to approve the SIP revision should adverse comments be received. Thus, the action will be effective November 13, 1995 unless, by no later than October 11, 1995, adverse or critical comments are received.

If such comments are received, this action will be withdrawn before the effective date by publishing a subsequent notice which will withdraw the final action. All public comments will then be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no comments are received, the public is advised that this action will be effective November 13, 1995.

The EPA has reviewed this request for revision of the federally-approved SIP for conformance with the provisions of the Clean Air Act Amendments. The EPA has determined that this action conforms with those requirements.

Nothing in this action should be construed as permitting, allowing, or establishing a precedent for any future request for revision to any SIP. The EPA shall consider each request for revision to the SIP in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, the EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities (5 U.S.C. 603 and 604). Alternatively, the EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and Subchapter I, Part D, of the Act do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-State relationship under the Act, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of State action. The Act forbids the EPA to base its actions concerning SIPs on such grounds (*Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (1976); 42 U.S.C. 7410(a)(2)).

Under Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final notice that includes a Federal mandate that may result in estimated costs to State, local, or tribal governments in the aggregate; or to the private sector, of $100 million or more. Under section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the approval action promulgated does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under State or local law, and imposes no new Federal requirements. Accordingly, no additional costs to State, local or tribal governments, or to the private sector, result from this action.

This action has been classified as a Table 3 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by a July 10, 1995 memorandum from Mary Nichols, Assistant Administrator for Air and Radiation. The Office of Management and Budget (OMB) has exempted this regulatory action from E.O. 12866 review.

Under section 307(b)(1) of the Act, petitions for judicial review of this Direct Final PAMS approval action must be filed in the U.S. Court of Appeals for the appropriate circuit by November 13, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review, nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Nitrogen dioxide, Ozone, Volatile organic compounds.

Dated: August 18, 1995.

W. Michael McCabe,

Regional Administrator, Region III.

40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart I—Delaware

2. Section 52.430 is added to read as follows:

§ 52.430 Photochemical Assessment Monitoring Stations (PAMS) Program.

On March 24, 1994 the Delaware Department of Natural Resources & Environmental Control submitted a plan for the establishment and implementation of a Photochemical Assessment Monitoring Stations (PAMS) Program as a state implementation plan (SIP) revision, as required by section 182(c)(1) of the Clean Air Act. EPA approved the Photochemical Assessment Monitoring Stations (PAMS) Program on September 11, 1995 and made it part of the Delaware SIP. As with all components of the SIP, Delaware must implement the program as submitted and approved by EPA.

Subpart J—District of Columbia

3. Section 52.480 is added to read as follows:

§ 52.480 Photochemical Assessment Monitoring Stations (PAMS) Program.

On January 14, 1994 the District of Columbia's Department of Consumer and Regulatory Affairs submitted a plan for the establishment and implementation of a Photochemical Assessment Monitoring Stations (PAMS) Program as a state implementation plan (SIP) revision, as required by section 182(c)(1) of the Clean Air Act. EPA approved the Photochemical Assessment Monitoring Stations (PAMS) Program on September 11, 1995 and made it part of the District of Columbia SIP. As with all components of the SIP, the District of Columbia must implement the program as submitted and approved by EPA.

Subpart V—Maryland

4. Section 52.1080 is added to read as follows:

§ 52.1080 Photochemical Assessment Monitoring Stations (PAMS) Program.

On March 24, 1994 Maryland's Department of the Environment submitted a plan for the establishment and implementation of a Photochemical Assessment Monitoring Stations (PAMS) Program as a state implementation plan (SIP) revision, as required by section 182(c)(1) of the Clean Air Act. EPA approved the Photochemical Assessment Monitoring Stations (PAMS) Program on September 11, 1995 and made it part of Maryland SIP. As with all components of the SIP, Maryland must implement the program as submitted and approved by EPA.

Subpart NN—Pennsylvania

5. Section 52.2035 is added to read as follows:

§ 52.2035 Photochemical Assessment Monitoring Stations (PAMS) Program.

On September 23, 1994 Pennsylvania's Department of Environmental Resources (now known as the Department of Environmental Protection) submitted a plan for the establishment and implementation of a Photochemical Assessment Monitoring Stations (PAMS) Program as a state implementation plan (SIP) revision, as required by section 182(c)(1) of the Clean Air Act. EPA approved the Photochemical Assessment Monitoring Stations (PAMS) Program on September 11, 1995 and made it part of Pennsylvania SIP. As with all components of the SIP, Pennsylvania must implement the program as submitted and approved by EPA.

Subpart W—Virginia

6. Section 52.2426 is added to read as follows:

§ 52.2426 Photochemical Assessment Monitoring Stations (PAMS) Program.

On November 23, 1994 Virginia's Department of Environmental Quality submitted a plan for the establishment and implementation of a Photochemical Assessment Monitoring Stations (PAMS) Program as a state implementation plan (SIP) revision, as required by section 182(c)(1) of the Clean Air Act. EPA approved the Photochemical Assessment Monitoring Stations (PAMS) Program on September 11, 1995 and made it part of the Virginia SIP. As with all components of the SIP, Virginia must implement the program as submitted and approved by EPA.

[FR Doc. 95–22158 Filed 9–8–95; 8:45 am]

BILLING CODE 6560–50–P

---

40 CFR Part 52

[FRL–5291–5]

Approval and Promulgation of Air Quality Implementation Plans; Commonwealth of Pennsylvania; Disapproval of the Enhanced Motor Vehicle Inspection and Maintenance Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA hereby gives notice that pursuant to its authority under Clean Air Act (the Act) section 110(k)(4), 42 U.S.C. 7410(k)(3), in an April 13, 1995 letter EPA notified Pennsylvania that the conditional approval of the Pennsylvania enhanced Inspection and Maintenance (I/M) State Implementation Plan (SIP) revision had been converted to a disapproval. The letter triggered the 18-month timeclock for the mandatory application of sanctions under section 179(a) of the Act and the 24-month timeclock for the Federal Implementation Plan (FIP) under section 110(c)(1). This also serves to amend the C.F.R. to note the conversion of the conditional approval to a disapproval.

EFFECTIVE DATE: September 11, 1995.

FOR FURTHER INFORMATION CONTACT: Mrs. Kelly L. Bunker, (215) 597– 4554.

SUPPLEMENTARY INFORMATION: On August 31, 1994 a final rule was published in the **Federal Register** (59 FR 44936) which conditionally approved the November 3, 1993 Pennsylvania SIP submittal for a centralized, test-only enhanced I/M program. The first two conditions of the conditional approval were required to be fulfilled by December 31, 1994. The first two conditions for approvability were as follows:

(1) by December 31, 1994, the Commonwealth was required to submit to EPA as a SIP revision, the *Pennsylvania Bulletin* notice which certified that the enhanced I/M program was required in order to comply with federal law, certified the geographic areas which were subject to the enhanced I/M program, and certified the commencement date of the enhanced I/M program and

(2) by December 31, 1994, the Commonwealth was required to submit to EPA as a SIP amendment, the amendments to the Pennsylvania I/M regulation, 67 Pa Code § 178.202–205, which require EPA approval prior to implementation of any alternate purge test procedure and incorporate the transient emission standards for Tier 1 vehicles, the Phase 2 standards for all vehicle types and model years, and the transient and evaporative purge test procedures found in the final version of the EPA document entitled "High-Tech I/M Test Procedures, Emission Standards, Quality Control Requirements, and Equipment Specifications", EPA-AA-EPSD-IM–93–1, April 1994.

The proposed rulemaking stated that if the Commonwealth did not submit, by December 31, 1994, a SIP revision in response to the first two conditions of the approval action, the conditional approval would convert to a disapproval. EPA has not received a SIP revision which fulfills the first two conditions of the August 31, 1994 conditional approval. EPA notified the Commonwealth by an April 13, 1995 letter that the conditional approval of the Pennsylvania enhanced I/M SIP had been converted to a full disapproval pursuant to section 110(k)(4) of the Clean Air Act (the Act). This action taken on April 13, 1995 started both the 18 and subsequent 6 month sanctions clocks and the 24-month FIP clock. The Commonwealth must submit and EPA must take rulemaking action to approve an enhanced I/M SIP by October 13, 1996 and April 13, 1997, respectively, in order to halt these sanctions and FIP clocks.

EPA believes that the good cause exception to the notice and comment rulemaking requirement applies to this rulemaking action. [Administrative Procedure Act (APA) section 553(a)(B)]. Section 553(a)(B) of the APA provides that the Agency need not provide notice and an opportunity for comment if the Agency, for good cause, determines that notice and comment are "impracticable, unnecessary, or contrary to the public interest." In the present circumstance, notice and comment are unnecessary. The conversion of the conditional approval to a disapproval does not require any judgment on the part of the Agency. The issue is clear that the Agency must state whether or not it has received any SIP revision by the required date from the Commonwealth in response to the conditions set forth in the conditional approval of the Commonwealth's enhanced I/M SIP. No substantive review is required for such a determination. The Agency is the only judge of whether or not it has received the SIP revision to meet the conditions of the conditional approval. Because there is nothing on which to comment, notice and comment rulemaking are unnecessary.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Ozone.

Dated: August 2, 1995.

W. Michael McCabe,

Regional Administrator, Region III.

40 CFR part 52 is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart NN—Pennsylvania

2. Section 52.2023 is amended by adding paragraph (j) to read as follows:

§ 52.2023 Approval status.

* * * * *

(j) The conditionally approved Pennsylvania enhanced I/M SIP revision (59 FR 44936) submitted on November 3, 1993 by the Pennsylvania Department of Environmental Resources was converted to a disapproval by an April 13, 1995 letter from EPA to Pennsylvania.

§ 52.2026 [Removed and Reserved]

3. Section 52.2026 is removed and reserved.

[TN–126–6580a; FRL–5282–8]

Approval and Promulgation of Implementation Plans; Tennessee: Approval of Revisions to Permit Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving revisions to the permit requirements for major sources of air pollution for the Nashville/Davidson County portion of the Tennessee State Implementation Plan (SIP). EPA is also approving the recodification of this chapter. On November 12, 1993, the State submitted revisions to the Nashville/Davidson portion of the Tennessee SIP on behalf of Nashville/Davidson County. These were revisions to the permit requirements for major sources of air pollution, including revisions to the general definitions, the permit requirements, and the exemptions. As a supplement to this submittal, on July 15, 1994, the State also submitted a request that the recodification of the entire air pollution control rule for Nashville/Davidson County be approved as part of the SIP.

DATES: This final rule will be effective November 13, 1995 unless adverse or critical comments are received by October 11, 1995. If the effective date is delayed, timely notice [illegible] be published in the **Federal Register**.

ADDRESSES: Wr[illegible]ments on this action should be addressed to Karen C. Borel, at the EPA Regional Office listed below. Copies of the documents relative to this action are available for public inspection during normal business hours at the following locations. The interested persons wanting to examine these documents should make an appointment with the appropriate office at least 24 hours before the visiting day.

FOR FURTHER INFORMATION CONTACT: Karen C. Borel, Regulatory Planning and Development Section, Air Programs Branch, Air, Pesticides & Toxics Management Division, Region 4 Environmental Protection Agency, 345 Courtland Street, NE, Atlanta, Georgia 30365 The telephone number is 404/347–3555 x4197. Reference file TN–126–1–6580a.

SUPPLEMENTARY INFORMATION: The State of Tennessee through the Tennessee Department of Environment and Conservation submitted revisions to the Nashville/Davidson County portion of the Tennessee SIP to EPA on November 12, 1993. EPA found these submittals to be complete on January 21, 1994.

A. Permit Requirement Revisions

Nashville/Davidson County officially adopted proposed amendments to the Chapter 10.56, "Air Pollution Control" of the Metropolitan Code of Laws on September 14, 1993. These regulatory revisions to their Chapter 10.56 change the permit requirements for major air pollution sources. EPA is approving all of the following revisions except where it is specifically noted that the proposed revision is not receiving action.

Section 10.56.010—Definitions

Definitions of "act," "administrator," "major source," "permitted allowable emission," and "volatile organic compounds," were added. The definition of "major stationary source" was deleted.

A definition for "Regulated Pollutant" has been added. However, in response to comments from the EPA this proposed definition is being revised by the State in accordance with their May 30, 1995, letter from Mr. John Walton, Technical Secretary of the Tennessee Air Pollution Control Board, to Mr. Doug Neeley, Chief of the Air Programs Branch of the Region 4 EPA. Therefore, action on the addition of this definition will be taken in future rulemaking.

Section 10.56.020—Construction Permits

Paragraphs (I) through (M) were added to clarify the requirements of their permit program. Paragraph (I) limits the operating time of the new or modified source to the time specified within the permit, but not to exceed one hundred and eighty (180) days. It also requires that the Director be notified of the startup date within five (5) working days of the startup. Paragraph (J) requires that all of the compliance testing required by the construction permit must be done in accordance with the requirements of the SIP and the test results must be submitted to the Director as required by the SIP. Any failure to demonstrate compliance will be sufficient grounds for the Director to require changes in the installation before an operating permit will be granted. Paragraph (K) gives the Director the right to observe any compliance tests and to inspect the installation and operation of the equipment. Paragraph (L) grants the EPA Administrator the right to objection and comment on any application for a construction permit for a major source. Paragraph (M) states that eighteen (18) months after receipt of a complete application for a construction permit the application is considered final, and becomes the permit, if there has been no action by the Director.

Section 10.56.030—Temporary Operating Permit

This section was deleted. All of the requirements previously contained in this section were moved to Sections 10.56.020 and 10.56.040.

Section 10.56.040—Operating Permit

Paragraph (A) was deleted and replaced with a new paragraph (A). All references to "temporary operating permits" have been changed to "construction permits" in this new paragraph. A minor revision was made to paragraph (B) to limit the operating permit to five (5) years, and paragraphs (C) through (F) were added. Paragraph (C) requires that applications for operating permits be filed by the operators of any sources that were operating prior to the effective date of this regulation. Paragraph (D) grants authority to the Metropolitan Board of Health to specify any additional permitting requirements. Paragraph (E) states that any application for a major source operating permit is also subject to objection and comment by the EPA Administrator. Paragraph (F) declares that an operating permit application may be declared final eighteen (18) months after its receipt, if there has not been any action by the Director.

Section 10.56.050—Exemptions

Nashville has proposed to delete the entire Section 10.56.050 [paragraphs (A) through (D)] and replace it with proposed paragraphs (A) and (B). The new paragraph (A) restates the same exemptions that were previously covered in the deleted paragraphs (A) through (D). The new paragraph (B) states that such quantities of air contaminants which adversely affect the public shall not be discharged from any source, regardless of the exemptions listed in the previous paragraph. Proposed paragraphs (C), (D), and (E) were withdrawn by the State in their letter of May 30, 1995, from Mr. Walton to Mr. Neeley in response to comments from the EPA.

Section 10.56.080—Permit Fees

Nashville has deleted the section on permit fees in its entirety. The proposed replacement Section 10.56.080 was withdrawn by the State in their letter of May 30, 1995, from Mr. Walton to Mr. Neeley in response to comments from the EPA.

Section 10.56.120.B.6—Complaint Notice—Hearings Procedure

The length of time to enter a final order or determination, after final argument, was changed from sixty days to ninety days.

Section 10.56.210—Hazardous Air Pollutants

The definition was deleted, and a new definition was added. The new section defines "Hazardous Air Pollutants" in accordance with Section 112 of the Clean Air Act, as amended in 1990 (CAA). This new definition will be used in the issuance of synthetic minor operating permits.

Section 10.56.290—Measurement and Reporting of Emissions

The old title, "Measurement of Air Contaminants," was deleted and the new title was added. Subparagraph 10.56.290.B.3 was added to provide the requirements for notification of compliance tests.

Section 10.56.290.E—Emissions Statement

In this paragraph Nashville/Davidson County requires an annual emissions report from all permitted facilities in accordance with the permitting requirements of Sections 10.56.020 and 10.56.040. In these sections, all sources that emit any regulated air pollutant are required to obtain a permit.

Section 10.56.310—Severability

This section was added to the SIP to address severability. In this new section it is stated that all other provisions of this ordinance will remain in full force and effect in the case where a court declares another section unconstitutional, illegal, or unenforceable.

B. Recodification

On July 15, 1994, the State submitted a request that the recodification of the entire air pollution control rule for Nashville/Davidson County be approved as part of the SIP. The Code of Laws of the Metropolitan Government of Nashville and Davidson County, Tennessee was recodified from Chapter Four, Subchapter One, into new Chapter 10.56, on August 21, 1991. In this document EPA is approving the recodification.

Final Action

EPA is fully approving the submitted revisions to the Nashville/Davidson County portion of the Tennessee SIP, with the exception of the definition of "regulated pollutant" in Section 10.56.010 on which action is not being taken in this rulemaking. EPA is also fully approving the recodification of the Air Pollution Control section of the Nashville/Davidson County portion of the Tennessee SIP, as submitted on July 15, 1994. EPA has not reviewed the substance of the remaining regulations, other than those submitted for revision on November 12, 1993. These rules were approved into the SIP in previous rulemakings. The EPA is now merely approving the renumbering system submitted by the State. The EPA's

approval of the renumbering system at this time does not imply any position with respect to the approvability of the substantive rules. To the extent EPA has issued any SIP calls to the State with respect to the adequacy of any of the rules subject to this recodification, EPA will continue to require the State to correct any such rule deficiencies despite EPA's approval of this recodification.

The EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this **Federal Register** publication, the EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 13, 1995 unless, within 30 days of its publication, adverse or critical comments are received.

If the EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on the separate proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective November 13, 1995.

Under section 307(b)(1) of the Act, 42 U.S.C. 7607(b)(1), petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 13, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2) of the Act, 42 U.S.C. 7607(b)(2)).

This action has been classified as a Table 3 action for signature by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by a July 10, 1995 memorandum from Mary Nichols, Assistant Administrator for Air and Radiation. The Office of Management and Budget (OMB) has exempted this regulatory action from E.O. 12866 review.

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any State implementation plan. Each request for revision to the State implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP Actions

SIP approvals and partial approvals under section 110 and subchapter I, part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-State relationship under the CAA, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of State action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. section 7410(a)(2) and 7410(k)(3).

Unfunded Mandates

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

Through submission of this State implementation plan or plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under Section 110 of the Clean Air Act. These rules may bind State, local and tribal governments to perform certain actions and also require the private sector to perform certain duties. To the extent that the rules being approved by this action will impose no new requirements; such sources are already subject to these regulations under State law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action. EPA has also determined that this final action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Incorporation by reference, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements.

Dated: August 9, 1995.

Patrick M. Tobin,

Acting Regional Administrator.

Part 52 of chapter I, title 40, Code of Federal Regulations, is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

Subpart RR—Tennessee

2. Section 52.2220 is amended by adding paragraph (c)(131) to read as follows:

§ 52.2220 Identification of plan.

* * * * *

(c) * * *

(131) On November 12, 1993, the State submitted revisions to the Nashville/Davidson County portion of the Tennessee State Implementation Plan (SIP) on behalf of Nashville/Davidson County. These were revisions to the permit requirements for major sources of air pollution, including revisions to the general definitions, the permit requirements, and the exemptions. As a supplement to this submittal, on July 15, 1994, the State also submitted a request that the recodification of the entire air pollution control rule for Nashville/Davidson County be approved as part of the SIP. These revisions and recodification incorporate changes to Nashville's Chapter 10.56, which was previously Chapter 4–1–1, which are required in the Clean Air Act as amended in 1990 and 40 CFR part 51, subpart I.

(i) Incorporation by reference.

Code of Laws of the Metropolitan Government of Nashville and Davidson County, Tennessee, Chapter 10.56, Air

Pollution Control, effective November 10, 1993, except for the following parts:

(A) Section 10.56.010, the definition of "regulated pollutant";

(B) Section 10.56.040, Paragraph (F);

(C) Section 10.56.050, Paragraphs (C), (D) and (E);

(D) Section 10.56.080.

(ii) Other material. None.

40 CFR Part 52

[WI55–02–7015; FRL–5289–5]

Approval of the State Implementation Plan; Wisconsin

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On January 10, 1995, the United States Environmental Protection Agency (USEPA) proposed approval of the State Implementation Plan (SIP) revision request for the Milwaukee ozone nonattainment area (Kenosha, Milwaukee, Ozaukee, Racine, Washington, and Waukesha counties), as submitted by the State of Wisconsin. The purpose of the revision is to offset any growth in emissions from growth in vehicle miles traveled (VMT), or number of vehicle trips, and to attain reduction in motor vehicle emissions, in combination with other measures, as needed to comply with Reasonable Further Progress (RFP) milestones of the Clean Air Act (Act). Wisconsin submitted the implementation plan revision to satisfy the statutory mandates, found in section 182 of the Act, which requires the State to submit a SIP revision that identifies and adopts specific enforceable Transportation Control Measures (TCM) to offset any growth in emissions from growth in VMT, or number of vehicle trips, in severe ozone nonattainment areas. The USEPA received no public comments on the above proposed approval. On May 5, 1995, USEPA finalized the first element of the VMT offset program for the Milwaukee area. This rule finalizes the approval of the second element of the VMT offset program for the Milwaukee area.

EFFECTIVE DATE: This action will be effective October 11, 1995.

ADDRESSES: Copies of the SIP revision, public comments and USEPA's responses are available for inspection at the following address: (It is recommended that you telephone Michael Leslie at (312) 353–6680 before visiting the Region 5 Office.) United States Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604.

A copy of this SIP revision is available for inspection at the following location: Office of Air and Radiation (OAR) Docket and Information Center (Air Docket 6102), room M1500, United States Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 260–7548.

FOR FURTHER INFORMATION CONTACT: Michael G. Leslie, Regulation Development Section (AT–18J), Air Toxics and Radiation Branch, Air and Radiation Division, United States Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, Telephone Number (312) 353–6680.

SUPPLEMENTARY INFORMATION:

I. Background Information

Section 182(d)(1)(A) of the Act requires States that contain severe ozone nonattainment areas to adopt transportation control measures and transportation control strategies to offset growth in emissions from growth in VMT or number of vehicle trips and to attain reductions in motor vehicle emissions (in combination with other measures) as needed to comply with the Act's RFP milestones and attainment requirements. The requirements for establishing a VMT Offset program are set forth in 182(d)(1)(A) and discussed in the General Preamble to Title I of the Act (57 FR 13498 April 16, 1992).

As described in the proposal, section 182(d)(1)(A) sets forth three elements that must be met by a VMT Offset SIP. Under USEPA's alternative interpretation, the three required elements of section 182(d)(1)(A) are separable, and can be divided into three separate submissions that could be submitted on different dates. Section 179(a) of the Act, in establishing how USEPA would be required to apply mandatory sanctions if a State fails to submit a full SIP, also provides that the sanctions clock starts if a State fails to submit one or more SIP elements, as determined by the Administrator. The USEPA believes that this language provides USEPA the authority to determine that the different elements of the SIP submissions are separable. Moreover, given the continued timing problems addressed above, USEPA believes it is appropriate to allow States to separate the VMT Offset SIP into three elements, each to be submitted at different times: (1) The initial requirement to submit TCMs that offset growth in emissions; (2) the requirement to comply with the 15 percent periodic reduction requirement of the Act; and 3) the requirement to comply with the post-1996 periodic reduction and attainment requirements of the Act.

As noted in the January 10, 1995, proposal, the USEPA would not take final action on the second element until the State has submitted a complete 15 percent ROP plan. On July 13, 1995, the State of Wisconsin submitted a 15 percent ROP plan with fully enforceable rules that have been subject to public hearing. No TCMs were utilized in the ROP plan to meet the 15 percent reduction in emissions. On July 18, 1995, the USEPA determined that this ROP plan was complete.

II. Final Rulemaking Action

In this action, USEPA is approving the second element of the VMT offset SIP revision submitted by the State of Wisconsin. The third element of the Wisconsin VMT offset SIP will also be the subject of a future rulemaking.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by an October 4, 1993, memorandum from Michael H. Shapiro, Acting Assistant Administrator for Air and Radiation. The Office of Management and Budget (OMB) has exempted this regulatory action from Executive Order 12866 review.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to any SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et seq., USEPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, USEPA may certify that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

The SIP approvals under section 110 and subchapter I, part D, of the Act do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, I certify that it does not have a significant impact on small entities affected.

Moreover, due to the nature of the Federal-State relationship under the Act, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of State action. The Act forbids USEPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *USEPA*, 427 U.S. 246, 256–66 (1976).

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 13, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See Section 307(b)(2)).

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 (Unfunded Mandates Act), signed into law on March 22, 1995, EPA must assess whether various actions undertaken in association with proposed or final regulations include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

EPA's final action will relieve requirements otherwise imposed under the Clean Air Act and, hence does not impose any federal intergovernmental mandate, as defined in section 101 of the Unfunded Mandates Act. This action also will not impose a mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Ozone.

Dated: August 17, 1995.

Valdas V. Adamkus,

Regional Administrator.

40 CFR part 52, is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C 7401–7671q.

Subpart YY—Wisconsin

2. Section 52.2585 is amended by adding paragraph (h) to read as follows:

§ 52.2585 Control strategy: Ozone.

* * * * *

(h) Approval—On November 15, 1993, the Wisconsin Department of Natural Resources submitted a revision to the ozone State Implementation Plan. The submittal pertained to a plan for forecasting VMT in the severe ozone nonattainment area of southeastern Wisconsin and demonstrated that Transportation Control Measures would not be necessary to meet the 15 percent Rate-of-Progress milestone.

Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Planning Purposes; Commonwealth of Kentucky

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: On November 13, 1992, the Commonwealth of Kentucky through the Natural Resources and Environmental Protection Cabinet (Cabinet), submitted a maintenance plan and a request to redesignate the Lexington, Owensboro, Paducah, and Edmonson County areas from nonattainment to attainment for ozone (O_3). Under the Clean Air Act (CAA), designations can be changed if sufficient data are available to warrant such changes and the redesignation request satisfies the criteria set forth in the CAA. In this action, EPA is approving the redesignation to attainment of the Lexington area (Fayette and Scott counties) and the associated maintenance plan because it meets the maintenance plan and redesignation requirements. EPA has approved the requests to redesignate to attainment and maintenance plans for the Owensboro, Edmonson County and Paducah areas. In this action, EPA is also approving the 1990 base year inventory for the Lexington marginal O_3 nonattainment area.

DATES: This final rule is effective November 13, 1995 unless adverse or critical comments are received by October 11, 1995. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Written comments on this action should be addressed to Scott Southwick, at the EPA Regional Office listed below. Copies of the documents relative to this action are available for public inspection during normal business hours at the following locations. The interested persons wanting to examine these documents should make an appointment with the appropriate office at least 24 hours before the visiting day.

Air and Radiation Docket and Information Center (Air Docket 6102), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Environmental Protection Agency, Region 4, Air Programs Branch, 345 Courtland Street NE., Atlanta, GA 30365

Commonwealth of Kentucky, Natural Resources and Environmental Protection Cabinet, Department for Environmental Protection, Division for Air Quality, 803 Schenkel Lane, Frankfort, KY 40601.

FOR FURTHER INFORMATION CONTACT: Scott Southwick of the EPA Region 4 Air Programs Branch at (404) 347–3555 extension 4207 and at the above address. Reference file KY–69–3–6904.

SUPPLEMENTARY INFORMATION: On November 15, 1990, the Clean Air Act Amendments of 1990 (CAAA) were enacted. (Pub. L. 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q). Under section 107(d)(1), in conjunction with the Governor of Kentucky, EPA designated the Lexington area as nonattainment because the area violated the O_3 standard during the period from 1987 through 1989 (See 56 FR 56694 (Nov. 6, 1991) and 57 FR 56762 (Nov. 30, 1992), codified at 40 CFR 81.318).

The Lexington marginal O_3 nonattainment area (nonattainment area) more recently has ambient monitoring data that show no violations of the O_3 National Ambient Air Quality Standards (NAAQS), during the period from 1989 through 1991. In addition, there have been no violations reported for the 1992, 1993, or 1994 O_3 seasons. Therefore, in an effort to comply with the amended CAA and to ensure continued attainment of the NAAQS, on November 13, 1992, the Cabinet submitted for parallel processing an O_3 maintenance SIP for the nonattainment area and requested redesignation of the nonattainment area to attainment with respect to the O_3 NAAQS and EPA found the request complete. On November 24, 1992, the Cabinet submitted the Marginal Ozone Nonattainment Areas Projection Inventory 1990–2004 as an amendment to the SIP. On January 15, 1993, July 16, 1993, February 28, 1994, August 29, 1994, and June 14, 1995, the Cabinet submitted revisions addressing public and/or EPA comments on the redesignation request, maintenance plan, and projection inventory.

On May 7, 1993, Region 4 determined that the information received from the Cabinet constituted a complete redesignation request under the general completeness criteria of 40 CFR 51, appendix V, sections 2.1 and 2.2. However, for purposes of determining what requirements are applicable for redesignation purposes, EPA believes it is necessary to identify when the Cabinet first submitted a redesignation request that meets the completeness criteria. EPA noted in a previous policy memorandum that parallel processing requests for submittals under the amended CAA, including redesignation submittals, would not be determined complete. *See* "State Implementation Plan (SIP) Actions Submitted in Response to Clean Air Act (Act) Deadlines," Memorandum from John Calcagni to Air Programs Division Directors, Regions I–X, dated October 28, 1992 (Memorandum). The rationale for this conclusion was that the parallel processing exception to the completeness criteria (40 CFR Part 51, appendix V, section 2.3) was not intended to extend statutory due dates for mandatory submittals. (*See* Memorandum at 3–4). However, since requests for redesignation are not mandatory submittals under the CAA, EPA believed it appropriate to change its policy with respect to redesignation submittals to conform to the existing completeness criteria (58 FR 38108 (July 15, 1993)). Therefore, EPA believes, the parallel processing exception to the completeness criteria may be applied to redesignation request submittals, at least until such time as the EPA decides to revise that exception. The Cabinet submitted a redesignation request and a maintenance plan on November 13, 1992. When the maintenance plan became state effective on June 14, 1995, the Commonwealth of Kentucky no longer needed parallel processing for the redesignation request and maintenance plan.

The Kentucky redesignation request for the nonattainment areas meets the five requirements of section 107(d)(3)(E) for redesignation to attainment. The following is a brief description of how the Commonwealth of Kentucky has fulfilled each of these requirements. Because the maintenance plan is a critical element of the redesignation request, EPA will discuss its evaluation of the maintenance plan under its analysis of the redesignation request.

1. The Area Must Have Attained the O_3 NAAQS

The Cabinet's request is based on an analysis of quality assured ambient air quality monitoring data which is relevant to the maintenance plan and to the redesignation request. Ambient air quality monitoring data for calendar year 1989 through calendar year 1991 show an expected exceedance rate of less than 1.0 per year of the O_3 NAAQS in the marginal nonattainment area. (*See* 40 CFR 50.9 and appendix H.) In addition, there were no violations reported for the 1992, 1993, and 1994 O_3 seasons and there have been no violations to date in 1995. Because the nonattainment area has complete quality-assured data showing no violations of the standard over the most recent consecutive three calendar year period, the area has met the first statutory criterion of attainment of the O_3 NAAQS. The Commonwealth of Kentucky has committed to continue monitoring the nonattainment area in accordance with 40 CFR 58.

2. The Area Has Met All Applicable Requirements Under Section 110, and Part D of the Act

On January 25, 1980, August 7, 1981, November 24, 1981, November 30, 1981, and March 30, 1983, EPA fully approved Kentucky's SIP as meeting the requirements of section 110(a)(2) and part D of the 1977 CAA (45 FR 6092, 46 FR 40188, 46 FR 57486, 46 FR 58080, and 48 FR 13168). The approved control strategy did not result in attainment of NAAQS for O_3. Additionally, the amended CAA revised section 182(a)(2)(A), 110(a)(2) and, under part D, revised section 172 and added new requirements for all nonattainment areas. Therefore, for purposes of redesignation, to meet the requirement that the SIP contain all applicable requirements under the CAA, EPA reviewed the Kentucky SIP to ensure that it contains all measures due under the amended CAA prior to or at the time the Commonwealth of Kentucky submitted its redesignation request.

A. Section 110 Requirements

Although section 110 was amended by the CAA of 1990, the Kentucky SIP for the marginal nonattainment area meets the requirements of amended section 110(a)(2). A number of the requirements did not change in substance and, therefore, EPA believes that the pre-amendment SIP met these requirements.

B. Part D Requirements

Before the nonattainment area may be redesignated to attainment, it must have fulfilled the applicable requirements of part D. Under part D, an area's classification indicates the requirements to which it will be subject. Subpart 1 of part D sets forth the basic nonattainment requirements applicable to all nonattainment areas, classified as well as nonclassifiable. Subpart 2 of part D establishes additional requirements for O_3 nonattainment areas classified under table 1 of section 181(a). The Lexington nonattainment area was classified as marginal (See 56 FR 56694, codified at 40 CFR 81.318). The Commonwealth of Kentucky submitted their request for redesignation of the marginal nonattainment area prior to November 15, 1992. Therefore, in order to be redesignated to attainment, the Commonwealth of Kentucky must meet the applicable requirements of subpart 1 of part D, specifically sections 172(c) and 176, but is not required to meet the applicable requirements of subpart 2 of part D, which became due on or after November 15, 1992.

B1. Subpart 1 of Part D

Under section 172(b), the section 172(c) requirements are applicable as determined by the Administrator, but no later than three years after an area has been designated to nonattainment. EPA has not determined that these requirements were applicable to O_3 nonattainment areas on or before November 13, 1992, the date that the Commonwealth of Kentucky submitted a complete redesignation request for the marginal nonattainment area. Therefore, the Commonwealth of Kentucky was not required to meet these requirements for purposes of redesignation. The Lexington area currently has a fully approvable New Source Review (NSR) program which was last revised on June 23, 1994 (59 FR 32343). Upon redesignation of the area to attainment, the Prevention of Significant Deterioration (PSD) provisions contained in part C of title I are applicable. On January 25, 1978; September 1, 1989; November 6, 1989; November 13, 1989; November 28, 1989; February 7, 1990; and June 23, 1994, the EPA approved revisions to the Commonwealth of Kentucky's PSD program (43 FR 3360, 54 FR 36307, 54 FR 46613, 54 FR 47211, 54 FR 48887, 55 FR 4169 and 59 FR 32343).

Section 176(c) of the CAA requires states to revise their SIPs to establish criteria and procedures to ensure that Federal actions, before they are taken, conform to the air quality planning goals in the applicable state SIP. The requirement to determine conformity applies to transportation plans, programs and projects developed,

funded or approved under Title 23 U.S.C. or the Federal Transit Act ("transportation conformity"), as well as to all other Federal actions ("general conformity"). Section 176 further provides that the conformity revisions to be submitted by states must be consistent with Federal conformity regulations that the CAA required EPA to promulgate. Congress provided for the state revisions to be submitted by November 15, 1992, one year after the date for promulgation of final EPA conformity regulations which were due November 15, 1991. When that date passed without such promulgation, EPA's General Preamble for the Implementation of Title I informed states that its conformity regulations would establish a submittal date [see 57 FR 13498, 13557 (April 16, 1992)].

The EPA promulgated final transportation conformity regulations on November 24, 1993, (58 FR 62188) and general conformity regulations on November 30, 1993 (58 FR 63214). These conformity rules require that states adopt both transportation and general conformity provisions in the SIP for areas designated nonattainment or subject to a maintenance plan approved under CAA section 175A. Pursuant to section 51.396 of the transportation conformity rule and section 51.851 of the general conformity rule, the Commonwealth of Kentucky is required to submit a SIP revision containing transportation conformity criteria and procedures consistent with those established in the Federal rule by November 25, 1994. Similarly, Kentucky is required to submit a SIP revision containing general conformity criteria and procedures consistent with those established in the Federal rule by December 1, 1994. Because the Commonwealth requested redesignation of the Lexington area prior to the deadline for these submittals, they are not applicable requirements under section 107(d)(3)(E)(v) and, thus, do not affect approval of this redesignation request.

On February 24, 1994, the Commonwealth of Kentucky revised their maintenance plan to commit to revise the SIP by November 25, 1994, to be consistent with the final Federal regulations on conformity. In addition, the Division for Air Quality and the Kentucky Transportation Cabinet are cooperating in adopting regulations consistent with the final conformity regulation.

B2. Subpart 2 of Part D

The CAA was amended on November 15, 1990, Pub. L. 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. EPA was required to classify O_3 nonattainment areas according to the severity of their problem. On November 6, 1991 (56 FR 56694), the Lexington area was designated as marginal O_3 nonattainment. Because this area is marginal, the area must meet section 182(a) of the CAA. EPA has analyzed the SIP and determined that it is consistent with the requirements of amended section 182. Below is a summary of how the area has meet the requirements of these sections.

(1) Emissions Inventory

The CAA required an inventory of all actual emissions from all sources as described in section 172(c)(3) by November 15, 1992. On November 13, 1992, the Cabinet submitted an emission inventory on the Lexington area. This emission inventory is being approved in this notice.

(2) Reasonably Available Control Technology (RACT)

The CAA also amended section 182(a)(2)(A), in which Congress statutorily adopted the requirement that O_3 nonattainment areas fix their deficient Reasonably Available Control Technology (RACT) rules for O_3. Areas designated nonattainment before amendment of the CAA and which retained that designation and were classified as marginal or above as of enactment are required to meet the RACT Fix-ups requirement. The Lexington area was not designated nonattainment prior to 1990 and was classified as marginal O_3 nonattainment pursuant to the 1990 CAA. Therefore, this area is not subject to the RACT fix-up requirement. However, Kentucky chose to apply RACT on all major sources which commenced on or after the effective date of a particular RACT rule. Kentucky submitted VOC RACT SIP revisions through the Cabinet to EPA on February 12, 1992; October 20, 1992; February 17, 1993; and March 4, 1993. Action was taken December 12, 1993, to approve the SIP revision submitted on February 12, 1992. Action was taken June 23, 1994, to approve the SIP revisions submitted on October 20, 1992, February 17, 1993, and March 4, 1993.

(3) Emissions Statements

The CAA required that the SIP be revised by November 15, 1992, to require stationary sources of oxides of nitrogen (NO_X) and VOCs to provide the State with a statement showing actual emissions each year. This request to redesignate was submitted prior to the November 15, 1992, emissions statement deadline. Therefore, the emissions statement program is not a requirement for the Lexington area.

(4) New Source Review (NSR)

The CAA required all classified nonattainment areas to meet several requirements regarding NSR, including provisions to ensure that increased emissions of VOCs compounds will not result from any new or major source modifications and a general offset rule. A SIP revision incorporating these requirements was due November 15, 1992. This request to redesignate was submitted prior to the November 15, 1992, NSR deadline. Therefore, the NSR program is not a requirement for the Lexington area.

3. The Area Has a Fully Approved SIP Under Section 110(k) of the CAA

Based on the approval of provisions under the pre-amended CAA and EPA's prior approval of SIP revisions under the amended CAA, EPA has determined that Kentucky has a fully approved O_3 SIP under section 110(k) for the marginal nonattainment areas, which also meets the applicable requirements of section 110 and part D as discussed above.

4. The Air Quality Improvement Must Be Permanent and Enforceable

Several control measures have come into place since the nonattainment area violated the O_3 NAAQS. Of these control measures, the reduction of fuel volatility from 11.4 psi to 8.6 psi, as measured by the Reid Vapor Pressure (RVP), and fleet turnover produced the most significant decreases in VOC emissions. The table below summarizes total emissions for VOCs. The difference between 1988 and 1990 are actual permanent and enforceable emission reductions which are responsible for the recent air quality improvement in the areas. The VOC emissions in the base year are not artificially low due to local economic downturn.

REDUCTIONS IN VOC EMISSIONS FROM 1988 TO 1990

MSA	VOCs (tpd)		
	1988	1990	1990–1988
Lexington	86.31	63.79	22.52

5. The Area Must Have a Fully Approved Maintenance Plan Pursuant to Section 175A of the CAA

Section 175A of the CAA sets forth the elements of a maintenance plan for areas seeking redesignation from nonattainment to attainment. The plan must demonstrate continued attainment of the applicable NAAQS for at least ten years after the Administrator approves a redesignation to attainment. Eight years after the redesignation, the State must submit a revised maintenance plan which demonstrates attainment for the ten years following the initial ten-year period. To provide for the possibility of future NAAQS violations, the maintenance plan must contain contingency measures, with a schedule for implementation, adequate to assure prompt correction of any air quality problems.

In this notice, EPA is approving the Commonwealth of Kentucky's maintenance plan for the Lexington marginal nonattainment area because EPA finds that the Commonwealth of Kentucky's submittal meets the requirements of section 175A.

A. Emissions Inventory—Base Year Inventory

On November 13, 1992, the Commonwealth of Kentucky submitted comprehensive inventories of VOC, NO_X, and CO emissions for the Lexington marginal nonattainment area. The inventories included biogenic, area, stationary, and mobile sources using 1990 as the base year for calculations to demonstrate maintenance. The 1990 inventory is considered representative of attainment conditions because the O_3 NAAQS was not violated during 1990.

The Commonwealth of Kentucky submittal contains the detailed inventory data and summaries by county and source category. This comprehensive base year emissions inventory was submitted in the SIP Air Pollutant Inventory Management System (SAMS) format. Finally, this inventory was prepared in accordance with EPA guidance. A summary of the base year and projected maintenance year inventories for the Lexington area is included in this notice for VOCs and NO_X. The CO and the biogenic VOC values are shown below and are a part of the 1990 base year emission inventory. This notice is approving the base year inventory.

CO EMISSION INVENTORY SUMMARY FOR 1990

[Tons per day]

	Point	Area	Mobile	Non-road	Total
Lexington	0.0	3.52	265.19	57.40	326.11

BIOGENIC EMISSION INVENTORY SUMMARY FOR 1990

[Tons per day]

	Biogenic
Lexington 1990 Emissions	24.1

B. Demonstration of Maintenance—Projected Inventories

Below, totals for VOC and NO_X emissions were projected from the 1990 base year out to 2004. These projected inventories were prepared in accordance with EPA guidance. As indicated in the following tables, increases in VOC and NO_X emissions are projected in the Lexington nonattainment area.

LEXINGTON VOC EMISSION INVENTORY SUMMARY

[Tons per day]

	1990	1993	1996	1999	2002	2004
Point	12.39	12.63	17.77	17.21	16.85	16.68
Area	14.36	14.53	14.71	14.88	15.06	15.18
Nonroad	11.06	11.21	11.36	11.51	11.66	11.77
Mobile	25.98	24.86	24.38	24.69	25.13	26.03
Total	63.79	63.23	68.22	68.29	68.70	69.66

LEXINGTON NO_X Emission Inventory Summary

[Tons per day]

	1990	1993	1996	1999	2002	2004
Point	1.98	2.01	2.03	2.05	2.07	2.09
Area	0.34	0.34	0.35	0.35	0.36	0.36
Nonroad	8.16	8.27	8.39	8.50	8.62	8.70
Mobile	22.06	21.23	20.98	20.95	20.85	21.71
Total	32.54	31.85	31.75	31.85	31.90	32.86

VOC AND NO_X PROJECTED EMISSIONS CHANGES

	VOCs	NO_X
Lexington	9.20%	0.98%

Because there were increases in VOC and NO_X emissions, Kentucky was required to model to demonstrate maintenance of the O_3 standard despite emissions growth. The Empirical Kinetics Modeling Approach (EKMA) was the model used. EKMA models Nonmethane Organic Compounds (NMOC) and NMOC data were available in 1989. For this reason, the model was run using meteorological data from June 23, June 26, and July 18, 1989. These days correspond to the highest ozone monitor readings for which on-site NMOC were available. The EKMA modeling projected O_3 values of 0.106 parts per million (ppm) for June 23, 1989, .116 ppm for July 26, 1989, and .064 ppm for July 18, 1995.

The modeling indicated that the future mix of emissions produced ozone levels below the federal O_3 standard. Thus, the analysis indicated that the Lexington area should continue to maintain the standard throughout the maintenance period.

C. Verification of Continued Attainment

Continued attainment of the O_3 NAAQS in the marginal nonattainment areas depends, in part, on the Commonwealth of Kentucky's efforts toward tracking indicators of continued attainment during the maintenance period. The Commonwealth of Kentucky's contingency plan is triggered by two indicators, the emissions inventory for interim years exceeding the baseline emission inventory by more than 10% or an air quality violation. As stated in the maintenance plan, the Cabinet will be developing these emissions inventories every three years beginning in 1996. These periodic inventories will help to verify continued attainment.

D. Contingency Plan

The level of VOC and NO_X emissions in the nonattainment area will largely determine its ability to stay in compliance with the O_3 NAAQS in the future. Despite the Commonwealth's best efforts to demonstrate continued compliance with the NAAQS, the ambient air pollutant concentrations may exceed or violate the NAAQS. Therefore, the Commonwealth of Kentucky has provided contingency measures with a schedule for implementation in the event of a future O_3 air quality problem. The plan contains a contingency to implement RACT on existing major sources in the area where the violation occurred within ninety (90) days. RACT was not required for this nonattainment area because it was designated as a marginal nonattainment area pursuant to the CAA. EPA finds that the contingency measures provided in the Commonwealth of Kentucky's submittal meet the requirements of section 175A(d) of the CAA.

E. Subsequent Maintenance Plan Revisions

In accordance with section 175A(b) of the CAA, the Commonwealth of Kentucky has agreed to submit a revised maintenance SIP eight years after the marginal nonattainment areas redesignate to attainment. Such revised SIP will provide for maintenance for an additional ten years.

Final Action

EPA is approving Lexington's O_3 maintenance plan because it meets the requirements of section 175A. The EPA is redesignating the Lexington nonattainment area to attainment for O_3 because the Commonwealth of Kentucky has demonstrated compliance with the requirements of section 107(d)(3)(E) for redesignation. In addition, EPA is approving the 1990 base year emission inventory for the Lexington nonattainment area. Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

The O_3 SIP is designed to satisfy the requirements of part D of the CAA and to provide for attainment and maintenance of the O_3 NAAQS. This final redesignation should not be interpreted as authorizing the Commonwealth of Kentucky to delete, alter, or rescind any of the VOC or NO_X emission limitations and restrictions contained in the approved O_3 SIP. Changes to O_3 SIP VOC regulations rendering them less stringent than those contained in the EPA approved plan cannot be made unless a revised plan for attainment and maintenance is submitted to and approved by EPA. Unauthorized relaxations, deletions, and changes could result in both a finding of nonimplementation (section 173(b) of the CAA) and in a SIP deficiency call made pursuant to section 110(a)(2)(H) of the CAA.

The EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this **Federal Register** publication, the EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 13, 1995 unless, by October 11, 1995, adverse or critical comments are received.

If the EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective November 13, 1995.

Under section 307(b)(1) of the CAA, 42 U.S.C. 7607 (b)(1), petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 13, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2) of the Act, 42 U.S.C. 7607 (b)(2).)

The OMB has exempted these actions from review under Executive Order 12866.

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

Redesignation of an area to attainment under section 107(d)(3)(E) of the CAA does not impose any new requirements on small entities. Redesignation is an action that affects the status of a geographical area and does not impose any regulatory requirements on sources. The Administrator certifies that the approval of the redesignation request will not affect a substantial number of small entities.

Unfunded Mandates

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

Through submission of this state implementation plan or plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under Section 107 of the Clean Air Act. These rules may bind State, local and tribal governments to perform certain actions and also require the private sector to perform certain duties. To the extent that the rules being approved by this action will impose no new requirements; such sources are already subject to these regulations under State law. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action. EPA has also determined that this final action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

40 CFR Part 60

[AD–FRL–5287–7]

Standards of Performance for New Stationary Sources Appendix A—Reference Methods; Amendments to Method 24 for the Determination of Volatile Matter Content, Water Content, Density, Volume Solids, and Weight Solids of Surface Coatings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes procedures for the determination of volatile matter content, density, volume solids, and water content for non thin film ultraviolet radiation-cured coatings. Method 24 refers to the American Society for Testing and Materials (ASTM) procedures for the determination of volatile matter content, density, volume solids, weight solids, and water content of surface coatings. This ASTM method excluded ultraviolet radiation-cured coatings which was not EPA's intent. Therefore, EPA is revising Method 24 to apply to non thin film ultraviolet radiation-cured coatings.

EFFECTIVE DATE: September 11, 1995. The incorporation by reference of certain publications listed in the regulation is approved by the Director of the Federal Register as of September 11, 1995.

ADDRESSES: *Docket.* Docket No. A–94–37, containing material relevant to this rulemaking, is available for public inspection and copying between 8:30 a.m. and Noon, and 1:30 and 3:30 p.m., Monday through Friday, at EPA's Air Docket Section, Room M1500, First Floor, Waterside Mall, Gallery 1, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

SUPPLEMENTARY INFORMATION:

I. The Rulemaking

Method 24 was intended to be used for measuring volatile organic compounds content of all coatings that are intended for either ambient or baking film foundation. When Method 24 was published in 1980 it referenced the American Society for Testing and Materials (ASTM) Method D 2369–81, which the Environmental Protection Agency believed would apply to all coatings. However, that method was not applicable to ultraviolet (UV) radiation-cured coatings and this amendment to Method 24 will incorporate ASTM Method D 5403–93, which does contain those procedures.

This rulemaking does not impose emission measurement requirements beyond those specified in the current regulation, nor does it change any emission standard. Rather, the rulemaking would simply amend an existing test method associated with emission measurement requirements that would apply irrespective of this rulemaking.

II. Public Participation

The opportunity to hold a public hearing on February 8, 1995 at 10 a.m. was present in the proposal notice, but no one desired to make an oral presentation. The public comment period was from January 9, 1995 to March 7, 1995.

III. Significant Comments and Changes to the Proposed Rulemaking

Seven comment letters were received from the proposal rulemaking. The major comments and responses are summarized in this preamble.

Three comments believe that ASTM D 5403–93 is not applicable to thin film UV cured coatings and inks. They noted that to meet the minimum sample size requirement of 0.2 grams, at the coatings recommended thickness, the substrate would be too large to weigh on normal laboratory balances. They requested that the method be modified to state this limitation.

The EPA agrees that the method should be modified to state that ASTM D 5403–93 is not applicable to thin film UV cured coatings and inks. For this method a thin film UV cured coating or ink is one which will not allow the tester to apply at least 0.2 g of coating to the substrate at the supplier recommended film thickness. Revisions have been made to add the equation used to determine if ASTM D 5403–93 is applicable. The revisions also include the requirement of a minimum size substrate before a coating can be classified thin film for this method.

One commenter requested that the cure test at 50 percent exposure and the oven drying portion of ASTM D 5403–93 be deleted from the proposed Method 24 amendments for UV cured coatings. The commenter believes that these steps should be deleted because they expose the cured coatings to conditions to which they would not normally be exposed and over estimate potential emissions.

The EPA does not agree with the commenter's argument that these steps over estimate potential emissions. The purpose of the cure test is to ensure that the coating is properly cured before being placed in the oven. If the coating is not properly cured before being placed in the oven, the emissions will be biased high. The purpose of placing the cured coating in the oven is to determine the VOC emissions that will be emitted over time. Even after a coating is cured under normal procedures, VOC are released during the life time of the coating.

Two commenters were concerned that EPA looks at this modification to Method 24 as a complete "fix it" for the test method. They both noted section 1.4 of ASTM D 5403–93 which states that the method may not be applicable to radiation curable materials wherein the volatile material is water.

The EPA is not trying to imply that this modification makes Method 24 perfect. The EPA recognizes the limitations of ASTM D 5403–93 as stated in Section 1 of the method and also its limitations with respect to thin film radiation cured coating as previously discussed in this preamble. However, Method 24 is the best method currently available for determining the VOC content of coatings and inks. The EPA is always investigating new ways to improve its current test methods including Method 24.

IV. Administrative Requirements

A. Docket

The docket is an organized and complete file for all information submitted or otherwise considered by EPA in the development of this proposed rulemaking. The principle purposes of the docket are: (1) To allow interested parties to identify and locate documents so that they can effectively participate in the rulemaking process and (2) to serve as the record in case of judicial review (except for interagency review materials).

[Section 307(d)(7)(A)].

B. Executive Order 12866

Under Executive Order 12866 (58 FR 51735 (October 4, 1993)), the Agency must determine whether a regulatory action is "significant" and therefore subject to Office of Management and Budget (OMB) review and the requirements of this Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligation of recipients thereof; or

(4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this rule is not "significant" because none of the listed criteria apply to this action. Consequently, this action was not submitted to OMB for review under Executive Order 12866.

C. Unfunded Mandates Act

Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act") (signed into law on March 22, 1995) requires that the Agency prepare a budgetary impact statement before promulgating a rule that includes a Federal mandate that may result in expenditure by State, local, and tribal governments, in aggregate, or by the private sector of $100 million or more in any one year. Section 204 requires the Agency to establish a plan for obtaining input from and informing, educating, and advising any small governments that may be significantly or uniquely affected by the rule.

Under section 205 of the Unfunded Mandates Act, the Agency must identify and consider a reasonable number of regulatory alternatives before promulgating a rule for which a budgetary impact statement must be prepared. The Agency must select form those alternatives the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule, unless the Agency explains why this alternative is not selected or the selection of this alternative is inconsistent with law.

Because this proposed rule is estimated to result in the expenditure by State, local, and tribal governments or the private sector of less than $100 million in any one year, the Agency has not prepared a budgetary impact statement or specifically addressed the selection of the least costly, most cost-effective, or least burdensome alternative. Because small governments will not be significantly or uniquely affected by this rule, the Agency is not required to develop a plan with regard to small governments.

D. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) of 1980 requires the identification of potentially adverse impacts of Federal regulations upon small business entities. The Act specifically requires the completion of an RFA analysis in those instances where small business impacts are possible. Because this rulemaking imposes no adverse economic impacts, an analysis has not been conducted. Pursuant to the provision of 5 U.S.C. 605(b), I hereby certify that the promulgated rule will not have an impact on small entities because no additional costs will be incurred.

E. Paperwork Reduction Act

This rule does not change any information collection requirements subject to Office of Management and Budget under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

List of Subjects in 40 CFR Part 60

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Surface coating of metal furniture, Automotive and light duty truck surface coating operations, Graphic arts industry publications rotogravure printing, Pressure sensitive tape and label surface coating, Industrial surface coating, Large appliances, Metal coil surface coating, Beverage can surface coating industry, Flexible vinyl and urethane coating and printing, Plastic parts for business machine coatings industry, Incorporation by reference, Reporting and recordkeeping requirements.

Dated: August 23, 1995.

Carol M. Browner,
Administrator.

40 CFR part 60 is amended as follows:

1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7401–7601.

2. In § 60.17 of Subpart A, by adding a paragraph (a)(63) to read as follows:

§ 60.17 Incorporation by reference.

* * * * *

(a) * * *

(63) ASTM D 5403–93 Standard Test Methods for Volatile Content of Radiation Curable Materials. IBR approved September 11, 1995 for Method 24 of Appendix A.

* * * * *

3. In Method 24 of Appendix A, Section 3.1 is amended by removing the words "For all other coatings analyzed as follows":

4. In Method 24 of Appendix A, Sections 3.2, 3.3, 3.4, 3.5, 3.6, 3.7 are redesignated as Sections 3.3, 3.4, 3.5, 3.6, 3.7, 3.8, respectively.

5. In Method 24 of Appendix A, Equations 24–1 through 24–4 are redesignated as Equations 24–2 through 24–5, respectively.

6. In Method 24 of Appendix A, newly redesignated Section 3.8.1, last sentence, "Section 3.4" is revised to read "Section 3.5".

7. In Method 24 of Appendix A, newly redesignated Section 3.8.2, second sentence, "Section 3.3" is revised to read "Section 3.4".

8. In Method 24 of Appendix A, newly redesignated Section 3.8.2, third sentence, "Section 3.4" is revised to read "Section 3.5".

9. In Method 24 of Appendix A, newly redesignated Section 3.8.2.4, last sentence, "Equation 24–1" is revised to read "Equation 24–2".

10. In Method 24 of Appendix A, Sections 2.6, 3.2 and 3.9 are added to read as follows:

* * * * *

2. * * *

2.6 ASTM D 5403–93 Standard Test Methods for Volatile Content of Radiation Curable Materials (incorporated by reference—see § 60.17).

* * * * *

3.2 Non Thin-film Ultraviolet Radiation-cured Coating. To determine volatile content of non thin-film ultraviolet radiation-cured (UV radiation-cured) coatings, follow the procedures in Section 3.9. Determine water content, density and solids content of the UV-cured coatings according to Sections 3.4, 3.5, and 3.6, respectively. The UV-cured coatings are coatings which contain unreacted monomers that are polymerized by exposure to ultraviolet light. To determine if a coating or ink can be classified as a thin-film UV cured coating or ink, use the following equation:

$C = F\ A\ D$ Eq. 24–1

Where:

A=Area of substrate, in^2, cm^2.
C=Amount of coating or ink added to the substrate, g.
D=Density of coating or ink, g/in^3 (g/cm^3)
F=Manufacturer's recommended film thickness, in (cm).

If C is less than 0.2 g and A is greater than or equal to 35 in^2 (225 cm^2) then the coating or ink is considered a thin-film UV radiation-cured coating for determining applicability of ASTM D 5403–93.

Note: As noted in Section 1.4 of ASTM D 5403–93, this method may not be applicable to radiation curable materials wherein the volatile material is water. For all other coatings not covered by Sections 3.1 or 3.2 analyze as follows:

* * * * *

3.9 UV-cured Coating's Volatile Matter Content. Use the procedure in ASTM D 5403–93 (incorporated by reference—see § 60.17) to determine the volatile matter content of the coating except the curing test described in NOTE 2 of ASTM D 5403–93 is required.

Clean Air Act Promulgation of Reclassification of PM_{10} Nonattainment Areas—Connecticut; Approval of 1-Year Extension of Attainment Date for New Haven

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is fully approving Connecticut's request for a 1-year extension of the attainment date for the New Haven PM10 nonattainment area. This action is based on monitored air quality data for the national ambient air quality standard for PM10 during the years 1992–94. This action is being taken under the Clean Air Act.

DATES: This final rule is effective November 13, 1995, unless notice is received by October 11, 1995 that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Comments may be mailed to Susan Studlien, Acting Director, Air, Pesticides and Toxics Management Division, EPA-New England, JFK Federal Building (AAA), Boston, MA 02203–2211. Copies of the documents relevant to this action are available for public inspection by appointment during normal business hours at the Air, Pesticides and Toxics Management Division, EPA-New England, One Congress Street, 10th floor, Boston, MA; Air and Radiation Docket and Information Center, US Environmental Protection Agency, 401 M Street, SW., (LE–131), Washington, DC 20460; and the Bureau of Air Management, Department of Environmental Protection, State Office Building, 79 Elm Street, Hartford, CT 06106–1630.

FOR FURTHER INFORMATION CONTACT: Matthew B. Cairns, (617) 565–4982.

SUPPLEMENTARY INFORMATION:

Background

Clean Air Act Requirements and EPA Actions Concerning Designation and Classification

On the date of enactment of the Clean Air Act Amendments of 1990 (herein after referred to as "the Act"), PM10 areas meeting the qualifications of § 107(d)(4)(B) of the Act were designated nonattainment by operation of law. [See generally, 42 USC section 7407(d)(4)(B).] These areas included all former Group I areas and any other areas violating the PM10 standards prior to January 1, 1989. On October 31, 1990 (55 FR 45799), EPA redefined a Group I area for Connecticut as the City of New Haven; the remainder of the state was designated as Group III. Subsequently, after enactment of the Act on November 15, 1990, New Haven was designated moderate nonattainment for PM10 in 56 FR 11101 (March 15, 1991). All other areas not designated nonattainment at enactment were designated unclassifiable.

States containing areas which were designated as moderate nonattainment by operation of law under § 107(d)(4)(B) were required to develop and submit SIPs to provide for the attainment of the PM10 NAAQS. Under § 189(a)(2), those SIP revisions were to be submitted within 1 year of enactment of the Act (November 15, 1991). The SIP revisions were to provide for implementation of reasonable available control measures/technology (RACM/RACT) by December 10, 1993 and attainment of the PM10 NAAQS by December 31, 1994.

Reclassification as Serious Nonattainment

EPA has the responsibility, under §§ 179(c) and 188(b)(2) of the Act, of determining within 6 months after December 31, 1994 whether initial moderate PM10 nonattainment areas have attained the NAAQS. Section 179(c)(1) of the Act provides that these determinations are to be based upon an area's "air quality as of the attainment date," and § 188(b)(2) is consistent with this requirement. EPA will make the determinations of whether an area's air quality is meeting the PM10 NAAQS based upon air quality data gathered at monitoring sites in the nonattainment area and entered into the Aerometric Information Retrieval System (AIRS). This data will be reviewed to determine the area's air quality status in accordance with EPA guidance at 40 CFR Part 50, Appendix K.

According to Appendix K, attainment of the annual PM10 standard is achieved when the annual arithmetic mean PM10 concentration is equal to or less than 50 $\mu g/m^3$. Attainment of the 24-hour standard is determined by calculating the expected number of exceedances of the 150 $\mu g/m^3$ limit per year. The 24-hour standard is attained when the expected number of exceedances is 1.0 or less. A total of 3 consecutive years of clean air quality data is generally necessary to show attainment of the 24-hour and annual standards for PM10. A complete year of air quality data, as referred to in 40 CFR Part 50, Appendix K, is comprised of all 4 calendar quarters with each quarter containing data from at least 75 percent of the scheduled sampling days.

Under § 188(b)(2) a moderate area shall be reclassified as serious by operation of law after the statutory attainment date if the Administrator determines that the area has failed to attain the NAAQS. Under § 188(b)(2)(B) of the Act, the EPA must publish a notice in the **Federal Register** identifying those areas which failed to attain the standard and must be reclassified as serious by operation of law.

Application for a 1-year Extension of the Attainment Date

If the State does not have the necessary number of consecutive clean years of data to show attainment of the NAAQS, a State may apply for an extension of the attainment date. Pursuant to § 188(d) of the Act, a State may apply for and EPA may grant a 1-year extension of the attainment date if the State has: (1) complied with the requirements and commitments pertaining to the applicable implementation plan for the area, and (2) the area has measured no more than 1 exceedance of the 24-hour PM10 standard in the year preceding the extension year, and the annual mean concentration of PM10 in the area for such year is less than or equal to the standard. If the State does not have the requisite number of years of clean air quality data to show attainment and does not apply or does not qualify for an attainment date extension, the area will be reclassified as serious by operation of law.

Section 188(d) of the Act provides that the Administrator "may" extend the attainment date for areas that meet the minimum requirements specified above. The provision does not dictate or compel that EPA grant extensions to such areas. In exercising this discretionary authority for PM10 nonattainment areas, EPA will examine the air quality planning progress made in the moderate area. EPA will be disinclined to grant an attainment date extension unless a State has, in substantial part, addressed its moderate PM10 planning obligations for the area. In order to determine whether the State has substantially met these planning requirements the EPA will review the States application for the attainment date extension to determine whether the State has: (1) Adopted and substantially implemented control measures submitted to address the requirement for implementing RACM/RACT in the moderate nonattainment area; and (2) that reasonable further progress is being met for the area. RFP for PM10 nonattainment areas is determined to be linear emissions reductions made on an annual basis which will provide progress toward the eventual attainment of the NAAQS in the area.

If an extension is granted, at the end of the extension year, EPA will again determine whether the area has attained the PM10 NAAQS. If the State still does not have 3 consecutive years of clean air quality data, it may apply for a second 1-year extension of the attainment date. In order to qualify for the second 1-year extension of the attainment date, the State must satisfy the same requirements listed above for the first extension. In addition, EPA will consider the State's PM10 planning progress for the area in a manner similar to its evaluation of the first extension request. However, EPA may grant no more than two 1-year extensions of the attainment date to a single nonattainment area. [See § 188(d) of the Act].

Summary of Connecticut's Extension Request

On March 31, 1995, the Connecticut Department of Environmental Protection (Connecticut DEP) submitted a request for a 1-year extension of the attainment date for the New Haven initial moderate PM10 nonattainment area.

EPA's Air Quality Strategies and Standards Division (AQSSD) has prepared a guidance titled "Criteria for Granting 1–Year Nonattainment Area Attainment Dates, Making Attainment Determinations, and Reporting on Quantitative Milestones" (November 14, 1994 memorandum from AQSSD Director Sally Shaver) which outlines how to assess the adequacy of requests for a 1-year extension of the attainment date. The rationale for EPA's approval action are detailed in the Technical Support Document (TSD), dated June 13, 1995. In summary, Connecticut has fulfilled the specific elements of that guidance as follows:

A. Connecticut is implementing the EPA-approved PM10 SIP.

B. New Haven has monitored no more than 1 exceedance during 1994, the year preceding the extension year.[1]

C. Connecticut has demonstrated that RACT/RACM, embodied in 7 consent orders, have been adopted and submitted in the form of a SIP revision and are being implemented for New Haven. Furthermore, real emissions reductions have been achieved.[2]

Connecticut's extension request states that indeed the area recorded no exceedances of the PM10 NAAQS in 1994, and is complying with the applicable state implementation plan. For further details regarding Connecticut's extension request and how it meets EPA's requirements, the reader should refer to the TSD dated June 13, 1995.

Final Action

EPA is approving an extension of the PM10 attainment date for New Haven, Connecticut to December 31, 1995.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this **Federal Register** publication, EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This action will be effective November 13, 1995 unless adverse or critical comments are received by October 11, 1995.

If the EPA receives such comments, this action will be withdrawn before the effective date by simultaneously publishing a subsequent notice that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective on November 13, 1995.

Under Executive Order 12866, 58 FR 51735 (October 4, 1993) EPA is required to determine whether regulatory actions are significant and therefore should be subject to OMB review, economic analysis, and the requirements of the Executive Order. The Executive Order defines a "significant regulatory action" as one that is likely to result in a rule that may meet at least one of the four criteria identified in section 3(f), including, under paragraph (1), that the rule may "have an annual effect on the economy of $100 million or more or adversely affect, in a material way, the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities."

The Agency has determined that the attainment date extension proposed today would result in none of the effects identified in section 3(f). Attainment date extensions under § 188(d) of the Act do not impose any new requirements on any sectors of the economy; nor do they result in a materially adverse impact on State, local, or tribal governments or communities.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

Under §§ 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must assess whether various actions undertaken in association with proposed or final regulations that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector, or to State, local, or tribal governments in the aggregate.

EPA has determined, as discussed earlier, that the finding that is the subject of this final action of failure to attain and grant a 1-year extension does not impose any federal intergovernment mandate, as defined in section 101 of the Unfunded Mandates Act. A finding that an area has failed to attain and should be granted a 1-year extension of the attainment date consists of factual determinations based upon air quality considerations and the area's compliance with certain prior requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector result from this action. This action also will not impose a mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector.

Extensions of attainment dates under § 188(d) do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *USEPA*, 427 US 246, 256–66 (S.Ct. 1976); 42 USC § 7410 (a)(2).

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225), as revised by an October 4, 1993, memorandum from Michael H. Shapiro, Acting Assistant Administrator for Air and Radiation. A future notice will inform the general public of these tables. The Office of Management and Budget (OMB) has exempted this action from review under Executive Order 12866.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under § 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 13, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. [See § 307(b)(2).]

List of Subjects in 40 CFR Part 81

Environmental protection, Air pollution control, Incorporation by reference, Particulate matter, Reporting and recordkeeping requirements.

Note: Incorporation by reference of the State Implementation Plan for the State of Connecticut was approved by the Director of the Federal Register on July 1, 1982.

Dated: July 10, 1995.

John P. DeVillars,

Regional Administrator, EPA-New England.

[FR Doc. 95–22132 Filed 9–8–95; 8:45 am]

BILLING CODE 6560-50-P

---

[1] A review of the PM10 air quality data for New Haven shows air quality monitors for this area monitored 4 exceedances of the 24-hour PM10 NAAQS during the 3-year period from 1992 to 1994. All exceedances occurred in 1993 at the Yankee Gas monitor site (AIRS Site ID 09–009–0021). The area did not have any exceedances of the PM10 NAAQS in 1994.

[2] Section 189(c) requires that Part D SIPs include quantitative milestones to document RFP towards attainment. Every 3 years until EPA redesignates an area to attainment, States must report on whether milestones have been met. Connecticut's SIP commits CT DEP to submit quantitative milestone and RFP reports to EPA every 3 years. For initial moderate PM10 nonattainment areas, the emissions reductions made between SIP submittal and the attainment date will satisfy the first quantitative milestone. (See General Preamble 57 FR 13539.) Since EPA believes it is reasonable to key the first milestone to the SIP revision containing control measures which will result in emission reductions and since the PM10 attainment date was less than 3 years from the actual submittal date of CT DEP's SIP revision, CT DEP submitted—and EPA is accepting—the emissions reductions associated with the New Haven PM10 Attainment Plan SIP revision (submitted to EPA on March 22, 1994) as meeting RFP and the first quantitative milestone for New Haven. (See TSD dated March 27, 1995.)

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 1803, 1815, and 1852

Addition of Coverage to NASA FAR Supplement Coverage on NASA Ombudsman Program

AGENCY: Office of Procurement, National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: This rule amends the regulations by adding coverage concerning NASA's Ombudsman Program. The Ombudsman Program will improve communications with interested parties. This rule sets forth a clause for identification of the NASA and installation ombudsmen to be included in solicitations and contracts. The clause also serves as the basis for a statement to be included in "Commerce Business Daily" announcements. In addition, the rule amends NASA's coverage on procurement integrity to include the NASA and installation ombudsmen as individuals authorized access to proprietary and source selection information.

EFFECTIVE DATE: October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph Le Cren, (202) 358–0444.

SUPPLEMENTARY INFORMATION:

Background

On May 25, 1995, a proposed rule to amend the NFS to add coverage on NASA's Ombudsman Program was published in the **Federal Register** (60 FR 27710) for comment. All comments were reviewed. A change was made as a result of the comments to substitute the word "adjudication" for "arbitration" in the clause at 1852.7002. That change was made as the term "arbitration" could be read as being too restrictive in its meaning. In addition, the word "Selection," appearing in the clause at 1852.215–84 was replaced with "Evaluation." That change is due to "Selection" being incorrect when the intention was to refer to NASA "Source Evaluation Board."

Impact

NASA certifies that this regulation will not have a significant economic impact on a substantial number of small entities under Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any reporting or record keeping requirements subject to the Paperwork Reduction Act.

List of Subjects in 48 CFR Parts 1803, 1815, and 1852

Government procurement.

Tom Luedtke,

Deputy Associate Administrator for Procurement.

Accordingly, 48 CFR parts 1803, 1815, and 1852 are amended as follows:

1. The authority citation for 48 CFR parts 1803, 1815, and 1852 continues to read as follows:

Authority: 42 U.S.C. 2473(c)(1).

PART 1803—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

2. In section 1803.104–5, the introductory text of paragraph (c) is revised and (c)(11) is added to read as follows:

1803.104–5 Disclosure, protection, and marking of proprietary and source selection information.

* * * * *

(c) Government employees serving in the following positions are authorized access to proprietary or source selection information, but only to the extent necessary to perform their official duties:

* * * * *

(11) Duly designated ombudsman.

* * * * *

PART 1815—CONTRACTING BY NEGOTIATION

3. Subpart 1815.70 is added to read as follows:

Subpart 1815.70—Ombudsman

1815.7001 NASA Ombudsman Program.
1815.7002 Commerce Business Daily announcements, solicitations and contracts.

1815.7001 NASA Ombudsman Program.

NASA's implementation of an ombudsman program is in NMI 1210.3, NASA Ombudsman Program.

1815.7002 Commerce Business Daily announcements, solicitations and contracts.

The contracting officer shall include a statement similar to that contained in the clause at 1852.215–84, Ombudsman, in Commerce Business Daily announcements of competitive procurements. Also, a clause substantially the same as the one at 1852.215–84 shall be included in Section L of solicitations, including draft solicitations, and in all contracts.

4. Section 1852.215–84 is added to read as follows:

1852.215–84 Ombudsman.

As prescribed in 1815.7002, insert the following clause:

Ombudsman

(October 1995)

An ombudsman has been appointed to hear concerns from offerors, potential offerors, and contractors during the preaward and postaward phases of this acquisition. The purpose of the ombudsman is not to diminish the authority of the contracting officer, the Source Evaluation Board, or the selection official, but to communicate concerns, issues, disagreements, and recommendations of interested parties to the appropriate Government personnel and to work to resolve them. When requested, the ombudsman will maintain strict confidentiality as to the source of the concern. The ombudsman does not participate in the evaluation of proposals, the source selection process, or the adjudication of formal contract disputes. Interested parties are invited to call the installation ombudsman _______ [Insert name] at _______ [Insert telephone number]. Concerns, issues, disagreements, and recommendations which cannot be resolved at the installation may be referred to the NASA ombudsman _______ [Insert name] at _______ [Insert telephone number].

(End of Clause)

BILLING CODE 7510–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 642

[Docket No. 940710–4292; I.D. 090195E]

Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Closure of a Commercial Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure of a commercial fishery for king mackerel.

SUMMARY: NMFS closes the commercial fishery in the exclusive economic zone (EEZ) for king mackerel from the western zone of the Gulf migratory group. This closure is necessary to protect the overfished Gulf king mackerel resource.

EFFECTIVE DATE: September 5, 1995, through June 30, 1996.

FOR FURTHER INFORMATION CONTACT: Mark F. Godcharles, 813–570–5305.

SUPPLEMENTARY INFORMATION: The fishery for coastal migratory pelagic fish (king mackerel, Spanish mackerel, cero, cobia, little tunny, dolphin, and, in the Gulf of Mexico only, bluefish) is managed under the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic (FMP). The FMP was prepared by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and is implemented by regulations at 50 CFR part 642, under the authority of the Magnuson Fishery Conservation and Management Act.

Catch limits recommended by the Councils and implemented by NMFS for the Gulf of Mexico migratory group of king mackerel for the current fishing year (July 1, 1995, through June 30, 1996) set the commercial quota at 0.77 million pounds (0.35 million kg) for the western zone.

Under 50 CFR 642.26(a), NMFS is required to close any segment of the king mackerel commercial fishery when its allocation or quota has been reached, or is projected to be reached, by publishing a document in the **Federal Register**. NMFS has determined that the commercial quota of 0.77 million pounds (0.35 million kg) for the western zone of the Gulf migratory group of king mackerel was reached on September 4, 1995. Hence, the commercial fishery for Gulf group king mackerel from the western zone is closed effective 12:01 a.m., local time, September 5, 1995, through June 30, 1996, the end of the fishing year. The boundary between the eastern and western zones is a line directly south from the Florida/Alabama boundary (87°31′06″ W. long.).

Except for a person aboard a charter vessel, during the closure, no person aboard a vessel permitted to fish under a commercial allocation may fish for, retain, or have in possession in the EEZ king mackerel from the western zone. A person aboard a charter vessel may continue to fish for king mackerel in the western zone under the bag limit set forth in § 642.24(a)(1)(i), provided the vessel is under charter and the vessel has an annual charter vessel permit, as specified in § 642.4(a)(2). A charter vessel with a permit to fish on a commercial allocation is under charter when it carries a passenger who fishes for a fee or when there are more than three persons aboard, including operator and crew.

During the closure, king mackerel from the western zone taken in the EEZ, including those harvested under the bag limit, may not be purchased, bartered, traded, or sold. This prohibition does not apply to trade in king mackerel from the western zone that were harvested, landed, and bartered, traded, or sold prior to the closure and held in cold storage by a dealer or processor.

Classification

This action is taken under 50 CFR 642.26(a) and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 5, 1995.

Richard W. Surdi,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

Proposed Rules

Federal Register

Vol. 60, No. 175

Monday, September 11, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 319

[Docket No. 93–119–1]

Importation of Citrus Fruits from Australia

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the Fruits and Vegetables regulations to allow oranges, lemons, limes, mandarins, and grapefruit from the Riverina and Sunraysia districts of Australia to be imported into the United States. We are taking this action because it appears that the citrus may be imported without presenting a significant risk of introducing injurious insects into the United States. Adoption of this proposed rule would provide importers and consumers in the United States with an additional source of citrus fruit.

DATES: Consideration will be given only to comments received on or before October 11, 1995.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 93–119–1, Regulatory Analysis and Development, PPD, APHIS, suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 93–119–1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Mr. Frank E. Cooper or Mr. Peter M. Grosser, Senior Operations Officers, Port Operations, PPQ, APHIS, 4700 River Road Unit 139, Riverdale, MD 20737–1236, (301) 734–8891.

SUPPLEMENTARY INFORMATION:

Background

The Fruits and Vegetables regulations in 7 CFR 319.56 through 319.56–8 (referred to below as "the regulations") prohibit or restrict the importation of fruits and vegetables to prevent the introduction and dissemination of injurious insects, including fruit flies, that are new to or not widely distributed in the United States. Paragraphs (e) and (f) of § 319.56–2 contain requirements for the importation of certain fruits and vegetables based on their origin in a definite area or district. The definite area or district must meet certain criteria, including criteria designed to ensure that the area or district is free from all or certain injurious insects.

The regulations also provide, among other things, that all importations of fruits and vegetables, as a condition of entry, shall be subject to inspection or treatment, or both, at the port of first arrival, as may be required by a U.S. Department of Agriculture (USDA) inspector (see § 319.56–6). Section 319.56–6 also provides that shipments of fruits and vegetables may be refused entry if the shipment is infested with fruit flies or other dangerous pests and an inspector determines that the pests cannot be eliminated by disinfection or treatment.

Section 319.56–2v contains provisions for importing citrus fruit from Australia. Currently, § 319.56–2v provides for imports of citrus from only specified subdivisions of the Riverland district. Citrus fruit may be imported from the Riverland district without treatment for fruit flies if the area remains free of fruit flies. Importation of citrus fruit from the Riverland district could continue in the event of a fruit fly infestation if the fruit undergoes cold treatment and meets all other applicable requirements of the regulations. Entry of citrus into the United States from the Riverland district of Australia would be denied if a fruit fly destructive of citrus should be detected in the Riverland district, and there is no authorized cold treatment for this fruit fly.

The Australian Quarantine and Inspection Service (AQIS) has requested that we consider allowing the entry of oranges (*Citrus sinensis* [Osbeck]); lemons (*C. limonia* [Osbeck] and *meyeri* [Tanaka]); limes (*C. aurantiifolia* [Swingle] and *latiifolia* [Tanaka]; mandarins, including satsumas, tangerines, tangors, and other fruits grown from this species or its hybrids (*C. reticulata* [Blanco]); and grapefruit (*C. paradisi* [MacFad.]) from the Riverina and Sunraysia districts of Australia, as well. The Riverina district of New South Wales is comprised of (1) the shire of Carrathool; and (2) the Murrumbidgee Irrigation Area, which is within the administrative boundaries of the city of Griffith and the shires of Leeton, Narrendera, and Murrumbidgee. The Sunraysia district is comprised of the shires of Wentworth and Balranald in New South Wales and the shires of Mildura, Swan Hill, Wakool, and Kerang, the cities of Mildura and Swan Hill, and the borough of Kerang in Victoria.

Both the Mediterranean fruit fly (*Ceratitis capitata* [Wiedemann]) and the Queensland fruit fly (*Dacus tryoni* [Frogg]), insects injurious to citrus, are known to attack citrus in Australia. The Mediterranean fruit fly is not widely distributed in the United States, and the Queensland fruit fly does not occur in the United States. If introduced into the United States, these pests would represent a serious threat to domestic fruit crops. AQIS has conducted extensive trapping surveys[1] that show the Riverina and Sunraysia districts to be free of all types of fruit flies that attack citrus. Specifically, we have determined that:

(1) Within the past 12 months, AQIS has conducted trapping surveys that show the Riverina and Sunraysia districts to be free from all fruit flies that attack citrus;

(2) AQIS has adopted and is enforcing requirements to prevent the introduction of fruit flies destructive of citrus into the Riverina and Sunraysia districts; and

(3) AQIS has submitted to the Administrator of the Animal and Plant Health Inspection Service (APHIS) detailed procedures for the conduct of pest surveys in the Riverina and Sunraysia districts, and for the enforcement of requirements to exclude fruit flies from these districts.

The Administrator of APHIS has determined that the survey methods employed by AQIS are adequate to detect infestations of the Mediterranean fruit fly, the Queensland fruit fly, and other fruit flies destructive of citrus. The Administrator has also determined that the requirements adopted and enforced by AQIS to prevent the introduction of injurious insects into the Riverina and Sunraysia districts of Australia are at least equivalent to those requirements imposed in the United States to prevent the introduction and interstate spread of injurious insects. Therefore, we are proposing to amend § 319.56–2v to allow the importation of oranges, lemons, limes, mandarins, and grapefruit from the Riverina and Sunraysia districts of Australia without treatment for fruit flies, provided that these districts remain free of fruit flies that attack citrus.

---

[1] Information regarding how the surveys were conducted can be obtained from the individuals listed under FOR FURTHER INFORMATION CONTACT.

If fruit flies were detected in a district, we would continue to allow oranges, lemons, limes, mandarins, and grapefruit to be imported from that district, subject to the completion of an APHIS-authorized cold treatment for that fruit fly, and to all other applicable requirements of the regulations. This provision would allow importers and exporters to respond to suddenly changed circumstances, such as a Mediterranean fruit fly or Queensland fruit fly infestation, without unnecessarily interrupting fruit shipments or creating a significant risk of introducing fruit flies into the United States.

However, if no APHIS-approved treatment is available for the detected fruit fly, the importation of citrus fruit from the district in which the fruit fly was detected would be prohibited. These are the same provisions currently in the regulations for citrus imported into the United States from the Riverland district of Australia.

In the event that citrus from the Riverina or Sunraysia district of Australia requires treatment for fruit flies, entry of the citrus into the United States would be limited to the port of Wilmington, NC, and North Atlantic ports north of and including Baltimore, MD, if treatment for fruit flies is to be completed in the United States. The climatic conditions in the northeastern United States would ensure that any injurious pests accompanying a shipment of citrus prior to treatment would not pose a risk in that area. Special precautions at the port of Wilmington, NC, mitigate risk there (see § 319.56–2d(b)(5)(iv)). Entry would be allowed through any port if treatment has been completed prior to arrival in the United States.

Lastly, we propose to amend § 319.56–2v by removing a reference to cold treatment authorized under § 319.56–2d and replacing it with a reference to cold treatment in accordance with the Plant Protection and Quarantine (PPQ) Treatment Manual, which has been incorporated by reference into the Code of Federal Regulations at 7 CFR 300.1. Cold treatment schedules no longer appear in § 319.56–2d, but are in the PPQ Treatment Manual, and § 319.56–2d currently refers readers to the PPQ Treatment Manual for the details of cold treatment.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

We are proposing to amend the Fruits and Vegetables regulations by allowing the importation of oranges, lemons, limes, mandarins, and grapefruit from the Riverina and Sunraysia districts of Australia.

According to a USDA estimate, the total U.S. production of citrus fruits was approximately 11.172 million metric tons in 1992. Approximately 1.1 million metric tons of citrus fruits were exported from the United States in 1992, with about 9,741 metric tons exported to Australia.

According to an estimate offered by the Australian Office of the Counsellor, Australia produced approximately 592,000 metric tons of citrus fruits in 1992. Citrus production in Australia is oriented primarily to domestic consumption, with exports accounting for approximately 79,000 metric tons, or only about 13 percent of the total production, in 1992. Of the total quantity exported, 2,517 metric tons (about 3 percent) went to the United States.

The U.S. entities who would be most affected by this proposed rule would include citrus fruit producers, exporters, and importers. It is estimated that 93 percent of the U.S. farms that produce citrus fruit, approximately 21,225 farms in all, qualify as small businesses. While this proposed rule would provide an additional supply of citrus fruit in the United States, domestic citrus fruit producers, including small entities, could expect a very insignificant decline in the price of citrus fruits. Due to the seasonal difference in availability, U.S. and Australian producers would not be in direct competition for the domestic citrus market. Both exporters and importers would be expected to benefit from the proposed rule. The projected benefit to exporters may accrue from the expanded export opportunities that could result from a favorable reciprocal trade treatment given by Australia. Importers may also benefit from the increased availability of citrus fruit, especially navel oranges, during the time of year when U.S. production is lowest. However, the economic benefits to importers and exporters are not expected to be significant.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12778

This proposed rule would allow oranges, lemons, limes, mandarins, and grapefruit to be imported into the United States from the Riverina and Sunraysia districts of Australia. If this proposed rule is adopted, State and local laws and regulations regarding citrus fruit imported under this rule would be preempted while the fruit is in foreign commerce. Fresh citrus fruits are generally imported for immediate distribution and sale to the consuming public, and would remain in foreign commerce until sold to the ultimate consumer. The question of when foreign commerce ceases in other cases must be addressed on a case-by-case basis. If this proposed rule is adopted, no retroactive effect will be given to this rule, and this rule will not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 7 CFR Part 319

Bees, Coffee, Cotton, Fruits, Honey, Imports, Incorporation by reference, Nursery Stock, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Rice, Vegetables.

Accordingly, 7 CFR part 319 would be amended to read as follows:

PART 319—FOREIGN QUARANTINE NOTICES

1. The authority citation for part 319 would continue to read as follows:

Authority: 7 U.S.C. 150dd, 150ee, 150ff, 151–167, 450, 2803, and 2809; 21 U.S.C. 136 and 136a; 7 CFR 2.17, 2.51, and 371.2(c).

2. Section 319.56–2v would be revised to read as follows:

§ 319.56–2v Conditions governing the entry of citrus from Australia.

(a) The Administrator has determined that the irrigated horticultural areas within the following districts of Australia meet the criteria of § 319.56–2 (e) and (f) with regard to the Mediterranean fruit fly (*Ceratitis capitata* [Wiedemann]), the Queensland fruit fly (*Dacus tryoni* [Frogg]), and other fruit flies destructive of citrus:

(1) The Riverland district of South Australia, defined as the county of Hamley and the geographical subdivisions, called "hundreds," of Bookpurnong, Cadell, Gordon, Holder, Katarapko, Loveday, Markaranka, Morook, Murtho, Parcoola, Paringa, Pooginook, Pyap, Stuart, and Waikerie;

(2) The Riverina district of New South Wales, defined as:

(i) The shire of Carrathool; and

(ii) The Murrumbidgee Irrigation Area, which is within the administrative boundaries of the city of Griffith and the shires of Leeton, Narrendera, and Murrumbidgee; and

(3) The Sunraysia district, defined as the shires of Wentworth and Balranald in New South Wales and the shires of Mildura, Swan Hill, Wakool, and Kerang, the cities of Mildura and Swan Hill, and the borough of Kerang in Victoria.

(b) Oranges (*Citrus sinensis* [Osbeck]); lemons (*C. limonia* [Osbeck] and *meyeri* [Tanaka]); limes (*C. aurantiifolia* [Swingle] and *latiifolia* [Tanaka]); mandarins, including satsumas, tangerines, tangors, and other fruits grown from this species or its hybrids (*C. reticulata* [Blanco]); and grapefruit (*C. paradisi* [MacFad.]) may be imported from the Riverland, Riverina, and Sunraysia districts without treatment for fruit flies, subject to paragraph (c) of this section and all other applicable requirements of this subpart.

(c) If surveys conducted in accordance with § 319.56–2d(f) detect, in a district listed in paragraph (a) of this section, the Mediterranean fruit fly (*Ceratitis capitata* [Wiedemann]), the Queensland fruit fly (*Dacus tryoni* [Frogg]), or other fruit flies, citrus fruit from that district will remain eligible for importation into the United States in accordance with § 319.56–2(e)(2), provided the fruit undergoes cold treatment in accordance with the Plant Protection and Quarantine (PPQ) Treatment Manual, which is incorporated by reference at § 300.1 of this chapter, and provided the fruit meets all other applicable requirements of this subpart. Entry is limited to ports listed in § 319.56–2d(b)(1) of this subpart if the treatment is to be completed in the United States. Entry may be through any port if the treatment has been completed in Australia or in transit to the United States. If no approved treatment for the detected fruit fly appears in the PPQ Treatment Manual, importation of citrus from the affected district or districts is prohibited.

Done in Washington, DC, this 1st day of September 1995.

Terry L. Medley,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

FARM CREDIT ADMINISTRATION

12 CFR Parts 613, 614, 618, 619, and 626

RIN 3052–AB10

Eligibility and Scope of Financing; Loan Policies and Operations; General Provisions; Definitions; Nondiscrimination in Lending

AGENCY: Farm Credit Administration.

ACTION: Proposed rule.

SUMMARY: The Farm Credit Administration (FCA) through the Farm Credit Administration Board (Board) proposes to amend the current regulations that govern eligibility and purposes for financing from Farm Credit System (Farm Credit, FCS, or System) banks and associations. This proposal would incorporate recent statutory amendments that govern eligibility and loan purposes from Farm Credit banks that operate under title III of the Farm Credit Act of 1971, as amended (Act). The proposed rule would also implement recently enacted sections 3.1(11)(B) and 4.18A of the Act, which grant Farm Credit banks and associations authorities to participate with non-System lenders in loans to similar entities. At the same time, the FCA proposes to eliminate restrictions in the current regulations that are not required by the Act. The FCA proposes to substantially reorganize these regulations in order to enhance their clarity. The FCA also proposes several technical amendments to other regulations so they conform with this proposal. The proposed rule would relocate the nondiscrimination in lending regulations to a new part without change.

DATES: Comments should be received on or before December 11, 1995.

ADDRESSES: Comments may be mailed or delivered to Patricia W. DiMuzio, Associate Director, Regulation Development, Office of Examination, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090. Copies of all communications received will be available for review by interested parties in the Office of Examination, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT:

John J. Hays, Policy Analyst, Policy Development and Planning Division, Office of Examination, Farm Credit Administration, McLean, VA 22102–5090, (703) 883–4498, TDD (703) 883–4444,

or

Richard A. Katz, Senior Attorney, Regulatory Operations Division, Office of General Counsel, Farm Credit Administration, McLean, VA 22102–5090, (703) 883–4020, TDD (703) 883–4444.

SUPPLEMENTARY INFORMATION:

I. General

The FCA proposes to amend its regulations in part 613 to eliminate unnecessary regulatory restrictions and implement statutory changes. Several recent amendments to sections 3.7 and 3.8 of the Act expand eligibility and purposes of financing for borrowers from BCs and ACBs. Two new statutory provisions were enacted in 1992 and 1994, which authorize Farm Credit banks and associations to participate with non-System lenders in loans to borrowers who are functionally similar but otherwise ineligible for direct FCS financing when the loans are for purposes that are within the System's scope of financing (sections 3.1(11)(B) and 4.18A of the Act).

The FCA's approach in crafting new eligibility regulations is guided by the Board's Policy Statement on Regulatory Philosophy (Policy Statement).[1] Pursuant to this Policy Statement, the FCA is committed to adopting regulations only as necessary to: (1) Implement or interpret the law; or (2) promote the safe and sound operations of System institutions. Consistent with the Policy Statement, the FCA proposes to remove regulatory provisions that prescribe operational procedures, to simplify and clarify the regulations wherever possible, and to delete existing regulatory restrictions that are not imposed by law or necessary to interpret the law or promote safety and soundness. The FCA's proposal should permit FCS institutions to more effectively meet the credit needs of agricultural and aquatic producers, farm-related businesses, rural homeowners, cooperatives, and rural utilities in today's economic environment. Additionally, it should help stimulate economic development in rural areas by increasing the availability of affordable credit to eligible borrowers.

---

[1] *See* 60 FR 26034 (May 16, 1995).

The FCA believes that removing non-statutory restrictions in these regulations will enable the FCS to compete appropriately in agricultural and rural credit markets and ultimately enhance its safety and soundness. In this context, the FCA's proposal will enable the FCS to fulfill its statutory mission (as stated in the preamble to the Act) to provide: (1) "A farmer-owned cooperative System of making credit available to farmers, ranchers, and their cooperatives;" and (2) "an adequate and flexible flow of money into rural areas."

II. Financing Under Titles I and II of the Act

The FCA proposes new eligibility regulations for Farm Credit banks and associations that operate under titles I and II of the Act. These rules are designed to clarify current eligibility criteria and the scope or purposes for which System financing may be obtained. The FCA's proposal eliminates provisions in existing subparts A and B of part 613 that prescribe management practices and procedures or unnecessarily restrict the eligibility of persons authorized to borrow under the Act.

The FCA also proposes to reorganize and clarify these regulations so they can be better utilized by the FCS, the FCA, and other interested parties. The existing regulations in subparts A and B would be replaced by four new regulations in subpart A of part 613, which would authorize System banks and associations to extend credit to the following classes of eligible borrowers: (1) Bona fide farmers, ranchers, and producers or harvesters of aquatic products; (2) processing or marketing operators; (3) farm-related businesses that provide services to farmers and ranchers; and (4) rural homeowners. An explanation of the proposed amendments follows.

A. Bona Fide Farmers, Ranchers, and Aquatic Producers and Harvesters

Sections 1.9(1) and 2.4(a)(1) of the Act state that "bona fide farmers, ranchers, and producers or harvesters of aquatic products" are eligible to borrow from Farm Credit banks and associations that operate under titles I or II of the Act, respectively. The term "bona fide farmer, rancher, or producer or harvester of aquatic products" is not defined in either the Act or its legislative history.

The FCA proposes to adopt a single regulation, § 613.3000, that will determine eligibility for financing for loans made to farmers, ranchers, and aquatic producers and harvesters. As a result of this consolidation, the FCA proposes to delete existing §§ 613.3000, 613.3005, 613.3010, and 613.3020.

Proposed § 613.3000(a)(2) defines a bona fide farmer, rancher, and aquatic producer as an individual or legal entity that either: (1) Produces agricultural products or produces or harvests aquatic products to generate income; or (2) owns agricultural land. The definition in the proposed regulation does not represent a significant departure from the existing regulations. The FCA proposes to combine the separate definitions of farmers and ranchers in existing § 613.3010(a) and aquatic producers and harvesters in § 613.3010(d) into a single provision, without substantive change. Agricultural land is defined by proposed § 613.3000(a)(1) as "land that is devoted to or available for the production of agricultural or aquatic products." This proposed definition is more streamlined and would replace current § 619.9025.

1. Elimination of Regulatory Restrictions on Eligibility

Although the regulatory definition of "bona fide farmer" remains essentially unchanged, this proposal would reduce or eliminate restrictions in the current regulations on financing to three types of farmers: part-time farmers, certain legal entities, and certain foreign nationals. The proposed regulation, consistent with the Act, eliminates all distinctions among farmers regarding their eligibility for agricultural and aquatic financing. The FCA proposes to place limits on financing that eligible borrowers may obtain for certain purposes. For the reasons explained below, limitations on financing of non-agricultural credit needs have been retained.

A. Part-time Farmers

The FCA proposes to eliminate any distinction between full-time and part-time farmers, ranchers, and aquatic producers and harvesters. Although the eligibility provisions in titles I and II of the Act do not distinguish full-time from part-time producers, current § 613.3005(a) establishes different lending policies and objectives for full-time and part-time producers who are eligible to borrow. The existing regulation requires Farm Credit Banks (FCBs), agricultural credit banks (ACBs), and their affiliated associations to provide: (1) "Full credit, to the extent of creditworthiness, to full-time bona fide farmers;" (2) "conservative credit" to part-time farmers for agricultural enterprises; and (3) "restricted credit for other credit requirements as needed to ensure a sound credit package."

System institutions have noted that § 613.3005 is more restrictive than the Act. Further, uniform and consistent application throughout the FCS has been difficult to achieve. For these reasons, the FCA proposes to repeal § 613.3005 (a) and (c) and replace it with a new § 613.3000, which will be clear, concise, and easier to implement.

Proposed § 613.3000 does not differentiate between full-time and part-time agricultural and aquatic producers. Moreover, the evolution of agriculture has made part-time producers an increasingly important sector of the agricultural industry and rural America,[2] and existing regulations restricting the scope of lending to them may not serve the purposes of the Act, which does not distinguish between full-time and part-time farmers. The applicant's creditworthiness, not eligibility criteria, would determine the availability of System loans to part-time farmers, as it does with full-time farmers. The broad prescriptions for operational policies and procedures of current § 613.3005(c), which were designed to keep the focus on agricultural lending would be replaced with limitations on the amount of other business credit needs of farmers that could be financed. Although the FCA is removing the policy and procedure requirements of § 613.3005(c), the FCA believes that FCS banks and associations should continue to adopt and implement sound management practices and policies to guide their operations.

B. Legal Entities

The FCA's proposed regulation also removes most distinctions between individuals and legal entities. No restriction on lending to legal entities appears in the Act, and a review of the legislative history of the Act reveals that Congress, over an extended period of time, deleted all statutory restrictions on loans to legal entities by title I and II institutions or their predecessors. The FCA proposes to update its regulations to conform with these changes.

---

[2] A recent report by the United States Department of Agriculture, entitled Rural Conditions and Trends, Spring 1995, reported 88 percent of a farm household's income comes from sources off the farm, with farm (income) accounting for the rest.

Under an existing regulation, § 613.3020(b), a legal entity is ineligible for loans from Farm Credit banks and associations unless more than 50 percent of: (1) Its equity or voting shares are owned by individuals conducting an agricultural or aquatic operation; (2) the value of its assets are related to the production of agricultural or aquatic commodities; or (3) its income is derived from agricultural or aquatic activities. Furthermore, the current regulation imposes additional requirements on a legal entity that is owned or controlled by another legal entity that is an ineligible borrower.

In 1993, the FCA solicited public comment on the burdens that existing regulations impose on System institutions. See 58 FR 34003, June 23, 1993. Several commenters responded that existing § 613.3020(b) limits the System's ability to finance legal entities despite the removal of such restrictions in the Act. Some of the comment letters also noted that the current regulation favors individual borrowers over legal entities.

After considering these comments, the FCA proposes to adopt a regulatory approach that equalizes the treatment of legal entities and individual borrowers with respect to financing their agricultural and aquatic needs. Section 1.1(b) of the Act states that one of the objectives of the FCS is to "be responsive to the credit needs of all types of agricultural producers having a basis for credit." Accordingly, the FCA concludes that the eligibility requirements for System institutions should not influence any borrower's decision about whether to farm, ranch, or fish in an individual capacity or as a legal entity.

The FCA proposes to eliminate the requirements in current § 613.3020(b) that most of the owners, assets, or income of an eligible legal entity be related to an agricultural or aquatic enterprise. Rather, any legal entity that engages in agricultural or aquatic production to generate income or owns agricultural land would become an eligible System borrower under proposed § 613.3000(a)(2). The FCA's proposal does not preempt State laws that prohibit or otherwise restrict legal entities (other than closely held family farm corporations) from owning agricultural land or conducting a farming, ranching, or aquatic operation.

Under the proposed regulation, entities that are eligible under title III of the Act would not qualify as legal entities for purposes of financing under titles I or II of the Act. The FCA is aware that some cooperatives now qualify for financing from FCBs and associations, as well as from BCs and ACBs. In fact, some cooperatives have existing financial relationships with associations. Although the FCA does not desire to interfere with existing business relationships, it is concerned that expanded competition within the FCS could be detrimental. The FCA invites comments on whether this approach is appropriate and on other alternatives for addressing this concern.

C. Nationality of the Borrower

Current FCA regulations permit System lenders to provide agricultural financing to foreign nationals only if they are permanent residents of the United States. This restriction derives from language in section 1.1(a) of the Act, which states:

> The farmer-owned cooperative Farm Credit System (is) designed to accomplish the objective of improving the income and well-being of American farmers and ranchers by furnishing sound, adequate, and constructive credit and closely related services to them (and) their cooperatives.

The FCA has viewed this provision as a basis for limiting the ability of the System to lend to certain foreign nationals. Existing § 613.3010(c) states that only foreign nationals who are admitted into the United States for permanent residence pursuant to 8 U.S.C. 1101(a)(20) are eligible for System financing. Legal entities that are owned by foreign nationals who are permanent residents of the United States also qualify for System financing under this provision.

The FCA is aware that non-resident foreign nationals and legal entities owned by such persons have applied to FCS banks and associations for agricultural or aquatic loans. System institutions and members of Congress have made the Agency aware of applicants who own and operate farms or processing and marketing operations in the United States, but are ineligible for financing because they are not citizens or permanent residents. FCS banks and associations are currently required by current § 613.3010(c) to reject automatically the loan applications of such prospective borrowers solely on the basis of their nationality and residency status. Many FCS banks and associations state that the current regulation compels them to deny loans to otherwise creditworthy farmers, ranchers, and aquatic producers and harvesters who make significant contributions to American agriculture. Furthermore, existing § 613.3010 causes System lenders to forfeit to competitors profitable business opportunities with entities that are statutorily eligible to borrow from the System. Many FCS representatives and some members of Congress have questioned the FCA's decision to prohibit System institutions from financing those agricultural and aquatic producers who are non-resident foreign nationals or foreign national legal entities.

These comments have prompted the FCA to consider whether the existing regulation is unnecessarily restrictive. In considering these comments, the FCA examined the immigration and nationality laws of the United States. As a general rule, foreign nationals are allowed to enter the United States as either immigrants or non-immigrants. According to 8 U.S.C. 1101(a)(20), persons who are lawfully admitted for permanent residence in the United States have immigrant status. As noted earlier, agricultural or aquatic producers who are admitted into the United States as permanent residents are already eligible to borrow from System institutions.

Non-immigrants generally are defined as foreign nationals who do not intend to abandon their residence in their home countries and settle permanently in the Untied States. Certain categories of non-immigrants are allowed to conduct businesses and own property in the United States. For example, non-immigrant foreign nationals may enter the United States to conduct business as:

(1) Businesspersons under 8 U.S.C. 1101(a)(15)(B);

(2) Merchants or traders under 8 U.S.C. 1101(a)(15)(E); or

(3) Executives, managers, or specialists for a legal entity that employs them, pursuant to 8 U.S.C. 1101(a)(15)(L).

The proposed regulation would expand eligibility provisions to encompass all foreign nationals who are authorized by the laws of the United States to engage in agricultural or aquatic production or to own agricultural land in the United States. It would also cover domestic legal entities in which foreign nationals have an ownership interest. The FCA believes that this interpretation is consistent with section 1.1(a) of the Act and it provides FCS institutions with greater flexibility to finance bona fide farmers, ranchers, and aquatic producers and harvesters who actively contribute to the growth, productivity, and prosperity of domestic agriculture and the rural economy.

As a result of its consideration of this issue, the FCA proposes to amend its eligibility regulations to enable Farm Credit banks and associations to finance certain non-immigrant foreign nationals who are bona fide farmers, ranchers, and aquatic producers or harvesters, as defined by proposed § 613.3000. More specifically, proposed § 613.3000 (a)(2) and (a)(3)(ii) would expand the definition of "individual" to include foreign nationals who have been admitted lawfully into the United States pursuant to any provision in 8 U.S.C. 1101(a)(15) that authorizes such individuals to own property or operate or manage businesses. This would permit such persons to qualify as a bona fide farmer, rancher, or aquatic producer or harvester if they are engaged in production or own agricultural land.

The proposed regulation would afford the same treatment to legal entities owned by citizens and permanent residents of the United States, or controlled by non-resident foreign nationals, provided that the entity is chartered domestically. The FCA observes, however, that certain foreign nationals and foreign national legal entities have registration and disclosure obligations under the Agricultural Foreign Investment Act of 1978 (AFIDA), 7 U.S.C. 3508, and its implementing regulation, 7 CFR Part 781. Because the Secretary of Agriculture is authorized by section 3 of AFIDA, 7 U.S.C. 3502, to impose civil penalties on non-resident foreign nationals and foreign national legal entities who fail to comply with these disclosure provisions, System institutions that lend to borrowers who are subject to the AFIDA should ensure that the borrowers have complied with its requirements. The FCA observes that the proposed regulation does not preempt State laws that prohibit or otherwise restrict non-resident foreign nationals and foreign national legal entities from owning agricultural land or conducting a farming, ranching, or aquatic operation within their jurisdiction.

The FCA notes that legal entities that are chartered by a foreign government or headquartered outside the United States are also covered by the AFIDA. The FCA seeks comment on whether foreign national legal entities that do not have a domestic subsidiary should be eligible for financing under the final regulation.

2. Limitations on Financing

The proposed regulations would impose no limitations on the System's ability to finance the agricultural and aquatic needs of farmers, ranchers, and aquatic producers. Proposed § 613.3000(c) would authorize FCS banks and associations to extend credit to all eligible borrowers for any agricultural or aquatic purpose, including refinancing pre-existing agricultural or aquatic debt.

Proposed § 613.3000(d) would enable eligible farmers, ranchers, and aquatic producers or harvesters to obtain System loans for their other credit needs with certain limitations. Sections 1.11(a) and 2.4(a) of the Act expressly authorize System banks and associations to finance the other credit needs of agricultural and aquatic producers. This statutory authority has existed since 1955,[3] when Congress originally acknowledged that farmers and ranchers often require credit for other "sound and appropriate" purposes so they can make ends meet and remain on the farm.[4] This longstanding Congressional policy is currently codified in § 613.3005(a).

The FCA proposes a regulatory approach that grants FCS banks and associations greater flexibility to finance the other credit needs of bona fide farmers, ranchers, and aquatic producers and harvesters, but simultaneously preserves the mission of System institutions as agricultural lenders. The proposed regulation removes the existing requirement that a borrower have an outstanding agricultural or aquatic loan in order to receive financing for other credit needs. Today, many agricultural and aquatic producers pursue non-farm business opportunities as a matter of economic survival. A Farm Credit System that is responsive to such other credit needs helps agricultural and aquatic producers to remain on their farms and ranches and in America's rural communities. Furthermore, System lenders fulfill their obligation to "provide for an adequate and flexible flow of money into rural areas, and * * * to meet current and future rural credit needs" when they finance certain non-farm businesses owned by farmers in rural areas. In this context, the Act expressly contemplates that Farm Credit banks and associations will contribute to economic development in rural areas by financing the other business needs of farmers, ranchers, and aquatic producers and harvesters.

Lending for farmers' other credit needs also enables FCBs, ACBs, and their affiliated associations to strengthen their viability by diversifying their loan portfolios. A strong and competitive Farm Credit System increases the availability of affordable credit in rural America. Lending for other domestic and business needs allows System banks and associations to offer a full array of quality credit services to farmers, ranchers, and aquatic producers and harvesters at competitive interest rates and to provide an incidental benefit to rural communities.

Because the primary mission of the FCS is to finance agriculture and aquaculture, the FCA's proposal would restrict loans for the other credit needs of System borrowers. In the FCA's opinion, the availability of credit for non-agricultural purposes should be proportionally related to the borrower's involvement in farming, ranching, or aquatic production or harvesting. For the reasons explained below, proposed § 613.3000(d) would grant borrowers who engage in agricultural or aquatic production ("farmer-producers") greater access to the FCS for their other credit needs than it would grant to borrowers who are eligible only because they own agricultural land as an investment ("farmer-investors") and non-resident foreign nationals. The FCA's proposal is designed to permit family farm corporations and other legal entities that are closely held by eligible farmers, ranchers, and aquatic producers and harvesters to finance their other credit needs at an FCS bank or association. However, the proposed regulation would authorize System banks and associations to finance only the agricultural or aquatic needs of publicly traded corporations and conglomerates with significant assets unrelated to agriculture.

Proposed § 613.3000(d)(1) would enable farmer-producers to obtain System financing for their housing and other domestic needs without restriction (other than their creditworthiness). Proposed § 613.3000(d)(1) also allows farmer-producers to obtain limited System financing for their other business needs in an amount that does not exceed the market value of their agricultural or aquatic assets. This regulatory approach would ensure that the amount of financing that farmer-producers obtain from FCS banks and associations for non-farm business needs would be proportionate to their investment in their agricultural or aquatic activities.

For the purposes of proposed § 613.3000(d), agricultural assets include real estate, a home that is located on a farm or ranch, equipment, chattel, and livestock. The proposed regulation contemplates that the market value of agricultural assets would be determined at the time of loan

---

[3] The former Federal land banks were granted this authority by the Farm Credit Act of 1955, Pub. L. No. 347, section 304(a), 69 Stat. 655 (Aug. 11, 1955). The Farm Credit Act of 1956 granted this authority to the PCAs, Pub. L. No. 84–809, section 105(i), 70 Stat. 665 (July 26, 1956).

[4] S. Rep. No. 1201, 84th Cong., 1st. Sess., (July 28, 1955), p. 21; H. Rep. No. 863, 84th Cong., 1st. Sess., (June 20, 1955), p. 20.

application from the most credible source available to FCS institutions. Because real estate, equipment, and livestock make up the bulk of agricultural assets on most loan applications, appraisals and collateral valuations would be the logical sources to support the market value of the most material of these assets. Absent available appraisals and valuations completed for the FCS institution, other sources could serve as a basis for determining market value such as county tax assessment values or real estate multiple listings. It is not the FCA's intent to cause extra cost or regulatory burden on either the FCS institution or the borrower in order to establish the market value of agricultural assets for determining the level of financing available from the System. Rather, a reasonable but credible valuation performed by FCS institutions that can be supported and tested should suffice for determining compliance with this subpart.

Proposed § 613.3000(d)(2) would limit financing that farmer-investors could obtain from the FCS for all of their other credit needs, including housing and domestic needs, to the market value of their agricultural assets. Such borrowers are not engaged in agricultural production and own agricultural land as a passive investment. As the FCA interprets the Act through its legislative history, Congress did not intend that these farmer-investors have the same access to the FCS for non-agricultural credit needs as farmer-producers. Proposed § 613.3000(d)(2) precludes farmer-investors from obtaining FCS loans for their other credit needs in amounts that are disproportionate to their investment in agriculture. The proposed regulation imposes no restrictions on loans for agricultural or aquatic purposes that farmer-investors may obtain from System banks and associations, and therefore, farmer-investors would have increasing access to the FCS for their other credit needs as their investment in agriculture increases. Retired farmers, ranchers, and aquatic producers and harvesters whose land is cultivated by others would be considered farmer-producers, if they acquired their agricultural land originally for agricultural production purposes rather than as an investment.

Non-resident foreign nationals are accorded the same treatment under proposed § 613.3000(d) as farmer-investors. Although such borrowers are often active agricultural or aquatic producers, their legal status imposes restrictions on their activities within the United States. Prudence requires greater restrictions on these borrowers than on farmer-producers who are citizens or permanent residents of the United States.

Proposed § 613.3000(d)(3) would continue to authorize System banks and associations to finance the other credit needs of family farm corporations and other small and medium sized legal entities that are closely held by bona fide farmers, ranchers, and aquatic producers or harvesters. Although all agricultural corporations would now become eligible to borrow from Farm Credit banks and associations that operate under titles I and II of the Act, the FCA intends that most large agricultural borrowers could obtain System financing only for their agricultural or aquatic needs. Under proposed § 613.3000(d)(3), legal entities could obtain System loans for their other credit needs in an amount that does not exceed the market value of their agricultural assets only if: (1) The securities of the borrower are not traded on a public exchange; and (2) more than 50 percent of the assets of the borrowing legal entity are used in agricultural or aquatic production. The FCA believes that this approach would effectively preclude System banks and associations from financing the other credit needs of large agribusiness corporations and conglomerates.

The FCA requests comments on whether and how the final regulations ought to distinguish among types of eligible farmers with respect to financing other credit needs.

B. Financing of Processing or Marketing Operations

Sections 1.11(a) and 2.4(a) of the Act authorize FCBs, ACBs, and their affiliated associations to finance the processing or marketing operations of bona fide farmers, ranchers, and aquatic producers or harvesters. According to the Act, the processing or marketing operation must be "directly related" to the agricultural or aquatic activities of the borrower. The Act also requires the borrower's agricultural or aquatic activities to supply some portion of the throughput used in the processing or marketing operations. The Act limits processing or marketing loans to borrowers who supply less than 20 percent of the throughput to 15 percent of the total outstanding loans, during the preceding fiscal year, of: (1) The FCB or ACB; and (2) all associations that are affiliated with the same funding bank.

The existing regulation, § 613.3045, imposes certain restrictions on financing for processing or marketing operations that are not required by the Act or are no longer needed to ensure the safety and soundness of the FCS. For example, additional compliance thresholds presently exist for loans to borrowers who supply less than 50 percent of the throughput. A restriction that has been particularly problematic relates to processing or marketing operations that have different owners than the agricultural or aquatic operation providing the throughput. Section 613.3045(b)(2)(iii) currently requires that the entire ownership of the processing or marketing operation vest in eligible borrowers. Many System banks and associations responded to the Notice of Regulatory Burden by requesting relief from this 100-percent ownership requirement. According to System commenters, processing or marketing operations have become ineligible under the existing regulation solely because of a slight change in ownership. FCS institutions point out, for example, that a borrower who establishes an employee ownership program can no longer borrow from the System.

The FCA now proposes to revise and redesignate this regulation, so it more closely parallels the Act. The revised regulation, § 613.3010, will simply require that the processing or marketing operation: (1) Be directly related to the borrower's agricultural or aquatic activities; and (2) consistently process some throughput produced by the borrower.

In an effort to reduce regulatory burden on FCS banks and associations, the FCA proposes to repeal the additional requirements that existing § 613.3045(b)(2) imposes on borrowers who supply less than 50 percent of the throughput to a processing or marketing operation. The FCA believes that this regulatory requirement is no longer necessary to interpret the Act since a statutory portfolio limitation has replaced the statutory requirement that the borrower supply at least 20 percent of the throughput.[5] The FCA also proposes to repeal § 613.3045(e), which unnecessarily specifies paperwork requirements for FCS institutions.

The FCA's proposal would also relax the current requirement that bona fide farmers, ranchers, and aquatic producers or harvesters own 100 percent of an eligible processing or marketing operation. Proposed § 613.3010(a)(1) clarifies that an eligible borrower includes a legal entity in which a controlling interest is owned by individuals or other legal entities that qualify as bona fide farmers, ranchers, or aquatic producers or harvesters. The controlling interest requirement in proposed § 613.3010(a)(1) implements sections 1.11(a)(1) and 2.4(a)(1) of the Act, which require a processing or marketing operation to be directly related to the agricultural or aquatic operations of the borrower. The FCA seeks comments on whether the controlling interest requirement appropriately implements the intent of the Act and provides sufficient guidance to System lenders.

---

[5] Pub. L. No. 101–624, section 1832, 104 Stat. 3359 (1990).

Proposed § 613.3010(b) implements the portfolio restrictions that sections 1.11(a)(2) and 2.4(a)(1) of the Act impose on loans to borrowers who contribute less than 20 percent of the throughput used by a processing or marketing operation. This provision would limit retail loans that System banks and associations make to borrowers who supply less than 20 percent of the throughput to 15 percent of outstanding loans at the end of the preceding fiscal year for: (1) The funding bank; and (2) all associations that are funded by the same FCB or ACB. Proposed § 613.3010(b) also retains the existing requirement in § 613.3045(d)(2) that each funding bank, in conjunction with its affiliated associations, ensures that processing or marketing loans to borrowers who supply less than 20 percent of the throughput are equitably allocated among the associations.

The FCA believes the proposed regulation would better enable System institutions to finance entities that contribute substantially to the agricultural economy and rural communities and that increase the income of America's farmers, ranchers, and aquatic producers or harvesters. This proposal would ultimately benefit both producers and consumers by providing competitive credit for this sector of the agricultural economy and fostering economic development in rural areas.

C. Loans to Farm-Related Businesses

Sections 1.9(2), 1.11(c)(1), and 2.4(a)(3) of the Act authorize FCBs, ACBs, and direct lender associations to finance "persons furnishing to farmers and ranchers farm-related services directly related to their on-farm operating needs." Presently, § 613.3050(a) imposes an additional requirement that farm-related businesses furnish "custom-type services" that are directly related to on-farm operating needs of farmers and ranchers. The term "custom-type services" is defined by § 619.9120 as the "performance of on-farm functions on a 'for-hire' basis which farmers and ranchers typically have done for themselves." Furthermore, to qualify under § 613.3050(b)(2) a farm-related business must sell only goods and inputs that "are incident to the services provided." Examples of farm-related services authorized by this regulation include: (1) Spraying of crops; (2) harvesting; (3) hauling agricultural commodities to grain elevators, livestock markets, and other processing centers; (4) custom feed mixing operations; (5) veterinary services; and (6) drying farm commodities.

The FCA has received numerous comments from the FCS about the burdensome nature of §§ 613.3050 and 619.9120. Many System representatives have stated that the current regulatory requirements too narrowly restrict the types of agricultural service businesses that can qualify for FCS loans. Statistics about FCS loans to farm-related businesses suggest that this may be true. Farm-related business loans comprise less than 1 percent of all loans in the Farm Credit System, and many FCS banks and their affiliated associations have no farm-related business loans in their portfolios. These circumstances may indicate that current §§ 613.3050 and 619.9120 frustrate the ability of System banks and associations to fund statutorily eligible and creditworthy farm-related service businesses, and unnecessarily deny many farm-related businesses competitive credit options.

To address this issue, the FCA is proposing a new regulation, § 613.3020, which would replace §§ 613.3050(a), 613.3050(b), and 619.9120, with an eligibility standard for farm-related businesses that is more closely aligned with the plain language of the Act. Under proposed § 613.3020(a), an individual or legal entity who furnishes services to farmers and ranchers that are directly related to their agricultural operations would be eligible to borrow from a Farm Credit bank or association that operates under titles I or II of the Act. Regulatory restrictions that are unnecessary to implement or interpret sections 1.9(2), 1.11(c)(1), and 2.4(a)(3) of the Act would be eliminated.

In 1979, the FCA acknowledged in the preamble to § 613.3050 that neither the literal language of the statute nor its legislative history compel an eligible farm-related business to actually perform services on the customer's property.[6] At that time, however, the FCA did not delete the "on-farm" requirement from the definition of "custom-type" services in § 619.9120. The FCA now proposes to delete the definition of custom-type services which should dispel confusion surrounding the "on-farm" requirement.

Furthermore, the Act does not specifically require eligible borrowers to furnish only "custom-type" services to farmers and ranchers. Although passages in the legislative history to the Farm Credit Act of 1971 contain examples of various custom services that farmers and ranchers may perform themselves, the FCA finds no evidence that sections 1.11(c)(1) or 2.4(a)(3) of the Act actually preclude the FCS from financing other types of services that are directly related to agricultural production. In fact, agricultural producers today rely on technologically advanced services that they cannot provide for themselves, such as computer mapping of soil and crop conditions, nutritional analysis for dairy production, and specialized animal husbandry records and services. These technologically advanced services enable farmers and ranchers to enhance their income by reducing costs, increasing productivity, and meeting the growing demand of consumers for improved food quality and specialty food products. The FCA believes the ability of the FCS to finance such service providers strengthens the agricultural economy of the United States.

A farm-related business is currently ineligible to borrow from a Farm Credit bank or association under § 613.3050(b)(2) unless substantially all of the goods sold are consumed in the services that the borrower provides to farmers and ranchers. As the FCA interprets sections 1.11(c)(1) and 2.4(a)(3) of the Act and their legislative history, a farm-related service business should not be automatically ineligible for FCS loans simply because it also sells some goods that are not incidental to its services. In the FCA's opinion, such a disqualification defeats the statutory purpose of providing credit to farm-related service businesses. For this reason, the FCA proposes to repeal current § 613.3050(b)(2).

The FCA proposes to rely on scope of financing provisions to ensure that FCS banks and associations finance only farm-related businesses that are eligible to borrow under sections 1.11(c)(1) and 2.4(a)(3) of the Act. Proposed § 613.3020(b) would require FCS banks and associations to determine the extent of financing for an eligible farm-related business by measuring the applicant's income on either a gross sales or a net sales basis. More specifically, proposed § 613.3020(b)(1) would authorize financing of all the business needs of an eligible farm-related business that derives more than 50 percent of its

---

[6] 44 FR 69631 (Dec. 4, 1979).

income, as determined on either a gross sales or net sales basis, from furnishing agricultural services to farmers and ranchers. A borrower who derives 50 percent or less of its income from furnishing agricultural services could obtain System financing under proposed § 613.3020(b)(2) only for the agricultural services portion of its business.

The FCA notes that this regulation would permit System banks and associations to measure each borrower's income consistently on either a gross sales or a net sales basis, as appropriate. System banks and associations should experience no difficulty in complying with § 613.3020(b) because gross and net sales information is normally provided in financial statements that a farm-related business submits to support its credit request.

The FCA believes that proposed § 613.3020 implements the requirements of the Act without imposing unnecessary regulatory burdens on the FCS or restricting its ability to offer competitive credit to farm-related businesses. The FCA believes that this proposal would provide System banks and associations and FCA examiners with clear and appropriate regulatory guidance, and it would protect the interests of System competitors by enforcing statutory restrictions.

The FCA proposes to delete § 613.3015, which directs a Farm Credit bank or association to determine the eligibility of an applicant who both conducts agricultural or aquatic operations and owns a farm-related business, using one or any combination of the criteria in the existing regulations. The existing regulation is not needed to interpret the Act nor to promote safety and soundness. Clearly, sections 1.11(a) and 2.4(a) of the Act and proposed § 613.3000 authorize FCS banks and associations to finance the "other credit needs" of bona fide farmers, ranchers, and aquatic producers and harvesters. For this reason, System banks and associations can finance farm-related businesses that are owned by eligible agricultural or aquatic producers under either proposed §§ 613.3000 or 613.3020. The FCA observes, however, that a System bank or association could not finance the "other credit needs" of an eligible farm-related business that is not owned by a bona fide farmer, rancher, or aquatic producer.

D. Non-farm Rural Home Loans

Sections 1.9(3), 1.11(b) and 2.4(b) of the Act authorize FCBs, ACBs, and their affiliated associations to finance single-family, moderately priced homes for residents of rural areas where the population does not exceed 2,500 inhabitants. Sections 1.11(b)(2) and 2.4(b)(2) generally restrict non-farm rural home loans to 15 percent of the total outstanding loans of each FCB, ACB, or association.

An existing regulation, § 613.3040, implements this statutory authority. The FCA now proposes to redesignate this regulation as § 613.3030 and revise it to provide greater flexibility to finance non-farm rural homes to the extent allowed by the Act. This proposal differs from the existing rural housing regulation in three ways. First, it clarifies that rural housing loans do not encompass loans to farmers and ranchers for their housing needs, because such loans are properly classified as agricultural loans. Second, the regulation revises and simplifies the criteria for determining whether a home is moderately priced and located in a rural area, as the law requires. Finally, the proposal eliminates regulatory restrictions that are not needed for safety and soundness. The FCA also addresses specific issues about non-farm rural home loans that commenters raised during the Regulatory Burden comment period and in other forums.

1. Definition of Rural Homeowner

The FCA's proposal would clearly differentiate the authority of System banks and associations to finance homes for agricultural and aquatic producers from all other rural residents. Proposed § 613.3030(a)(1) would define an eligible rural homeowner as a person who is not a bona fide farmer, rancher, or aquatic producer or harvester within the meaning of proposed § 613.3000(a)(2). The definition of "rural home" in proposed § 613.3030 would no longer incorporate current § 613.3040(e)(1), which requires either that the: (1) Property lack the capacity to produce agricultural products on a sustainable basis; or (2) borrower does not use the property for agricultural purposes. These provisions were the regulatory mechanism for ensuring that housing loans to farmers were considered agricultural loans rather than rural home loans. The proposed regulations addresses this issue by excluding farmers from the definition of rural homeowner. The FCA also proposes to repeal existing § 613.3040(e)(2), which applies the price, locality, and portfolio restrictions in sections 1.11(b) and 2.4 (b)(1), (b)(2), and (b)(3) of the Act to home loans that System banks and associations make to certain farmers, ranchers, and aquatic producers and harvesters.

The FCA believes that this new approach will clarify the authority of System lenders to finance homes for both agricultural and aquatic producers and other rural residents and eliminate any confusion about the scope of home lending authority. Under the FCA's proposal, Farm Credit banks and associations would finance homes for both full-time and part-time farmers, ranchers, and aquatic producers under proposed § 613.3000(d), while proposed § 613.3030 would apply to home loans that System lenders make to all other rural residents.

Because the Act affords certain benefits and applies certain restrictions to agricultural loans and rural housing loans, it has been important to classify home loans to farmers correctly. For example, the homes of agricultural or aquatic producers are not required to be moderately priced or located in communities where the population does not exceed 2,500 inhabitants. In fact, neither the Act nor FCA regulations require agricultural producers to live on the land that they farm or ranch. As the FCA interprets the Act, home loans to farmers are not subject to the portfolio limitations applicable to rural housing loans.

The FCA notes that statutory borrower rights generally apply to all loans to farmers, ranchers, and aquatic producers, including loans for the purchase of a residence.[7] Borrower rights do not, however, apply to rural home loans.

All bona fide agricultural and aquatic producers are required by section 4.3A(c)(1)(D)(i) of the Act to own voting stock in the FCS bank or association that extends credit to them, including home loans. In contrast, non-farm rural residents hold non-voting participation certificates in FCS banks and associations.

2. Definition of Rural Home

Proposed § 613.3030(a)(2) defines a "rural home" as a single-family moderately priced dwelling located in a rural area that will serve as the occupant's principal residence. Sections 1.11(b)(2) and 2.4(b)(1) of the Act explicitly limit the non-farm rural home financing authority of FCS banks and associations to single-family moderately priced houses. The proposed regulation deletes the requirement in existing regulations that System banks and associations finance only owner-occupied homes, because this limitation does not appear in the Act. The proposal retains, however, a requirement that the home be used as a primary residence. This requirement would implement the Act's stated intent that the System provide financing for housing for rural residents. The FCA is concerned that an infrequently occupied vacation home would not be compatible with Congressional intent. This change will enable the System to finance moderately priced rural homes that shall be used as the principal residence of either the borrower or another rural resident. Thus, a borrower who intends to occupy the home in the future, perhaps as a retirement residence, would be eligible for financing so long as the house was leased to a tenant, in the interim, as the tenant's principal residence.

---

[7] In some instances, the protections of another Federal law will supplant the borrower rights provisions of the Act. For loans covered by the Federal Truth in Lending Act (TILA), 15 U.S.C. 1601, *et seq.*, FCS lenders must provide the disclosures required by the TILA in lieu of the effective interest rate disclosures that are otherwise applicable to loans pursuant to subpart K of part 614. The TILA applies to all loans for which the principal purpose is residential housing, regardless of whether the loan is classified as an agricultural or rural housing loan under FCA regulations.

The FCA proposes to remove the passage in § 613.3040(a)(2) that describes rural homes as "conventional housing, modular housing, or mobile homes which are related to a specific site." The FCA believes that any type of dwelling that is moderately priced and located in a rural area may be financed, so the passage is not necessary to implement the Act. Section 613.3030(b) retains a provision that allows a borrower to obtain financing from the System on only one home at any one time. This limitation, which derives from the Act's legislative history, prevents the System from financing rural housing developers.

The existing regulation, § 613.3040(c), allows FCS banks and associations to make loans to non-farm rural residents solely for the purpose of buying, building, remodeling, improving, repairing a rural home, and refinancing existing indebtedness thereon. System representatives have frequently petitioned the FCA to remove this restriction so that they can offer equity lines-of-credit loans to rural homeowners.

The FCA observes that although home equity loans were not generally available loan products when the rural home financing authority was granted to the FCS in 1971, neither the Act nor FCA regulations preclude revolving lines of credit secured by home equity. During the intervening years, however, the residential mortgage markets have developed so that home equity lines of credit are now standard loan products that mortgage lenders routinely offer to their clientele. Home equity loans would enable the rural home lending authority of the FCS to reflect current market practices and would allow rural homeowners who borrow from the FCS to have more flexibility in financing and utilizing the equity in their homes.

The FCA believes line-of-credit loans are compatible with sections 1.11(b) and 2.4(b) of the Act and the current regulation, which authorize System institutions to finance the housing needs of non-farm rural residents. Furthermore, home equity loans would enable FCS banks and associations to fulfill their mission of providing for an adequate and flexible flow of credit for housing in rural areas. Homeowners in rural communities often lack affordable credit options that are widely available in metropolitan areas.

The FCA also observes that home equity loans are compatible with the existing authority of production credit associations (PCAs) and agricultural credit associations (ACAs) under section 2.4(b) of the Act to take either a first or second lien on a rural home. Under existing FCA regulations, FCBs, ACBs, Federal land credit associations (FLCAs), and ACAs can, for certain purposes, make a line-of-credit loan that is secured by a first lien on an unencumbered rural home that is occupied by the borrower. Furthermore, an FCS long-term mortgage lender that already holds the first lien on the property could take a second lien to secure the home equity line-of-credit loan.

For these reasons, proposed § 613.3030(b) would enable FCS banks and associations to offer home equity loans to non-farm rural residents in addition to the types of loans that are already authorized by existing § 613.3040(c). The FCA also proposes conforming revisions to § 614.4222. The FCA emphasizes that FCS lenders could only make home equity line-of-credit financing on rural homes that comply with the requirements of proposed § 613.3030. The FCA fully expects home equity loans to be prudently underwritten. The FCA notes that this proposal would grant FCS institutions reasonable flexibility to make rural home loans within the 15-percent portfolio limit that is imposed by statute.

3. Definition of Rural Area

The FCA proposes to revise the regulatory definition of "rural area" to provide a standard that is clear, consistent, and easy to apply. The proposed definition will also eliminate the need for System institutions to seek FCA guidance about whether a particular locality is a "rural area" within the meaning of these regulations. Proposed § 613.3030(a)(3) defines a "rural area" as a designated territory within a State or the Commonwealth of Puerto Rico, including communities that have a population of not more than 2,500 inhabitants based on the latest decennial census of the United States.

The United States Bureau of Census is an expert, official, and neutral source for accurate and accessible information about the demographics of rural areas. The United States census examines the population density in each State and then classifies the territories with 2,500 or fewer inhabitants as "rural areas." The United States Bureau of the Census does not utilize political boundaries to determine whether an area is rural. The United States census often identifies rural pockets (with 2,500 inhabitants or fewer) that are located inside standard metropolitan statistical areas. The proposed regulation would enable FCS banks and associations to finance non-farm housing in such designated rural areas.

Proposed § 613.3030(a)(3) would replace the definition of "rural area" in current § 613.3040(a)(3). Census data satisfies all of the criteria for "rural areas" that are specified by existing § 613.3040(a)(3). This proposal would also delete the current regulatory requirement that the FCA approve rural areas that include "towns" where the population exceeds 2,500 people. Since 1971, the FCA has acted on only a few requests to approve rural areas including such towns. Moreover, the FCA believes that the Bureau of the Census designation of a "rural area" may provide significantly more reliable and flexible data for System institutions because it disregards political boundaries and is updated to reflect changing conditions.

4. Definition of Moderately Priced

The FCA also proposes to replace the definition of "moderately priced" housing in existing § 613.3040(c)(2) with new § 613.3030(a)(4). The revised definition would provide System banks and associations with a clear standard for determining whether a rural home is "moderately priced." The FCA proposes a two-part definition for "moderately priced" rural homes. The first part is a safe-harbor provision for rural home loans that qualify under section 8.0(1)(B) of the Act for programs of the Federal Agricultural Mortgage Corporation (Farmer Mac). Loans qualify as collateral for Farmer Mac securities if they are secured by rural homes that are located in communities of fewer than 2,500 inhabitants and have a purchase price of not more than $100,000, as adjusted for inflation. Thus, a rural home would be considered "moderately priced" for the purposes of proposed § 613.3030(a)(4)(i) if the loan complies with Farmer Mac's underwriting standards.

The second alternative, proposed § 613.3030(a)(4)(ii), allows Farm Credit banks and associations to finance rural homes that are below the 75th percentile of housing values, ranked from the lowest value to the highest value in the rural area where it is located, as published by the United States Bureau of the Census in the most recent edition of the Census of Housing, General Housing Characteristics. This provision will enable the FCS to finance homes valued in excess of $100,000 in areas in which such homes are still properly considered as moderately priced.

The FCS relied on a similar model until the early 1980's. At the time, the FCA provided administrative guidance to the System by annually publishing an upper limit for moderately priced housing. The upper value of moderately priced housing was derived from housing prices throughout the United States, stratified from the lowest to the highest sales figures. The FCA's proposal provides a more appropriate and accurate measure of "moderately priced" housing, because it examines housing prices in the designated rural areas where the property is located, rather than the entire United States.

In most designated rural areas with a population between 1,000 and 2,499 persons, the 75th percentile for housing prices does not exceed the Farmer Mac threshold of $100,000, as adjusted for inflation. As a result, most of the rural housing in the United States would satisfy either provision of proposed § 613.3030(a)(4). However, when the 75th percentile for home prices in designated rural areas exceeds $100,000, as adjusted for inflation, System institutions could finance homes that satisfy the criteria of proposed § 613.3020(a)(4)(ii) and still comply with Congressional intent that the System finance only moderately priced homes.

The FCA proposes to delete § 613.3040(c), and instead rely on § 614.4210(b), which authorizes System mortgage lenders to lend up to 97 percent of the appraised value of the security property if the loan is guaranteed by a Federal, State, or other government agency. This would permit FCS mortgage lenders to finance low-equity rural home borrowers when the loan is guaranteed by a Federal, State or other government agency.

5. Portfolio Limitations

Both new § 613.3030(c) and existing § 613.3040(d)(2) implement sections 1.11(b)(2) and 2.4(b)(2) of the Act, which limit non-farm rural home loans to 15 percent of the total outstanding loans of each FCS bank or association. Although the FCA has rewritten these provisions to enhance their clarity, the substantive requirements of existing § 613.3040(d)(2) remain the same. Proposed § 613.3030(c)(1) continues to restrict the rural home portfolio of each FCB or ACB to 15 percent of its total outstanding loans at any one time. Under proposed § 613.3020(c)(2), rural home loans by each direct lender association could not exceed 15 percent of its total outstanding loans at the end of its preceding fiscal year, except with the prior approval of its funding bank. Proposed § 613.3030(c)(3) restricts the aggregate of rural home loans made by all direct lender associations that are funded by the same Farm Credit bank to 15 percent of the total outstanding loans of all such associations at the end of the funding bank's preceding fiscal year.

6. Other Deletions

The FCA proposes to delete the existing program limitations in § 613.3040(d)(1) and (d)(3). Existing § 613.3040(d)(1) is obsolete because it prohibits rural home lending in each Farm Credit district without the approval of the now-defunct district boards.[8] Moreover, no provision of the Act requires associations to obtain approval from their funding bank or the FCA before they can exercise their statutory authority to make rural home loans.

Finally, the FCA proposes to delete § 613.3040(d)(3), which states that "agricultural loans shall receive priority to the exclusion of rural home loans" if loan funds for the System are curtailed. This provision derives from a commitment that the FCA gave to Congress in 1971, when System banks and associations were first granted authority to finance non-farm rural homes.[9] The FCA continues to adhere to this commitment. However, existing § 613.3040(d)(3) is a policy statement, rather than an enforceable regulatory provision. If a crisis curtails the ability of the FCS to meet the credit demands of agricultural and aquatic producers, the FCA Board would use its statutory authorities to ensure that the credit needs of agricultural and aquatic producers are given priority.

III. Eligibility and Scope of Financing Under Title III of the Act

The FCA proposes to revise and clarify regulations that govern eligibility and scope of financing for BCs and ACBs. The proposed regulations will implement provisions of the Farm Credit Banks and Associations Safety and Soundness Act of 1992[10] (1992 Act) and the Farm Credit System Agricultural Export and Risk Management Act[11] (1994 Act) that expand the ability of BCs and ACBs to finance: (1) Cooperatives; (2) their parents, subsidiaries, and other entities in which eligible cooperatives hold an ownership interest; and (3) water and waste disposal facilities. The FCA also proposes to amend these regulations so that BC and ACB loans to rural electric and telecommunication utilities are compatible with recent revisions to the Rural Electrification Act of 1936, 7 U.S.C. 901 et seq.

This proposal retains the format in which the domestic lending authorities and international lending authorities of these banks are addressed in two separate regulations. The FCA proposes to redesignate current § 613.3110, however, as new § 613.3100, and to rearrange this regulation so it addresses eligibility, and when appropriate, purposes for financing for each of the following classes of domestic borrowers: (1) Cooperatives, their parents, subsidiaries, and other related entities that serve farmers, ranchers, and aquatic producers and harvesters; (2) electric and telecommunications utilities; (3) water and waste disposal facilities; and (4) domestic lessors. Similarly, the FCA proposes to redesignate § 613.3120 as new § 613.3200, which will clearly delineate eligibility and purposes for financing for the following categories of international loan transactions: (1) Imports; (2) exports; and (3) international business transactions.

Current § 613.3005(b) will be deleted by this proposal because it prescribes business objectives and management practices. From the FCA's perspective, § 613.3005(b) is not necessary to implement or interpret the Act or to promote safety and soundness.

A. Eligibility and Scope of Financing for Domestic Loans

1. Cooperatives and Related Entities That Serve Agricultural and Aquatic Producers

Proposed § 613.3100 streamlines the provisions in current § 613.3110 which authorize BCs and ACBs to lend to cooperatives and related entities that serve farmers, ranchers, and aquatic producers and harvesters. The eligibility provisions for this class of borrowers are scattered throughout paragraphs (a), (b), (c) and (d) of the current regulation. The FCA proposes to consolidate these requirements for agricultural and aquatic cooperatives, their parents, subsidiaries, and other related entities into § 613.3100(b). Except to the extent that proposed § 613.3100(b) incorporates recent statutory amendments that expand the authority of BCs and ACBs to lend to cooperatives and their affiliates, this reorganization is not intended to alter the substance of the current regulation.

---

[8] The district boards were abolished by Pub. L. No. 100–399, section 409(d), 102 Stat. 989, 1003, (August 17, 1988).

[9] S.R. 92–307, 92nd Cong., 1st. Sess., (July 27, 1971), p. 6.

[10] Pub. L. No. 102–552, 106 Stat. 4102, (Oct. 28, 1992).

[11] Pub. L. No. 100–376, 108 Stat. 3497, (Oct. 19, 1994).

Proposed § 613.3100(a)(1) defines a cooperative as any association of farmers, ranchers, producers or harvesters of aquatic products, or any federation of such associations, which conducts business for the mutual benefit of its members and has the power to: (1) Process, prepare for market, handle, or market farm or aquatic products; (2) purchase, test, grade, process, distribute, or furnish farm or aquatic supplies; or (3) furnish business or financially related services to their members.

The FCA proposes to revise the definition of service cooperative in current § 613.3110(a)(4) so that it more closely reflects the language of the Act. Under the current regulation, an eligible service cooperative is "predominately involved in providing specialized business services related to the agricultural or aquatic business operation of farmers, ranchers, or producers and harvesters of aquatic products, or cooperatives." This regulatory definition is more restrictive than section 3.8(a) of the Act, which only requires such cooperatives to furnish "farm or aquatic business services or services" to their members. Because the Act does not require eligible service cooperatives to serve only the agricultural or aquatic business operations of their members, proposed (and redesignated) § 613.3100(a)(5) would enable BCs and ACBs to finance service cooperatives that are predominately involved in providing both business services and financially related services to farmers, ranchers, aquatic producers and harvesters, or cooperatives. Cooperatives that satisfy the criteria in proposed § 613.3100(b)(1) are eligible to borrow from a BC or ACB.

Proposed § 613.3100(b)(1)(i) implements section 3.8(a)(4) of the Act, which requires agricultural and aquatic producers to hold a specified percentage of the voting control of an eligible cooperative. Generally, both the Act and the regulation require agricultural and aquatic producers to hold at least 80 percent of the voting control of cooperatives that are eligible to borrow under title III of the Act. However, section 3.8(a)(4) of the Act and § 613.3100(b)(1)(i) reduce the minimum voting control threshold of agricultural and aquatic producers in service cooperatives and certain farm supply cooperatives to 60 percent. Both the current and proposed versions of this regulation allow the board of directors of a BC or ACB to adopt resolutions that impose a higher voting control threshold on any type of cooperative. The FCA proposes to delete the remainder of current § 613.3110(b)(2), which prescribes detailed procedures about how BCs and ACBs should: (1) Treat all eligible cooperatives equitably; (2) compel borrowers to make good faith representations about voting control by agricultural and aquatic producers; and (3) document voting control of eligible cooperatives in certain circumstances. Such regulatory prescriptions are deemed unnecessary for the enforcement of eligibility limitations.

Proposed § 613.3100(b)(1)(ii) retains, with minor stylistic revisions, the current statutory requirement that each cooperative deal in farm or aquatic products or products processed therefrom, farm or aquatic supplies, farm or aquatic business services, or financially related services with or for members in an amount at least equal in value to the total amount of such business that it transacts with or for nonmembers. Transactions with the United States, its agencies and instrumentalities, and public utilities are excluded from the amount of business that a cooperative conducts with either members or nonmembers. Redesignated § 613.3100(b)(1)(iii) retains, without substantive amendment, the requirements in section 3.8(a) of the Act and current § 613.3110(b)(4) that: (1) No member of an eligible cooperative has more than one vote because of the amount of stock or membership capital owned therein; or (2) an eligible cooperative restricts dividends on stock or membership capital to 10 percent per year, or the maximum percentage per year permitted by applicable State law, whichever is less.

Proposed § 613.3100(b)(2) enables legal entities that are affiliated with eligible cooperatives to borrow from BCs and ACBs. Under proposed § 613.3100(b)(2)(i), any legal entity that holds more than 50 percent of the voting control of any eligible cooperative may borrow from a BC or ACB as long as it uses the loan proceeds to fund the activities of its cooperative subsidiary on the terms and conditions specified by the bank. Any legal entity in which an eligible cooperative has an ownership interest would be eligible to borrow from a BC or ACB under proposed § 613.3100(b)(2)(ii). This provision of the regulation reflects section 3(B) of the 1994 Act, which authorizes BCs and ACBs to finance, for the first time, legal entities in which the ownership interest of eligible cooperatives is less than 50 percent. However, the amount of financing that a BC or ACB can provide to entities in which eligible cooperatives hold less than a 50-percent ownership interest under section 3.7(b)(2)(A)(ii) of the Act and proposed § 613.3100(b)(2)(ii) cannot exceed the percentage that eligible cooperatives own in the entity multiplied by the value of the entity's total assets. For example, an entity with $100 million in total assets that is 45-percent owned by eligible cooperatives could receive financing from a BC or ACB that does not exceed $45 million.

Proposed § 613.3100(b)(2)(iii) derives from section 506 of the 1992 Act, which authorizes BCs and ACBs to finance creditworthy, non-profit service cooperatives and their subsidiaries, if they benefit agriculture in furtherance of the welfare of the farmers, ranchers, and aquatic producers and harvesters who are its members. Many of the cooperative eligibility criteria in § 613.3100(b)(1) apply to this new class of borrowers. First, only eligible service cooperatives and their subsidiaries qualify for loans under proposed § 613.3100(b)(2)(iii). The regulation requires farmers, ranchers, and aquatic producers and harvesters to hold at least 60 percent of the voting control in a service cooperative which is either the borrower, or the borrower's parent. Second, eligibility under proposed § 613.3100(b)(2)(iii) is predicated upon compliance with proposed § 613.3100(b)(1)(iii), which requires cooperatives to either: (1) Operate on the principle of one person, one vote; or (2) restrict dividends on stock or membership capital to 10 percent per year, or the maximum percentage per year permitted by applicable State law, whichever is less. Neither section 3.8(b)(1)(D) of the amended Act, nor § 613.3100(b)(2)(iii) of the proposed regulations require this category of borrowers to transact more business with members than non-members.

2. Electric, Telecommunications, and Cable Television Utilities

The FCA proposes to update and consolidate the regulations that authorize BCs and ACBs to finance public utilities that provide electric, telecommunication, and cable television services in rural areas. Section 1322 of the Food Security Act of 1985[12] significantly expanded the authorities of the BCs (and subsequently the ACBs) to finance rural utilities. Prior to 1985, only electric and telephone cooperatives in which agricultural or aquatic producers held 60 percent of the voting control were eligible for loans under title III of the Act. After 1985, any rural electric or telephone utility that qualifies for financing from either the former Rural Electrification Administration (now the Rural Utilities Services (RUS)), or the Rural Telephone Bank (RTB) of the United States Department of Agriculture is eligible to borrow under section 3.8(b)(1)(A) of the Act. Section 3.8(b) of the Act allows the corporate parents, subsidiaries, and other related entities of such rural utilities to borrow from BCs and ACBs, as well.

The statutory eligibility standards for rural electric and telecommunication utilities are incorporated into § 613.3100(c)(1) of the proposed regulation, which consolidates all of the rural utilities eligibility and scope of financing provisions that are now scattered throughout paragraphs (c)(1), (c)(2), and (c)(3) of existing § 613.3110.

Utilities cooperatives in which at least 60 percent of the voting control vests with agricultural or aquatic producers continue to separately qualify for BC and ACB loans under section 3.8(a)(4)(A) of the Act. State laws usually require utilities to provide electric or telephone service to all inhabitants of a specific geographic territory. As a result of the growth of the non-farm population in rural areas, virtually no utility cooperative still satisfies the statutory requirement that farmers, ranchers, and aquatic producers comprise at least 60 percent of its membership. The FCA understands that BCs and ACBs no longer receive loan applications from borrowers who meet the criteria of section 3.8(a)(4)(A) of the Act. Therefore, the FCA proposes to delete specific references in the regulations to this class of borrowers. However, the FCA notes that utility cooperatives in rural areas almost always satisfy the less stringent eligibility criteria of the RUS or the RTB. As a result, BCs and ACBs now lend exclusively to borrowers who are eligible for RUS or RTB loans.

Redesignated § 613.3100(c)(1)(ii) makes minor stylistic edits to existing § 613.3110(c)(3), which authorizes BCs and ACBs to finance any legal entity that holds more than 50 percent of the voting control of any eligible electric or telecommunication utility if the borrower uses the proceeds of the loan to fund the activities of its subsidiary on the terms and conditions specified by the bank. The subsidiaries and other entities in which eligible utility borrowers hold an ownership interest also qualify for BC and ACB loans under amended section 3.7(b)(2)(A)(ii) of the Act and proposed § 613.3100(c)(1). However, when eligible rural electric and telecommunication utilities own less than 50 percent of another entity, section 3.7(b)(2)(A)(ii) of the Act and proposed § 613.3100(c)(3) limit bank financing to an amount that does not exceed the ownership percentage multiplied by the total assets of such entity.

The FCA proposes that § 613.3100(a)(3) and (c) refer to "telecommunication," rather than "telephone" services. This proposed revision reflects the fact that Congress recently amended the definition of "telephone service" in section 203(a) of the Rural Electrification Act of 1936, 7 U.S.C. 924(a), to encompass new telecommunication technologies.[13] Whereas 7 U.S.C. 924(a) previously defined "telephone services" as communications "through the use of electricity between the transmitting and receiving apparatus," the statute now refers to communications "by wire, fiber, radio, light, or other visual or electromagnetic means." As a result, cellular, facsimile, cable television, speed data services and other technologically advanced communication services are increasingly available in rural areas. Accordingly, proposed § 613.3100(c)(2) authorizes BCs and ACBs to finance these new telecommunication technologies and services.

Proposed § 613.3100(c)(2) would authorize BCs and ACBs to extend credit to eligible borrowers so they can provide electric or telecommunication services in rural areas. Although the eligibility of rural utilities to borrow from a BC or ACB is now based primarily upon their eligibility for RUS or RTB loans, the purposes for financing for utilities is not directly governed by the Rural Electrification Act of 1936 as amended. Section 203(a) of the Rural Electrification Act of 1936, as amended, 7 U.S.C. 924(a) expressly prohibits cable television carriers from obtaining loans from the RUS or RTB. However, section 3.7(b)(2)(A)(ii) of the Act permits BCs and ACBs to finance affiliated entities that facilitate the business operations of eligible rural electric or telephone utilities. For this reason, proposed § 613.3100(c)(2) would authorize BCs and ACBs to finance an eligible subsidiary of an electric or telecommunication utility that is licensed to provide cable television services in a designated rural community.

3. Water and Waste Disposal Facilities

In 1990, Congress added section 3.7(f) to the Act,[14] granting BCs and ACBs new authorities to finance water and waste disposal facilities in rural areas where the population does not exceed 20,000 inhabitants. The 1992 Act expanded the scope of financing so that BCs and ACBs could also finance the maintenance and operations of such water and waste disposal facilities.[15] The FCA proposes to add a provision to the regulation that will reflect this new statutory authority.

Under proposed § 613.3100(d)(1), a cooperative, or a public, quasi-public agency, body, or other public or private entity that under the authority of State or local law establishes and operates water and waste disposal facilities in a rural area would be eligible to borrow from a BC or ACB. For the purposes of proposed § 613.3100(d), a rural area is defined by statute as all territory of a State that is not within the outer boundary of any city or town having a population of more than 20,000 inhabitants based on the latest decennial census of the United States. Proposed § 613.3100(d)(2) would authorize BCs and ACBs to extend credit to these borrowers for the installation, maintenance, expansion, improvement, or operation of rural water and waste disposal facilities.

4. Loans to Domestic Lessors

The FCA proposes to redesignate existing § 613.3110(c)(4) as new § 613.3100(e). Under this provision, a BC or ACB may extend credit to domestic parties to finance the acquisition of facilities or equipment that will be leased to shareholders of the bank for use in their operations within the United States. The lease customers of eligible borrowers include any cooperative, rural electric or telecommunication utility, or water or waste disposal facility that is a shareholder of the BC or ACB. The corporate parents and subsidiaries of cooperatives and rural electric and telecommunication utilities may also lease from the borrower. The FCA observes that the authority of BCs and ACBs to make loans to domestic lessors is separate and distinct from the banks' authority to lease equipment to their shareholders under section 3.7(a) of the Act.

[14] Pub. L. No. 101–624, section 2323(a), 104 Stat. 4013, (Nov. 28, 1990).

[15] Pub. L. 102–552, section 505, 106 Stat. 4131, (Oct. 28, 1992).

5. Status of Certain Borrowers

Section 3.8(b)(4) of the Act preserves the eligibility of existing BC or ACB borrowers despite adverse changes in the law. Existing § 613.3110(b)(5) "grandfathers" parties who were actual BC borrowers on May 17, 1972. The FCA believes that it is no longer necessary for this regulation to contain a "grandfather" clause because the statute adequately protects such borrowers. The eligibility of current BC and ACB borrowers will not be adversely affected by the removal of this regulatory provision.

B. Eligibility and Scope of Financing for International Loan Transactions

The FCA proposes new § 613.3200, which implements the expanded statutory authority of BCs and ACBs to finance the import, export, and international business transactions of cooperatives and other eligible borrowers. The FCA proposes substantial revisions to the existing regulation in order to reflect the provisions in the 1994 Act and enhance the regulation's clarity. The FCA also proposes several conforming and technical amendments to §§ 614.4010(d), 614.4020(a), 614.4233, and subpart Q of part 614 to reflect the expanded international lending authorities of BCs and ACBs.

Proposed § 613.3200(a) would define "farm supplies" only for import and export loan transactions. Under this proposal, "farm supplies" refers to inputs that are used in a farming or ranching operation, but excludes agricultural processing equipment, machinery used in food manufacturing, or other capital goods which are not used in a farming or ranching operation. This definition of "farm supplies" is consistent with the legislative history of the 1994 Act which indicates that Congress did not intend the BCs and ACBs to use their international lending authorities to finance the import or export of capital equipment and machinery.[16]

1. Import Transactions

The 1994 Act did not alter the eligibility and scope of financing requirements for agricultural, aquatic, and farm supply imports that are financed by a BC or ACB. Although the FCA's proposal restructures the existing regulation by consolidating all of the eligibility and scope of financing requirements for import transactions into § 613.3200(b), the FCA has not changed the substance of current § 613.3120. The proposed regulation continues to authorize BCs and ACBs to finance the import of agricultural commodities or products therefrom, aquatic products, and farm supplies into the United States for: (1) An eligible cooperative; (2) a counterparty with respect to a specific import transaction with a voting stockholder of the bank for the substantial benefit of the shareholder; and (3) any foreign or domestic legal entity in which eligible cooperatives hold an ownership interest.

2. Export Transactions

Section 3 of the 1994 Act expanded the authority of the BCs and ACBs to finance parties who facilitate the export of agricultural and aquatic products and farm supplies from the United States to foreign countries. As amended, section 3.7(b)(2)(A) of the Act extends eligibility for such export loans beyond eligible cooperatives, their related entities and counterparties, to any domestic or foreign party, provided that the BC or ACB gives priority, to the extent feasible, to cooperatively sourced products, commodities, and supplies. The statute imposes limits on BC and ACB financing of exports that are not both: (1) Originally sourced from cooperatives; and (2) guaranteed or insured in an amount that equals or exceeds 95 percent of the loan amount by an entity of the United States Government.

These new statutory requirements are incorporated into proposed § 613.3200(c), which provides that the total amount of balances outstanding on loans that are not originally sourced from cooperatives and at least 95-percent guaranteed by the Federal government shall not, at any time, exceed 50 percent of the bank's capital. Furthermore, both the Act and the regulation require the board of directors of each BC and ACB to adopt policies and procedures that ensure that exports of agricultural products and commodities, aquatic products, and farm supplies which originate from eligible cooperatives are financed on a priority basis.

3. International Business Transactions

Prior to 1994, section 3.7(b) of the Act authorized BCs and ACBs to finance only the domestic and foreign legal entities that facilitated the import and export transactions of their cooperative owners. As amended by section 3 of the 1994 Act, this statutory provision now authorizes BCs and ACBs to extend credit to any domestic or foreign legal entity that facilitates the foreign business operations of an eligible cooperative that holds an ownership interest in it. This new statutory authority is incorporated into proposed § 613.3200(d). The FCA observes that this new authority will enable BCs and ACBs to assist their cooperative customers in developing overseas markets for American agricultural and aquatic exports, which in turn, will ultimately increase the income of America's farmers, ranchers, and aquatic producers.

4. Restrictions

Proposed § 613.3200(e) contains restrictions that the Act imposes on the international lending authorities of BCs and ACBs. When eligible cooperatives own less than 50 percent of a foreign or domestic legal entity, section 3.7(b)(2)(A)(ii) of the Act and proposed § 613.3200(e)(1) limit the amount of financing that a BC or ACB may provide to the affiliated entity for any import, export, or international business transaction, to the percentage of ownership that such cooperatives hold in such entity multiplied by the value of the entity's total assets. Furthermore, section 3.7(b)(2)(B) and proposed § 613.3200(e)(2) prohibit BCs and ACBs from financing the relocation of any plant or facility from the United States to a foreign country.

IV. Similar Entities

In 1992, Congress granted FCS banks operating under title III of the Act new authority to participate in loans made by non-System lenders to "similar entities."[17] Section 2 of the 1994 Act clarified this new authority,[18] while section 5 of the 1994 Act granted similar loan participation powers to Farm Credit banks operating under title I of the Act and direct lender associations.[19] As amended, sections 3.1(11)(B) and 4.18A of the Act grant System banks and associations broader authorities pertaining to eligibility and loan participations. The FCA proposes § 613.3300 to provide FCS banks and direct lender associations with guidance about the scope of their new authorities.

Both sections 3.1(11)(B)(iv) and 4.18A(a)(1) of the Act define "participate" and "participation" to mean "multilender transactions, including syndications, assignments, loan participations, subparticipations, other forms of the purchase, sale, or transfer of interests in loans, or other extensions of credit, or other technical and financial assistance." The FCA proposes to incorporate this statutory definition into § 613.3300(a)(1). The FCA emphasizes that this definition would apply only to loan participations between FCS and non-System lenders under sections 3.1(11)(B) and 4.18A of the Act and proposed § 613.3300. For all transactions under sections 1.5(12), 2.2(13), and 3.1(11)(A) of the Act and subpart H of part 614, "loan participation" is defined by § 614.4325(a)(4) as a "fractional undivided interest in the principal amount of the loan."

The proposed regulation would authorize FCS banks and associations to provide related services to similar entities. The FCA observes that the plain language of sections 3.1(11)(B)(iv) and 4.18A(a)(1) of the Act permits FCS banks and associations to provide "technical and financial assistance" to similar entities. Accordingly, the FCA proposes a conforming amendment to § 618.8005 to reflect this new statutory authority. The FCA invites comments about whether the final regulation ought to provide further guidance about this financially related service authority.

Sections 3.1(11)(B)(ii) and 4.18A(a)(2) identify a "similar entity" as a party that is ineligible for a loan from an FCS bank or association, but has operations that are "functionally similar" to the activities of eligible borrowers. An entity is functionally similar to an eligible borrower if it derives a majority of its income from, or a majority of its assets are invested in, the conduct of the activities that are functionally similar to the activities that are conducted by eligible parties. The FCA proposes in § 613.3300(a)(2) a definition of similar entity that is closely aligned with the statutory definition.

Proposed § 613.3300(b) reflects sections 3.1(11)(B)(ii) and 4.18A(a)(2) of the Act, which the FCA interprets to mean that the borrower is ineligible under sections 1.9, 1.11, 2.4, 3.7 and 3.8 of the Act to borrow directly from a System bank or association, but has a credit need that an FCS lender could finance for an eligible borrower. Section 4.18A(b)(4) of the Act expressly precludes Farm Credit banks operating under title I of the Act and direct lender associations from participating in rural home loans under this similar entity authority.

For illustration purposes, the parties who qualify as similar entities under sections 3.1(11)(B) and 4.18A of the Act and the proposed regulations are presented below. The FCA solicits comments about whether the final regulation should provide a specific listing of the parties who qualify as similar entities. Farm Credit banks and direct lender associations that operate under titles I or II of the Act would be authorized to participate with non-System lenders in loans to: (1) Parties who are ineligible to borrow under § 613.3000 but require financing for any agricultural or aquatic purpose; (2) any individual, cooperative, and other legal entity that processes or markets agricultural or aquatic products, but supplies no throughput from an agricultural or aquatic operation; (3) a processing or marketing operation in which farmers, ranchers or aquatic producers do not hold a controlling interest; and (4) parties who are ineligible to borrow under proposed § 613.3020, but operate farm or aquatic supply businesses that furnish services, farm or aquatic equipment, and other goods that are directly related to the agricultural or aquatic operations of farmers, ranchers, and aquatic producers or harvesters.

The FCA believes that title III lenders could participate in loans made by non-System lenders to four types of "similar entities." First, BCs and ACBs could participate in loans to any legal entity that is not part of a cooperative enterprise, but: (1) Processes, prepares for market, handles, or markets farm or aquatic products; (2) purchases, tests, grades, processes, distributes, or furnishes farm or aquatic supplies; or (3) furnishes business and financially related services primarily to farmers, ranchers, and aquatic producers or harvesters. Second, BCs and ACBs could participate in loans to electric utilities that provide some service in rural communities, but for some reason are ineligible to participate in RUS programs. Third, BCs and ACBs could participate in loans to independent power producers, so long as they sell more than 50 percent of the electricity that they generate to rural electric utilities that are eligible for RUS loans. Finally, BCs and ACBs could participate in loans that finance the import of agricultural commodities and products, aquatic products, and farm supplies for borrowers who are not eligible cooperatives, their subsidiaries, or their counterparties.

Section 4.18A(b) of the Act allows each FCB, ACB, and direct lender association to "participate in any loan of a type *otherwise authorized under title I or II* made to a similar entity * * *." The FCA interprets this passage to mean that similar entity loans should still be compatible with the basic lending powers of each Farm Credit bank or association. In other words, section 4.18A(b) of the Act would, for example, authorize FLCAs to participate only in similar entity loans that are: (1) Secured by a first lien on real estate; and (2) mature within not fewer than 5 years, nor more than 40 years. Similarly, this statutory provision would permit PCAs to participate only in operating loans that mature within the time prescribed in section 1.10(b) of the Act. Accordingly, § 613.3300(c) reflects the FCA's interpretation of section 4.18A(b) of the Act. In the FCA's opinion, the above-cited passage in section 4.18A(b) of the Act is compatible with sections 1.5(12)(C) and 2.2(13) of the Act, which authorize FCS banks and direct lender associations to participate with non-System lenders only in the type of loans that such FCS institutions could originate.

Proposed § 613.3300(d) implements the restrictions that sections 3.1(11)(B)(i) and 4.18A(b) of the Act impose on loan participations to similar entities. Proposed § 613.3300(d)(1) reflects statutory lending limits for loan participations to similar entities. Under proposed § 613.3300(d)(1)(i)(A), the total amount of all loan participations that any FCB, ACB, or direct lender association may have outstanding under proposed § 613.3300(b)(1) to a single credit risk could not exceed 10 percent of its total capital. However, proposed § 613.3300(d)(1)(i)(B) would authorize the shareholders of any FCB, ACB, or direct lender to approve a higher lending limit, provided it does not exceed 25 percent of the institution's total capital. This provision would implement section 4.18A(b)(1) of the Act, which authorizes the FCA to permit a higher limit that would apply if shareholders approve. This proposal is consistent with the lending limits that FCA has established for loans to borrowers under titles I and II of the Act. Under proposed § 613.3300(d)(1)(ii), the total amount of all loan participations that any BC or ACB may have outstanding under proposed § 613.3300(b)(2) to a single credit risk could not exceed 10 percent of its total capital.

Under proposed § 613.3300(d)(2), the participation interest in the same loan held by one or more Farm Credit bank(s) or association(s) could not, at any time, equal or exceed 50 percent of the principal amount of the loan. This regulatory provision would implement sections 3.1(11)(B)(i)(I)(bb) and 4.18A(b)(2) of the Act. Sections 3.1(11)(B) and 4.18A of the Act also limit the amount of loan participations to similar entities that each FCS bank or direct lender association may hold at any time to 15 percent of its total outstanding assets. Therefore, proposed § 613.3300(d)(3) applies this 15-percent portfolio limit to FCBs, BCs, ACBs, and direct lender associations.

[16] 140 Cong. Rec. S14236 (daily ed. Oct. 5, 1994) (Colloquy between Senators Leahy and Lugar).

[17] Pub. L. No 102–552, section 502, 106 Stat. 4130 (Oct. 28, 1992).

[18] Pub. L. No. 103–376, section 2, 108 Stat 3497, (Oct. 19, 1994).

[19] Pub. L. No. 103–376, section 5, 108 Stat 3497, (Oct. 19, 1994).

Proposed § 613.3300(e) would implement requirements of sections 3.1(11)(B) and 4.18A(c)(3) concerning approval by other FCS banks and associations. Proposed § 613.3300(e)(1) implements a statutory provision that requires a direct lender association to obtain approval from its funding bank before it participates with a non-System lender in a loan to a similar entity. The FCA believes that a funding bank's decision to grant or deny approval under section 4.18A(c)(3) of the Act and proposed § 613.3300(e)(1) should rest exclusively on safety and soundness considerations that the transaction would have on the bank's financial position. Direct lender associations have not previously participated with non-System lenders in syndications and other multilender transactions that provide credit to ineligible borrowers. The FCA solicits comments from interested parties about how the final regulation can best accord equitable treatment to both funding banks and their affiliated associations.

Proposed § 613.3300(e)(2) would require a Farm Credit bank operating under title I of the Act or a direct lender association to comply with § 614.4070 before it participates in a similar entity loan in the chartered territory of another FCS institution. These provisions are designed to prevent intra-System competition without the consent of affected institutions. Requiring consent for similar entity participations would be consistent with the FCA's policy for out-of-territory participations and loans to eligible borrowers. However, some System institutions have informed the Agency that obtaining consent is time-consuming and impedes their ability to engage in participation transactions. As the Act is silent on this point, the FCA seeks public comment on whether consent for out-of-territory participations to similar entities ought to be required.

Proposed § 613.3300(e)(3) would implement section 4.18A(c)(1) of the Act by requiring a FCB or direct lender association to obtain BC or ACB approval before it participates in a loan to a similar entity that is eligible to borrow directly from a Farm Credit bank operating under title III of the Act. Both the Act and the proposed regulation require approval from the BC or ACB that, at the time of origination, has the greatest volume of loans (made under title III of the Act) in the State where the headquarters of the similar entity is located.

Similarly, proposed § 613.3300(e)(4) implements section 3.1(11)(B)(iii) of the Act by requiring a BC or ACB to obtain FCB approval before it participates with a non-System lender in a loan to a similar entity that is eligible to borrow directly from an FCB or a direct lender association under proposed §§ 613.3010 or 613.3030. The BC or ACB is required to obtain approval from the FCB(s) in whose chartered territory the similar entity conducts operations. As the FCA interprets section 3.1(11)(B)(iii) of the Act, approval by two FCBs would only be required when both banks are chartered to fund mortgage and short- and intermediate-term operating loans in the same chartered territory. When one FCB discounts production loans in a territory where another FCB funds solely mortgage loans, the BC or ACB would only be required to obtain consent from the FCB with the authority to finance the similar entity.

Pursuant to sections 3.1(11)(B)(iii) and 4.18A(c)(2) of the Act, proposed § 613.3300(e)(5) grants FCS institutions broad latitude to negotiate agreements that confer intra-System consents required by the Act and FCA regulations.

Proposed § 613.3300(f) reflects the FCA's determination that borrower rights do not apply to participation interests that FCBs, ACBs, and associations hold in similar entity loans. Sections 4.14A(a)(5) and 4.14A(a)(6)(A) of the Act require Farm Credit banks (operating under title I of the Act) and associations to accord borrower rights on loans to eligible borrowers that they make to bona fide farmers, ranchers, and aquatic producers and harvesters. Borrower rights would not apply to similar entity loans because the borrower is ineligible to borrow directly from an FCS bank or association and the loan is originated by a non-System lender.

The capitalization requirements for similar entity loan participations is addressed by proposed § 613.3300(g). This provision of the proposed regulation would require the capitalization bylaws of each Farm Credit bank and association to address whether, and to what extent, non-voting stock or participation certificates should be required for participation interests in similar entity loans. Proposed § 613.3300(g) is consistent with section 4.3A of the Act and § 615.5220.

V. Miscellaneous

The FCA proposes to delete existing § 613.3060, which simply states that direct lender associations and other financing institutions (OFIs) are eligible to borrow from FCBs and ACBs. Regulations in subparts C and P of part 614 specifically implement the authority of FCBs and ACBs to fund and discount loans for direct lender associations and OFIs under section 1.7 of the Act rendering this section redundant.

The FCA also proposes to delete the following regulations: §§ 619.9025; 619.9030; 619.9040; 619.9065; 619.9080; 619.9090; 619.9100; 619.9120; 619.9150; 619.9160; 619.9190; 619.9220; 619.9270; 619.9280; 619.9300; and 619.9310. These regulations define certain terms that pertain to eligibility and scope of financing. Many of these definitions are not identical to either the existing or proposed regulations in part 613. This deletion will reduce duplication and potential for confusion.

Finally, the FCA proposes to relocate the nondiscrimination in lending regulations in subpart E of part 613 to a new part 626. Nondiscrimination is unrelated to eligibility and scope of financing, and therefore, the FCA believes that this topic should be addressed in a separate part of the regulations.

List of Subjects

12 CFR Part 613

Agriculture, Banks, Banking, Credit, Rural areas.

12 CFR Part 614

Agriculture, Banks, Banking, Foreign Trade, Reporting and recordkeeping requirements, Rural areas.

12 CFR Part 618

Agriculture, Archives and records, Banks, banking, Insurance, Reporting and recordkeeping requirements, Rural areas, Technical assistances.

12 CFR Part 619

Agriculture, Banks, Banking, Rural areas.

12 CFR Part 626

Advertising, Aged, Agriculture, Banks, Banking, Civil rights, Credit, Fair housing, Marital status discrimination, Sex discrimination, Signs and symbols.

For the reasons stated in the preamble, parts 613, 614, 618, 619, and 626 of chapter VI, title 12 of the Code of Federal Regulations are proposed to be amended to read as follows:

PART 613—ELIGIBILITY AND SCOPE OF FINANCING

1. The authority citation for part 613 is revised to read as follows:

Authority: Secs. 1.5, 1.7, 1.9, 1.10, 1.11, 2.2, 2.4, 2.12, 3.1, 3.7, 3.8, 3.22, 4.18A, 4.25, 4.26, 4.27 5.9, 5.17 of the Farm Credit Act (12 U.S.C. 2013, 2015, 2017, 2018, 2019, 2073, 2075, 2093, 2122, 2128, 2129, 2143, 2206a, 2211, 2212, 2213, 2243, 2252).

2. Subparts A, B, C, and D of part 613 are revised to read as follows:

Subpart A—Financing Under Titles I and II of the Farm Credit Act

Sec.

613.3000 Financing for farmers, ranchers, and aquatic producers or harvesters.
613.3010 Financing for processing or marketing operations.
613.3020 Financing for farm-related businesses.
613.3030 Rural home financing.

Subpart B—Financing for Banks Operating Under Title III of the Farm Credit Act

613.3100 Domestic lending.
613.3200 International lending.

Subpart C—Similar Entity Authority Under Sections 3.1(11)(B) and 4.18A of the Act

613.3300 Participations and other interests in loans to similar entities.

Subpart A—Financing Under Titles I and II of the Farm Credit Act

§ 613.3000 Financing for farmers, ranchers, and aquatic producers or harvesters.

(a) *Definitions.* For purposes of this subpart, the following definitions apply:

(1) *Agricultural land* means land that is devoted to or available for the production of agricultural or aquatic products.

(2) *Bona fide farmer, rancher, or producer or harvester of aquatic products* means an individual or legal entity that either:

(i) Produces agricultural products or produces or harvests aquatic products to generate income; or

(ii) Owns agricultural land.

(3) *Individual* means a natural person who is either:

(i) A citizen of the United States; or

(ii) A foreign national who has been lawfully admitted into the United States for permanent residency pursuant to 8 U.S.C. 1101(a)(20) or on a visa pursuant to a provision in 8 U.S.C. 1101(a)(15) that authorizes such individual to own property or operate or manage a business.

(4) *Legal entity* means any partnership, corporation, trust, estate, or other legal entity, excluding legal entities eligible under title III of the Act, that is established pursuant to the laws of the United States, any State thereof, the Commonwealth of Puerto Rico, or the District of Columbia and is legally authorized to conduct a business.

(b) *Eligible borrowers.* A bona fide farmer, rancher, or producer or harvester of aquatic products is eligible to borrow under either title I or II of the Act.

(c) *Financing for agricultural or aquatic needs.* Any borrower who is eligible under paragraph (b) of this section may obtain financing for any agricultural or aquatic purpose.

(d) *Financing for other credit needs.*

(1) Individual eligible borrowers who are either citizens or permanent residents of the United States and are actively engaged in agricultural or aquatic production may also obtain financing for:

(i) Housing and domestic needs; and

(ii) Other business needs in an amount that does not exceed the market value of their agricultural or aquatic assets.

(2) Individual eligible borrowers who either own agricultural land as an investment, or are non-resident foreign nationals, may obtain total financing for their housing, domestic and other business needs in an amount that does not exceed the market value of their agricultural or aquatic assets.

(3) Legal entities may obtain financing for their other credit needs in an amount that does not exceed the market value of their agricultural assets only if:

(i) The securities of the borrower are not traded on a public exchange; and

(ii) More than 50 percent of the assets of the borrowing legal entity are used in agricultural or aquatic production.

§ 613.3010 Financing for processing or marketing operations.

(a) *Eligible borrowers.* A borrower is eligible for financing for a processing or marketing operation under titles I and II of the Act, only if the borrower meets the following requirements:

(1) The borrower is either a bona fide farmer, rancher, or producer or harvester of aquatic products or is a legal entity in which eligible borrowers under § 613.3000(b) hold a controlling interest; and

(2) The borrower or an owner of a borrowing legal entity consistently produces some portion of the throughput used in the processing or marketing operation.

(b) *Portfolio restrictions for certain processing and marketing loans.* Processing or marketing loans to eligible borrowers who supply, on a consistent basis, less than 20 percent of the throughput are subject to the following restrictions:

(1) *Bank limitation.* The aggregate of such processing and marketing loans made by a Farm Credit bank shall not exceed 15 percent of all its outstanding retail loans at the end of the preceding fiscal year.

(2) *Association limitation.* The aggregate of such processing and marketing loans made by all direct lender associations affiliated with the same Farm Credit bank shall not exceed 15 percent of the aggregate of their outstanding retail loans at the end of the preceding fiscal year. Each Farm Credit bank, in conjunction with all its affiliated direct lender associations, shall ensure that such processing or marketing loans are equitably allocated among its affiliated direct lender associations.

(3) *Calculation of outstanding retail loans.* For the purposes of this paragraph, "outstanding retail loans" include loans, loan participations, and other interests in loans that are either bought without recourse or sold with recourse.

§ 613.3020 Financing for farm-related businesses.

(a) *Eligibility.* An individual or legal entity that furnishes services to farmers and ranchers that are directly related to their agricultural operations is eligible to borrow under titles I and II of the Act.

(b) *Purposes of financing.* An eligible farm-related business may obtain financing for its business needs, subject to the following requirements:

(1) An eligible farm-related business that derives more than 50 percent of its income (as consistently measured on either a gross sales or net sales basis) from furnishing services that are directly related to the agricultural operations of farmers and ranchers may obtain financing for all of its business needs.

(2) An eligible farm-related business that derives 50 percent or less of its income (as consistently measured on either a gross sales or net sales basis) from furnishing services that are directly related to the agricultural operations of farmers and ranchers may obtain financing only for those credit needs that are related to the provision of farm-related [illegible]

§ 613.3030 Rural home financing.

(a) *Definitions.*

(1) *Rural homeowner* means an individual who is not a bona fide farmer, rancher, or producer or harvester of aquatic products.

(2) *Rural home* means a single-family moderately priced dwelling located in a

rural area that will be the occupant's principal residence.

(3) *Rural area* means a designated rural area within a State or the Commonwealth of Puerto Rico including communities that have a population of not more than 2,500 inhabitants based on the latest decennial census of the United States.

(4) *Moderately priced* means the price of any rural home that either:

(i) Satisfies the criteria in section 8.0 of the Act pertaining to rural home loans that collateralize securities that are guaranteed by the Federal Agricultural Mortgage Corporation; or

(ii) Is below the 75th percentile of housing values, ranked from the lowest value to the highest value in the rural area where it is located in accordance with the most recent edition of the Census of Housing, General Housing Characteristics published by the United States Bureau of the Census. System institutions may obtain copies of this document from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

(b) *Eligibility*. Any rural homeowner is eligible to obtain financing on a rural home. No borrower shall have a loan from the Farm Credit System on more than one rural home at any one time.

(c) *Portfolio limitations*, (1) The aggregate of retail rural home loans by any Farm Credit Bank or agricultural credit bank shall not exceed 15 percent of the total of all of its outstanding loans at any one time.

(2) The aggregate of rural home loans made by each direct lender association shall not exceed 15 percent of the total of its outstanding loans at the end of its preceding fiscal year, except with the prior approval of its funding bank.

(3) The aggregate of rural home loans made by all direct lender associations that are funded by the same Farm Credit bank shall not exceed 15 percent of the total outstanding loans of all such associations at the end of the funding bank's preceding fiscal year.

Subpart B—Financing for Banks Operating Under Title III of the Farm Credit Act

§ 613.3100 Domestic lending.

(a) *Definitions.*

(1) *Cooperative* means any association of farmers, ranchers, producers or harvesters of aquatic products, or any federation of such associations, which conducts business for the mutual benefit of its members and has the power to:

(i) Process, prepare for market, handle, or market farm or aquatic products;

(ii) Purchase, test, grade, process, distribute, or furnish farm or aquatic supplies; or

(iii) Furnish business and financially related services to its members.

(2) *Farm or aquatic supplies and farm or aquatic business services* are any goods or services normally used by farmers, ranchers, or producers and harvesters of aquatic products in their business operations, or improve the welfare or livelihood of such persons.

(3) *Public utility* means a cooperative or other entity that is licensed under Federal, State, or local law to provide electric, telecommunication, cable television, water, or waste treatment services.

(4) *Rural area* means all territory of a State that is not within the outer boundary of any city or town having a population of more than 20,000 inhabitants based on the latest decennial census of the United States.

(5) *Service cooperative* means a cooperative that is predominately involved in providing business and financially related services (other than public utility services) to farmers, ranchers, aquatic producers or harvesters, or their cooperatives.

(b) *Cooperatives and other entities that serve agricultural or aquatic producers.* (1) *Eligibility for cooperatives.* A cooperative is eligible to borrow from a bank for cooperatives or an agricultural credit bank only if the following requirements are satisfied:

(i) Unless the bank's board of directors establishes by resolution a higher voting control threshold for any type of cooperative, the percentage of voting control of the cooperative held by farmers, ranchers, producers or harvesters of aquatic products, or cooperatives shall be 80 percent except:

(A) Sixty (60) percent for a service cooperative;

(B) Sixty (60) percent for local farm supply cooperatives that have historically served the needs of a community that would not be adequately served by other suppliers and have experienced a reduction in the percentage of membership by agricultural or aquatic producers due to changed circumstances beyond their control; and

(C) Sixty (60) percent for local farm supply cooperatives that shall provide needed services to a community, and shall compete with a cooperative specified in § 613.3100(b)(1)(i)(B);

(ii) The cooperative deals in farm or aquatic products, or products processed therefrom, farm or aquatic supplies, farm or aquatic business services, or financially related services with or for members in an amount at least equal in value to the total amount of such business it transacts with or for nonmembers, excluding from the total of member and non-member business, transactions with the United States, or any agencies or instrumentalities thereof, or services or supplies furnished by a public utility; and

(iii) The cooperative conforms with one of the following two conditions:

(A) No member of the cooperative shall have more than one vote because of the amount of stock or membership capital owned therein; or

(B) The cooperative restricts dividends on stock or membership capital to 10 percent per year or the maximum percentage per year permitted by applicable State law, whichever is less.

(2) *Other eligible entities.* The following entities are eligible to borrow from banks for cooperatives and agricultural credit banks:

(i) Any legal entity that holds more than 50 percent of the voting control of a cooperative that is an eligible borrower under paragraph (b)(1) of this section, and it uses the proceeds of the loan to fund the activities of its cooperative subsidiary on the terms and conditions specified by the bank;

(ii) Any legal entity in which an eligible cooperative has an ownership interest, *provided that* if such interest is less than 50 percent, financing shall not exceed the percentage that the eligible cooperative owns in such entity multiplied by the value of the total assets of such entity; or

(iii) Any creditworthy private entity operated on a non-profit basis that satisfies the requirements for a service cooperative and complies with the requirements of paragraphs (b)(1)(i)(A) and (b)(1)(iii) of this section, and any subsidiary of such entity. An entity that is eligible to borrow under this paragraph shall be organized to benefit agriculture in furtherance of the welfare of the farmers, ranchers, and aquatic producers and harvesters who are its members.

(c) *Electric, telecommunication, and cable television utilities.*—(1) *Eligibility.* A bank for cooperatives or an agricultural credit bank may lend to:

(i) Cooperatives, other entities, or the subsidiaries of such cooperatives or other entities that:

(A) Have received a loan, loan commitment, insured loan, or loan guarantee from the Rural Utilities Service of the United States Department of Agriculture to finance rural electric and telecommunication services;

(B) Have received a loan or a loan commitment from the Rural Telephone

Bank of the United States Department of Agriculture; or

(C) Have been certified by the Rural Utilities Service of the United States Department of Agriculture to be eligible for a loan, loan commitment, or loan guarantee; or

(ii) Any legal entity that holds more than 50 percent of the voting control of any public utility that is an eligible borrower under paragraph (c)(1)(i) of this section, and uses the proceeds of the loan to fund the activities of the eligible subsidiary on the terms and conditions specified by the bank for cooperatives or agricultural credit bank.

(2) *Purposes for financing.* A bank for cooperatives or agricultural credit bank may extend credit to entities that are eligible to borrow under paragraph (c)(1) of this section in order to provide electric or telecommunication services that are generally compatible with the Rural Electrification Act of 1936, as amended, 7 U.S.C. 901 *et seq.*, and regulations that the Secretary of Agriculture promulgates in 7 CFR parts 1610, 1710, 1712, 1714, 1735, 1737, 1739, and 1751. A subsidiary that is eligible to borrow under paragraph (c)(1) of this section may also obtain financing from a bank for cooperatives or agricultural credit bank to operate a licensed cable television utility.

(3) *Restriction.* When an eligible utility, as defined in paragraph (c)(1)(i) of this section, owns less than 50 percent of any legal entity, the amount of financing provided by the bank for cooperatives or agricultural credit bank to the entity shall not exceed the percentage that the eligible cooperatives own in such entity multiplied by the value of the total assets of such entity.

(d) *Water and waste disposal facilities.*—(1) *Eligibility.* A cooperative or a public, quasi-public agency, body, or other public or private entity that, under the authority of State or local law, establishes and operates water and waste disposal facilities in a rural area, as that term is defined by paragraph (a)(5) of this section, is eligible to borrow from a bank for cooperatives or an agricultural credit bank.

(2) *Purposes for financing.* A bank for cooperatives or agricultural credit bank may extend credit to entities that are eligible under paragraph (d)(1) of this section solely for installing, maintaining, expanding, improving, or operating water and waste disposal facilities in rural areas.

(e) *Domestic lessors.* A bank for cooperatives or agricultural credit bank may lend to domestic parties to finance the acquisition of facilities or equipment that will be leased to shareholders of the bank for use in their operations located inside of the United States.

§ 613.3200 International lending.

(a) *Definition.* For the purpose of this section only, the term "farm supplies" refers to inputs that are used in a farming or ranching operation, but excludes agricultural processing equipment, machinery used in food manufacturing or other capital goods which are not used in a farming or ranching operation.

(b) *Import transactions.* The following parties are eligible to borrow from a bank for cooperatives or an agricultural credit bank pursuant to section 3.7(b) of the Act for the purpose of financing the import of agricultural commodities or products therefrom, aquatic products, and farm supplies into the United States:

(1) An eligible cooperative as defined by § 613.3100(b);

(2) A counterparty with respect to a specific import transaction with a voting stockholder of the bank for the substantial benefit of the shareholder; and

(3) Any foreign or domestic legal entity in which eligible cooperatives hold an ownership interest.

(c) *Export transactions.* Pursuant to section 3.7(b)(2) of the Act, a bank for cooperatives or an agricultural credit bank is authorized to finance the export (including the cost of freight) of agricultural commodities or products therefrom, aquatic products, or farm supplies from the United States to any foreign country. The board of directors of each bank for cooperatives and agricultural credit bank shall adopt policies that ensure that exports of agricultural products and commodities, aquatic products, and farm supplies which originate from eligible cooperatives are financed on a priority basis. The total amount of balances outstanding on loans made under this paragraph shall not, at any time, exceed 50 percent of the capital of any bank for cooperatives or agricultural credit bank for loans that:

(1) Finance the export of agricultural commodities and products therefrom, aquatic products, or farm supplies that are not originally sourced from an eligible cooperative; and

(2) At least 95 percent of the loan amount is not guaranteed by a department, agency, bureau, board, or commission of the United States or a corporation that is wholly owned directly or indirectly by the United States.

(d) *Transactions involving international business operations.* A bank for cooperatives or an agricultural credit bank may finance a domestic or foreign entity which is at least partially owned by eligible cooperatives described in § 613.3100(b), and facilitates the international business operations of such cooperatives.

(e) *Restrictions.* (1) When eligible cooperatives own less than 50 percent of a foreign or domestic legal entity, the amount of financing that a bank for cooperatives or agricultural credit bank may provide to the entity for any import, export, or international business transaction shall not exceed the percentage of ownership that eligible cooperatives hold in such entity multiplied by the value of the total assets of such entity; and

(2) A bank for cooperatives or agricultural credit bank shall not finance the relocation of any plant or facility from the United States to a foreign country.

Subpart C—Similar Entity Authority Under Sections 3.1(11)(B) and 4.18A of the Act

§ 613.3300 Participations and other interests in loans to similar entities.

(a) *Definitions.*

(1) *Participate* and *participation*, for the purpose of this section, refer to multilender transactions, including syndications, assignments, loan participations, subparticipations, other forms of the purchase, sale, or transfer of interests in loans, or other extensions of credit, or other technical and financial assistance.

(2) *Similar entity* means a party that is ineligible for a loan from a Farm Credit bank or association, but has operations that are functionally similar to the activities of eligible borrowers in that a majority of its income is derived from, or a majority of its assets are invested in, the conduct of activities that are performed by eligible borrowers.

(b) *Similar entity transactions.* A Farm Credit bank or a direct lender association may participate with a lender that is not a Farm Credit System institution in loans to a similar entity that is not eligible to borrow directly under §§ 613.3000, 613.3010, 613.3020, 613.3100, or 613.3200, for purposes similar to those for which an eligible borrower could obtain financing from the participating FCS institution.

(c) *Compatibility with lending authorities under titles I and II of the Act.* Each direct lender association may participate in loans to similar entities under paragraph (b) of this section only to the extent that such loans are compatible with the association's applicable long-term real estate lending authority under sections 1.7(a) and 1.10(a) of the Act or its short- and intermediate-term lending authorities under sections 1.10(b) and 2.4 of the Act.

(d) *Restrictions.* Participations by a Farm Credit bank or association in loans to a similar entity under this section are subject to the following limitations:

(1) *Lending limits.*

(i) *Farm Credit banks operating under title I of the Act and direct lender associations.* The total amount of all loan participations that any Farm Credit Bank, agricultural credit bank, or direct lender association has outstanding under paragraph (b) of this section to a single credit risk shall not exceed:

(A) Ten (10) percent of its total capital; or

(B) Twenty-five (25) percent of its total capital if a majority of the shareholders of the respective Farm Credit bank or direct lender association so approve.

(ii) *Farm Credit banks operating under title III of the Act.* The total amount of all loan participations that any bank for cooperative or agricultural credit bank has outstanding under paragraph (b) of this section to a single credit risk shall not exceed 10 percent of its total capital;

(2) *Percentage held in the principal amount of the loan.* The participation interest in the same loan held by one or more Farm Credit bank(s) or association(s) shall not, at any time, equal or exceed 50 percent of the principal amount of the loan; and

(3) *Portfolio limitations.* The total amount of participations that any Farm Credit bank or direct lender association has outstanding under paragraph (b) of this section shall not exceed 15 percent of its total outstanding assets at the end of its preceding fiscal year.

(e) *Approval by other Farm Credit System institutions.* (1) No direct lender association shall participate in a loan to a similar entity under paragraph (b) of this section without the approval of its funding bank. A funding bank shall deny such requests only for safety and soundness reasons affecting the bank.

(2) No Farm Credit bank operating under title I of the Act or a direct lender association shall participate in a loan under paragraph (b) of this section to a similar entity that is located outside of its chartered territory unless it complies with the requirements of § 614.4070 of this chapter.

(3) No Farm Credit Bank or direct lender association shall participate in a loan to a similar entity that is eligible to borrow under § 613.3100(b) without the prior approval of the bank for cooperatives or agricultural credit bank that, at the time the loan is made, has the greatest volume of loans made under title III of the Act in the State where the headquarters office of the similar entity is located.

(4) No bank for cooperatives or agricultural credit bank shall participate in a loan to a similar entity that is eligible to borrow under §§ 613.3010 or 613.3020 without the prior consent of the Farm Credit Bank(s) in whose chartered territory the similar entity conducts operations.

(5) All approvals required under paragraph (e) of this section may be granted on an annual basis and under such terms and conditions as the various Farm Credit System institutions may agree.

(f) *Borrower rights.* The borrower rights requirements in title IV of the Act and § 614.4336 and subparts K, L and N of part 614 of this chapter do not apply to participations in loans to similar entities under paragraph (b) of this section.

(g) *Borrower stock requirements.* Pursuant to section 4.3A of the Act and § 615.5220 of this chapter, the capitalization bylaws of each Farm Credit bank and association shall determine whether, and to what extent, non-voting stock or participation certificates shall be required for participations in loans to similar entities.

Subpart E—Nondiscrimination in Lending

§§ 613.3145, 613.3150, 613.3151, 613.3152, 613.3160, 613.3170, 613.3175 (Subpart E) [Redesignated]

3. Subpart E of part 613, consisting of §§ 613.3145, 613.3150, 613.3151, 613.3152, 613.3160, 613.3170, and 613.3175 is redesignated as new part 626, consisting of §§ 626.6000, 626.6005, 626.6010, 626.6015, 626.6020, 626.6025, and 626.6030 respectively.

PART 614—LOAN POLICIES AND OPERATIONS

4. The authority citation for part 614 is revised to read as follows:

Authority: 42 U.S.C. 4012a, 4104a, 4104b, 4106, and 4128; Secs. 1.3, 1.5, 1.6, 1.7, 1.9, 1.10, 1.11, 2.0, 2.2, 2.3, 2.4, 2.10, 2.12, 2.13, 2.15, 3.0, 3.1, 3.3, 3.7, 3.8, 3.10, 3.20, 3.28, 4.12, 4.12A, 4.13, 4.13B, 4.14, 4.14A, 4.14C, 4.14D, 4.14E, 4.18, 4.18A, 4.19, 4.36, 4.37, 5.9, 5.10, 5.17, 7.0, 7.2, 7.6, 7.7, 7.8, 7.12, 7.13, 8.0, 8.5 of the Farm Credit Act (12 U.S.C. 2011, 2013, 2014, 2015, 2017, 2018, 2019, 2071, 2073, 2074, 2075, 2091, 2093, 2094, 2096, 2121, 2122, 2124, 2128, 2129, 2131, 2141, 2149, 2183, 2184, 2199, 2201, 2202, 2202a, 2202c, 2202d, 2202e, 2206, 2206a, 2207, 2219a, 2219b, 2243, 2244, 2252, 2279a, 2279a–2, 2279b, 2279b–1, 2279b–2, 2279f, 2279f–1, 2279aa, 2279aa–5); sec. 413 of Pub. L. 100–233, 101 Stat. 1568, 1639.

Subpart A—[Amended]

5. Subpart A of part 614 is amended by removing the reference "613.3020" each place it appears and adding in its place "613.3000"; by removing the reference "613.3045" each place it appears and adding in its place "613.3010"; by removing the reference "613.3040" each place it appears and adding in its place "613.3030"; by removing the reference "613.3050" each place it appears and adding in its place "613.3020"; by removing the reference "613.3110" each place it appears and adding in its place "613.3100(b)(1)"; and by removing the reference "613.3110(c)" each place it appears and adding in its place "613.3100(b)(2), (c), and (d)."

6. Section 614.4010 is amended by removing the words "export or" each place they appear in paragraphs (d)(4) and (d)(5); by removing the reference "(d)(3)" and adding in its place "(d)(4)" in paragraph (d)(5); and by adding new paragraphs (d)(6) and (d)(7) to read as follows.

§ 614.4010 Agricultural credit banks.

* * * * *

(d) * * *

* * * * *

(6) Any party, subject to the requirements in § 613.3200(c) of this chapter, for the export (including the cost of freight) of agricultural commodities or products therefrom, aquatic products, or farm supplies from the United States to any foreign country, in accordance with § 614.4233 and subpart Q of this part 614; and

(7) Domestic or foreign parties in which eligible cooperatives, as defined in § 613.3100 of this chapter, hold an ownership interest, for the purpose of facilitating the international business operations of such cooperatives pursuant to the requirements of § 613.3200(d) and (e) of this chapter.

* * * * *

7. Section 614.4020 is amended by removing the words "export or" each place they appear in paragraphs (a)(4) and (a)(5); by adding after the words "bank's board", the reference ", § 614.4233," in paragraph (a)(4); by removing the words "board policy" and adding in their place, the words "policies of the bank's board, § 614.4233," in paragraph (a)(5); and by adding new paragraphs (a)(6) and (a)(7) to read as follows:

§ 614.4020 Banks for cooperatives.

(a) * * *

* * * * *

(6) Any party, subject to the requirements in § 613.3200(c) of this chapter, for the export (including the cost of freight) of agricultural commodities or products therefrom, aquatic products, or farm supplies from the United States to any foreign country, in accordance with § 614.4233 and subpart Q of this part 614; and

(7) Domestic or foreign parties in which eligible cooperatives, as defined in § 613.3100 of this chapter, hold an ownership interest, for the purpose of facilitating the international business operations of such cooperatives pursuant to the requirements in § 613.3200(d) and (e) of this chapter.

* * * * *

Subpart E—Loan Terms and Conditions

8. Section 614.4222 is revised to read as follows:

§ 614.4222 Rural home loans.

A long-term real estate loan, including a revolving line of credit, on a rural home shall be secured by a first lien on the property, pursuant to § 614.4210, except that it may be secured by a second lien if the institution also holds the first lien on the property. A short- or intermediate-term loan on a rural home, including a revolving line of credit, must be secured by a lien on the property unless the financing is provided exclusively for repairs, remodelling, or other improvements to the rural home, in which case the credit may be secured by other property or unsecured if warranted by the creditworthiness of the borrower.

9. Section 614.4233 is amended by revising the introductory paragraph to read as follows:

§ 614.4233 International loans.

Term loans made by banks for cooperatives and agricultural credit banks under the authority of section 3.7(b) of the Act and § 613.3200 of this chapter to foreign or domestic parties who are not shareholders of the bank shall be subject to following conditions:

* * * * *

Subpart P—Farm Credit Bank and Agricultural Credit Bank Financing of Other Financing Institutions

§ 614.4610 [Amended]

10. Section 614.4610 is amended by removing the words "a association in the district" and adding in their place, the words "any association funded by the bank" in the first sentence and removing the reference "§ 613.3040(d)(2)" and adding in its place the reference "§§ 613.3010(b)(1) and 613.3030(c)(2)".

Subpart Q—Banks for Cooperatives Financing International Trade

11. The heading for subpart Q is amended by adding after the words "Banks for Cooperatives" the words "and Agricultural Credit Banks".

§ 614.4700 [Amended]

12. Section 614.4700 is amended by adding after the words "banks for cooperatives" the words "and agricultural credit banks" each place they appear in paragraphs (a), (b), and (h).

§ 614.4710 [Amended]

13. Section 614.4710 is amended by adding after the words "banks for cooperatives" the words "and agricultural credit banks" each place it appears in the introductory paragraph and paragraph (c); by adding after the words "bank for cooperatives'" the words "or agricultural credit bank's" in paragraph (a)(1)(ii); by adding after the words "bank for cooperatives" the words "or an agricultural credit bank" each place they appear in paragraphs (a)(1), (a)(1)(i), (a)(3), (a)(5) and (b)(1).

§ 614.4720 [Amended]

14. Section 614.4720 is amended by adding after the words "Banks for cooperatives" the words "and agricultural credit banks" in the first sentence of the introductory paragraph.

§ 614.4800 [Amended]

15. Section 614.4800 is amended by adding after the words "A bank for cooperatives" the words "or an agricultural credit bank" in the first sentence.

§ 614.4810 [Amended]

16. Section 614.4810 is amended by adding after the words "banks for cooperatives" the words "and agricultural credit banks" each place they appear in paragraphs (a) and (b).

§ 614.4900 [Amended]

17. Section 614.4900 is amended by adding after the words "a bank for cooperatives" the words "or an agricultural credit bank" each place they appear in paragraphs (a) through (d); and by adding after the words "banks for cooperatives" the words "and agricultural credit banks" in the first sentence of paragraph (i).

PART 618—GENERAL PROVISIONS

18. The authority citation for part 618 continues to read as follows:

Authority: Secs. 1.5, 1.11, 1.12, 2.2, 2.4, 2.5, 2.12, 3.1, 3.7, 4.12, 4.13A, 4.25, 4.29, 5.9, 5.10, 5.17 of the Farm Credit Act (12 U.S.C. 2013, 2019, 2020, 2073, 2075, 2076, 2093, 2122, 2128, 2183, 2200, 2211, 2218, 2243, 2244, 2252).

Subpart A—Related Services

§ 618.8005 [Amended]

19. Section 618.8005 is amended by removing the reference "§§ 613.3010, 613.3020 (a)(1), (a)(2), (b), and 613.3045" in paragraph (a) and adding in its place, the reference "§§ 613.3000 (a) and (b), 613.3010, and 613.3300" and by removing the reference "§§ 613.3110 and 613.3120" and adding in its place, the reference "§§ 613.3100, 613.3200, and 613.3300" in paragraph (b).

PART 619—DEFINITIONS

20. The authority citation for part 619 is revised to read as follows:

Authority: Secs. 1.7, 2.4, 4.9, 5.9, 5.12, 5.17, 5.18, 7.0, 7.6, 7.7, 7.8 of the Farm Credit Act (12 U.S.C. 2015, 2075, 2160, 2243, 2246, 2252, 2253, 2279a, 2279b, 2279b–1, 2279b–2).

§§ 619.9025, 619.9030, 619.9040, 619.9065, 619.9080, 619.9090, 619.9100, 619.9120, 619.9150, 619.9160, 619.9190, 619.9220, 619.9270, 619.9280, 619.9300, and 619.9310 [Removed]

21. Sections 619.9025, 619.9030, 619.9040, 619.9065, 619.9080, 619.9090, 619.9100, 619.9120, 619.9150, 619.9160, 619.9190, 619.9220, 619.9270, 619.9280, 619.9300, and 619.9310 are removed.

PART 626—NONDISCRIMINATION IN LENDING

22. The authority citation for part 626 is added to read as follows:

Authority: Secs. 1.5, 2.2, 2.12, 3.1, 5.9, 5.17 of the Farm Credit Act (12 U.S.C. 2013, 2073, 2093, 2122, 2243, 2252); 42 U.S.C. 3601 *et seq.*; 15 U.S.C. 1691 *et seq.*; 12 CFR 202, 24 CFR 100, 109, 110.

§ 626.6025 [Amended]

23. Newly designated § 626.6025 is amended by removing the reference "§ 613.3160(b)" and adding in its place, the reference "§ 626.6020(b)" in paragraph (b).

Secretary, Farm Credit Administration Board.

[FR Doc. 95–22313 Filed 9–8–95; 8:45 am]

BILLING CODE 6705–01–P

RAILROAD RETIREMENT BOARD

20 CFR Part 220

RIN 3220–AA99

Determining Disability

AGENCY: Railroad Retirement Board.

ACTION: Proposed rule.

SUMMARY: The Board proposes to update its regulations to reflect a change in how it evaluates pain and other subjective symptoms when determining if an individual is disabled from all regular employment. Other changes are proposed to reflect changes in law and procedure.

DATES: Comments must be received by November 13, 1995.

ADDRESSES: Secretary to the Board, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092.

FOR FURTHER INFORMATION CONTACT: Thomas W. Sadler, Assistant General Counsel, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611, (312) 751–4513, TDD (312) 751–4701.

SUPPLEMENTARY INFORMATION: Courts have consistently held that disability for all regular employment under section 2(a)(1)(v) of the Railroad Retirement Act (45 U.S.C. 231a(a)(1)(v)) is synonymous with the inability to perform any substantial gainful activity under section 223(d) of the Social Security Act (42 U.S.C. 423(d)). Therefore, the Board has generally patterned its regulations dealing with the adjudication of claims for disability based upon the inability to engage in all regular employment (20 CFR Part 220) on regulations promulgated by the Department of Health and Human Services, Social Security Administration (20 CFR Part 404, Subpart P). On November 14, 1991, the Social Security Administration published a final rule (56 FR 57928) expanding its regulations pertaining to how it evaluates symptoms, including pain, in its disability adjudication. The Board has generally followed these regulations in adjudication of claims for disability based on inability to engage in regular employment and now proposes to amend its regulations to conform thereto.

Proposed § 220.100(f) explains how a symptom, such as pain, is considered when it appears as a criterion in the Listing of Impairments contained in Appendix 1 of this part. Appendix 1 contains medical criteria for finding a person disabled on medical factors alone without consideration of the person's age, education, and work experience.

The addition of proposed § 220.100(g) insures that the Listing of Impairments contained in Appendix 1 will at all times conform to Appendix 1 of Subpart P, 20 CFR, Part 404, of the Social Security Adminitration's disability regulations unless specifically indicated otherwise by regulation under this part.

Section 220.112(a) is proposed to be revised by eliminating the reference to remarried widow(ers) and surviving divorced spouses. Section 5103 of Public Law 101–508 revised the standard of disability for these groups of beneficiaries to require the consideration of other than medical factors, such as age, education, and experience, in determining disability for all substantial gainful activity for these groups. Prior to the amendment, only medical factors were required to be used in a disability determination for these beneficiaries.

The proposed rule completely revises § 220.114 to parallel the Social Security regulation dealing with the same subject. See § 404.1529 of this chapter. Proposed § 220.114 will provide guidance on the evaluation of symptoms, including pain. The proposed regulation conforms to the Board's current procedures and applicable court decisions on the evaluation of symptoms, especially pain, in making disability determinations.

Paragraph (a) of proposed § 220.114 is a general statement of how symptoms, such as pain, are considered in determining disability. It explains that the Board will consider a claimant's symptoms along with other objective medical evidence and other evidence relating to a claimant's condition.

Paragraph (b) of proposed § 220.114 explains that the Board will not find that pain will affect an individual's ability to do basic work activities unless the claimant first establishes that he or she has a medically determinable physical or mental impairment, supported by medical signs and laboratory findings, to which the allegation of pain can reasonably be related.

Paragraph (c) of proposed § 220.114 provides that when a symptom, such as pain, is established, the Board must then evaluate the intensity and persistence of the symptom with respect to how it limits the claimant's capacity for work. In making this evaluation the Board considers all available evidence, including the claimant's medical history, statements from the claimant and his treating physician, and statements from others who have knowledge of the claimant's situation.

Paragraph (d) of proposed § 220.114 explains how symptoms, such as pain, are evaluated in the sequential evaluation process required in disability adjudication.

The proposed rule would revise § 220.120 to explain that in determining the claimant's residual functional capacity the Board considers the claimant's symptoms, such as pain, and that such pain or other symptoms may limit the claimant's residual functional capacity beyond what can be determined from anatomical or physiological abnormalities taken alone. Consistent with the revision of section 220.120, proposed new § 220.135 explains that a claimant's symptoms, such as pain, may cause both exertional and nonexertional limitations. This proposed new section defines these terms. Only when the claimant's impairments and related symptoms impose solely exertional impairments do the rules set forth in Appendix 2 of this part direct a conclusion.

Proposed § 220.134 does for Appendix 2 of this part what the proposed amendment to § 220.100(g) does for Appendix 1 and insures that Appendix 2 will be consistent with the comparable appendix in the regulations under the Social Security Act. Appendix 2 contains the medical vocational guidelines or "grids". The grids direct a finding of disabled or not disabled based on specified limitations combined with the individual's age, education, and work experience. Appendix 2 was developed by the Social Security Administration after an extensive administrative rule-making procedure. The Board has adopted the Administration's Appendix 2 in its disability adjudication. This amendment will insure that the Board's Appendix 2 automatically remains in conformance with that of the Social Security Administration except where otherwise stated by this regulation.

Finally, the proposed amendment to § 200.00 of Appendix 2 conforms that section to the revised § 220.120.

The Board, with the agreement of the Office of Management and Budget, has determined that this is not a significant regulatory action under Executive Order 12866; therefore, no regulatory impact analysis is required. There are no information collections associated with this rule.

List of Subjects in 20 CFR Part 220

Disability benefits, Railroad employees, Railroad retirement.

For the reasons set out in the preamble, Part 220 of Title 20 of the

Code of Federal Regulations is proposed to be amended as follows:

PART 220—DETERMINING DISABILITY

1. The authority for Part 220 continues to read as follows:

Authority: 45 U.S.C. 231a; 45 U.S.C. 231f.

2. Section 220.110 is amended by adding paragraphs (f) and (g) to read as follows:

§ 220.110 Listing of impairments in Appendix 1 of this part.

* * * * *

(f) *Symptoms as criteria of listed impairment(s).* Some listed impairment(s) include symptoms usually associated with those impairment(s) as criteria. Generally, when a symptom is one of the criteria in a listed impairment, it is only necessary that the symptom be present in combination with the other criteria. It is not necessary, unless the listing specifically states otherwise, to provide information about the intensity, persistence or limiting effects of the symptom as long as all other findings required by the specific listing are present.

(g) The Listing of Impairments found in Appendix 1 of this part is intended to be identical to the list promulgated by the Social Security Administration in Appendix 1 of Subpart P, 20 CFR Part 404. In addition to Appendix 1 of this part a claimant should also consult Appendix 1 of 20 CFR, Subpart P, Part 404.

§ 220.112 [Amended]

3. The penultimate sentence of § 220.112(a) is amended by removing the words "Except in cases of remarried widows, widowers, and surviving divorced spouses, the" and adding the word "The" to begin that sentence.

§ 220.114 [Amended]

4. Section 220.114 is revised to read as follows:

§ 220.114 Evaluation of symptoms, including pain.

(a) *General.* In determining whether the claimant is disabled, the Board considers all of the claimant's symptoms, including pain, and the extent to which the claimant's symptoms can reasonably be accepted as consistent with the objective medical evidence and other evidence. By objective medical evidence, the Board means medical signs and laboratory findings as defined in § 220.113 (b) and (c) of this part. By other evidence, the Board means the kinds of evidence described in §§ 220.45 and 220.46 of this part. These include statements or reports from the claimant, the claimant's treating or examining physician or psychologist, and others about the claimant's medical history, diagnosis, prescribed treatment, daily activities, efforts to work, and any other evidence showing how the claimant's impairment(s) and any related symptoms affect the claimant's ability to work. The Board will consider all of the claimant's statements about his or her symptoms, such as pain, and any description by the claimant, the claimant's physician or psychologist, or other persons about how the symptoms affect the claimant's activities of daily living and ability to work. However, statements about the claimant's pain or other symptoms will not alone establish that the claimant is disabled; there must be medical signs and laboratory findings which show that the claimant has a medical impairment(s) which could reasonably be expected to produce the pain or other symptoms alleged and which, when considered with all of the other evidence (including statements about the intensity and persistence of the claimant's pain or other symptoms which may reasonably be accepted as consistent with the medical signs and laboratory findings), would lead to a conclusion that the claimant is disabled. In evaluating the intensity and persistence of the claimant's symptoms, including pain, the Board will consider all of the available evidence, including the claimant's medical history, the medical signs and laboratory findings and statements about how the claimant's symptoms affect the claimant. (Section 220.112 of this part explains how the Board considers opinions of the claimant's treating source and other medical opinions on the existence and severity of the claimant's symptoms, such as pain.) The Board will then determine the extent to which the claimant's alleged functional limitations and restrictions due to pain or other symptoms can reasonably be accepted as consistent with the medical signs and laboratory findings and other evidence to decide how the claimant's symptoms affect the claimant's ability to work.

(b) *Need for medically determinable impairment that could reasonably be expected to produce symptoms, such as pain.* The claimant's symptoms, such as pain, fatigue, shortness of breath, weakness, or nervousness will not be found to affect the claimant's ability to do basic work activities unless medical signs or laboratory findings show that a medically determinable impairment(s) is present. Medical signs and laboratory findings, established by medically acceptable clinical or laboratory diagnostic techniques, must show the existence of a medical impairment(s) which results from anatomical, physiological, or psychological abnormalities and which could reasonably be expected to produce the pain or other symptoms alleged. The finding that the claimant's impairment(s) could reasonably be expected to produce the claimant's pain or other symptoms does not involve a determination as to the intensity, persistence, or functionally limiting effects of the claimant's symptoms. The Board will develop evidence regarding the possibility of a medically determinable mental impairment when the Board has information to suggest that such an impairment exists, and the claimant alleges pain or other symptoms but the medical signs and laboratory findings do not substantiate any physical impairment(s) capable of producing the pain or other symptoms.

(c) *Evaluating the intensity and persistence of symptoms, such as pain, and determining the extent to which the claimant's symptoms limit his or her capacity for work.* (1) *General.* When the medical signs or laboratory findings show that the claimant has a medically determinable impairment(s) that could reasonably be expected to produce the claimant's symptoms, such as pain, the Board must then evaluate the intensity and persistence of the claimant's symptoms so that it can determine how the claimant's symptoms limit the claimant's capacity for work. In evaluating the intensity and persistence of the claimant's symptoms the Board considers all of the available evidence including the claimant's medical history, the medical signs and laboratory findings, and statements from the claimant, the claimant's treating or examining physician or psychologist, or other persons about how the claimant's symptoms affect the claimant. The Board also considers the medical opinions of the claimant's treating source and other medical opinions as explained in § 220.112 of this part. Paragraphs (c)(2) through (c)(4) of this section explain further how the Board evaluates the intensity and persistence of the claimant's symptoms and how it determines the extent to which the claimant's symptoms limit the claimant's capacity for work, when the medical signs or laboratory findings show the claimant has a medically determinable impairment(s) that could reasonably be expected to produce the claimant's symptoms, such as pain.

(2) *Consideration of objective medical evidence.* Objective medical evidence is evidence obtained from the application

of medically acceptable clinical and laboratory diagnostic techniques, such as evidence of reduced joint motion, muscle spasm, sensory deficit or motor disruption. Objective medical evidence of this type is a useful indicator to assist the Board in making reasonable conclusions about the intensity and persistence of the claimant's symptoms and the effect those symptoms, such as pain, may have on the claimant's ability to work. The Board must always attempt to obtain objective medical evidence and, when it is obtained, will consider it in reaching a conclusion as to whether the claimant is disabled. However, the Board will not reject the claimant's statements about the intensity and persistence of the claimant's pain or other symptoms or about the effect the claimant's symptoms have on the claimant's ability to work solely because the available objective medical evidence does not substantiate the claimant's statements.

(3) *Consideration of other evidence.* Since symptoms sometimes suggest a greater severity of impairment than can be shown by objective medical evidence alone, the Board will carefully consider any other information the claimant may submit about his or her symptoms. The information that the claimant, the claimant's treating physician or psychologist, or other persons provide about the claimant's pain or other symptoms (e.g., what may precipitate or aggravate the claimant's symptoms, what medications, treatments or other methods he or she uses to alleviate them, and how the symptoms may affect his or her pattern of daily living) is also an important indicator of the intensity and persistence of the claimant's symptoms. Because symptoms, such as pain, are subjective and difficult to quantify, any symptom-related functional limitations and restrictions which the claimant, the claimant's treating or examining physician or psychologist, or other persons report, which can reasonably be accepted as consistent with the objective medical evidence and other evidence, will be taken into account as explained in paragraph (c)(4) of this section in reaching a conclusion as to whether the claimant is disabled. The Board will consider all of the evidence presented, including information about the claimant's prior work record, the claimant's statements about his or her symptoms, evidence submitted by the claimant's treating, examining or consulting physician or psychologist, and observations by Board employees and other persons. Section 220.112 of this part explains in detail how the Board considers and weighs treating source and other medical opinions about the nature and severity of the claimant's impairment(s) and any related symptoms, such as pain. Factors relevant to the claimant's symptoms, such as pain, which the Board will consider include:

(i) The claimant's daily activities;

(ii) The location, duration, frequency, and intensity of pain or other symptoms;

(iii) Precipitating and aggravating factors;

(iv) The type, dosage, effectiveness, and side effects of any medication the claimant takes or has taken to alleviate pain or other symptoms;

(v) Treatment, other than medication, the claimant receives or has received for relief of pain or other symptoms:

(vi) Any measures the claimant uses or has used to relieve pain or other symptoms (e.g., lying flat on the claimant's back, standing for 15 to 20 minutes every hour, sleeping on a board, etc.); and

(vii) Other factors concerning the claimant's functional limitations and restrictions due to pain or other symptoms.

(4) *How the Board determines the extent to which symptoms, such as pain, affect the claimant's capacity to perform basic work activities.* In determining the extent to which the claimant's symptoms, such as pain, affect the claimant's capacity to perform basic work activities, the Board considers all of the available evidence described in paragraphs (c)(1) through (c)(3) of this section. The Board will consider the claimant's statements about the intensity, persistence, and limiting effects of the claimant's symptoms, and the Board will evaluate the claimant's statements in relation to the objective medical evidence and other evidence, in reaching a conclusion as to whether the claimant is disabled. The Board will consider whether there are any inconsistencies in the evidence and the extent to which there are any conflicts between the claimant's statements and the rest of the evidence, including the claimant's medical history, the medical signs and laboratory findings and statements by the claimant's treating or examining physician or psychologist or other persons about how the claimant's symptoms affect the claimant. The claimant's symptoms, including pain, will be determined to diminish the claimant's capacity for basic work activities to the extent that the claimant's alleged functional limitations and restrictions due to symptoms, such as pain, can reasonably be accepted as consistent with the objective medical evidence and other evidence.

(d) *Consideration of symptoms in the disability determination process.* The Board follows a set order of steps to determine whether the claimant is disabled. If the claimant is not doing substantial gainful activity, the Board considers the claimant's symptoms, such as pain, to evaluate whether the claimant has a severe physical or mental impairment(s), and at each of the remaining steps in the process. Sections 220.100 and 220.101 of this part explain this process in detail. The Board also considers the claimant's symptoms, such as pain, at the appropriate steps in the Board's review when the Board considers whether the claimant's disability continues. Subpart O of this part explains the procedure the Board follows in reviewing whether the claimant's disability continues.

(1) *Need to establish a severe medically determinable impairment(s).* The claimant's symptoms, such as pain, fatigue, shortness of breath, weakness, or nervousness, are considered in making a determination as to whether the claimant's impairment or combination of impairment(s) is severe. (See § 220.100(b)(2) of this part.)

(2) *Decision whether the Listing of Impairments is met.* Some listed impairment(s) include symptoms, such as pain, as criteria. Section 220.110(f) of this part explains how the Board considers the claimant's symptoms when the claimant's symptoms are included as criteria for a listed impairment.

(3) *Decision whether the Listing of Impairments is equaled.* If the claimant's impairment is not the same as a listed impairment, the Board must determine whether the claimant's impairment(s) is medically equivalent to a listed impairment. Section 220.111 of this part explains how the Board makes this determination. Under § 220.111(b) of this part, the Board will consider equivalence based on medical evidence only. In considering whether the claimant's symptoms, signs, and laboratory findings are medically equal to the symptoms, signs, and laboratory findings of a listed impairment, the Board will look to see whether the claimant's symptoms, signs, and laboratory findings are at least equal in severity to the listed criteria. However, the Board will not substitute the claimant's allegations of pain or other symptoms for a missing or deficient sign or laboratory finding to raise the severity of the claimant's impairment(s) to that of a listed impairment. If the symptoms, signs, and laboratory findings of the claimant's impairment(s)

are equivalent in severity to those of a listed impairment, the Board will find the claimant disabled. If the Board determines the claimant's impairment(s) is not medically equivalent to a listed impairment, the Board will consider the impact of the claimant's symptoms on the claimant's residual functional capacity. (See paragraph (d)(4) of this section.)

(4) *Impact of symptoms (including pain) on residual functional capacity.* If the claimant has a medically determinable severe physical or mental impairment(s), but the claimant's impairment(s) does not meet or equal an impairment listed in Appendix 1 of this part, the Board will consider the impact of the claimant's impairment(s) and any related symptoms, including pain, on the claimant's residual functional capacity. (See § 220.120 of this part.)

§ 220.120 [Revised]

6. Section 220.120 is revised to read as follows:

§ 220.120 The claimant's residual functional capacity.

(a) *General.* The claimant's impairment(s) and any related symptoms, such as pain, may cause physical and mental limitations that affect what the claimant can do in a work setting. The claimant's residual functional capacity is what the claimant can still do despite the claimant's limitations. If the claimant has more than one impairment, the Board will consider all of the claimant's impairment(s) of which the Board is aware. The Board will consider the claimant's ability to meet certain demands of jobs, such as physical demands, mental demands, sensory requirements, and other functions, as described in paragraphs (b), (c), and (d) of this section. Residual functional capacity is an assessment based upon all of the relevant evidence. It may include descriptions (even the claimant's own) of limitations that go beyond the symptoms, such as pain, that are important in the diagnosis and treatment of the claimant's medical condition. Observations by the claimant's treating or examining physicians or psychologists, the claimant's family, neighbors, friends or other persons, of the claimant's limitations, in addition to those observations usually made during formal medical examinations, may also be used. These descriptions and observations, when used, must be considered along with the claimant's medical records to enable the Board to decide to what extent the claimant's impairment(s) keeps the claimant from performing particular work activities. This assessment of the claimant's remaining capacity for work is not a decision on whether the claimant is disabled, but is used as the basis for determining the particular types of work the claimant may be able to do despite the claimant's impairment(s). Then, using the guidelines in §§ 220.125 through 220.135 of this part, the claimant's vocational background is considered along with the claimant's residual functional capacity in arriving at a disability determination or decision. In deciding whether the claimant's disability continues or ends, the residual functional capacity assessment may also be used to determine whether any medical improvement the claimant has experienced is related to the claimant's ability to work as discussed in § 220.178 of this part.

(b) *Physical abilities.* When the Board assesses the claimant's physical abilities, the Board first assesses the nature and extent of the claimant's physical limitations and then determines the claimant's residual functional capacity for work activity on a regular and continuing basis. A limited ability to perform certain physical demands of work activity, such as sitting, standing, walking, lifting, carrying, pushing, pulling, or other physical functions (including manipulative or postural functions, such as reaching, handling, stooping or crouching), may reduce the claimant's ability to do past work and other work.

(c) *Mental abilities.* When the Board assesses the claimant's mental abilities, the Board first assesses the nature and extent of the claimant's mental limitations and restrictions and then determines the claimant's residual functional capacity for work activity on a regular and continuing basis. A limited ability to carry out certain mental activities, such as limitations in understanding, remembering, and carrying out instructions, and in responding appropriately to supervision, co-workers, and work pressures in a work setting, may reduce the claimant's ability to do past work and other work.

(d) *Other abilities affected by impairment(s).* Some medically determinable impairment(s), such as skin impairment(s), epilepsy, impairment(s) of vision, hearing or other senses, and impairment(s) which impose environmental restrictions may cause limitations and restrictions which affect other work-related abilities. If the claimant has this type of impairment(s), the Board considers any resulting limitations and restrictions which may reduce the claimant's ability to do past work and other work in deciding the claimant's residual functional capacity.

(e) *Total limiting effects.* When the claimant has a severe impairment(s), but the claimant's symptoms, signs, and laboratory findings do not meet or equal those of a listed impairment in Appendix 1 of this part, the Board will consider the limiting effects of all the claimant's impairment(s), even those that are not severe, in determining the claimant's residual functional capacity. Pain or other symptoms may cause a limitation of function beyond that which can be determined on the basis of the anatomical, physiological or psychological abnormalities considered alone; e.g., someone with a low back disorder may be fully capable of the physical demands consistent with those of sustained medium work activity, but another person with the same disorder, because of pain, may not be capable of more than the physical demands consistent with those of light work activity on a sustained basis. In assessing the total limiting effects of the claimant's impairment(s) and any related symptoms, the Board will consider all of the medical and nonmedical evidence, including the information described in § 220.114(c) of this part.

§ 220.134 [Amended]

7. Section 220.134 is amended by adding a new paragraph (d) to read as follows:

§ 220.134 Medical-Vocational Guidelines in Appendix 2 of this part.

* * * * *

(d) The medical-vocational guidelines found in Appendix 2 of this part are intended to be identical to those promulgated by the Social Security Administration in Appendix 2 of Subpart P, 20 CFR Part 404. In addition to Appendix 2 of this part a claimant shall also consult Appendix 2 of 20 CFR, Subpart P, Part 404.

8. A new § 220.135 is added to read as follows:

§ 220.135 Exertional and nonexertional limitations.

(a) *General.* The claimant's impairment(s) and related symptoms, such as pain, may cause limitations of function or restrictions which limit the claimant's ability to meet certain demands of jobs. These limitations may be exertional, nonexertional, or a combination of both. Limitations are classified as exertional if they affect the claimant's ability to meet the strength demands of jobs. The classification of a limitation as exertional is related to the United States Department of Labor's classification of jobs by various exertional levels (sedentary, light, medium, heavy, and very heavy) in terms of the strength demands for sitting, standing, walking, lifting, carrying, pushing, and pulling. Sections 220.132 and 220.134 of this part explain how the Board uses the classifications of jobs by exertional levels (strength demands) which are contained in the Dictionary of Occupational Titles published by the Department of Labor, to determine the exertional requirements of work which exists in the national economy. Limitations or restrictions which affect the claimant's ability to meet the demands of jobs other than the strength demands, that is, demands other than sitting, standing, walking, lifting, carrying, pushing or pulling, are considered nonexertional. Sections 220.100(b)(5) and 220.180(h) of this part explain that if the claimant can no longer do the claimant's past relevant work because of a severe medically determinable impairment(s), the Board must determine whether the claimant's impairment(s), when considered along with the claimant's age, education, and work experience, prevents the claimant from doing any other work which exists in the national economy in order to decide whether the claimant is disabled or continues to be disabled. Paragraphs (b), (c), and (d) of this section explain how the Board applies the medical-vocational guidelines in Appendix 2 of this part in making this determination, depending on whether the limitations or restrictions imposed by the claimant's impairment(s) and related symptoms, such as pain, are exertional, nonexertional, or a combination of both.

(b) *Exertional limitations.* When the limitations and restrictions imposed by the claimant's impairment(s) and related symptoms, such as pain, affect only the claimant's ability to meet the strength demands of jobs (sitting, standing, walking, lifting, carrying, pushing, and pulling), the Board considers that the claimant has only exertional limitations. When the claimant's impairment(s) and related symptoms only impose exertional limitations and the claimant's specific vocational profile is listed in a rule contained in Appendix 2 of this part, the Board will directly apply that rule to decide whether the claimant is disabled.

(c) *Nonexertional limitations.* (1) When the limitations and restrictions imposed by the claimant's impairment(s) and related symptoms, such as pain, affect only the claimant's ability to meet the demands of jobs other than strength demands, the Board considers that the claimant has only nonexertional limitations or restrictions. Some examples of nonexertional limitations or restrictions include the following:

(i) Difficulty functioning because of nervousness, anxiety, or depression;

(ii) Difficulty maintaining attention or concentrating;

(iii) Difficulty understanding or remembering detailed instructions;

(iv) Difficulty in seeing or hearing;

(v) Difficulty in tolerating some physical feature(s) of certain work settings, e.g., inability to tolerate dust or fumes; or

(vi) Difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching.

(2) If the claimant's impairment(s) and related symptoms, such as pain, only affect the claimant's ability to perform the nonexertional aspects of work-related activities, the rules in Appendix 2 of this part do not direct factual conclusions of disabled or not disabled. The determination as to whether disability exists will be based on the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2 of this part.

(d) *Combined exertional and nonexertional limitations.* When the limitations and restrictions imposed by the claimant's impairment(s) and related symptoms, such as pain, affect the claimant's ability to meet both the strength demands and demands of jobs other than the strength demands, the Board considers that the claimant has a combination of exertional and nonexertional limitations or restrictions. If the claimant's impairment(s) and related symptoms, such as pain, affect the claimant's ability to meet both the strength demands and demands of jobs other than the strength demands the Board will not directly apply the rules in Appendix 2 of this part unless there is a rule that directs a conclusion that the claimant is disabled based upon the claimant's strength limitations; otherwise the rules provide a framework to guide the Board's decision.

Appendix 2 [Amended]

9. Appendix 2—Medical-Vocational Guidelines of part 220 is amended by revising paragraph (c) of section 200.00 to read as follows:

§ 200.00 Introduction. * * *

* * * * *

(c) In the application of the rules, the individual's residual functional capacity (i.e., the maximum degree to which the individual retains the capacity for sustained performance of the physical-mental requirements of jobs), age, education, and work experience must first be determined. When assessing the person's residual functional capacity, the Board considers his or her symptoms (such as pain), signs, and laboratory findings together with other evidence the Board obtains.

* * * * *

Dated: August 29, 1995.

By Authority of the Board.

Beatrice Ezerski,

Secretary to the Board.

BILLING CODE 7905-01-P

SOCIAL SECURITY ADMINISTRATION

20 CFR Parts 404 and 416

RIN 0960–AD39

Payment for Vocational Rehabilitation Services Furnished Individuals During Certain Months of Nonpayment of Supplemental Security Income Benefits

AGENCY: Social Security Administration (SSA).

ACTION: Proposed rules.

SUMMARY: We are proposing to amend our regulations relating to payment for vocational rehabilitation (VR) services provided to recipients of supplemental security income (SSI) benefit payments based on disability or blindness under title XVI of the Social Security Act (the Act). These regulations reflect section 5037 of the Omnibus Budget Reconciliation Act of 1990 (OBRA 1990). Section 5037 of OBRA 1990 added section 1615(e) to the Act which authorizes the Commissioner of Social Security (the Commissioner) to pay a State VR agency for costs incurred in furnishing VR services to an individual during certain months for which the individual did not receive SSI payments based on disability or blindness as well as during months for which the individual did receive such payments. We also propose to amend our regulations on VR payments to clarify certain rules and remove some outdated rules.

DATES: Your comments will be considered if we receive them no later than November 13, 1995.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, P.O. Box 1585, Baltimore, MD 21235; sent by telefax to (410) 966–2830; sent by E-mail to "regulations@ssa.gov;" or delivered to the Division of Regulations and Rulings, Social Security Administration, 3–B–1 Operations Building, 6401 Security Boulevard, Baltimore, MD

21235 between 8 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Jack Schanberger, Legal Assistant, 3–B–1 Operations Building, 6401 Security Boulevard, Baltimore, MD 21235 (410) 965–8471.

SUPPLEMENTARY INFORMATION: We are proposing to amend our regulations on payment for VR services provided to individuals receiving SSI benefits based on disability or blindness. These amended regulations will reflect section 5037 of OBRA 1990, Public Law 101–508, which added paragraph (e) to section 1615 of the Act. Our existing regulations concerning payment for such services carry out the provisions of section 1615(d) of the Act.

In general, section 1615(d) of the Act authorizes the Commissioner to reimburse a State VR agency for the costs incurred in providing VR services to individuals receiving SSI benefits under title XVI of the Act based on disability or blindness in three categories of cases. Specifically, section 1615(d) permits payment for VR services furnished to such individuals only in cases where: (1) The furnishing of such services results in the individual's performance of substantial gainful activity (SGA) for a continuous period of nine months; (2) the individual is continuing to receive benefits, despite his or her medical recovery, under section 1631(a)(6) of the Act because of his or her participation in a VR program; or (3) the individual, without good cause, refuses to continue to accept VR services or fails to cooperate in such a manner as to preclude his or her successful rehabilitation. (In such a case of refusal to continue or cooperate in a VR program, payments are authorized only for the VR services provided prior to the cessation of VR participation. If the individual resumes participation, then payments are authorized for the VR services provided after participation is resumed only if all requirements for payment are met. These cases are described in sections 1615(d)(1), (2) and (3) of the Act, respectively, and in §§ 416.2211–416.2213 of our regulations.)

Under section 1615(d) of the Act, payment may be made for VR services furnished by a State VR agency, i.e., an agency administering a State plan for VR services approved under title I of the Rehabilitation Act of 1973, as amended. However, in the case of a State which is unwilling to participate or does not have such a plan for VR services, our regulation at 20 CFR 416.2204 provides that we may arrange for VR services for an SSI recipient who is disabled or blind through an alternative VR service provider (alternate participant) and pay such provider for the costs of services under the same terms and conditions that apply to State VR agencies. This regulation is based in part on section 222(d)(2) of the Act, which provides for the use of alternate participants in the VR payment program under title II of the Act (relating to the rehabilitation of social security disability beneficiaries), and on the authority provided to the Commissioner under section 1633(a) of the Act to make such administrative and other arrangements as may be necessary or appropriate to carry out title XVI of the Act, including making arrangements under title XVI in the same manner as they are made under title II.

Prior to the enactment of OBRA 1990, SSA was authorized to pay a State VR agency under section 1615(d) of the Act only for VR services that were provided to an individual during months for which the individual received SSI benefits based on disability or blindness, including benefits payable under section 1611 or 1619(a) of the Act or, for cases under section 1615(d)(2), discussed above, continued payment of such benefits under section 1631(a)(6) of the Act. This is reflected in our existing regulations at §§ 416.2201, 416.2203 and 416.2215(a)(2).

Section 5037 of OBRA 1990 added section 1615(e) to the Act to provide us the authority to pay a State VR agency under section 1615(d) for the costs described in that section that are incurred in providing VR services to an individual during certain months for which the individual was not receiving SSI benefits based on disability or blindness as well as during months for which the individual was receiving such benefits. Under section 1615(e) of the Act, payment may be made for VR services in a case described in section 1615(d)(1), (2) or (3) of the Act which are provided to an individual in a month for which the individual receives, i.e., is eligible for—

- SSI cash benefits under section 1611 or special SSI cash benefits under section 1619(a) of the Act (this is the same as under prior law);
- A special status for medicaid under section 1619(b) of the Act; or
- A federally administered State supplementary payment under section 1616 of the Act or section 212(b) of Public Law 93–66.

In addition, section 1615(e) of the Act permits payment for VR services provided in a month for which an individual was ineligible for the benefits or special status described above for a reason other than cessation of disability or blindness, if such month occurred prior to the 13th consecutive month of such ineligibility following a month for which the individual was eligible for such benefits or special status. This means that payment may be made for VR services furnished during a month for which an individual's benefit payment or special status for Medicaid under section 1619(b) was suspended.

Section 1615(e) of the Act became effective November 5, 1990, the date of the enactment of OBRA 1990, and applies to claims for reimbursement pending on or after that date. This amendment to the Act, which allows us to reimburse a State VR agency or alternate participant for VR services furnished during certain months for which an individual was not receiving SSI benefits, responds to a recommendation in the March 1988 Report of the Disability Advisory Council that the Congress amend the Act to permit SSA to pay for VR services provided in months when an individual is in suspension status.

Proposed Changes to the VR Payment Regulations

The proposed rules will amend the existing regulations concerning the SSI VR payment program under title XVI of the Act to take account of the provisions of section 1615(e) of the Act which permit payment for VR services furnished during certain months for which a disabled or blind individual does not receive SSI benefits. The proposed rules also will make some other changes in the existing VR payment regulations to clarify certain rules and delete some obsolete rules. These changes affect the regulations governing the social security VR payment program under title II of the Act as well as the regulations concerning the SSI VR payment program under title XVI. The existing social security VR payment regulations carry out section 222(d) of the Act which contains provisions that are similar to the provisions of section 1615(d) of the Act, except that they apply to payment for VR services provided to individuals entitled to social security benefits based on disability under title II.

Changes to the Regulations to Implement Section 1615(e) of the Act

We are proposing to amend § 416.2201 to explain that, in general, sections 1615(d) and (e) of the Act authorize payment for costs of VR services provided to certain disabled or blind individuals who are eligible for SSI benefits, special SSI eligibility status, or federally administered State supplementary payments. In the proposed amendment to § 416.2201, we also explain that for the purpose of the SSI VR payment regulations, we refer to SSI benefits, special SSI eligibility status, or federally administered State supplementary payments as "disability or blindness benefits." Additionally, we also propose to add a corresponding definition of "disability or blindness benefits" for this purpose in § 416.2203, discussed below.

The proposed amendment to § 416.2201 further explains that, subject to the other requirements and conditions for payment prescribed in the regulations, payment may be made for VR services which are furnished during a month(s) for which an individual is eligible for disability or blindness benefits or continues to receive such benefits under section 1631(a)(6) of the Act, or which are furnished during a month(s) for which the individual's disability or blindness benefits are suspended. This rule also is reflected in proposed § 416.2215, discussed below.

In § 416.2203, "*Definitions,*" we propose to delete the paragraph defining "eligible," which discusses eligibility for SSI benefits only, and add a new paragraph to explain the meaning of "disability or blindness benefits" when used in the SSI VR payment regulations. The proposed rules provide that "disability or blindness benefits," as defined for the SSI VR payment regulations only, refer to regular SSI benefits under section 1611 of the Act, special SSI cash benefits under section 1619(a) of the Act, special SSI eligibility status under section 1619(b) of the Act, and/or a federally administered State supplementary payment under section 1616 of the Act or section 212(b) of Public Law 93–66, for which an individual is eligible based on disability or blindness, as appropriate. Thus, in the proposed VR payment regulations, when we use the terms "disability or blindness benefits" with reference to the SSI program, we mean the benefits, status, or payments referred to in section 1615(e) of the Act. As used in this preamble, "disability or blindness benefits" has the same meaning as in the proposed rules. Further, in § 416.2203, we propose to define the phrase "special SSI eligibility status" to refer to the special status for Medicaid under section 1619(b) of the Act since this is the phrase we use to describe the special status in our other SSI regulations, e.g., §§ 416.260 and 416.264.

We also propose to amend several sections of the SSI VR payment regulations to replace phrases such as "disability or blindness payment" with the phrase "disability or blindness benefits," and to substitute the term "benefits" for "payment" or "payments," as the context requires. We are making these changes to §§ 416.2201(b), 416.2209(b) and (c), 416.2212, 416.2213(c), 416.2215(a) and (b), and 416.2216(c)(2).

Section 416.2215(a) of our existing regulations provides that in order for the State VR agency or alternate participant to be paid, the VR services must have been provided—(1) after September 30, 1981; (2) during months the individual is eligible for SSI disability or blindness payments; and (3) before completion of a continuous 9-month period of SGA. We propose to revise paragraph (a)(2) of § 416.2215 to provide that to be payable, the VR services must have been provided during a month or months for which—(i) the individual is eligible for disability or blindness benefits or continues to receive such benefits under section 1631(a)(6) of the Act; or (ii) the disability or blindness benefits of the individual are suspended due to his or her ineligibility for the benefits. We also propose to revise paragraph (a)(3) of § 416.2215 to provide that the VR services must have been provided prior to the completion of a continuous 9-month period of SGA or termination of disability or blindness benefits, whichever occurs first.

The proposed changes to § 416.2215 (a)(2) and (a)(3) provide cross-references to the regulations in Subpart M of 20 CFR Part 416 which contain our rules on suspension and termination of benefits under the SSI program. In general, these regulations provide that unless a termination of an individual's eligibility for benefits is required, an individual's benefits will be suspended for any month for which the individual no longer meets the requirements for eligibility for benefits under the SSI program. Termination of eligibility is required when benefits have been suspended for a period of 12 consecutive months, i.e., the individual remains ineligible for SSI benefits, special status for medicaid, and/or federally administered State supplementary payments for a continuous 12-month period. Eligibility for SSI benefits based on disability or blindness also terminates if the individual's disability or blindness ceases, unless the individual is participating in an approved VR program and the other requirements for the continuation of benefits under section 1631(a)(6) of the Act are met.

The proposed changes we are making to § 416.2215 (a)(2) and (a)(3) are consistent with the provisions of sections 1615 (d) and (e) of the Act. They permit payment for VR services which are provided either during a month(s) for which an individual is eligible for disability or blindness benefits, including the continuation of such benefits under section 1631(a)(6) of the Act, or during a month(s) for which the individual is ineligible for disability or blindness benefits, for a reason other than cessation of disability or blindness, if such month(s) occurs prior to the 13th consecutive month of such ineligibility, i.e., a month(s) for which benefits are suspended but not terminated.

We also propose to amend the introductory paragraph of § 416.2217 to add a reference to section 1615(e) of the Act. In addition, we are proposing to make a change to the regulations governing the social security VR payment program under title II of the Act to reflect the expanded scope of the SSI VR payment program under title XVI resulting from section 1615(e) of the Act. We are proposing to amend § 404.2115(b) of the title II regulations to explain that if VR services are provided to an individual who is entitled to title II disability benefits and who also is or has been receiving disability or blindness benefits under the SSI program, the determination as to when VR services must have been provided may be made under either § 404.2115 or § 416.2215, whichever is advantageous to the State VR agency or alternate participant that is participating in both VR programs.

Other Changes to the VR Payment Regulations

In addition to the changes to the regulations discussed above, we are proposing to amend the social security and SSI VR payment regulations to clarify certain rules relating to payment for VR services provided to an individual in a case where the individual, without good cause, refuses to continue or cooperate in a VR program. We also propose to delete some obsolete rules relating to the time periods within which claims for payment for VR services must be filed. We are making a few other nonsubstantive changes to certain provisions of the regulations affected by the proposed changes described above.

We are proposing to amend §§ 404.2113(c) and 416.2213(c) to indicate that if deductions are imposed against an individual's social security disability benefits because of VR refusal, or if an individual's disability or blindness benefits under the SSI program are suspended because of VR refusal, the services for which payment may be made in such a case are those VR services which were provided to the individual prior to his or her VR refusal. If the individual thereafter resumes participation in a VR program and again receives VR services, payment may be made for those services only if the criteria for payment in § 404.2113 or § 416.2213 are again met, or if the services qualify for payment under one of the other provisions of the regulations permitting payment, i.e., §§ 404.2111, 404.2112, 416.2211, or 416.2212.

We also are proposing to delete the parenthetical phrase "(suspension of benefits in cases described in § 404.2113)" in existing § 404.2115(a)(3). This change is appropriate since under section 222(b) of the Act and § 404.422 of the title II regulations, a determination by us that a social security disability beneficiary has refused, without good cause, to accept VR services available to the individual results in our imposing deductions against social security benefits, rather than suspending benefits. This is reflected in existing §§ 404.2109(c) and 404.2113(c). To be consistent with these sections, we are making a change to § 404.2116(c)(2) to clarify that a beneficiary's VR refusal results in deductions against social security disability benefits, rather than a suspension of benefits.

Existing §§ 404.2116 (b)(2) and (c)(2) and 416.2216 (b)(2) and (c)(2) contain provisions which provide for the filing of claims for payment for VR services in certain cases within 12 months after the month of the initial publication of these sections in the **Federal Register**, 55 FR 8449 (March 8, 1990). This 12-month period ended March 31, 1991, the close of the 12th month following the month of publication in the **Federal Register**. Since this time period for filing a claim is no longer in effect, we are proposing to delete these provisions from the regulations.

We also are proposing to amend §§ 404.2116(c)(2) and 416.2216(c)(2) to clarify that the other 12-month period described in these sections for filing a claim for payment in the case of an individual's VR refusal begins after the first month for which deductions are imposed against social security disability benefits, or after the first month for which disability or blindness benefits under the SSI program are suspended, because of such VR refusal.

Electronic Versions

The electronic file of this document is available on the Federal Bulletin Board (FBB) at 9 on the date of publication in the **Federal Register**. To download the file, modem dial (202) 512–1387. The FBB instructions will explain how to download the file and the fee. This file is in Wordperfect and will remain on the FBB during the comment period.

Regulatory Procedures

Executive Order 12866

We have consulted with the Office of Management and Budget (OMB) and determined that these rules do not meet the criteria for a significant regulatory action under Executive Order 12866. Thus, they were not subject to OMB review.

Regulatory Flexibility Act

We certify that these regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis as provided in Public Law 96–354, the Regulatory Flexibility Act, is not required.

These proposed regulations carry out section 1615(e) of the Act which allows payment for VR services under section 1615(d) of the Act provided during certain months for which an individual does not receive SSI benefits based on disability or blindness. They apply to States and certain alternate providers of VR services which are willing to provide services to disabled or blind SSI recipients, or social security disability beneficiaries, under our VR payment programs under the conditions specified in the regulations.

Paperwork Reduction Act

These proposed regulations impose no additional reporting or recordkeeping requirements subject to clearance by OMB.

Dated: August 23, 1995.

Shirley Chater,

Commissioner of Social Security.

For the reasons set out in the preamble, we propose to amend subpart V of part 404 and subpart V of part 416 of 20 CFR chapter III as follows:

PART 404—FEDERAL OLD–AGE, SURVIVORS AND DISABILITY INSURANCE (1950–)

Subpart V—[Amended]

1. The authority citation for Subpart V of Part 404 is revised to read as follows:

Authority: Secs. 205(a), 222, and 702(a)(5) of the Social Security Act; (42 U.S.C. 405(a), 422, and 902(a)(5)).

2. Section 404.2113 is amended by revising the last sentence of paragraph (c) to read as follows:

§ 404.2113 Payment for VR services in a case of VR refusal.

* * * * *

(c) * * * A State VR agency or alternate participant may be paid, subject to the provisions of this subpart, for the costs of VR services provided to an individual prior to his or her VR refusal if deductions have been imposed against the individual's monthly disability benefits for a month(s) after October 1984 because of such VR refusal.

3. Section 404.2115 is amended by revising paragraphs (a)(3) and (b) to read as follows:

§ 404.2115 When services must have been provided.

(a) * * *

(3) Before completion of a continuous 9-month period of SGA or termination of entitlement to disability benefits, whichever occurs first.

(b) If an individual who is entitled to disability benefits under this part also is or has been receiving disability or blindness benefits under part 416 of this chapter, the determination as to when services must have been provided may be made under this section or § 416.2215 of this chapter, whichever is advantageous to the State VR agency or alternate participant that is participating in both VR programs.

4. Section 404.2116 is amended by revising paragraphs (b)(2) and (c)(2) to read as follows:

§ 404.2116 When claims for payment for VR services must be made (filing deadlines).

* * * * *

(b) * * *

(2) If no written notice was sent to the State VR agency or alternate participant,

a claim must be filed within 12 months after the month in which VR services end.

(c) * * *

(2) If no written notice was sent to the State VR agency or alternate participant, a claim must be filed within 12 months after the first month for which deductions are imposed against disability benefits because of such VR refusal.

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Subpart V—[Amended]

1. The authority citation for subpart V of part 416 is revised to read as follows:

Authority: Secs. 702(a)(5), 1615, 1631(d)(1) and (e), and 1633(a) of the Social Security Act; (42 U.S.C. 902(a)(5), 1382d, 1383(d)(1) and (e), and 1383b(a)).

2. Section 416.2201 is amended by revising the introductory text of this section and revising paragraph (b) to read as follows:

§ 416.2201 General.

In general, sections 1615 (d) and (e) of the Social Security Act (the Act) authorize payment from the general fund for the reasonable and necessary costs of vocational rehabilitation (VR) services provided certain disabled or blind individuals who are eligible for supplemental security income (SSI) benefits, special SSI eligibility status, or federally administered State supplementary payments. In this subpart, such benefits, status, or payments are referred to as disability or blindness benefits (see § 416.2203). Subject to the provisions of this subpart, payment may be made for VR services provided an individual during a month(s) for which the individual is eligible for disability or blindness benefits, including the continuation of such benefits under section 1631(a)(6) of the Act, or for which the individual's disability or blindness benefits are suspended (see § 416.2215). Paragraphs (a), (b) and(c) of this section describe the cases in which the State VR agencies and alternate participants can be paid for the VR services provided such an individual under this subpart. The purpose of sections 1615 (d) and (e) of the Act is to make VR services more readily available to disabled or blind individuals, help State VR agencies and alternate participants to recover some of their costs in VR refusal situations, as described in § 416.2213, and ensure that savings accrue to the general fund. Payment will be made for VR services provided on behalf of such an individual in cases where—

* * * * *

(b) The individual continues to receive disability or blindness benefits, even though his or her disability or blindness has ceased, under section 1631(a)(6) of the Act because of his or her continued participation in an approved VR program which we have determined will increase the likelihood that he or she will not return to the disability or blindness rolls (see § 416.2212); or

* * * * *

3. Section 416.2203 is amended by removing the definition of "Eligible" and adding 2 new definitions in alphabetical order to read as follows:

§ 416.2203 Definitions.

* * * * *

Disability or blindness benefits, as defined for this subpart only, refers to regular SSI benefits under section 1611 of the Act (see § 416.202), special SSI cash benefits under section 1619(a) of the Act (see § 416.261), special SSI eligibility status under section 1619(b) of the Act (see § 416.264), and/or a federally administered State supplementary payment under section 1616 of the Act or section 212(b) of Public Law 93–66 (see § 416.2001), for which an individual is eligible based on disability or blindness, as appropriate.

* * * * *

Special SSI eligibility status refers to the special status described in §§ 416.264 through 416.269 relating to eligibility for medicaid.

4. Section 416.2209 is amended in paragraph (b) by removing "payments" and adding "benefits" in its place and in paragraph (c) by removing "payment" and adding "benefits" in its place.

5. Section 416.2212 is amended by revising the section heading and revising the first and second sentences to read as follows:

§ 416.2212 Payment for VR services in a case where an individual continues to receive disability or blindness benefits based on participation in an approved VR program.

Section 1631(a)(6) of the Act contains the criteria we will use in determining if an individual whose disability or blindness has ceased should continue to receive disability or blindness benefits because of his or her continued participation in an approved VR program. A VR agency or alternate participant can be paid for the cost of VR services provided to an individual if the individual was receiving benefits based on this provision in a month(s) after October 1984 or, in the case of a blindness recipient, in a month(s) after March 1988. * * *

6. Section 416.2213 is amended by revising the last sentence of paragraph (c) to read as follows:

§ 416.2213 Payment for VR services in a case of VR refusal.

* * * * *

(c) * * * A State VR agency or alternate participant may be paid, subject to the provisions of this subpart, for the costs of VR services provided to an individual prior to his or her VR refusal if the individual's disability or blindness benefits have been suspended for a month(s) after October 1984 because of such VR refusal.

7. Section 416.2215 is revised to read as follows:

§ 416.2215 When services must have been provided.

(a) In order for the VR agency or alternate participant to be paid, the services must have been provided—

(1) After September 30, 1981;

(2) During a month(s) for which—

(i) The individual is eligible for disability or blindness benefits or continues to receive such benefits under section 1631(a)(6) of the Act (see § 416.2212); or

(ii) The disability or blindness benefits of the individual are suspended due to his or her ineligibility for the benefits (see subpart M of this part concerning suspension for ineligibility); and

(3) Before completion of a continuous 9-month period of SGA or termination of disability or blindness benefits, whichever occurs first (see subpart M of this part concerning termination of benefits).

(b) If an individual who is receiving disability or blindness benefits under this part, or whose benefits under this part are suspended, also is entitled to disability benefits under part 404 of this chapter, the determination as to when services must have been provided may be made under this section or § 404.2115, whichever is advantageous to the State VR agency or alternate participant that is participating in both VR programs.

8. Section 416.2216 is amended by revising paragraphs (b)(2) and (c)(2) to read as follows:

§ 416.2216 When claims for payment for VR services must be made (filing deadlines).

* * * * *

(b) * * *

(2) If no written notice was sent to the State VR agency or alternate participant, a claim must be filed within 12 months

after the month in which VR services end.

(c) * * *

(2) If no written notice was sent to the State VR agency or alternate participant, a claim must be filed within 12 months after the first month for which disability or blindness benefits are suspended because of such VR refusal.

9. Section 416.2217 is amended in the introductory text of the section by adding "and (e)" after "section 1615(d)."

BILLING CODE 4190–29–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Ch. 1

Meeting of the Indian Self-Determination Negotiated Rulemaking Committee

AGENCY: Bureau of Indian Affairs, Interior, Indian Health Service, HHS.

ACTION: Notice of meeting.

SUMMARY: The Secretary of the Interior (DOI) and the Secretary of Health and Human Services (DHHS) have established an Indian Self-Determination Negotiated Rulemaking Committee (Committee) to negotiate and develop a proposed rule implementing the Indian Self-Determination and Education Assistance Act (ISDEAA), as amended.

The Department have determined that the establishment of this committee is in the public interest and will assist the agencies in developing regulations authorized under section 107 of the ISDEAA. The agenda planned for the week includes meetings of work groups as well as the full committee. Work groups will be finalizing draft regulatory language and recommending adoption by the full committee. The full committee will review and give approval of such language for publication in the **Federal Register**, as a Notice of Proposed Rulemaking (NPRM). This will be the final meeting of the committee prior to publication of the NPRM.

DATES: The committee and appropriate workgroups will meet on the following days, beginning at approximately 8:30 a.m. and ending at approximately 5 p.m. on each day: Tuesday, September 26; Wednesday, September 27; and Thursday, September 28, 1995.

ADDRESSES: All meetings September 26 through September 28, 1995, will be held at the Doubletree Inn (previously Ramada Inn), 7801 Leesburg Pike, Falls Church, Virginia 22043, telephone (703) 893–1340.

Written statements may be submitted to Mr. James J. Thomas, Chief, Division of Self-Determination Services, Bureau of Indian Affairs, 1849 C Street, NW, MS: 4627–MIB, Washington, DC 20420, telephone (202) 208–3708.

FOR FURTHER INFORMATION CONTACT: Mr. James J. Thomas, Chief, Division of Self-Determination Services, Bureau of Indian Affairs, 1849 C Street NW., MS: 4627–MIB, Washington, DC 20240, telephone (202) 208–3708.

Mrs. Merry Elrod, Acting Director, Division of Self-Determination, Indian Health Service, 5600 Fishers Lane, Parklawn Building, Room 6A–05, Rockville, MD, 20857, telephone (301) 443–1044.

SUPPLEMENTARY INFORMATION: The location and dates of future meetings will be published in the **Federal Register**. The meetings will be open to the public without advance registration.

Public attendance may be limited to the space available. Members of the public may make statements during the meeting, to the extent that time permits, and file written statements with the committee for its consideration. Written statements should be submitted to the addresses listed above. Summaries of committee meetings will be available for public inspection and copying ten days following each meeting at the same addresses. In addition, the materials received during the input sessions are available for inspection and copying at the same addresses.

Dated: September 5, 1995.

Ada E. Deer,

Assistant Secretary—Indian Affairs.

[FR Doc. 95–22552 Filed 9–8–95; 8:45 am]

BILLING CODE 4310–02–M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1952

U.S. Virgin Islands State Plan for Occupational Safety and Health

AGENCY: Occupational Safety and Health Administration (OSHA), U.S. Department of Labor.

ACTION: U.S. Virgin Islands state plan: Notice of reconsideration of 18(e) determination; proposed reassumption of concurrent Federal enforcement authority; request for written comments; notice of opportunity to request informal public hearing.

SUMMARY: The U.S. Virgin Islands operates a state occupational safety and health program or "state plan" which is federally approved under section 18 of the Occupational Safety and Health Act. In 1984, the Occupational Safety and Health Administration made a "final approval" determination under section 18(e) of the Act which in effect gave exclusive regulatory authority over all safety and health issues covered by the state plan to the Virgin Islands Department of Labor. (The Virgin Islands State Plan is limited in coverage to safety issues, in the private sector.) The most recent Federal monitoring of the state plan indicates that state plan enforcement has ceased to be "at least as effective as" that provided under OSHA and that other 18(e) requirements are no longer being met. In response to that finding, the Virgin Islands Commissioner of Labor has agreed to voluntarily relinquish the State's final approval status, has requested the reassertion of concurrent Federal enforcement jurisdiction, and has pledged to accomplish the necessary corrective action. As a result, the affirmative 18(e) determination is under reconsideration by the Assistant Secretary of Labor for Occupational Safety and Health, (the "Assistant Secretary") pursuant to procedures set forth in 29 CFR 1902.47 *et seq.* Reconsideration and subsequent revocation/suspension of the 18(e) determination will result in reinstatement of concurrent enforcement authority by Federal OSHA over occupational safety issues in the U.S. Virgin Islands pending State corrective action. This notice affords an opportunity for the public to submit written information, views and comments on the proposed reconsideration. A similar notice will be published by the Virgin Islands within the next 10 days.

OSHA is soliciting written comment from interested persons in its reconsideration of the U.S. Virgin Islands State Plan's affirmative 18(e) determination to assure that all relevant information, views, data and arguments are available to the Assistant Secretary during this proceeding. Members of the public may also submit requests for an informal hearing; if the Assistant Secretary determines that substantial issues are presented which a hearing would likely resolve, an informal hearing will be scheduled in accordance with 29 CFR 1902.49(c).

DATES: Comments and requests for an informal hearing must be received by October 16, 1995.

ADDRESSES: Written comments and requests for an informal hearing must be submitted in quadruplicate to the Docket Office. Telefaxes will be accepted, however, a hard copy original with three (3) copies must also be submitted. All comments and requests must be submitted to Docket No. T–030, U.S. Department of Labor, room N2625, 200 Constitution Avenue NW., Washington, DC 20210 (202) 219–7894. Written comments, and requests for an informal hearing will be made available for public inspection and copying in the Docket Office, Room n2625 at the previously mentioned address, between the hours of 8:15 a.m. and 4:45 p.m.

Copies of the applicable evaluation reports and the State's letters and Corrective Action Plan may be inspected and copied during normal business hours at the OSHA Technical Data Center (TDC), Room N2625, 200 Constitution Avenue NW., Washington, DC; the approved plan may be inspected and copied during normal business hours at the OSHA Office of State Programs (OSP), Room N3700, 200 Constitution Avenue NW., Washington, DC; copies of the approved plan, the applicable evaluation reports and the State's letters and Corrective Action Plan may be inspected and copied during normal business hours at the Office of the Regional Administrator, Occupational Safety and Health Administration, 201 Varick Street, Room 670, New York, New York 10014; Puerto Rico Area Office, Occupational Safety and Health Administration, U.S. Courthouse & FOB, Carlos Chardon Avenue, Room 555, Hato Rey, Puerto Rico 00918, and the Virgin Islands Department of Labor, Occupational Safety and Health Division, 3012 Golden Rock, Christiansted, St. Croix, Virgin Islands 00820.

FOR FURTHER INFORMATION CONTACT: Anne Cyr, Acting Director, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N3637, 200 Constitution Avenue NW., Washington, DC 20210, Telephone (202) 219–8148.

SUPPLEMENTARY INFORMATION:

Background

Section 18 of the Occupational Safety and Health Act of 1970 (the Act) provides that States which desire to assume responsibility for the development and enforcement of occupational safety and health standards may do so by submitting, and obtaining Federal approval of, a State plan. Section 3(7) of the Act makes several U.S. territories and possessions including the U.S. Virgin Islands eligible to submit State plans under section 18. Procedures for State plan submission and approval are set forth in regulations at 29 CFR Part 1902. If the Assistant Secretary, applying the criteria set forth in Section 18(c) of the Act and 29 CFR 1902.3 and 1902.4, finds that the plan provides or will provide for State standards and enforcement which are "at least as effective as" Federal standards and enforcement, "initial approval" is granted. A State may commence operations under its plan after this determination is made, but the Assistant Secretary retains discretionary Federal enforcement authority during the initial-approval period as provided by Section 18(e) of the Act.

The Virgin Islands state plan received initial federal OSHA plan approval on September 11, 1973, 38 FR 16775. A description of the plan and a basic chronology of its submission and federal approval is codified in the Code of Federal Regulations at 29 CFR Part 1952, Subpart S. The Virgin Islands Department of Labor, Division of Occupational Safety and Health (VIDOSH) was designated as the state agency with responsibility for administering the state plan, and operations under the plan commenced at the time of initial plan approval in 1973. The Virgin Islands state plan covers all issues of occupational safety in workplaces located within the Virgin Islands. Although in the public sector the state plan covers occupational health as well as safety, in the private sector the state plan does not exercise enforcement authority over occupational health issues; enforcement of health standards and other health-related requirements in the Virgin Islands private sector is provided by the U.S. Department of Labor.

During the 1970's the Virgin Islands plan proceeded through the various stages of federal approval, and after certification of completion of all required developmental steps in 1981 (29 CFR 1952.252; 46 FR 46808, 09–22–81), Federal OSHA began to evaluate the program for final approval under section 18(e) of the Act in accordance with procedures at 29 CFR 1902.30 *et seq.*, to determine, on the basis of actual operations under the plan, whether the criteria for final approval were being satisfied. An 18(e) or "final approval" determination results in the relinquishment of Federal concurrent enforcement authority in the State with respect to occupational safety and/or health issues covered by the plan, 29 U.S.C. 667(e).

Based on OSHA's evaluation of operations under the plan, and after opportunity for public comment the Assistant Secretary determined that in actual operations, the Virgin Islands State plan was "at least as effective as" the Federal program in providing safe and healthful employment and places of employment, and met all other criteria for final State plan approval under Section 18(e) of the Act and implementing regulations at 29 CFR Part 1902 including compliance staffing consistent with benchmarks established pursuant to *AFL–CIO* v. *Marshall* 570 F.2d 1030 (D.C. Cir. 1978). Accordingly, the Virgin Islands plan was granted final approval, 29 CFR 1952.253, and concurrent Federal enforcement authority over occupational safety was relinquished under section 18(e) of the Act effective April 17, 1984. 29 CFR 1952.254; 49 FR 16755 (April 20, 1984).

Summary of Current Situation

The U.S. Virgin Islands state program is experiencing significant difficulties, and exhibiting deficiencies in many aspects of its 18(e) program, as documented in the three most recent Evaluation reports covering 1991 through 1994 as prepared by OSHA's Region II in New York. Despite many past assurances to OSHA that the administering agency will correct the deficiencies and satisfactorily address the problems, the deficiencies remain unabated. The most basic activities of the program, including scheduling of inspections, identification and citation of hazards, proposal of penalties, review of contested cases, staff training, and response to new Federal standards and Federal program changes are not being accomplished in an effective manner. Accompanied visits and case file reviews have uncovered significant deficiencies in critical enforcement areas, including inspection preparation, inspection procedures, hazard recognition, abatement assurance, case file documentation, and adjudication of contested cases. Additional deficiencies also exist in fiscal administration and reporting, and maintenance of sufficient, qualified staff. The severity of the program's present deficiencies along with the record of their last five (5) years of somewhat problematic performance has resulted in the mutual conclusion by OSHA's Regional Administrator and the Virgin Islands newly appointed Commissioner of Labor that the VIDOSH program does not currently meet the criteria requisite to retain an affirmative determination under Section 18(e) of the Act, as it is not operating in a manner that can be judged "at least as effective as" the Federal OSHA program.

By letter dated July 19, 1995, Lisa Harris-Moorhead, Virgin Islands' Commissioner of Labor indicated the state's agreement to voluntary relinquishment of the U.S. Virgin Islands State plan's final approval status under Section 18(e) of the Act and to reassertion of concurrent Federal enforcement jurisdiction. On behalf of the Governor and his new administration she committed the state to making the Virgin Islands' workplaces safe and healthful and to "marked improvement" in the state's program by December.

Proposed Reconsideration of 18(e) Determination and Reinstatement of Concurrent Federal Enforcement Authority

Section 18(f) of the Act requires the Assistant Secretary to make a continuing evaluation of the manner in which each state plan is being administered. Under regulations at 29 CFR 1902.32(e), after a State's plan has been given an affirmative 18(e) determination, the State is required to maintain a program which will meet the requirements of section 18(c) and will continue to be "as least as effective as" the Federal program. A failure to comply with this or other 18(e) requirements may result in the reconsideration and revocation or suspension of the affirmative 18(e) determination and the resumption of Federal enforcement authority, or, if circumstances warrant, the commencement of proceedings for the withdrawal of approval of the plan pursuant to 29 CFR Part 1955 and section 18(f) of the Act.

Under the authority of section 18 of the Act and 29 CFR 1902.32(f) and 1902.47 *et seq.*, the Assistant Secretary on his own initiative and in response to the state's request is seeking public comment on his proposal to reconsider the U.S. Virgin Islands State plan's affirmative 18(e) determination and reinstate concurrent Federal enforcement authority in order to assure adequate worker protection and the effective enforcement of safety standards and regulations. A decision revoking or suspending the state's 18(e) status would not terminate federal approval of the state plan and would not affect the legal authority of the Virgin Islands to carry on enforcement activities under the state plan. Instead, revocation/suspension of a state's 18(e) determination restores the state plan to "initial approval" status and permits the resumption of concurrent federal enforcement activity including independent Federal or joint state and Federal inspections resulting in the issuance of appropriate Federal citations and penalties and the review of contested cases by the Occupational Safety and Health Review Commission (OSHRC). Federal enforcement activity will reflect all new OSHA compliance initiatives to promote voluntary compliance through common sense regulation and appropriately rewarding employers who take affirmative steps to assure worker protection. OSHA believes such action is an appropriate response to current circumstances in the Virgin Islands; restoring the state plan to its pre-1984 "initial approval" status acknowledges the deficiencies presently existing in the state program, which, while serious and extensive, do not in the Assistant Secretary's judgement warrant the commencement at this time of proceedings under 29 CFR Part 1955 and section 18(f) of the Act to entirely withdraw state plan approval. At the same time, reverting the state's federal approval status from final to initial approval would allow OSHA to exercise discretionary concurrent enforcement authority to compensate for the current deficiencies in state plan enforcement and allow the state sufficient time and assistance to improve its program. Pending a final decision, Federal OSHA compliance officers may accompany State inspectors, effective immediately, but no Federal citations will be issued until a final decision on this action is published.

Final approval status may be renewed or a process to withdraw Federal approval of the State plan may be initiated subsequently, depending on the results of State efforts to address the identified State plan deficiencies.

Signed at Washington, DC this 5th day of September, 1995.

Joseph A. Dear,

Assistant Secretary of Labor.

BILLING CODE 4510–26–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 17

RIN 2900–AH61

Adult Day Health Care Program; Community Residential Care Program; and Contract Program for Veterans With Alcohol and Drug Dependence Disorders

AGENCY: Veterans Health Administration, VA.

ACTION: Proposed rule.

SUMMARY: This document proposes to update references to material incorporated by reference in the Department of Veterans Affairs regulations concerning the Adult Day Health Care Program, the Community Residential Care Program, and the Contract Program for Veterans With Alcohol and Drug Dependence Disorders. These regulations incorporate by reference various editions of the National Fire Protection Association Life Safety Code entitled "NFPA 101, Life Safety Code" and "NFPA 101A, Guide on Alternative Approaches to Life Safety." It is proposed to substitute the current edition (1994) of the Life Safety Code and the current edition (1995) of the Guide on Alternative Approaches to Life Safety for earlier editions. The regulations are designed to ensure that buildings used for treatment and residential services for veterans meet the fire and safety requirements of the Life Safety Code and the Guide on Alternative Approaches to Life Safety. Also, this document amends the current "Contract Program for Veterans With Alcohol and Drug Dependence Disorders" regulations which, prior to the effective date of this document, provided that the Director, Facility Engineering, Planning, and Construction Office, was delegated authority to grant certain equivalencies or variances to building requirements. This delegation of authority is removed and instead such delegation of authority is granted to each of the Regional Directors of the Veterans Health Administration.

DATES: Comments must be received on or before November 13, 1995.

FOR FURTHER INFORMATION CONTACT: Daniel J. Schoeps, Chief, Community Care Programs, Veterans Health Administration, Department of Veterans Affairs, (202) 565–7530, for issues relating to the Adult Day Health Care Program and the Community Residential Care Program; Karen G. Boies, Ph.D., Deputy Associate Director for Addictive Disorders and Psychiatric Rehabilitation, Veterans Health Administration, Department of Veterans Affairs, (202) 565–7316, for issues relating to the Contract Program for Veterans With Alcohol and Drug Dependence Disorders.

ADDRESSES: Mail written comments concerning these proposed regulations to: Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Ave. NW., Washington, DC 20420; or hand deliver written comments to: Office of Regulations Management, room 1176, 801 Eye Street NW., Washington, DC 20001. Comments should indicate that they are submitted in response to "RIN 2900–AH61." All written comments will be available for public inspection in the Office of Regulations Management, room 1176, 801 Eye Street NW., Washington, DC 20001 between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays).

SUPPLEMENTARY INFORMATION: The regulations affected by this document are authorized under provisions of 38 U.S.C. as follows:

Adult Day Health Care Program—38 U.S.C. 1712; Community Residential Care Program—38 U.S.C. 1730; and Contract Program for Veterans With Alcohol and Drug Dependence Disorders—38 U.S.C. 501 and 38 U.S.C. 1720A

Regulatory Flexibility Act

The Secretary hereby certifies that the provisions of the proposed rule would not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. In all likelihood, only similar entities that are small entities would conduct activities affected by this rule. Therefore, pursuant to 5 U.S.C. 605(b), this rule is exempt from the initial and final regulatory flexibility analysis requirement of sections 603 and 604.

List of Subjects in 38 CFR Part 17

Alcoholism, Claims, Dental Health, Drug Abuse, Foreign Relations, Government Contracts, Grants Program—Health, Health Care, Health Facilities, Health Professions, Medical Devices, Medical Research, Mental Health Programs, Nursing Homes, Philippines, Veterans.

Approved: August 29, 1995.

Jesse Brown,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 17 is proposed to be amended as set forth below:

PART 17—MEDICAL

1. The authority citation for part 17 continues to read as follows:

Authority: 72 Stat. 1114, 38 U.S.C. 501, unless otherwise noted.

2. In § 17.51e, paragraph (c)(2) is revised to read as follows:

§ 17.51e Adult day health care in private facilities.

* * * * *

(c) * * *

(2) The institution shall meet the requirements of chapters 1–7, 10–11, and 31 of the National Fire Protection Association's Life Safety Code, entitled NFPA 101 Life Safety Code 1994, dated February 11, 1994 (which is incorporated by reference). Incorporation of the 1994 edition of the Life Safety Code was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. The code is available for inspection at the Office of the Federal Register, room 700, 800 North Capitol Street NW., Washington, DC and at the Department of Veterans Affairs, Office of Regulations Management (02D), room 1176, 801 Eye Street NW., Washington, DC 20001. Copies may be obtained from: National Fire Protection Association, Battery March Park, Quincy, MA 02269. (For ordering information, call toll-free 1–800–344–3555.) The institution shall provide sufficient staff to assist patients in the event of fire or other emergency.

* * * * *

3. In § 17.51j, paragraph (a)(2) is revised to read as follows:

§ 17.51j Approval of community residential care facilities.

* * * * *

(a) * * *

(2) Meet the requirements of chapters 1–7, 22–23, and 31 of the 1994 edition of the National Fire Protection Association's Life Safety Code, NFPA 101, and the 1995 edition of NFPA 101A, Guide on Alternative Approaches to Life Safety (which are incorporated by reference). The institution shall provide sufficient staff to assist patients in the event of fire or other emergency. Incorporation by reference of the 1994 edition of the Life Safety Code and the 1995 edition of NFPA 101A was approved by the Director of the Federal Register, in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. The code is available for inspection at the Office of the Federal Register, room 700, 800 North Capitol Street NW., Washington, DC and the Department of Veterans Affairs, Office of Regulations Management (02D), room 1176, 801 Eye Street NW., Washington, DC 20001. Copies may be obtained from the National Fire Protection Association, Battery March Park, Quincy, MA 02269. (For ordering information, call toll-free 1–800–344–3555.)

* * * * *

4. In § 17.53b, paragraph (a)(1)(i) is revised to read as follows:

§ 17.53b Contracts for residential treatment services for veterans with alcohol or drug dependence or abuse disabilities.

(a) * * *

(1) * * *

(i) The building must meet the requirements of the applicable residential occupancy chapters 1–7, 22–23, and 31 of the Life Safety Code (NFPA 101) published by the National Fire Protection Association (NFPA). Battery March Park, Quincy, MA 02269, 1994 edition. (For ordering information, call toll-free 1–800–344–3555.) The 1994 edition of the Life Safety Code is hereby incorporated by reference into this section as though set forth in full herein. This code is available for inspection at the Office of the Federal Register, 800 North Capitol Street NW., room 700, Washington, DC and the Department of Veterans Affairs, Office of Regulations Management (02D), room 1176, 801 Eye Street NW., Washington, DC 20001. Any equivalencies or variances to Department of Veterans Affairs requirements must be approved by the appropriate Veterans Health Administration Regional Director.

* * * * *

5. In § 17.53c, paragraph (a)(1)(i) is revised to read as follows:

§ 17.53c Contracts for outpatient services for veterans with alcohol or drug dependence or abuse disabilities.

(a) * * *

(1) * * *

(i) The building must meet the requirements of the applicable business occupancy chapters 1–7, 26–27, and 31 of the Life Safety Code (NFPA 101) published by the National Fire Protection Association (NFPA), Battery March Park, Quincy, MA 02269, 1994 edition. (For ordering information, call toll-free 1–800–344–3555.) The 1994 edition of the Life Safety Code (NFPA 101) is hereby incorporated by reference into this section as though set forth in full herein. This code is available for inspection at the Office of the Federal Register, 800 North Capitol Street NW., room 700, Washington, DC and the Department of Veterans Affairs, Office of Regulations Management (02D), room 1176, 801 Eye Street NW., Washington, DC 20001. Any Equivalencies or variances to Department of Veterans Affairs requirements must be approved by the appropriate Veterans Health Administration Regional Director.

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 15 and 32

[FRL–5219–6]

RIN 2030–AA38

Suspension, Debarment and Ineligibility for Contracts, Assistance, Loans and Benefits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: In this notice, EPA proposes to remove Part 15 ("Administration of the Clean Air Act and the Clean Water Act with Respect to Contracts, Grants, and Loans—List of Violating Facilities") from Title 40 of the Code of Federal Regulations. EPA also proposes that 40 CFR Part 32, Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drugfree Workplace (Grants), be amended simultaneously by adding procedures needed to administer the ineligibility provisions of the Clean Air Act (CAA), Clean Water Act (CWA), and EO 11738.

DATES: Comments must be submitted on or before November 13, 1995.

ADDRESSES: Comments may be mailed to Robert Meunier, Director, Suspension and Debarment Division (3902F), U.S. Environmental Protection Agency, 401 M St. SW, Washington, DC 20460, or delivered to EPA, Fairchild Building, 499 South Capitol St., room 217 between 8 a.m. and 4:30 p.m.

Comments and data may also be submitted electronically by electronic mail (e-mail) to: meunier.robert@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [FRL–5219–6]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below.

FOR FURTHER INFORMATION CONTACT: Robert F. Meunier, Director, Suspension and Debarment Division (3902F), 401 M Street S.W., Washington, DC 20460. Telephone: (202) 260–8025.

SUPPLEMENTARY INFORMATION:

A. Background

Last year, the EPA Administrator decided to reorganize the former Office of Enforcement (OE), now the Office of Enforcement and Compliance Assurance (OECA). As part of that reorganization, administrative responsibility for the Part 15 CAA and CWA contractor listing program was transferred from OECA to the Office of Administration and Resources Management (OARM) so that all EPA debarment functions would be conducted by a single office.

On October 5, 1994, EPA published technical amendments to 40 CFR Parts 15 and 32 to reassign specific functions from OECA to OARM. (See, 59 Fed. Reg. 50691). In the preamble to those amendments, EPA notified the public of its intention to consolidate the two rules into a single rule in 1995.

These proposed amendments would eliminate Part 15 in its entirety, and amend EPA's suspension and debarment rule at Part 32 by adding the few procedures needed to implement the statutorily mandated ineligibility provisions of the CAA and the CWA.

In addition to significantly reducing regulatory text, the proposed rule will reduce the confusion that occurred because EPA had one set of procedures for mandatory and discretionary facility ineligibility (Part 15), and another for discretionary suspension and debarment actions (Part 32). When the proposed amendments become final, pre-conviction cases involving violations of the CAA and CWA will, like cases involving other environmental statutes, be candidates for suspension and proposed debarment under 40 CFR Part 32 and 48 CFR Subpart 9.4.

The following regulatory provisions will be affected under this proposed rule.

Part 15 of Title 40 of the Code of Federal Regulations will be removed.

Part 32 of Title 40 of the Code of Federal Regulations will be amended to incorporate references to the CAA and CWA ineligibility provisions in the title, table of contents, and authorities section.

General references will be added to the purpose clauses at § 32.100(e) and the definitions of "facility" and "CAA or CWA ineligibility" will be added to the definitions at § 32.105.

New paragraphs (d) are added to §§ 32.110 (Coverage) and 32.115 (Policy), to indicate that CAA and CWA ineligibility are within the scope of this rule; and the statutory authority of agency heads to grant exceptions to CAA and CWA ineligible facilities has been added to the exceptions provisions at § 32.215(a) according to the standards set forth in the statute.

A significant addition being proposed is a new paragraph (c) in the settlement provisions of § 32.315. The new text would state that, as part of a comprehensive settlement agreement and before a judgment of conviction is entered, the EPA debarring official may certify that the condition giving rise to the CAA or CWA violation has been corrected. Such certifications would be issued only if the Debarring Official has the same type of documentation which would be required to obtain reinstatement (under the new § 32.321) after a post-conviction CAA or CWA facility ineligibility.

A new § 32.321 is proposed which prescribes the procedures for seeking reinstatement of facility eligibility.

Finally, §§ 32.330 and 32.425 are proposed to be removed from this rule as part of EPA's effort to eliminate unnecessary regulatory provisions. These sections were part of EPA's original 1982 assistance debarment regulation and were retained when EPA published its version of the OMB Nonprocurement Governmentwide Debarment and Suspension Rule (Common Rule) in 1988. Although the Common Rule does not prescribe a "reconsideration" procedure, § 32.320(c) authorizes a debarred respondent to request, at any time, that the debarment decision be reversed or that the period or scope of a debarment be reduced. Even without this provision, EPA believes that the debarring and suspending official has inherent authority to reconsider a suspension or debarment decision.

The proposed removal of the §§ 32.330 and 32.425 reconsideration provisions will not affect a respondent's opportunity to file an appeal under §§ 32.335 and 32.430. Although also not prescribed in the OMB Common Rule, the seldom used Part 32 appeal provisions are being retained because they provide an inexpensive procedure for challenging EPA suspension and debarment determinations.

A record has been established for this rulemaking under docket number "[FRL–5219–6]" (including comments and data submitted electronically as described below). A public version of this record, including printed paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 217 of the EPA Fairchild Building located at 499 South Capitol Street, Washington, DC.

Electronic comments can be sent directly to EPA at: meunier.robert@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in **ADDRESSES** at the beginning of this document.

Rulemaking Analysis

B. Executive Order 12866

This rulemaking has been determined not to be significant under EO 12866. However, it has been sent to the Office of Management and Budget for review for consistency with the OMB Common Rule.

C. Regulatory Flexibility Act

The EPA certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities.

D. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because this rule does not contain information collection requirements for the approval of OMB under 44 U.S.C. 3501 *et seq.*

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), P.L. 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

Today's proposed rule contains no Federal mandates (under the regulatory provisions of Title II of the UMRA) for State, local, or tribal governments or the private sector. The proposed rule imposes no enforceable duties on any of these governmental entities or the private sector. This proposed rule does not change the current statutory and regulatory duties that arise from conditions of federal assistance which, as defined by UMRA, do not constitute a "Federal intergovernmental mandate" or a "Federal private sector mandate." Thus, today's proposed rule is not subject to the requirements of sections 202 and 205 of the UMRA.

EPA has determined that this proposed rule contains no regulatory requirements that might significantly or uniquely affect small governments. The proposed rule would eliminate the separate procedures in 40 CFR Part 15 for administering the Clean Air Act and Clean Water Act ineligibility provisions, and incorporate simplified ineligibility procedures in EPA's existing nonprocurement suspension and debarment rules (40 CFR Part 32). None of these amended procedures would impose significant or unique regulatory requirements on small governments. Therefore, the proposed rule is not subject to section 203 of the UMRA.

List of Subjects in 40 CFR Parts 15 and 32

Administrative practice and procedure, Debarment and suspension, Ineligibility.

Dated: August 21, 1995.

Alvin Pesachowitz,

Acting Assistant Administrator, Office of Administration and Resources Management.

For the reasons set out in the preamble, 40 CFR Parts 15 and 32 are proposed to be amended as follows:

1. Part 15 is removed.
2. The title of Part 32 is revised to read as follows:

PART 32—GOVERNMENTWIDE DEBARMENT AND SUSPENSION (NONPROCUREMENT) AND GOVERNMENTWIDE REQUIREMENTS FOR DRUG-FREE WORKPLACE (GRANTS); CLEAN AIR ACT AND CLEAN WATER ACT INELIGIBILITY OF FACILITIES IN PERFORMANCE OF FEDERAL CONTRACTS, GRANTS AND LOANS

3. The authorities citation for part 32 is revised to read as follows:

Authority: EO 12549; 41 U.S.C. 701 *et seq.*; 7 U.S.C. 136 *et seq.*; 15 U.S.C. 2601 *et seq.*; 20 U.S.C. 4011 *et seq.*; 33 U.S.C. 1251 *et seq.*; 42 U.S.C. 300f, 4901, 6901, 7401, 9801 *et seq.*; EO 12689; EO 11738; Pub. L. 103–355 § 2455.

4. Section 32.100 is amended by adding new paragraph (e) as follows:

§ 32.100 Purpose.

* * * * *

(e) Facilities ineligible to provide goods, materials, or services under Federal contracts, loans or assistance, pursuant to Section 306 of the Clean Air Act (CAA) or Section 508 of the Clean Water Act (CWA) are excluded in accordance with the terms of those statutes. Reinstatement of a CAA or CWA ineligibile facility may be requested in accordance with the procedures at § 32.321.

5. Section 32.105 is amended by adding in alphabetical order the following definitions.

§ 32.105 Definitions.

* * * * *

CAA or CWA ineligibility. The status of a facility which, as provided in section 306 of the Clean Air Act (CAA) and section 508 of the Clean Water Act (CWA), is ineligible to be used in the performance of a Federal contract, subcontract, loan, assistance award or covered transaction. Such ineligibility commences upon conviction of a facility owner, lessee, or supervisor for a violation of section 113 of the CAA or section 309(c) of the CWA, which violation occurred at the facility. The ineligibility of the facility continues until such time as the EPA Debarring Official certifies that the condition giving rise to the CAA or CWA criminal conviction has been corrected.

Facility. Any building, plant, installation, structure, mine, vessel, floating craft, location or site of operations at which, or from which, a Federal contract, subcontract, loan, assistance award or covered transaction is to be performed. Where a location or site of operations contains or includes more than one building, plant, installation or structure, the entire location or site shall be deemed the facility unless otherwise limited by EPA.

* * * * *

6. Section 32.110 is amended by adding a new paragraph (d) to read as follows:

§ 32.110 Coverage.

* * * * *

(d) Except as provided in § 32.215 of this Part, Federal agencies shall not use a CAA or CWA ineligible facility in the performance of any Federal contract, subcontract, loan, assistance award or covered transaction.

* * * * *

7. Section 32.115 is amended by revising paragraph (d) to read as follows:

§ 32.115 Policy.

* * * * *

(d) It is EPA policy to exercise its authority to reinstate CAA or CWA ineligible facilities in a manner which is consistent with the policies in paragraphs (a) and (b) of this section.

* * * * *

8. Section 32.215 is amended by revising paragraph (a) to read as follows:

§ 32.215 Exception provision.

* * * * *

(a) Any agency head, or authorized designee, may except any Federal contract, subcontract, loan, assistance award or covered transaction, individually or as a class, in whole or in part, from the prohibitions otherwise applicable by reason of a CAA or CWA ineligibility. The agency head granting the exception shall notify the EPA Debarring Official of the exception as soon, before or after granting the exception, as may be practicable. The justification for such an exception, or any renewal thereof, shall fully describe the purpose of the contract or covered transaction, and show why the paramount interest of the United States requires the exception.

9. Section 32.215 is further amended by adding a new paragraph (b) to read as follows:

§ 32.215 Exception provision.

* * * * *

(b) The EPA Debarring Official is the official authorized to grant exceptions under this section for EPA.

10. Section 32.315 is amended by adding a new paragraph (c) to read as follows:

§ 32.315 Settlement and voluntary exclusion.

* * * * *

(c) The EPA Debarring Official may consider matters regarding present responsibility, as well as any other matter regarding the conditions giving rise to alleged CAA or CWA violations in anticipation of entry of a plea, judgment or conviction. If, at any time, it is in the interest of the United States to conclude such matters pursuant to a comprehensive settlement agreement, the EPA Debarring Official may conclude the debarment and ineligibility matters as part of any such settlement, so long as he or she certifies that the condition giving rise to the CAA or CWA violation has been corrected.

11. Section 32.321 is added to read as follows:

§ 32.321 Reinstatement of facility eligibility.

(a) A written petition to reinstate the eligibility of a CAA or CWA ineligible facility may be submitted to the EPA Debarring Official. The petitioner bears the burden of providing sufficient information and documentation to establish, by a preponderance of the evidence, that the condition giving rise to the CAA or CWA conviction has been corrected. If the material facts set forth in the petition are disputed, and the Debarring Official denies the petition, the petitioner shall be afforded the opportunity to have additional proceedings as provided in § 32.314(b).

(b) A decision by the EPA Debarring Official denying a petition for reinstatement may be appealed under § 32.335.

§ 32.330 [Removed]

12. Section 32.330 is removed.

§ 32.425 [Removed]

13. Section 32.425 is removed.

Approval and Promulgation of State Implementation Plans; California State Implementation Plan Revision, Mojave Desert Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to act on revisions to the California State Implementation Plan (SIP) which concern two negative declarations from the Mojave Desert Air Quality Management District for two volatile organic compound (VOC) source categories: Asphalt Air Blowing and Vacuum Producing Devices or Systems. The intended effect of proposing to include these negative declarations in the SIP is to meet the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). In the Final Rules Section of this **Federal Register**, the EPA is acting on the state's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A rationale for this action is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this action should do so at this time.

DATES: Comments on this proposed rule must be received in writing by October 11, 1995.

ADDRESSES: Written comments on this action should be addressed to: Daniel A. Meer, Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Copies of the negative declarations are available for public inspection at EPA's Region 9 office and at the following locations during normal business hours.

Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105

Air Docket (6102), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 L Street, Sacramento, CA 95812

Mojave Desert Air Quality Management District (formerly San Bernardino County Air Pollution Control District, 15428 Civic Drive, Suite 200, Victorville, CA 92392–2382.

FOR FURTHER INFORMATION CONTACT: Julie A. Rose, Rulemaking Section, A–5–3, Air and Toxics Division, U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105–3901, Telephone: (415) 744–1184.

SUPPLEMENTARY INFORMATION: This document concerns negative declarations for two VOC source categories from the Mojave Desert Air Quality Management District: (1) Asphalt Air Blowing submitted to EPA on December 20, 1994 and (2) Vacuum Producing Devices or Systems submitted to EPA on December 29, 1994 by the California Air Resources Board.

For further information, please see the information provided in the Direct Final action which is located in the Rules Section of this **Federal Register**.

Approval and Promulgation of Air Quality Implementation Plans—Connecticut; PM10 Attainment Plan and Contingency Measures for New Haven

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing full approval of a State Implementation Plan (SIP) revision submitted by the State of Connecticut to satisfy certain federal requirements for the New Haven initial PM10 nonattainment area. The purpose of this action is to bring about the attainment of the national ambient air quality standards (NAAQS) for particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM10). EPA also proposes full approval of reasonable available control measures (RACM) and contingency measures for the New Haven initial PM10 moderate nonattainment area as established in this SIP revision, since Connecticut has demonstrated implementation of RACM will attain and maintain the PM10 NAAQS. Additionally, EPA proposes approval of Connecticut's adoption of the PM10 NAAQS and emergency episode regulation. In the Final Rules Section of this **Federal Register**, EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule. If EPA does receive adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this proposal. Any parties interested in commenting on this proposal should do so at this time.

DATES: Comments must be received on or before October 11, 1995.

ADDRESSES: Comments may be mailed to Susan Studlien, Acting Director, Air, Pesticides and Toxics Management Division, EPA-New England, JFK Federal Bldg (AAA), Boston, MA 02203–2211. Copies of the State submittal and EPA's technical support document are available for public inspection by appointment during normal business hours at the Air, Pesticides and Toxics Management Division, EPA-New England, One Congress Street, 10th floor, Boston, MA and the Bureau of Air Management, Department of Environmental Protection, State Office Building, 79 Elm Street, Hartford, CT 06106–1630.

FOR FURTHER INFORMATION CONTACT: Matthew B. Cairns, (617) 565–4982.

SUPPLEMENTARY INFORMATION: For additional information, see the direct final rule which is located in the Rules Section of this **Federal Register**.

Authority: 42 USC 7401–7671q.

Dated: May 26, 1995.

Approval and Promulgation of Air Quality Implementation Plans; Delaware, the District of Columbia, Maryland, Pennsylvania, Virginia; Revisions to the State Implementation Plans (SIPs) Addressing Ozone Monitoring

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve revisions to the following states State Implementation Plans (SIPs) for ozone: Delaware, the District of Columbia, Maryland, Pennsylvania, and Virginia. This action is based upon revision requests submitted by these states to satisfy the requirements of the Clean Air Act, as amended November 15, 1990 and the Photochemical Assessment Monitoring Stations (PAMS) regulations. The PAMS regulation required states to provide for the establishment and maintenance of an enhanced ambient air quality network in the form of PAMS by November 12, 1993.

In the Final Rules section of this **Federal Register**, EPA is approving these states' SIP revisions as a direct final rule without prior proposal because the Agency views these as noncontroversial SIP revisions and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by October 11, 1995.

ADDRESSES: Written comments on this action should be addressed to Marcia L. Spink, Associate Director, Air Programs, Mailcode 3AT00, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. Copies of the documents relevant to this action are available for public inspection during normal business hours at the Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; and the Delaware Department of Natural Resources & Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, Delaware 19903; District of Columbia Department of Consumer and Regulatory Affairs, 2100 Martin Luther King Avenue, SE., Washington, DC 20020; Maryland Department of the Environment, 2500 Broening Highway, Baltimore, Maryland, 21224; Pennsylvania Department of Environmental Protection, P.O. Box 8468, 400 Market Street, Harrisburg,

Pennsylvania 17105; Virginia Department of Environmental Quality, 629 East Main Street, Richmond, Virginia, 23219; Department of Public Health, Air Management Services, 321 University Avenue, Philadelphia, Pennsylvania 19104.

FOR FURTHER INFORMATION CONTACT: Catherine L. Magliocchetti, Ozone/CO & Mobile Sources Section, Mailcode 3AT21, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107, (215) 597–6863.

SUPPLEMENTARY INFORMATION: For further information regarding the PAMS rulemaking for Delaware, the District of Columbia, Maryland, Pennsylvania, and Virginia, see the information provided in the Direct Final action of the same title which is located in the Rules and Regulations Section of this **Federal Register**.

Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Planning Purposes; Commonwealth of Kentucky

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the Commonwealth of Kentucky through the Natural Resources and Environmental Protection Cabinet approving the redesignation to attainment and maintenance plan of the Lexington area because it meets the maintenance plan and redesignation requirements. EPA also proposes to approve the 1990 baseline emissions inventory of the area. In the final rules section of this **Federal Register**, the EPA is approving the Commonwealth's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

DATES: To be considered, comments must be received by October 11, 1995.

ADDRESSES: Written comments on this action should be addressed to Scott Southwick, at the EPA Regional Office listed below. Approval and Promulgation of Implementation Plans; Tennessee: Approval of Revisions to Permit Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to approve the State Implementation Plan (SIP) revision submitted by the State of Tennessee for the purpose of establishing revisions to the permit requirements for major sources of air pollution in the Nashville/Davidson County area. In the final rules section of this **Federal Register**, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

[FRL–5292–4]

Outer Continental Shelf Air Regulations Consistency Update for California

AGENCY: Environmental Protection Agency ("EPA").

ACTION: Notice of proposed rulemaking—consistency update.

SUMMARY: EPA is proposing to update a portion of the Outer Continental Shelf ("OCS") Air Regulations. Requirements applying to OCS sources located within 25 miles of states' seaward boundaries must be updated periodically to remain consistent with the requirements of the corresponding onshore area ("COA"), as mandated by section 328(a)(1) of the Clean Air Act ("the Act"), the Clean Air Act Amendments of 1990. The portion of the OCS air regulations being updated pertain to the operating permit requirements for OCS sources for which the Santa Barbara County Air Pollution Control District (Santa Barbara County APCD) is the designated COA. The OCS requirements for the above District, contained in the Technical Support Document, are proposed to be incorporated by reference into the Code of Federal Regulations and are listed in the appendix to the OCS air regulations.

DATES: Comments on the proposed update must be received on or before October 11, 1995.

ADDRESSES: Comments must be mailed (in duplicate if possible) to: EPA Air Docket (A–5), Attn: Docket No. A–93–16 Section X, Environmental Protection Agency, Air and Toxics Division, Region 9, 75 Hawthorne St., San Francisco, CA 94105.

Docket: Supporting information used in developing the proposed notice and copies of the documents EPA is proposing to incorporate by reference are contained in Docket No. A–93–16 (Section X). This docket is available for public inspection and copying Monday—Friday during regular business hours at the following locations:

EPA Air Docket (A–5), Attn: Docket No. A–93–16 Section X, Environmental Protection Agency, Air and Toxics Division, Region 9, 75 Hawthorne St., San Francisco, CA 94105.

EPA Air Docket (LE–6102), Attn: Air Docket No. A–93–16 Section X, Environmental Protection Agency, 401 M Street SW, Room M–1500, Washington, DC 20460.

A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Christine Vineyard, Air and Toxics Division (A–5–3), U.S. EPA Region 9, 75 Hawthorne Street, San Francisco, CA 94105, (415) 744–1197.

SUPPLEMENTARY INFORMATION:

Background

On September 4, 1992, EPA promulgated 40 CFR Part 55,[1] which established requirements to control air pollution from OCS sources in order to attain and maintain federal and state ambient air quality standards and to comply with the provisions of Part C of title I of the Act. Part 55 applies to all OCS sources offshore of the States except those located in the Gulf of Mexico west of 87.5 degrees longitude. Section 328 of the Act requires that for such sources located within 25 miles of a state's seaward boundary, the requirements shall be the same as would be applicable if the sources were located in the COA. Because the OCS requirements are based on onshore requirements, and onshore requirements may change, section 328(a)(1) requires that EPA update the OCS requirements as necessary to maintain consistency with onshore requirements.

Pursuant to § 55.12 of the OCS rule, consistency reviews will occur (1) at least annually; (2) upon receipt of a Notice of Intent (NOI) under § 55.4; or (3) when a state or local agency submits a rule to EPA to be considered for incorporation by reference in Part 55. This NPR is being promulgated in response to the submittal of Part 70 operating permit rules by a local air pollution control agency.

Section 328(a) of the Act requires that EPA establish requirements to control air pollution from OCS sources located within 25 miles of states' seaward boundaries that are the same as onshore requirements. To comply with this statutory mandate, EPA must incorporate applicable onshore rules into Part 55 as they exist onshore. This limits EPA's flexibility in deciding which requirements will be incorporated into Part 55 and prevents EPA from making substantive changes to the requirements it incorporates. As a result, EPA may be incorporating rules into Part 55 that do not conform to all of EPA's state implementation plan (SIP) guidance or certain requirements of the Act. Consistency updates may result in the inclusion of state or local rules or regulations into Part 55, even though the same rules may ultimately be disapproved for inclusion as part of the SIP. Inclusion in the OCS rule does not imply that a rule meets the requirements of the Act for SIP approval, nor does it imply that the rule will be approved by EPA for inclusion in the SIP.

EPA Evaluation and Proposed Action

On July 10, 1995 (60 FR 35538), EPA proposed interim approval of the Operating Permits Program submitted by the Santa Barbara County APCD. EPA is now proposing to update 40 CFR Part 55 by incorporating the requirements of this program, in response to Santa Barbara County APCD's request and to maintain consistency with onshore requirements. These proposed requirements will apply to the extent that they are rationally related to the attainment or maintenance of federal or state ambient air quality standards or Part C of title I of the Act, that they are not designed expressly to prevent exploration and development of the OCS, that they are applicable to OCS sources, and that they do not solely regulate pollutants or precursors to pollutants for which there is no federal or state ambient air quality standard. These proposed Santa Barbara County APCD operating permit requirements applicable to OCS sources will not be finalized in Part 55 until EPA takes final action granting full or interim approval to the Santa Barbara County APCD Operating Permits Program.

The following Santa Barbara County APCD Part 70 permit requirement were submitted for inclusion in Part 55:

Rule 370 Potential to Emit—Limitations for Part 70 Sources (Adopted 06/15/95)
Rule 1301 Part 70 Operating Permits—General Information (Adopted 11/09/93)
Rule 1302 Part 70 Operating Permits—Permit Application (Adopted 11/09/93)
Rule 1303 Part 70 Operating Permits—Permits (Adopted 11/09/93)
Rule 1304 Part 70 Operating Permits—Issuance, Renewal, Modification and Reopening (Adopted 11/09/93)
Rule 1305 Part 70 Operating Permits—Enforcement (Adopted 11/09/93)

---

[1] The reader may refer to the Notice of Proposed Rulemaking, December 5, 1991 (56 FR 63774), and the preamble to the final rule promulgated September 4, 1992 (57 FR 40792) for further background and information on the OCS regulations.

Administrative Requirements

A. Regulatory Flexibility Act

As was stated in the final OCS regulation, the OCS rule does not apply to any small entities, and the structure of the rule averts direct impacts and mitigates indirect impacts on small entities. This consistency update merely incorporates onshore Part 70 permit requirements into the OCS rule to maintain consistency with onshore regulations as required by section 328 of the Act and does not alter the structure of the OCS rule. Because this action does not create any new requirements, it does not have a significant impact on a substantial number of small entities.

B. Executive Order 12866

The Office of Management and Budget (OMB) has exempted this regulatory action from Executive Order 12866 review.

C. Unfunded Mandates

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules include a Federal mandate that may result in estimated costs of $100 million or more to the private sector or to State, local, or tribal governments in the aggregate.

EPA has determined that the final action promulgated today does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under State or local law, and imposes no new Federal requirements. Accordingly, no additional costs to the State, local, or tribal governments, or to the private sector, result from the action.

List of Subjects in 40 CFR Part 55

Administrative practice and procedures, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Nitrogen oxides, Outer Continental Shelf, Ozone, Particulate matter, Permits, Reporting and Recordkeeping requirements, Sulfur oxides.

Dated: August 25, 1995.

Felicia Marcus,

Regional Administrator.

Title 40 of the Code of Federal Regulations, Part 55, is proposed to be amended as follows:

PART 55—[AMENDED]

1. The authority citation for Part 55 continues to read as follows:

Authority: Section 328 of the Clean Air Act (42 U.S.C. § 7401 *et seq.*) as amended by Public Law 101–549.

2. Section 55.14 is proposed to be amended by revising paragraphs (e)(3)(ii)(F) to read as follows:

§ 55.14 Requirements that apply to OCS sources located within 25 miles of states' seaward boundaries, by state.

* * * * *

(e) * * *
(3) * * *
(ii) * * *
(F) *Santa Barbara County Air Pollution Control District Requirements Applicable to OCS Sources.*

* * * * *

4. Appendix A to CFR Part 55 is proposed to be amended by revising paragraph (b) (6) under the heading California to read as follows:

Appendix A to 40 CFR Part 55—Listing of State and Local Requirements Incorporated by Reference Into Part 55, by State

* * * * *

(California) * * *

* * * * *

(b) Local requirements.

* * * * *

(6) The following requirements are contained in *Santa Barbara County Air Pollution Control District Requirements Applicable to OCS Sources:*

Rule 102 Definitions (Adopted 7/30/91)
Rule 103 Severability (Adopted 10/23/78)
Rule 201 Permits Required (Adopted 7/2/79)
Rule 202 Exemptions to Rule 201 (Adopted 3/10/92)
Rule 203 Transfer (Adopted 10/23/78)
Rule 204 Applications (Adopted 10/23/78)
Rule 205 Standards for Granting Applications (Adopted 7/30/91)
Rule 206 Conditional Approval of Authority to Construct or Permit to Operate (Adopted 10/15/91)
Rule 207 Denial of Application (Adopted 10/23/78)
Rule 210 Fees (Adopted 5/7/91)
Rule 212 Emission Statements (Adopted 10/20/92)
Rule 301 Circumvention (Adopted 10/23/78)
Rule 302 Visible Emissions (Adopted 10/23/78)
Rule 304 Particulate Matter—Northern Zone (Adopted 10/23/78)
Rule 305 Particulate Matter Concentration–Southern Zone (Adopted 10/23/78)
Rule 306 Dust and fumes—Northern Zone (Adopted 10/23/78)
Rule 307 Particulate Matter Emission Weight Rate–Southern Zone (Adopted 10/23/78)

Clean Air Act Promulgation of Reclassification of PM10 Nonattainment Areas—Connecticut; Approval of 1-Year Extension of Attainment Date for New Haven

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing full approval of Connecticut's request for a 1-year extension of the attainment date for the New Haven PM10 nonattainment area. This action is based on monitored air quality data for the national ambient air quality standard for PM10 during the years 1992–94. This action is being taken under the Clean Air Act. In the Final Rules Section of this **Federal Register**, EPA is approving the Connecticut's extension request as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule. If EPA does receive adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this proposal. Any parties interested in commenting on this proposal should do so at this time.

DATES: Comments must be received on or before October 11, 1995.

ADDRESSES: Comments may be mailed to Susan Studlien, Acting Director, Air, Pesticides and Toxics Management Division, EPA-New England, JFK Federal Bldg (AAA), Boston, MA 02203–2211. Copies of Connecticut's submittal and EPA's technical support document are available for public inspection by appointment during normal business hours at the Air, Pesticides and Toxics Management Division, EPA-New England, One Congress Street, 10th floor, Boston, MA and the Bureau of Air Management, Department of Environmental Protection, State Office Building, 79 Elm Street, Hartford, CT 06106–1630.

FOR FURTHER INFORMATION CONTACT: Matthew B. Cairns, (617) 565–4982.

SUPPLEMENTARY INFORMATION: For additional information, see the direct final rule which is located in the Rules Section of this **Federal Register**.

Authority: 42 USC 7401–7671q.

Dated: July 10, 1995.

John P. DeVillars,

Regional Administrator, EPA-New England.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 677

[Docket No. 950822211–5211–01; I.D. 080395A]

RIN 0648–AD80

North Pacific Fisheries Research Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; public hearing by teleconference.

SUMMARY: NMFS issues a proposed rule to implement Amendment 1 to the North Pacific Fisheries Research Plan (Research Plan). Regulations implementing this amendment would delay full implementation of the Research Plan until 1997 and establish 1996 observer coverage requirements for the Research Plan fisheries. This delay is necessary to provide the North Pacific Fishery Management Council (Council) additional time to address certain issues presented by implementation of the Research Plan. To remain consistent with the Council's intent, observer coverage requirements in regulations that implement Amendment 35 to the Fishery Management Plan (FMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area are proposed to be extended through 1996.

DATES: Comments on this proposed rule must be received by November 6, 1995. A public hearing on the proposed rule will be held by teleconference on Monday, September 18, 1995, at 1 p.m., Alaska local time.

ADDRESSES: Comments on this proposed rule may be sent to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, 709 West 9th Street, Juneau, AK 99801, or P.O. Box 21668, Juneau, AK 99802–1668, Attn: Lori J. Gravel. Copies of the Observer Plan may also be obtained from this address.

Copies of the Research Plan as revised by proposed Amendment 1, the environmental assessment/regulatory impact review prepared for the Research Plan, and the final report "Establishing the Fee Percentage and Standard Exvessel Prices for 1995" may be obtained from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510.

Locations where interested persons may participate in the September 18, 1995, public hearing by teleconference are as follows:

1. Anchorage—North Pacific Fishery Management Council, 600 West 4th Avenue, Anchorage, AK (907–271–2809);
2. Juneau—National Marine Fisheries Service, Alaska Region, 706 West 9th Street, Juneau, AK (907–271–7228);
3. Seattle—Alaska Fisheries Science Center, 7600 Sand Point Way Northeast, Building 4, Room 7600, Seattle, WA (206–526–4197);
4. Newport—Oregon Department of Fish and Wildlife, 2040 Southeast Marine Science Drive, Newport, OR (503–867–0300).

FOR FURTHER INFORMATION CONTACT: Susan Salveson, 907–586–7228.

SUPPLEMENTARY INFORMATION:

Background

Regulations implementing the Research Plan became effective October 6, 1994 (59 FR 46126, September 6, 1994). A regulatory amendment was published in the **Federal Register** on January 9, 1995 (60 FR 2344), that clarified 1995 observer coverage requirements and revised the definition of certain terms set out under § 677.2. Two additional rules have been published in the **Federal Register** that make other minor substantive changes to the regulations implementing the Research Plan. A final rule published on July 5, 1995 (60 FR 34904), and required vessels and shoreside processors to facilitate transmission of observer data. Finally, a proposed rule published on August 16, 1995 (60 FR 42470) revised 1995 observer coverage requirements for crab catcher vessels and exempted certain crab catcher vessels required to obtain observer coverage from paying 1995 Research Plan fees.

The Research Plan adopted by the Council at its December 1993 meeting established a two-phase implementation strategy for the Research Plan. The first phase is occurring in 1995 and serves to collect start-up funding for full implementation of the Research Plan. During 1995, NMFS is assessing and collecting Research Plan fees. Participants in the Research Plan fisheries are continuing independently to obtain required observer coverage

from NMFS-certified observer contractors. "Double payments" for observer services and the Research Plan fee liability are avoided in 1995 through either catcher vessel exemptions from the fee liability or processor credits up to each processor's Research Plan fee liability. Under the Research Plan adopted by the Council and NMFS, the Research Plan would be fully implemented starting in 1996, and observer coverage would be provided to participants in Research Plan fisheries through contractual arrangements between NMFS and companies awarded contracts to provide observer services for the Research Plan fisheries.

The Council, at its April 1995 meeting, raised some concerns about proceeding with the Research Plan and requested NMFS to delay the solicitation process for awarding contracts to provide observers under the Research Plan during 1996. The Council also requested NMFS to initiate an amendment to the Research Plan that would delay full implementation of the Research Plan for at least 6 months.

NMFS informed the Council that the design and implementation of the Research Plan and its specification process are tied to an annual cycle. Mid-year implementation of the Research Plan would create significant administrative and operational problems. Therefore, NMFS suggested a 1-year delay of the full implementation of the Research Plan, rather than the 6-month delay requested by the Council. During a May 16, 1995, teleconference, the Council reaffirmed its desire to delay the Research Plan and agreed to extend the delay for a 1-year period. The Council sought a delay in full implementation of the Research Plan in order to provide additional time to reconsider certain elements of the Research Plan that were previously adopted by the Council. The Council's concerns are as follows: Minimum levels of observer insurance coverage, minimum number of contractors that will provide observer coverage, duration of contracts, notification requirements for obtaining observer coverage, allowances for emergency replacement of observers as well as transfer of observers among vessels, adequate monitoring and control of industry compliance with observer coverage requirements, and ability of supplemental or voluntary observer programs to meet increased compliance monitoring requirements of future management programs under consideration by the Council.

The Council also expressed its intent to continue the fee collection program implemented for 1995 for the remainder of the year, so that adequate start-up funds may be collected for full implementation of the Research Plan in 1997. This means that NMFS will continue to assess fees through early 1996 for fish harvested and retained in the Research Plan fisheries during the last few months of 1995. Collected funds would continue to be held in an interest-bearing account and would be used to award contracts to provide observers under the Research Plan starting in 1997.

The current Research Plan allows a delay in the full implementation of the plan beyond 1995, only if insufficient funds exist to support contract awards for the first half of 1996. NMFS believes that the 1995 fee collection program will provide sufficient funds to support contract awards to initiate full implementation of the Research Plan.

Through mid-July 1995, NMFS had collected $4.2 million in Research Plan fees. The final report "Establishing the Fee Percentage and Standard Exvessel Prices for 1995" (see **ADDRESSES**) estimates that $4.8 million will be needed for start-up funding to support contractual arrangements for observer coverage during the first 6 months of full implementation of the Research Plan. NMFS anticipates that this amount will be collected in 1995 and that full implementation of the Research Plan can be pursued for 1997.

Therefore, the Council's request to delay full implementation of the Research Plan requires an amendment to the Research Plan. At its June 1995 meeting, the Council requested that the date for full implementation of the Research Plan be established by regulations rather than by the Research Plan. The intent of this request was to allow for a revision of this date through a regulatory amendment, rather than an amendment to the Research Plan.

Given that adequate start-up funds will be collected during 1995, no reason exists to continue the fee collection program during 1996. As a result, Research Plan fees will not be assessed for fish caught in 1996. The annual Research Plan specification process becomes unnecessary for 1996, because no reason exists to establish a 1996 fee percentage or standard exvessel prices on which to base fee assessments. The Council intends that 1996 observer coverage levels remain unchanged from 1995 levels. These observer coverage requirements for the groundfish and crab fisheries are set out at § 677.10(a). As in 1995, participants in the groundfish and crab Research Plan fisheries would be responsible for making their own arrangements and paying for required observer coverage. As a result, specifications for observer embarkment/disembarkment ports for observers also are unnecessary for 1996.

The Council's intent to maintain 1995 observer coverage levels through 1996 would also apply to mothership processor vessel and shoreside processor observer coverage requirements set out in regulations implementing Amendment 35 to the FMP for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area. Final regulations implementing Amendment 35, published on July 5, 1995 (60 FR 34904) and codified at 50 CFR 675.25(b), are effective through December 31, 1995. In keeping with the Council's intent to maintain 1995 observer coverage levels in 1996, NMFS proposes to extend the Amendment 35 requirements through 1996 by including them under regulations implementing 1996 Research Plan observer coverage requirements at § 677.10(a)(1). NMFS also proposes to clarify that the additional observer coverage requirements implemented under Amendment 35 are effective only through October 15 of the second pollock season defined under 50 CFR 675.23(e).

NMFS notes that regulations at § 677.10(g) set out vessel safety requirements applicable in 1996 and beyond. No changes to these requirements are proposed, however, the regulatory text would be revised to clarify that these requirements apply to vessels required to carry observers in 1996 under § 677.10(a).

NMFS further notes that the following sections of the Observer Plan still would be in effect until full implementation of the Research Plan in 1997: (1) Standards of observer conduct; and (2) Description, specifications, and work statement for certified domestic observer contractors, including conflict of interest standards for NMFS-certified observers and contractors and conditions for contractor and observer certification revocation. Copies of the Observer Plan dated May 1994 are available from NMFS (see **ADDRESSES**).

Public comments on the proposed amendment to the Research Plan and its implementing regulations are invited for 60 days. During this comment period, NMFS will conduct public hearings, as required by section 313(c)(2) of the Magnuson Act, in Alaska, Oregon, and Washington to receive public comments on the proposed regulations (see **DATES** and **ADDRESSES** for dates and locations). NMFS will consider the public comments received in preparing the final rule implementing the amendment.

Classification

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. An effect of the proposed rule would be to eliminate the 1996 fee assessment program authorized under the Research Plan.

The vessel owners who will benefit from this delay are those owners whose vessels fall into the following categories: about 4,000 halibut vessels, 1,400 groundfish vessels less than 60 ft length overall (LOA), and approximately 270 crab catcher vessels; these owners will be relieved from having to pay the Research Plan fee and will not be required to have observer coverage. In addition, owners of all processors will benefit because they will pay the direct observer cost which is less than the Research Plan fee. Groundfish catcher vessels over 60 ft LOA will pay direct observer costs; these costs will equal or exceed the Research Plan fee. In general the direct observer costs are about 1.1 percent of the exvessel value of landings. About 30 crab catcher vessels are required to carry observers. Owners of most of these vessels will pay direct observer costs that may be 2 to 4 times higher than what they would pay in terms of Research Plan fees.

Thus, while the proposed rule would affect a substantial number of small entities during 1996, the effect would not be economically significant. As a result, a regulatory flexibility analysis was not prepared. This proposed rule has been determined to be not significant for purposes of E.O. 12866.

List of Subjects in 50 CFR Part 677

Fisheries, Reporting and recordkeeping requirements.

Dated: September 5, 1995

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 677 is proposed to be amended as follows:

PART 677—NORTH PACIFIC FISHERIES RESEARCH PLAN

1. The authority citation for part 677 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 677.6, paragraph (b)(2) is redesignated as paragraph (b)(3), a new paragraph (b)(2) is added, and the heading to newly redesignated paragraph (b)(3) is revised to read as follows:

§ 677.6 Research Plan fee.

* * * * *

(b) * * *

(2) *Fee assessments during 1996.* Processors of Research Plan fisheries will not be assessed fees based on catch from Research Plan fisheries that is retained during the 1996 calendar year.

(3) *Fee assessments applicable after December 31, 1996.* * * *

* * * * *

3. In § 677.10, the headings for paragraphs (a) and (b) and the introductory text to paragraph (g) are revised, paragraphs (a)(1)(i)(C) through (a)(1)(i)(F) are redesignated as paragraphs (a)(1)(i)(D) through (a)(1)(i)(G), respectively and paragraphs (a)(1)(i)(C) and (a)(2)(iii) are added to read as follows:

§ 677.10 General requirements.

(a) *Observer requirements applicable through December 31, 1996.* (1) * * *

(i) * * *

(C) Each mothership processor vessel that receives pollock harvested by catcher vessels in the catcher vessel operational area, defined at § 675.22(g) of this chapter, during the second pollock season that starts on August 15 under § 675.23(e) of this chapter, is required to have a second NMFS-certified observer aboard, in addition to the observer required under paragraphs (a)(1)(i)(A) and (B) of this section, for each day of the second pollock season until the chum salmon savings area is closed under § 675.22(h)(2) of this chapter, or October 15, 1996, whichever occurs first.

* * * * *

(2) * * *

(iii) Each shoreside processor that offloads pollock at more than one location on the same dock and has distinct and separate equipment at each location to process those pollock and that receives pollock harvested by catcher vessels in the catcher vessel operational area, defined at § 675.22(g) of this chapter, during the second pollock season that starts on August 15, under § 675.23(e) of this chapter, is required to have a NMFS-certified observer, in addition to the observer required under paragraphs (a)(2)(i) and (ii) of this section, at each location where pollock is offloaded, for each day of the second pollock season until the chum salmon savings area is closed under § 675.22(h)(2) of this chapter, or October 15, 1996, whichever occurs first.

* * * * *

(b) *Observer requirements applicable after December 31, 1996.* * * *

* * * * *

(g) *Vessel safety requirements applicable after December 31, 1995.* Any vessel that is required to carry observers under paragraph (a) or (b)(1) of this section must have onboard either:

* * * * *

4. In § 677.11, paragraph (a)(4) is revised to read as follows:

§ 677.11 Annual Research Plan specifications.

(a) * * *

(4) *Observer coverage.* For the period January 1, 1995, through December 31, 1996, observer coverage levels in Research Plan fisheries will be as required by § 677.10(a). After December 31, 1996, the level of observer coverage will be determined annually by NMFS, after consultation with the Council and the State of Alaska, and may vary by fishery and vessel or processor size, depending upon the objectives to be met for the groundfish, halibut, and king and Tanner crab fisheries. The Regional Director may change observer coverage inseason pursuant to § 677.10(b)(2)(ii).

* * * * *

Notices

Federal Register

Vol. 60, No. 175

Monday, September 11, 1995

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Intergovernmental Advisory Committee Meeting

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Intergovernmental Advisory Committee (IAC) will meet on September 28, 1995, at the Veterans of Foreign Wars Post 5689, 37410 Main Street, Burney, CA 96013. The purpose of the meeting is to continue discussions on the implementation of the Northwest Forest Plan. The meeting will begin at 9:00 a.m. on September 28 and continue until 4:30 p.m. the same day. The main agenda item will be discussions on policy implications of implementation and effectiveness monitoring. As time permits, other items on the agenda will include an update on Section II of the federal watershed analysis guide, a presentation from the California Coast Provincial Advisory Committee, and other topics relative to the Northwest Forest Plan. The IAC meeting will be open to the public. Written comments may be submitted for the record at the meeting. Time will also be scheduled for oral public comments. Interested persons are encouraged to attend.

FOR FURTHER INFORMATION CONTACT:

Questions regarding this meeting may be directed to Don Knowles, Executive Director, Regional Ecosystem Office, 333 SW 1st Avenue, P.O. Box 3623, Portland, OR 97208 (Phone: 503–326–6265).

Dated: September 5, 1995.

Donald R. Knowles,

Designated Federal Official.

[FR Doc. 95–22455 Filed 9–8–95; 8:45 am]

BILLING CODE 3410-11-M

Natural Resources Conservation Service

Honey Creek Watershed, Vigo and Clay Counties, IN

AGENCY: Natural Resources Conservation Service.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Regulations (40 CFR Part 1500); and the Natural Resources Conservation Service Regulations (7 CFR 650); The Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Honey Creek Watershed, Vigo and Clay Counties, Indiana.

FOR FURTHER INFORMATION CONTACT: Robert L. Eddleman, State Conservationist, Natural Resources Conservation Service, 6013 Lakeside Boulevard, Indianapolis, Indiana, 46278, telephone (317) 290–3200.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Robert L. Eddleman, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project purpose is a plan for flood control. The planned works of improvement covered by this Finding of No Significant Impact (FONSI) is the relocation of approximately 0.7 mile of Jordan Ditch.

The Notice of a FONSI has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Robert L. Eddleman.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904, Watershed Protection and Flood Prevention, and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials)

Robert L. Eddleman,

State Conservationist.

[FR Doc. 95–22404 Filed 9–8–95; 8:45 am]

BILLING CODE 3410-16-M

Muddy Fork of Silver Creek Watershed, Clark, Floyd and Washington Counties, IN

AGENCY: Natural Resources Conservation Service.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Regulations (40 CFR Part 1500); and the Natural Resources Conservation Service Regulations (7 CFR Part 650), the Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Muddy Fork of Silver Creek Watershed, Clark, Floyd, and Washington Counties, Indiana.

FOR FURTHER INFORMATION CONTACT: Robert L. Eddleman, State Conservationist, Natural Resources Conservation Service, 6013 Lakeside Boulevard, Indianapolis, Indiana 46278, telephone (317) 290–3200.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Robert L. Eddleman, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project purposes are a plan for flood control, watershed protection and municipal and industrial water supply. The planned works of improvement covered by this Finding of No Significant Impact (FONSI) is approximately 12.0 miles of debris removal, selective tree removal, and streambank stabilization.

The Notice of a FONSI has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Robert L. Eddleman.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904, Watershed Protection and Flood Prevention, and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials)

Robert L. Eddleman,
State Conservationist.

BILLING CODE 3410–16–M

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Export Administration (BXA).

Title: Exceptions to the Import Certification and Delivery Verification Procedures.

Agency Form Number: None.

OMB Approval Number: 0694-0001.

Type of Request: Extension of a currently approved collection.

Burden: 16 hours.

Number of Respondents: 31.

Avg Hours Per Response: Approximately 30 minutes.

Needs and Uses: The U.S. and participating countries have agreed to establish Import Certificate and Delivery Verification requirements to help control the disposition of strategically important commodities. This reporting requirement allows exporters to request an exception to the import certificate or delivery verification procedures. The information provided is used by BXA to determine if an exception request is warranted.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Title: Quarterly Report on Exports of Parts to Service Equipment Shipped Against a Validated Export License.

Agency Form Number: None.

OMB Approval Number: 0694–0003.

Type of Request: Extension of a currently approved collection.

Burden: 5 hours.

Number of Respondents: 2 respondents filing quarterly reports.

Avg Hours Per Response: 30 minutes for the reporting requirement and 1 minute for recordkeeping.

Needs and Uses: The Export Administration regulations permit firms to apply for export licenses or reexport authorizations to ship parts needed to service equipment previously exported under an export license. Once BXA grants authority to ship replacement parts, the exporter is required to submit a quarterly report. These reports are reviewed to make sure that there are no excessive shipments of spare parts.

Affected Public: Businesses or other for–profit organizations.

Frequency: Quarterly.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Foreign Availability Procedures and Criteria.

Agency Form Number: None.

OMB Approval Number: 0694–0004.

Type of Request: Extension of a currently approved collection.

Burden: 2,550 hours.

Number of Respondents: 10.

Avg Hours Per Response: Ranges between 105 and 300 hours.

Needs and Uses: BXA restricts the export of goods and technology that would make a significant contribution to the military potential of other countries, unless it can be determined that foreign availability of the same goods and technology makes export controls ineffective. The information provided is used in determining whether to conduct a foreign availability assessment.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Report of Requests for Restrictive Trade Practice or Boycott.

Agency Form Numbers: BXA–621P, 6051P, 6051P–a.

OMB Approval Number: 0694–0012.

Type of Request: Extension of a currently approved collection.

Burden: 14,776 reporting and recordkeeping hours.

Number of Respondents: 1,187.

Avg Hours Per Response: Varies between 1 and 30 hours depending on the requirement and one minute for each record maintained.

Needs and Uses: The Export Administration Regulations require U.S. persons to report any requests that they have received to take any action to comply with, further, or support an unsanctioned foreign boycott. The information provided by firms is used by BXA to monitor requests for participation in foreign boycotts, analyze changing trends for purposes of deciding U.S. policy of discouraging participation in restrictive trade practices, and to initiate boycott investigations. Without this data, BXA would not have an adequate factual basis for implementing the U.S. boycott program.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Statement by Ultimate Consignee and Purchaser.

Agency Form Number: BXA 629P.

OMB Approval Number: 0694–0021.

Type of Request: Extension of a currently approved collection.

Burden: 4,289 hours.

Number of Respondents: 4,289.

Avg Hours Per Response: 1 hour.

Needs and Uses: Most export license application requests must be accompanied by supporting documents designed to elicit information concerning the intended end–use and end–user of the goods abroad. In order to verify what the U.S. exporter has told BXA about the shipment, the ultimate consignee and purchaser are also required to provide information on the use of the item. The information is used in making licensing decisions.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Quarterly Report of the Loan or Sale of Aircraft Equipment Parts, Accessories and Components by Airlines.

Agency Form Number: None.

OMB Approval Number: 0694–0035.

Type of Request: Extension of a currently approved collection.

Burden: 819 hours.

Number of Respondents: 190.

Avg Hours Per Response: Annual recordkeeping time per respondent is 4.3 hours and 2 hours for those companies that need to file quarterly reports.

Needs and Uses: The Export Administration regulations allow airlines operating abroad to lend or sell U.S. airplane parts to another airline without written BXA authority. Airlines participating must maintain records of these transactions. For those countries in which inspections are now allowed, airlines must submit quarterly reports on equipment transfers. If this procedure were not in place, individual validated licenses would be required.

Affected Public: Businesses or other for–profit organizations.

Frequency: Quarterly, recordkeeping.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Report on Unscheduled Unloading and or Return of Cargo.

Agency Form Number: None.

OMB Approval Number: 0694–0040.

Type of Request: Extension of a currently approved collection.

Burden: 2 hours.

Number of Respondents: 2.

Avg Hours Per Response: 1 hour.

Needs and Uses: On rare occasions, a carrier may find itself in an emergency situation in which controlled goods or technology are unloaded at a destination other than shown on the Shipper's Export Declaration. In such instances, the carrier must notify BXA. Also, a carrier who believes that a shipment may be in violation must notify BXA. This data collection supports BXA's mission of controlling items for national security or foreign policy reasons.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Procedure for Voluntary Self–Disclosure of Violations of the Export Administration Act.

Agency Form Number: None.

OMB Approval Number: 0694–0058.

Type of Request: Extension of a currently approved collection.

Burden: 670 hours.

Number of Respondents: 67.

Avg Hours Per Response: 10 hours.

Needs and Uses: BXA has established procedures for voluntary self–disclosure of export violations. The information provided is used by Export Enforcement to investigate and assess the nature and gravity of the violation. By having such a procedure, it allows BXA to administer the regulations more effectively.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Telecommunications.

Agency Form Number: None.

OMB Approval Number: 0694–0078.

Type of Request: Extension of a currently approved collection.

Burden: 92 hours.

Number of Respondents: 15.

Avg Hours Per Response: Varies per the requirement from 15 minutes to 2 hours.

Needs and Uses: For the shipment of telecommunications equipment to proscribed countries, exporters must provide end use assurances and provide detailed information on the proposed use. The information is used for licensing decisions and for enforcement purposes once a license is issued.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Import Certificates and End–User Certificates.

Agency Form Number: None.

OMB Approval Number: None.

Type of Request: Existing collection in use without an OMB control number.

Burden: 1,144 hours.

Number of Respondents: 4,576.

Avg Hours Per Response: 15 minutes.

Needs and Uses: A number of countries are participating in a program to control the trade of strategic commodities through the Import Certificate–Delivery Verification procedure. This collection of information is the certification of the overseas importer to the U.S. Government that they will not reexport commodities except in accordance with U.S. export regulations.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: Bureau of Export Administration (BXA).

Title: Procedures for Acceptance or Rejection of Rated Order.

Agency Form Number: None.

OMB Approval Number: None.

Type of Request: Existing collection in use without an OMB control number.

Burden: 31,500 hours.

Number of Respondents: 25,000 with multiple responses.

Avg Hours Per Response: Approximately 15 minutes.

Needs and Uses: This requirement is needed for the administration of the Defense Production Act. The purpose of the Act is to ensure the timely delivery of goods and services to meet current national defense and emergency preparedness requirements. To help ensure the timely delivery, suppliers must accept or reject defense rated orders and must do so by writing or by electronic means.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Request for Restoration Ideas – New Bedford Harbor.

Agency Form Number: None assigned.

OMB Approval Number: None.

Type of Request: New Collection.

Burden: 100 hours.

Number of Respondents: 50.

Avg Hours Per Response: 1 hours — 2 responses per respondent.

Needs and Uses: Under the Comprehensive Environmental Response, Compensation and Liability Act, state and federal natural resource trustees, are responsible for the restoration of natural resources injured by releases of hazardous substances. The collection provides an opportunity for the public to submit ideas for restoration of resources that were injured by the release of contaminated materials in the New Bedford environment.

Affected Public: Individuals, businesses or other for–profit organizations, not–for–profit institutions, state, local or tribal government.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Northeast Region Dealer Purchase Reports.

Agency Form Numbers: NOAA 88–30 and 88–142.

OMB Approval Number: 0648–0229.

Type of Request: Revision of a currently approved collection.

Burden: 2,801 hours.

Number of Respondents: 1,120 with multiple responses.

Avg Hours Per Response: Ranges between 2 and 30 minutes depending on the requirement.

Needs and Uses: Fishery statistics are collected by NMFS so that the Nation's fishery resources can be managed effectively. Dealer reporting is needed to obtain fishery dependent data on the landings and purchase of fish and shellfish to monitor, evaluate, and enforce fishery regulations, collect basic fishery statistics and to collect certain effort information for economic and biological assessment of the stocks.

Affected Public: Businesses or other for–profit organizations.

Frequency: On occasion, weekly.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Cooperative Game Fish Tagging Report.

Agency Form Number: NOAA 88–162.

OMB Approval Number: 0648–0247.

Type of Collection: Extension of a currently approved collection.

Burden: 450 hours.

Number of Respondents: 1,500.

Avg Hours Per Response: 2 minutes.

Needs and Uses: Data are needed to determine migratory patterns, distance traveled, stock boundaries, age, and growth patterns of billfish and other recreational and commercially–valued species. Anglers volunteer to tag and release fish, submitting a tagging card with information of the fish released and the location of release. This information is used with information on returned tags to perform analyses necessary for the development of fishery management plans.

Affected Public: Individuals.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Don Arbuckle, (202) 395–7340.

Copies of the above information collection proposals can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to Don Arbuckle, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, D.C. 20503.

Dated: August 30, 1995

Gerald Tache,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–CW–F

Foreign-Trade Zones Board

[Docket 49–95]

Proposed Foreign-Trade Zone—St. Lucie County, FL; Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Central Florida Foreign-Trade Zone, Inc. (a not-for-profit corporation), to establish a general-purpose foreign-trade zone at sites in St. Lucie County, Florida, within the limits of the Fort Pierce Customs Station, which, with Customs concurrence, is considered the functional equivalent of a Customs port of entry for purposes of foreign-trade zone status. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on August 31, 1995. The applicant is authorized to make the proposal under Section 288.36, Florida Statutes Annotated.

The proposed new zone would consist of 3 sites (1,588 acres) in St. Lucie County: *Site 1* (1,078 acres)—St. Lucie County International Airport; *Site 2* (102 acres)—King's Highway Industrial Park, intersection of King's Highway and Commercial Circle, Fort Pierce; and, *Site 3* (408 acres)—St. Lucie West Commerce Park, 590 N.W. Peacock Blvd., Port St. Lucie.

The application contains evidence of the need for zone services in the St. Lucie County area. Several firms have indicated an interest in using zone procedures for warehousing/distribution of such items as machine tools, electronic components, medical equipment, food processing/manufacturing, aircraft manufacture, and boat building/marine industry. Specific manufacturing approvals are not being sought at this time. Requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

As part of the investigation, the Commerce examiner will hold a public hearing on September 29, 1995, at 2:30 p.m., at the Fort Pierce Community Center, 600 N. Indian River Drive, Fort Pierce, Florida 34950.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is [60 days from date of publication]. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to [75 days from date of publication].

A copy of the application and accompanying exhibits will be available during this time for public inspection at the following locations:

Fort Pierce Station,
U.S. Customs Service,
2990 Aviation Way,
Fort Pierce, Florida 34946
Office of the Executive Secretary,
Foreign-Trade Zones Board, Room 3716,
U.S. Department of Commerce,
14th & Pennsylvania Avenue, NW.,
Washington, DC 20230

Dated: September 5, 1995.

John J. DaPonte, Jr.,

Executive Secretary.

[FR Doc. 95–22503 Filed 9–8–95; 8:45 am]

BILLING CODE 3510–DS–P

[Order No. 766]

Grant of Authority for Expansion Foreign-Trade Subzone 9B Kerr Pacific Corporation (Animal Feeds) Honolulu, Hawaii

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment * * * of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs ports of entry;

Whereas, the Board's regulations (15 CFR Part 400) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved;

Whereas, an application from the Department of Business, Economic Development & Tourism of the State of Hawaii, grantee of Foreign-Trade Zone 9 (Honolulu, Hawaii), requesting authority to expand the scope of activity conducted under zone procedures at FTZ Subzone 9B, at the Kerr Pacific Corporation/HFM Division plant, (formerly Hawaiian Flour Mills, Inc.) in Honolulu, Hawaii, to include the production of animal feed solely for Hawaiian and export markets, and requesting authority to expand the subzone boundary, was filed by the Board on June 8, 1994, and notice inviting public comment was given in the **Federal Register** (FTZ Docket 24–94, 59 FR 35095, 7/8/94); and,

Whereas, the Board has found that the requirements of the FTZ Act and Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, Therefore, the Board hereby authorizes the expansion of the subzone boundaries and the scope of activity at Subzone 9B at the plant site of Kerr Pacific Corporation/HFM Division, in Honolulu, Hawaii, as described in the application, and subject to the FTZ Act and the Board's regulations, including § 400.28.

Signed at Washington, DC, this 1st day of September 1995.

Paul L. Joffe,

Acting Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

Attest:

John J. DaPonte, Jr.,

Executive Secretary.

BILLING CODE 3510–DS–P

[Order No. 767]

Grant of Authority for Subzone Status; Rotorex Company, Inc. (Rotary Compressors), Walkersville, MD

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment * * * of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs ports of entry;

Whereas, the Board's regulations (15 CFR Part 400) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved;

Whereas, an application from the Maryland Department of Transportation, grantee of Foreign-Trade Zone 73, for authority to establish special-purpose subzone status at the rotary compressor manufacturing plant of the Rotorex Company, Inc., in Walkersville, Maryland, was filed by the Board on September 6, 1994, and notice inviting public comment was given in the **Federal Register** (FTZ Docket 30–94, 59 FR 48850, 9–23–94); and

Whereas, the Board has found that the requirements of the FTZ Act and Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, Therefore, the Board hereby authorizes the establishment of a subzone (Subzone 73A) at the Rotorex Company, Inc., plant in Walkersville, Maryland, at the location described in the application, subject to the FTZ Act and the Board's regulations, including § 400.28.

Signed at Washington, DC, this 1st day of September 1995.

Paul L. Joffe,

Acting Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

Attest:

BILLING CODE 3510–DS–P

[Order No. 764]

Expansion of Foreign-Trade Zone 122, Corpus Christi, TX

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, an application from the Port of Corpus Christi Authority, grantee of Foreign-Trade Zone No. 122, requesting authority to expand its general-purpose zone in the Corpus Christi, Texas, area, within the Corpus Christi Customs port of entry, was filed by the Foreign-Trade Zones (FTZ) Board on August 25, 1994 (Docket 29–94, 59 FR 48850, 9/23/94);

Whereas, notice inviting public comment was given in the **Federal Register** and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board has found that the requirements of the Act and the regulations are satisfied, and that the proposal is in the public interest;

Now, Therefore, the Board hereby orders:

The grantee is authorized to expand its zone as requested in the application, subject to the Act and the Board's regulations, including § 400.28, and subject to a 2,000-acre activation limit.

Signed at Washington, DC, this 1st day of September 1995.

Paul L. Joffe,

Acting Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

Attest:

BILLING CODE 3510–DS–P

International Trade Administration

[A–580–812]

Dynamic Random Access Memory Semiconductors of One Megabit or Above From the Republic of Korea; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration/International Trade Administration/Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to requests from three respondents, one U.S. producer, and several interested parties, the Department of Commerce (the Department) has conducted an administrative review of the antidumping duty order on dynamic random access memory semiconductors of one megabit or above from the Republic of Korea. The review covers three manufacturers/exporters of the subject merchandise to the United States for the period of October 29, 1992 through April 30, 1994

We have preliminarily determined that sales have been made below the foreign market value (FMV). If these preliminary results are adopted in our final results of administrative review, we will instruct U.S. Customs to assess antidumping duties equal to the difference between the United States price (USP) and the FMV. Interested parties are invited to comment on these preliminary results. Parties who submit arguments in this proceeding are requested to submit with the argument (1) a statement of the issue, and (2) a brief summary of the argument.

EFFECTIVE DATE: September 11, 1995.

FOR FURTHER INFORMATION CONTACT: Thomas F. Futtner, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, telephone: (202) 482–3814.

SUPPLEMENTARY INFORMATION:

Background

On May 10, 1993, the Department of Commerce published in the **Federal Register** (58 FR 27520) the antidumping duty order on dynamic random access memory semiconductors (DRAMS) from the Republic of Korea. On May 4, 1994, the Department published (59 FR 23051) a notice of "Opportunity to Request an Administrative Review" of this antidumping duty order for the period of October 29, 1992, through April 30, 1994. We received timely requests for review from Hyundai Electronics Industries, Co. (Hyundai), Goldstar Electron Co. (Goldstar), and Samsung Electronics Co. (Samsung). The petitioner, Micron Technologies Inc., requested an administrative review of these same three Korean manufacturers of DRAMs. Two interested parties, PNY Electronics and Pulsar Components International, Inc., requested a review of sixteen Japanese resellers of Korean DRAMs. However, these two interested parties subsequently withdrew their request. On June 15, 1994, the Department initiated a review of the above Korean manufacturers (59 FR 30770). The period of review (POR) for all respondents was October 29, 1992, through April 30, 1994.

The Department is conducting this administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act). Unless otherwise indicated, all citations to the statute and to the Department's regulations are in reference to the provisions as they existed on December 31, 1994.

Scope of the Review

Imports covered by the review are shipments of DRAMs of one megabit and above from the Republic of Korea (Korea). For purposes of this review, DRAMs are all one megabit and above DRAMs, whether assembled or unassembled. Assembled DRAMs include all package types. Unassembled DRAMs include processed wafers, uncut die and cut die. Processed wafers produced in Korea, but packaged, or assembled into memory modules in a third country, are included in the scope; wafers produced in a third country and assembled or packaged in Korea are not included in the scope.

The scope of this review includes memory modules. A memory module is a collection of DRAMs, the sole function of which is memory. Modules include single in-line processing modules (SIPs), single in-line memory modules (SIMMs), or other collections of DRAMs, whether unmounted or mounted on a circuit board. Modules that contain other parts that are needed to support the function of memory are covered. Only those modules which contain additional items which alter the function of the module to something other than memory, such as video graphics adapter (VGA) boards and cards, are not included in the scope.

The scope of this review also includes video random access memory semiconductors (VRAMs), as well as any future packaging and assembling of DRAMs.

The scope of this review also includes removable memory modules placed on motherboards, with or without a central processing unit (CPU), unless the importer of motherboards certifies with the Customs Service that neither it, nor a party related to it or under contract to it, will remove the modules from the motherboards after importation. The scope of this review does not include DRAMs or memory modules that are reimported for repair or replacement.

The DRAMs subject to this review are classifiable under subheadings 8542.11.0001, 8542.11.0024, 8542.11.0026, and 8542.11.0034 of the Harmonized Tariff Schedule of the United States (HTSUS). Also included in the scope are those removable Korean DRAMs contained on or within products classifiable under subheadings 8471.91.0000 and 8473.30.4000 of the HTSUS. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this review remains dispositive.

United States Price

In calculating USP, the Department treated respondents' sales as purchase price, as defined in section 772(b) of the Act, when the merchandise was sold to unrelated U.S. purchasers prior to importation. The Department treated respondents' sales as exporter's sale price (ESP), as defined in section 772(c) of the Act, when the merchandise was sold to unrelated U.S. purchasers after importation.

We calculated purchase price based on packed, f.o.b., f.c.a., or c.i.f. prices to unrelated customers in the United States. We made deductions, where appropriate, for foreign brokerage and handling, foreign inland insurance, air freight, air insurance, U.S. duties, U.S. commissions, discounts, and rebates in accordance with section 772(d)(2) of the Act.

We calculated ESP based on packed, ex-U.S. warehouse prices to unrelated customers in the United States. We made deductions, where appropriate, for discounts, rebates, foreign brokerage and handling, foreign inland insurance, air freight, air insurance, U.S. duties, credit expenses, warranty expenses, royalty payments, U.S. commissions, advertising and promotion expenses, foreign banking charges, U.S. subsidiary packing expenses and U.S. and Korean indirect selling expenses, including inventory carrying costs in accordance with section 772(d)(2) of the Act. For both purchase price and ESP sales, we added duty drawback, where applicable, pursuant to section 772(d)(1)(B) of the Act.

We adjusted USP for taxes in accordance with our practice as outlined in *Siliconmanganese from Venezuela, Preliminary Determination of Sales at Less-Than-Fair-Value (LTFV)*, 59 FR 31204 (June 17, 1994). For DRAMs that were further manufactured into memory modules after importation, we deducted all value added in the United States, pursuant to section 772(e)(3) of the Act. The value added consists of the costs of the materials, fabrication, and general expenses associated with the portion of the merchandise further manufactured in the United States, as well as a proportional amount of profit or loss attributable to the value added. *See, e.g., Notice of Final Determination of Sales at LTFV; Certain Hot-Rolled Carbon Steel Flat Product, Certain Cold-Rolled Carbon Steel Flat Product, Certain Corrosion-Resistant Carbon Steel Flat Products and Certain Cut-to-Length Carbon Steel Plate from France*, 58 FR 37125 (July 9, 1993). Profit or loss was calculated by deducting from the sales price of the memory module all production and selling costs incurred by the company for the memory module. The total profit or loss was then allocated proportionately to all components of cost. Only the profit or loss attributable to the valued added was deducted. In determining the costs incurred to produce the memory module, we included materials, fabrication, and general expenses, including selling expenses and interest expenses. No other adjustments were claimed or allowed.

Foreign Market Value

In order to determine whether there were sufficient sales of DRAMs in the home market to serve as a viable basis for calculating FMV, we compared the volume of home market sales of DRAMs to the volume of third country sales of DRAMs, in accordance with section 773(a)(1) of the Act. All three respondents had viable home markets with respect to sales of DRAMs made during the POR in accordance with 19 CFR 353.48(a). The Department relied on monthly weighted-average home market prices in the calculation of FMV.

Because Goldstar made some home market sales to related parties during the POR, we tested these sales to ensure that, on average, the related party sales were at arms length. To conduct this test, we compared the gross unit prices of sales to related and unrelated customers net of all movement charges, direct and indirect selling expenses, valued-added tax and packing. *See Final Determination of Sales at LTFV; Certain Cold-Rolled Carbon Steel Flat Products from Argentina, Appendix II*, 58 FR 87062 (July 9, 1993). Based on the results of that test, we discarded from Goldstar's home market database all related party sales not made at arm's length. *See Notice of Final Determination of Sales at LTFV; Small Diameter Circular Seamless Carbon and Alloy Steel, Standard, Line and Pressure Pipe from Brazil*, 60 FR 31960, 31971 (June 19, 1995).

Because the Department found sales made at prices less than the cost of production (COP) during the less than fair value (LTFV) investigation, in accordance with our standard practice, we found reasonable grounds to believe or suspect that all three respondents had made sales at prices below the COP in the home market during the POR. Thus in accordance with section 773(b) of the Act, we examined whether the home market sales of each model were made at prices below their COP in substantial quantities over an extended period of time, and whether such sales were made at prices which would permit recovery of all costs within a reasonable period of time in the normal course of trade.

We performed a model-specific COP test, in which we examined whether each home market sale was priced below the merchandise's COP. The Department defines COP as the sum of direct material, direct labor, variable and fixed factory overhead, general expenses, and packaging costs (19 CFR 353.51(c)(1994)). *See Stainless Steel Hollow Products from Sweden; Preliminary Results of Antidumping Duty Administrative Review*, 59 FR 40521 (August 9, 1994). For each model, we compared this sum to the reported home market unit price, net of price adjustments and movement expenses.

For each model where less than ten percent, by quantity, of the home market sales during the POR were made at prices below the COP, we included all sales of that model in the computation of FMV. For each model where ten percent or more, but less than ninety percent, of the home market sales during the POR were priced below the merchandise's COP, we excluded from the calculation of FMV those home market sales which were priced below the merchandise's COP, provided that these below-cost sales were made over an extended period of time. For each model where ninety percent or more of the home market sales during the POR were priced below the COP and were made over an extended period of time, we disregarded all sales of that model from our analysis. *See Brass Sheet and Strip from Canada: Preliminary Results of Antidumping Duty Administrative Review*, 60 FR 50670 (April 27, 1995).

In order to determine whether below-cost sales had been made over an extended period of time, we compared the number of months in which below-cost sales occurred for each product to the number of months during the POR in which each model was sold. If a product was sold in fewer than three months during the POR, we did not exclude the below-cost sales unless there were below-cost sales in each month of sale. If a product was sold in three or more months, we did not exclude the below-cost sales unless there were below-cost sales in at least three months during the POR. *Id*.

Finally, respondents did not provide any information, nor is there any information on the record of this proceeding which indicates recovery of all costs within a reasonable period of time for sales found to have been made at prices below the cost of production. Therefore, in accordance with our practice, we have disregarded respondents' sales found to have been made at prices below the COP in substantial quantities over an extended period of time, which would not permit recovery of all costs within a reasonable period of time in the normal course of trade.

We calculated the COP for the merchandise based on the sum of each respondent's material costs, fabrication costs and general expenses in accordance with section 353.51(c) of the Department's regulations (19 CFR 353.51(c) (1994)). We adjusted respondents' cost data as described below:

For Hyundai, the Department relied on the submitted COP and constructed value (CV) information, except in the following instances where the costs were not appropriately quantified or valued:

1. We reclassified certain capitalized costs from R&D to current costs of production. We recalculated R&D costs to reflect the current costs incurred for all semiconductors.
2. We revised interest expense to reflect the proportional amount incurred by the semiconductor business.

For Goldstar, the Department relied on the submitted COP and CV information, except in the following instances where the costs were not appropriately quantified or valued:

1. We recalculated [illegible] costs to reflect the current costs incurred for all semiconductors.

For Samsung, the Department relied on the submitted COP and CV information, except in the following instances where the costs were not appropriately quantified or valued:

1. We recalculated R&D costs to reflect the current costs incurred for all semiconductors.
2. We revised interest expense to reflect the proportional amount incurred by the semiconductor business.

When all home market sales of a such or similar product in the contemporaneous month (as identified in the July 19, 1994 model match memorandum) were excluded from our analysis because the home market sales were priced below the COP, or when no home market sales of such or similar merchandise were found, then we used the CV of the merchandise sold in the United States as the basis for FMV in accordance with section 773(e) of the Act. We calculated the CV, in accordance with section 773(e) of the Act, as the sum of the cost of manufacture of the product sold in the United States, home market selling, general and administrative (SG&A) expenses, and home market profit. The cost of manufacture of the product sold in the United States is the sum of direct material, direct labor, and variable and fixed factory overhead expenses. For home market SG&A expenses, in accordance with section 773(e)(B)(i) of our regulations, we used the larger of the actual SG&A expenses reported by the respondents or ten percent of the cost of manufacture, the statutory minimum for foreign SG&A expenses. For home market profit, in accordance with section 773(e)(B)(ii) of our regulations, we used the larger of the actual profit reported by the respondents or the statutory minimum of eight percent of the sum of cost of manufacture and SG&A expenses. *See Polyethylene Terephthalate Film, Sheet, and Strip from the Republic of Korea; Preliminary Results of Antidumping*

Duty Administrative Review, 59 FR 35098, 35100 (July 8, 1994).

We calculated FMV based on delivered prices to unrelated customers and, where appropriate, to related customers in the home market. In calculating FMV, we made adjustments, where appropriate, for inland freight, inland insurance, discounts, rebates, Korean brokerage and handling charges, and home market credit expenses. We adjusted for Korean consumption tax in accordance with our practice as outlined in *Siliconmanganese from Venezuela, Preliminary Determination of Sales at LTFV*, 59 FR 31204 (June 17, 1994). We deducted home market packing costs from the home market price and added U.S. packing costs to the FMV. We also made, where applicable, difference-in-merchandise adjustments.

For comparison to purchase price sales, pursuant to 19 CFR 353.56, we made circumstance-of-sale adjustments to the FMV, where appropriate, for bank charges, royalty payments, and advertising. We made further adjustments, where appropriate, for U.S. commissions and credit expenses in accordance with 19 CFR 353.56(a)(2). Where commissions were paid on U.S. sales and not paid on home market sales, we allowed an offset to FMV amounting to the lesser of the weighted-average home market indirect selling expenses, or the U.S. commissions in accordance with 19 CFR 353.56(b) of our regulations.

For comparison to ESP sales, we made deductions, where appropriate, for credit expenses, royalty payments, bank charges and advertising expenses. We also allowed an ESP offset to the FMV, amounting to the lesser of the weighted-average total of home market indirect selling expenses, or he total U.S. indirect selling expenses plus commissions in accordance with 19 CFR 353.56(b)(2).

No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of this review, we preliminarily determine that the following margins exist for the POR:

Manufacturer/exporter	Percent margin
Hyundai Electronics Co., Ltd. .	0.202 (de minimis)
Samsung Electronics Co., Ltd.	0.9936 (de minimis)
Goldstar Electron Co., Ltd.	0.319 (de minimis)

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between the USP and the FMV may vary from the percentages stated above. Upon completion of the review the Department will issue appraisement instructions on each exporter directly to the U.S. Customs Service.

Furthermore, the following deposit requirements will be effective for all shipments of dynamic random access memory semiconductors of one megabit and above, assembled or unassembled, entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(1) of the Act.

(1) The cash deposit rate for the reviewed companies will be those rate established in the preliminary results of this review (except that no deposit will be required for firms with zero or de minimis margins; *i.e.*, margins less than 0.5%);

(2) For previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period;

(3) If the exporter is not a firm covered in this review or in the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and

(4) If neither the exporter nor the manufacturer is a firm covered in this or any previous review conducted by the Department, the cash deposit rates will be 3.85%, the "all other" rate established in the LTFV investigation.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

Interested parties may request disclosure within five days of the date of publication of this notice, and may request a hearing within ten days of the date of publication. Any hearing, if requested, will be held as early as convenient for the parties but not later than 44 days after the date of publication or the first work day thereafter. Case briefs or other written comments from interested parties may be submitted not later than 30 days after the date of publication of this notice. Rebuttal briefs and rebuttal comments, limited to issues in the case briefs, may be filed not later than 37 days after the date of publication. The Department will publish the final results of this administrative review, including the results of its analysis of issues raised in any such written comments.

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: August 16, 1995.

Susan G. Esserman,

Assistant Secretary for Import Administration.

[FR Doc. 95–22501 Filed 9–8–95; 8:45 am]

BILLING CODE 3510–DS–M

[A–533–806]

Sulfanilic Acid From India: Termination of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Termination of Antidumping Administrative Review.

SUMMARY: On April 14, 1995, the Department of Commerce (the Department) published in the **Federal Register** (60 FR 19017) the notice of initiation of the administrative review of the antidumping duty order on sulfanilic acid from India. This review has now been terminated as a result of a request by the respondents.

EFFECTIVE DATE: September 11, 1995.

FOR FURTHER INFORMATION CONTACT: Todd Peterson, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone: (202) 482–4195.

SUPPLEMENTARY INFORMATION:

Background

On March 29, 1995, Kokan Synthetics and M/S Kay International (collectively "Kokan and M/S Kay"), requested an administrative review of the antidumping duty order on sulfanilic acid from India for the period March 1, 1994, through February 28, 1995, pursuant to 19 CFR 353.22(a)(5). On April 14, 1995, the Department published in the **Federal Register** (60 FR 19017) the notice of initiation of that administrative review.

Kokan and M/S Kay timely withdrew their request for a review on June 26, 1995, pursuant to 19 CFR 353.22(a)(5). As a result, the Department has terminated the review.

This notice is published in accordance with section 751 of the Tariff Act of 1930, as amended (19 U.S.C. 1675 and 19 CFR 353.22(a)(5).

Dated: August 30, 1995.

Roland L. MacDonald,

Acting Deputy Assistant Secretary for Compliance.

[FR Doc. 95–22502 Filed 9–8–95; 8:45 am]

BILLING CODE 3510–DS–M

North American Free Trade Agreement, Article 1904 Binational Panel Reviews; Notice of Decision of Binational Panel

AGENCY: NAFTA Secretariat, United States Section, International Trade Administration, Department of Commerce.

ACTION: Notice of Decision of Binational Panel.

SUMMARY: On August 30, 1995 the binational panel in Secretariat Case Number MEX–94–1904–02 issued its decision. This panel was convened to review the final antidumping duty determination made by the Secretaria de Comercio y Fomento Industrial (SECOFI) with respect to Imports of Cut-Length Plate, Covered by Customs Tariff Classifications 7208.32.01, 7208.33.01, 7208.42.01 and 7208.43.01 of the Tariff Schedule of the General Tax Import Law, Originating in and Entering from the United States of America. The panel majority remanded the determination to SECOFI to issue a new determination within 21 days (by September 20, 1995) that terminates the proceeding. A copy of the complete panel decision is available from the NAFTA Secretariat.

FOR FURTHER INFORMATION CONTACT: James R. Holbein, United States Secretary, NAFTA Secretariat, Suite 2061, 14th and Constitution Avenue, Washington, D.C. 20230, (202) 482–5438.

SUPPLEMENTARY INFORMATION: Chapter 19 of the North American Free Trade Agreement ("Agreement") establishes a mechanism to replace domestic judicial review of final determinations in antidumping and countervailing duty cases involving imports from a NAFTA country with review by independent binational panels. When a Request for Panel Review is filed, a panel is established to act in place of national courts to review expeditiously the final determination to determine whether it conforms with the antidumping or countervailing duty law of the country that made the determination.

Under Article 1904 of the Agreement, which came into force on January 1, 1994, the Government of the United States, the Government of Canada and the Government of Mexico established *Rules of Procedure for Article 1904 Binational Panel Reviews* ("Rules"). These Rules were published in the **Federal Register** on February 23, 1994 (59 FR 8686). The binational panel review in this matter was conducted in accordance with these Rules.

Background

On September 1, 1994, Bethlehem Steel Corporation filed a First Request for Panel Review with the Mexican Section of the NAFTA Secretariat pursuant to Article 1904 of the North American Free Trade Agreement. On the same date, a Request for Panel Review was also filed by US Steel Group, a unit of USX Corporation. Panel review was requested of the final antidumping duty determination made by the Secretaria de Comercio y Fomento Industrial with respect to Imports of Cut-Length Plate, Covered by Customs Tariff Classifications 7208.32.01, 7208.33.01, 7208.42.01 and 7208.43.01 of the Tariff Schedule of the General Tax Import Law, Originating in and Entering from the United States of America. This determination was published in the *Diario Oficial* on Tuesday August 2, 1994. The NAFTA Secretariat has assigned Case Number MEX–94–1904–02 to this request.

Complaints were filed by both requestors challenging SECOFI's final determination in three areas:

1. Jurisdictional and technical errors;
2. Errors in the calculation of the dumping margin; and
3. Errors in causation and injury determinations.

Standard of Review

In reviewing SECOFI's final determination, the Panel determined that it must apply the standard of review and the general legal principles that a Mexican court (the Fiscal Tribunal) would apply when it reviews a final determination by SECOFI. The Panel interpreted this obligation to require it to apply Article 238 of the Federal Fiscal Code, in conjunction with Articles 237 and 239, to the maximum extent, consistent with the nature of the binational panel review process.

In deciding whether SECOFI's determination under this standard of review was in accordance with the antidumping law of Mexico, the Panel also determined that it was required to examine the applicable provisions of the Mexican Constitution, treaties, statutes, legislative history, regulations, administrative practice and judicial precedents—all to the extent that the Mexican Fiscal Tribunal would have relied on such legal sources.

The Panel further found that the guarantees of legality and legal security contained in Articles 14 and 16 of the Mexican Constitution impact both the interpretation to be given to the standard of review and to the substance and procedure of any Mexican antidumping proceeding. A primary function of judicial review by Mexican courts and, consequently, by the Panel, is the enforcement of these guarantees. The Panel concluded that in order for the actions of Mexican authorities to be legal, the agency issuing or carrying out such functions or performing such acts, must be "competent": the existence of the acting entity or unit must be formally established in a legal provision; and that entity or unit must only act in accordance with the express authority granted it by Mexican law.

Panel Decision

In its decision the majority of the Panel only addressed itself to Complainants' first areas of challenges—that SECOFI's actions were illegal because of jurisdictional errors—since as a consequence of its findings, the other areas of challenge became unnecessary to address.

The Panel decided the following:

1. The two administrative units that carried out the antidumping investigation and proceeding in its early stages (December 4, 1992–April 1, 1993), namely the Direccion General de Practicas Commerciales Internacionales (DGPCI) and the Direccion de Cuotas Compensatorias (DCC), were incompetent to do so. They were not duly created and established in the manner required by Mexican Law, and, therefore, their actions were illegal.
2. The visitation orders of July 13 and 14, 1993 were illegal because they were issued by an administrative unit that was incompetent to act.
3. The verification visits that took place on July 19–21, 1993 were performed in part by public officers (Director and Assistant Director of Investigation of Dumping and Subsidies) who lacked competence to act in that capacity because their administrative units had not been legally established.
4. The "external advisors" who participated in the verification visits also lacked competence to act.

Order of the Panel

Pursuant to NAFTA Article 1904.8, the Panel remanded SECOFI's Final Determination to SECOFI for action not inconsistent with its decision. In particular, it directed SECOFI to issue a new determination within 21 days that terminates the proceeding against the Complainants and provides that:

1. The exports of USX and Bethlehem of the goods subject to this proceeding enter Mexican territory with zero antidumping duties applied to them upon their importation; and
2. Any cash deposits or customs bonds relative to antidumping duties made or posted by the importers, in order to import the goods manufactured by USX and Bethlehem, be refunded or cancelled as appropriate.

Dated: September 5, 1995.

James R. Holbein,

United States Secretary, NAFTA Secretariat.

BILLING CODE 3510-GT-M

National Institute of Standards and Technology

Notice of Government Owned Inventions Available for Licensing

SUMMARY: The inventions listed below are owned by the U.S. Government, as represented by the Department of Commerce, and are available for licensing in accordance with 35 U.S.C. 207 and 37 CFR Part 404 to achieve expeditious commercialization of results of federally funded research and development.

FOR FURTHER INFORMATION CONTACT: Technical and licensing information on these inventions may be obtained by writing to: Marcia Salkeld, National Institute of Standards and Technology, Office of Technology Commercialization, Physics Building, Room B–256, Gaithersburg, MD 20899; Fax 301–869–2751. Any request for information should include the NIST Docket No. and Title for the relevant invention as indicated below.

SUPPLEMENTARY INFORMATION: The inventions available for licensing are:

NIST Docket No. 93–063

Title: Polymeric Amorphous Calcium Phosphate Compositions.

Description: Polymeric composites that can provide long-term release of calcium and phosphate ions in biological environments at levels conducive to the formation of hydroxyapatite have been developed. These composites utilize as their filler phase amorphous calcium phosphate, which is highly soluble and rapidly converts to hydroxyapatite. Such biomaterials have the potential to remineralize defective mineralized tissues such as bone or teeth.

NIST Docket No. 94–043

Title: Low Cost Renewable Polishing Lap.

Description: Researchers in the Precision Engineering Division at the National Institute of Standards and Technology have developed a new method for the fabrication of laps wherein the substrate never contacts the polishing media or part being polished. The invention provides the potential to eliminate contamination of the part and/or degradation of the substrate. The concept offers the potential to significantly lower costs in appropriate applications.

NIST Docket No. 95–023D

Title: Methods and Electrolyte Compositions for Electrodepositing Chromium Coatings.

Description: A NIST process deposits chromium plating up to 600 microns thick. The plating process uses nontoxic trivalent chromium to produce a plating three to four times harder, after heating, than depositions using hexavalent chromium.

Dated: September 5, 1995.

Samuel Kramer,

Associate Director.

BILLING CODE 3510-13-M

Open Forum on Laboratory Accreditation

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice.

SUMMARY: This notice announces an Open Forum for discussion of issues in laboratory accreditation. The forum is co-sponsored by ACIL (formerly American Council of Independent Laboratories), the American National Standards Institute (ANSI), and the National Institute of Standards and Technology (NIST). We invite all interested parties to attend and participate in defining needs for a more streamlined system to eliminate current duplication and unnecessary costs in laboratory accreditation. We hope to stimulate discussion on means for achieving greater compatibility, coordination, and mutual recognition of competent laboratory accreditation programs.

DATES: The forum will take place on Friday, October 13, 1995, at 9 a.m.

ADDRESSES: The forum will be held in the Red Auditorium at the National Institute of Standards and Technology, Gaithersburg, Maryland.

To register to attend the Open Forum and pay the $50 registration fee, interested parties may contact Lori Phillips, NIST, Administration Building, Room B–116, Gaithersburg, Maryland 20899, (301) 975–4513, facsimile (301) 948–2067.

FOR FURTHER INFORMATION CONTACT: Belinda Collins, Director, Office of Standards Services, NIST, (301) 975–4000, facsimile (301) 963–2871.

SUPPLEMENTARY INFORMATION:

Background

NIST, ACIL, and ANSI have explored issues facing both the private sector and government in laboratory accreditation. Multiple, duplicate assessments occur frequently for many laboratories, wasting resources for all parties. Procedures need to be developed, toward a goal of one assessment per laboratory, that are in accord with international guidelines and recognized by all who require laboratory accreditation. Laboratories, accreditors, industry, and federal and state governments must be considered, and the procedures must mesh with domestic and international requirements.

Problems of multiple and/or duplicate accreditations result from accreditation requirements that lack assurance for reciprocity, or constrain acceptance from outside sectors. Challenges raised by the National Research Council study, Standards, Conformity, Assessment and Trade," * * * domestic policies and procedures for assessing conformity of products and processes to standards require urgent improvement" must be addressed.

Speakers will address accreditation issues and problems related to trade needs, international perspectives, and U.S. economic impacts. They will consider the need for joint approaches by the private sector and government to further opportunities for greater acceptance of and reciprocity in laboratory accreditation programs.

Forum Announcement

Laboratory Accreditation in the United States

ACIL, ANSI, and NIST are cosponsoring an Open Forum for discussion of issues in laboratory accreditation. The forum will be an opportunity to define the needs for a more streamlined system to eliminate current duplication and unnecessary costs. There is widespread agreement that the current situation results in unnessary burdens. The forum is intended to stimulate discussion on means for achieving greater compatibility, coordination, and mutual recognition of competent laboratory accreditations. All interested parties are invited to attend and to express their views.

To date, several task groups have assessed the problems encountered by their communities. The various stakeholders include laboratories and their customers, accreditation organizations, industry, and government at all levels. They report overlapping and contradictory requirements among regulations, contractual specifications, and other voluntary applications, as well as a lack of reciprocity among bodies. The consequent duplication of effort costs time and money and seriously degrades U.S. competitiveness in domestic and global markets.

Laboratories, accreditors, manufacturers, the National Environmental Laboratory Accreditation Conference (NELAC), and government representatives, both federal and state, will present their views. They will discuss the cost of multiple accreditations for individual laboratories; conflicting requirements of those requiring accreditation; special programs tailored to narrow customer or supplier bases; non-uniformity of requirements and lack of reciprocity; international trade implications; and other pertinent factors.

A panel discussion and open exchange of ideas at the October 13 forum will explore concepts for future collaboration that will lead to "one-stop shopping" in laboratory accreditation.

Dated: September 5, 1995.

Samuel Kramer,

Associate Director.

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

[I.D. 083095E]

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of modification to permit no. 918 (P191E).

SUMMARY: Notice is hereby given that on August 30, 1995, Permit No. 918, issued to California Department of Fish and Game, 1416 Ninth Street, Sacramento, CA 95814, was modified.

ADDRESSES: The modification and related documents are available for review upon written request or by appointment in the following offices:

Permits Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130 Silver Spring, MD 20910 (301/712–2289); and

Southwest Region, NMFS, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213.

FOR FURTHER INFORMATION CONTACT: E. Ruth Johnson, 301/713–2289.

SUPPLEMENTARY INFORMATION: The subject modification has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the provisions of §§ 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as admended (16 U.S.C. 1543 et seq.), the regulations governing endangered species permit (50 CFR 217–222), the Fur Seal Act of 1966, and the regulations governing the taking of fur seals (50 CFR 215).

The Permit authorizes up to 30,000 Pacific harbor seals to be inadvertently harassed annually during aerial surveys and an unspecified number of California sea lions (*Zalophus californianus*), Northern elephant seals (*Mirounga angustrirostris*), and Northern fur seals (*Callorhinus ursinus*) will be opportunistically harassed during these surveys. This Permit was extended until September 30, 1999.

Dated: August 31, 1995.

Ann D. Terbush,

Chief, Permits and Documentation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-F

[I.D. 090195C]

New England Fishery Management Council; Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council (Council) will hold a 2-day public meeting to consider actions affecting New England fisheries in the exclusive economic zone.

DATES: The meeting will be held on September 13, 1995, at 10:00 a.m. and on September 14, 1995, at 9:00 a.m.

ADDRESSES: The meeting will be held at the Mariner's Church Banquet Center, 368 Fore Street, Portland, ME; telephone: (207) 774–7016.

Council address: New England Fishery Management Council, 5 Broadway, Saugus, MA 01906–1097.

FOR FURTHER INFORMATION CONTACT: Douglas G. Marshall, Executive Director, telephone: (617) 231–0422.

SUPPLEMENTARY INFORMATION: On September 13, the morning session will commence with a report from the Groundfish Committee on the status of Amendment #7 to the Northeast Multispecies Fishery Management Plan (FMP). There also will be an update and recommendation from the Aquaculture Committee on the Westport Scalloping enhancement project.

The Marine Mammal Committee will report during the afternoon session. Following that discussion, the Monkfish Committee will report on the progress to develop a monkfish total allowable catch and evaluate trip limits and qualification criteria for limited access, directed monkfish permits. This will be followed by the Gear Conflict Committee update on the Council's request for emergency action to close areas defined in the Southern New England Deepwater Gear Conflict Resolution.

On September 14, the morning session will begin with an update from the Lobster Committee Chairman on the progress of Amendment #6 to the Lobster FMP. Later, reports will be received from the Council Chairman, Executive Director, Northeast Regional Director, Northeast Fisheries Science Center, Atlantic States Marine Fisheries Commission, U.S. Coast Guard and the Mid-Atlantic Council Liaison.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Douglas G. Marshall at the Council (see **ADDRESSES**), at least 5 days prior to the meeting date.

Dated: September 5, 1995.

Richard W. Surdi,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

COMPETITIVENESS POLICY COUNCIL

Notice of Forthcoming Meeting

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the

Competitiveness Policy Council announces a forthcoming meeting.

DATES: September 14; 2 p.m. to 5 p.m.

ADDRESSES: Dirksen Senate Office Building, Room 11, Washington, D.C. 20510.

FOR FURTHER INFORMATION CONTACT: Howard Rosen, Executive Director, Competitiveness Policy Council, Suite 300, 1726 M Street, N.W., Washington, D.C. 20036, 632–1307.

SUPPLEMENTARY INFORMATION: The Competitiveness Policy Council (CPC) was established by the Competitiveness Policy Council Act, as contained in the Trade and Competitiveness Act of 1988, Public Law 100–418, sections 5201–5210, as amended by the Customs and Trade Act of 1990, Public Law 101–382, section 133. The CPC is composed of 12 members and is to advise the President and Congress on matters concerning competitiveness of the US economy. The Council's chairman, Dr. C. Fred Bergsten, will chair the meeting.

The meeting will be open to the public subject to the seating capacity of the room. Visitors will be requested to sign a visitor's register.

Type of Meeting: Open.

Agenda: The Council will discuss its annual report and consider additional business as suggested by its members.

Dated: September 5, 1995.

C. Fred Bergsten,

Chairman, Competitiveness Policy Council.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to the Office of Management and Budget (OMB) for Review

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paper Reduction Act (44 U.S.C. Chapter 35).

Title and OMB Control Number: Recreation Research—Use Surveys; OMB Control Number 0710–0002.

Type of Request: Expedited Processing—Approval date requested: 30 days following publication in the **Federal Register**.

Number of Respondents: 37,500.

Responses Per Respondent: 1.

Annual Responses: 37,500.

Average Burden Per Response: 5 minutes.

Annual Burden Hours: 3,000.

Needs and Uses: The information collected hereby, will be used to enhance research efforts directed toward evaluation, as well as increasing cost efficiency of, planning, design, and management of Corps of Engineers projects. It is also used to report visit information to Congress as required by statute.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Mr. Timothy G. Hunt.

Written comments and recommendations on the proposed information collection should be sent to Mr. Hunt at the Office of Management and Budget, Desk Officer for DoD, Room 10202, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William Pearce.

Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202–4302.

Dated: September 6, 1995.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Office of the Secretary

Meeting of the Semiconductor Technology Council; Notice

SUMMARY: Under the provisions of PL 92–463, the "Federal Advisory Committee Act," notice is hereby given that the Semiconductor Technology Council will hold its third meeting. The Council's mission is to: Link industry and national security needs to opportunities for cooperative investments, foster pre-competitive cooperation among industry, government and academia, recommend opportunities for new R&D efforts and potential to rationalize and align on-going industry and government investments. Part of the meeting will be closed to the public in accordance with Section 10(d) of the Federal Advisory Committee Act, and pursuant to the appropriate provisions of Section 552b(c) (3) and (4), Title 5, U.S.C. There will be an open section from 12:30 to 1:30 p.m. for a discussion of MicroElectroMechanical Systems (MEMS) technology. Advanced registration is required for this session.

DATES: September 18, 1995.

ADDRESSES: 1300 N. 17th St., Suite 1450, Arlington, VA 22209.

FOR FURTHER INFORMATION CONTACT: Dr. Lance Glasser, Director, ARPA/ETO, 3701 N. Fairfax Drive, Arlington, VA 22203–1714; telephone: 703/696–2213.

Dated: September 6, 1995.

BILLING CODE 5000-04-M

Department of the Army; Corps of Engineers

Intent to Prepare an Environmental Impact Statement for the Proposed McDonald Gold Project, Lincoln, MT

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The proposed action is an open-pit mining operation with ore processed by heap leaching, and gold and silver recovered by carbon adsorption. The project would be located in Lewis and Clark County, approximately 8 miles east of Lincoln, Montana. The project area covers 5,400 acres above the confluence of the Landers Fork with the Blackfoot River. The majority of the gold deposit lies on state land in Section 6, T14N, R7W. Major facilities would include rock piles, heap leach pads, solution ponds, processing equipment, and auxiliary buildings. Two miles of Montana Highway 200 would relocated 1,200 feet to the south. A project life of 25 years, from construction to reclamation, is anticipated.

The applicant has determined that 205 million tons of ore can be mined and processed economically at a gold price of $375/ounce. This will require the removal of 440 million tons of barren rock to uncover the ore, for a total of over 600 million tons of rock to be removed from the open pit. Phelps Dodge Mining Company, the majority partner in the Seven-Up Pete Joint Venture, will be the operator of the proposed mine. Phelps Dodge advocates a commitment to mining in an environmentally responsible manner.

The Seven-Up Pete Joint Venture identified 16 candidate sites for either rock pile or heap leach sites. All sites were within a 4-mile radius of the McDonald gold deposit. The Co-Lead agencies for preparation of the EIS have requested the applicant to consider additional alternative sites, and that some facilities be broken into smaller units (i.e., three 100 million ton waste rock piles instead of one 300 million ton waste rock pile. The Lead Agencies will also specifically solicit comments from cooperating agencies and the interested public regarding alternatives.

DATES: Public Scoping Meeting, October 12, 1995, 7 p.m., Lincoln Community Hall, Lincoln, Montana.

ADDRESSES: U.S. Army Corps of Engineers, Omaha District, Planning Division, 215 North 17th Street, Omaha, Nebraska 68102–4978; Montana Department of Environmental Quality, Hard Rock Bureau, Reclamation Division, 1625 11th Avenue Helena, Montana 59620–1601.

FOR FURTHER INFORMATION CONTACT: Bob Nebel, U.S. Army Corps of Engineers, (402) 221–4621, or Jim Robinson, Montana Department of Environmental Quality, (406) 444–4958.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

BILLING CODE 3710-62-M

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Lower Atchafalaya Basin Reevaluation Study, Louisiana

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: This study proposes to develop recommendable solutions for flood control, navigation, and environmental problems in the Atchafalaya Basin Floodway System and adjacent backwater areas. Alternatives being considered consist of various structural and non-structural measures, and will be compared to the no-action alternative.

FOR FURTHER INFORMATION: Questions regarding the proposed study should be addressed to Mr. Troy Constance, U.S. Army Corps of Engineers; Planning Division (CELMN–PD–FB), P.O. Box 60267, New Orleans, Louisiana 70160–0267, telephone (504) 862–2742.

SUPPLEMENTARY INFORMATION: 1. *Authority*. The Atchafalaya Basin project was authorized by the Flood Control Act of 1928 and subsequently modified by the Acts of 1934, 1936, 1938, 1941, 1946, 1950, and 1954. The United States Senate Report to the 1994 Energy and Water Development Act (PL 103–126), dated 28 October 1993, directed the Corps to use available funds to investigate conditions at Wax Lake Outlet, Bayou Black, and other features and recommend any modifications desirable for flood protection, navigation, and environmental management.

2. *Proposed Action*. Under the proposed action, the existing project will be investigated to identify possible improvements to the navigation, flood control, environmental, and operation and maintenance features of the Atchafalaya Basin Floodway System, Louisiana, project.

3. *Alternatives*. The alternatives being considered include regulating water distribution in the lower floodway between the Lower Atchafalaya River and the Wax Lake Outlet; construction of a barrier around Morgan City, Louisiana, to prevent flooding from river backflooding events, moving the navigation channel from the Lower Atchafalaya River; and channel development in the upper backwater areas to facilitate drainage from rainfall events.

4. *Scoping Process*. a. Public input for scoping will be achieved through the distribution of a widely circulated Scoping Input Request to all segments of the public having an interest in the study/project. In addition, scoping meetings will be held in the vicinity of Plaquemine, Morgan City, and New Iberia, Louisiana, to request submission of views on alternatives, significant resources in the study area, and any other study-related issue considered important. Comments received as a result of this process will be compiled and analyzed, and a Scoping Document summarizing the results will be made available to all respondents.

b. A tentative list of significant resources to be evaluated in the EIS includes: wetlands; navigation facilities; flood control facilities; cultural resources; socio-economic resources; biological resources, including endangered and threatened species; recreational resources, and water quality.

c. The U.S. Department of the Interior will provide a Fish and Wildlife Coordination Act Report. Coordination will be maintained with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service concerning endangered species. Coordination will be maintained with the Natural Resources Conservation Service regarding prime and unique farmlands. We will prepare a Section 404(b)(1) evaluation for review by the U.S. Environmental Protection Agency and other interested parties. Coordination will be maintained with the Advisory Council on Historic Preservation and the State Historic Preservation Officer. The Louisiana Department of Natural Resources will be consulted regarding consistency with the Coastal Zone Management Act. Application will be made to the Louisiana Department of Environmental Quality for a Water Quality Certificate.

d. A 45-day public review period will be allowed so that all interested agencies, groups, and individuals will have the opportunity to comment on the DEIS.

5. *Availability*. The DEIS is scheduled to be available to the public during the fall of 1998.

Kenneth H. Clow,

Colonel, U.S. Army District Engineer.

[FR Doc. 95–22436 Filed 9–8–95; 8:45 am]

BILLING CODE 3710-84-M

Environmental Assessment and Finding of No Significant Impact for the Proposed Consolidation of the Finance and Accounting Activities of the U.S.Army Corps of Engineers (USACE) to Memphis, TN

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of availability.

SUMMARY: This notice of availability is for the Final Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) prepared for the consolidation of the finance and accounting activities of Corps' district, division and headquarters offices under the Department of Defense's Centralized Service to Millington Naval Air Station (NAS), Memphis, Tennessee.

The establishment of the USACE Finance Center (UFC) would provide the vehicle to realign existing resources to facilitate the continued development of Corps of Engineers Financial Management System (CEFMS) and deployment to all 60 USACE locations. Over a three year period CEFMS deployment and establishment of the UFC would enable USACE to consolidate the operating finance and accounting functions currently performed in all 60 locations into one site, freeing up about 67% FTE/Manyears for redistribution or savings. The consistency/standardization of business processes in a CEFMS/single Finance & Accounting operating site would also enhance productivity and quality throughout USACE and provide additional opportunities for redistribution of effort.

The No Action alternative was evaluated and deemed unacceptable because it maintains the present finance and accounting activities at district, division, and headquarters. This alternative would not capitalize on savings which could be realized if the action was implemented. Therefore, the No Action alternative was not considered further.

Although the proposed consolidation would have some adverse socioeconomic effect on the employees displaced or whose jobs are terminated, the effects of this consolidation on the natural and physical environment would not be significant. Under consolidation the financial management functions will continue to be performed; the only change would be that some of these functions will be performed in a different city. The actual physical displacement of the Corps' employees relocating to Memphis, Tennessee, should not have a significant effect on the environment. Affected Corps' headquarters, division and district offices are almost exclusively located within urban areas. The consolidation would require the Corps to dispose of office space in some cities and to lease or utilize existing office space at Millington NAS in Memphis, Tennessee. Again, because this activity would be confined primarily to urban areas, the environmental impact of this action would be minimal. Therefore, an environmental impact statement will not be prepared.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph Hand, U.S. Army Corps of Engineers, P.O. Box 2288, Mobile, Alabama 36628–0001, (334) 694–3881.

SUPPLEMENTARY INFORMATION: Copies of the EA and FONSI will be available to the public for review for 30 days following publication of this notice.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

[FR Doc. 95–22438 Filed 9–8–95; 8:45 am]

BILLING CODE 3710–92–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER95–1630–000, et al.]

PECO Energy Corporation, et al.; Electric Rate and Corporate Regulation Filings

September 1, 1995.

Take notice that the following filings have been made with the Commission:

1. PECO Energy Company

[Docket No. ER95–1630–000]

Take notice that on August 28, 1995, PECO Energy Company (PECO) filed a Service Agreement dated August 17, 1995, with Ohio Edison Company (OE) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff). The Service Agreement adds OE as a customer under the Tariff.

PECO requests an effective date of August 17, 1995, for the Service Agreement.

PECO states that copies of this filing have been supplied to OE and to the Pennsylvania Public Utility Commission.

Comment date: September 15, 1995, in accordance with Standard Paragraph E at the end of this notice.

2. PECO Energy Company

[Docket No. ER95–1631–000]

Take notice that on August 28, 1995, PECO Energy Company (PECO), filed a Service Agreement dated August 22, 1995, with LG&E Power Marketing Inc. (LG&E) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff). The Service Agreement adds LG&E as a customer under the Tariff.

PECO requests an effective date of August 22, 1995, for the Service Agreement.

PECO states that copies of this filing have been supplied to LG&E and to the Pennsylvania Public Utility Commission.

Comment date: September 15, 1995, in accordance with Standard Paragraph E at the end of this notice.

3. PECO Energy Company

[Docket No. ER95–1632–000]

Take notice that on August 28, 1995, PECO Energy Company (PECO), filed a Service Agreement dated August 22, 1995, with Northern Indiana Public Service Company (NIPSCO) under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff). The Service Agreement adds NIPSCO as a customer under the Tariff.

PECO requests an effective date of August 22, 1995, for the Service Agreement.

PECO states that copies of this filing have been supplied to NIPSCO and to the Pennsylvania Public Utility Commission.

Comment date: September 15, 1995, in accordance with Standard Paragraph E at the end of this notice.

4. Engelhard Power Marketing, Inc.

[Docket No. ER95–1633–000]

Take notice that on August 28, 1995, Engelhard Power Marketing, Inc. (ENGL), tendered for filing a letter from the Executive Committee of the Western Systems Power Pool (WSPP) indicating that ENGL had completed all the steps for pool membership. ENGL requests that the Commission amend the WSPP Agreement to include it as a member.

ENGL requests an effective date of August 17, 1995, for the proposed amendment. Accordingly, ENGL requests waiver of the Commission's notice requirements for good cause shown.

Copies of the filing were served upon the WSPP Executive Committee.

Comment date: September 15, 1995, in accordance with Standard Paragraph E at the end of this notice.

5. Illinois Power Company

[Docket No. ER95–1634–000]

Take notice that on August 28, 1995, Illinois Power Company (Illinois), tendered for filing an Interchange Agreement between Illinois and Kimball Power Company (Kimball). Illinois states that the purpose of this agreement is to provide for the buying and selling of capacity and energy between Illinois and Kimball.

Comment date: September 15, 1995, in accordance with Standard Paragraph E at the end of this notice.

6. Northeast Utilities Service Company

[Docket No. ER95–1635–000]

Take notice that on August 28, 1995, Northeast Utilities Service Company (NUSCO), tendered for filing, a unit exchange agreement between NUSCO, on behalf of The Connecticut Light and Power Company, Western Massachusetts Electric Company, Holyoke Water Power Company, Holyoke Power and Electric Company and Public Service Company of New Hampshire, and Central Maine Power Company (CMP).

NUSCO states that a copy of this filing has been mailed to CMP.

NUSCO requests that the Agreement become effective on November 1, 1995.

Comment date: September 15, 1995, in accordance with Standard Paragraph E at the end of this notice.

7. Delmarva Power and Light Company

[Docket No. ER95–1639–000]

Take notice that on August 28, 1995, Delmarva Power and Light Company (Delmarva Power), tendered for filing a tariff providing for comprehensive transmission service. Delmarva Power states that its filing modifies its Tariff No. 2 that was filed in Docket No. ER95–222–000 and that its tariff is consistent with the draft pro forma tariffs the Commission included with the proposed rule in "Promoting Wholesale Competition Through Open-Access Non-Discriminatory Transmission Services by Public Utilities," Docket No. RM95–8–000, IV FERC Stats. and Regs. ¶32,514 (1995). Delmarva Power asks the Commission to set an effective date for this filing of November 1, 1995.

Comment date: September 15, 1995, in accordance with Standard Paragraph E at the end of this notice.

8. Delmarva Power & Light Company

[Docket No. ER95–1640–000]

Take notice that on August 28, 1995, Delmarva Power & Light Company (Delmarva) of Wilmington, Delaware, tendered for filing revised rate schedule sheets, and a request to suspend the operation of its fuel clause for the purposes of making a one-time refund of fuel expense over-collections and of resetting its Fuel Adjustments. The Company is proposing several revisions to its rate schedules to define more clearly the operation of the fuel adjustment clause. These revisions involve the following customers and rate schedules: Seaford, Rate Schedule 62; Berlin, Rate Schedule 63; Middletown, Rate Schedule 65; and Smyrna, Rate Schedule 68. Delmarva requests an effective date of October 27, 1995.

Comment date: September 15, 1995, in accordance with Standard Paragraph E at the end of this notice.

9. Brooklyn Navy Yard Cogeneration Partners, L.P.

[Docket No. QF95–302–000]

On August 16, 1995, Brooklyn Navy Yard Cogeneration Partners, L.P. of 366 Madison Avenue, Suite 1103, New York, New York 10017, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to Section 292.207(b) of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

According to the applicant, the natural gas-fired topping-cycle cogeneration facility is located in Kings County, Brooklyn, New York. The facility will consist of two combustion turbine generators, two unfired heat recovery boilers, two extraction/condensing steam turbine generators, and related interconnection equipment. The maximum net power production capacity of the facility will be 315 MW. Thermal energy recovered from the facility will be used for space heating, water distillation and waste water treatment purposes. Installation of the facility began in January of 1995.

Comment date: October 11, 1995 in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22451 Filed 9–8–95; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. CP95–709–000, et al.]

Southern Natural Gas Company, et al.; Natural Gas Certificate Filings

September 1, 1995.

Take notice that the following filings have been made with the Commission:

1. Southern Natural Gas Company

[Docket No. CP95–709–000]

Take notice that on August 25, 1995, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP95–709–000 a request pursuant to Sections 157.205, 157.212, and 157.216 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212, and 157.216) for authorization to relocate certain delivery point facilities which serve Dalton Utilities (Dalton). Southern makes such request, under its blanket certificate issued in Docket No. CP82–406–000, all as more fully set forth in the request on file with the Commission and open to public inspection.

Specifically, Southern proposes to abandon two four-inch meter runs, a heater and some regulating equipment at its existing Dalton No. 2 Delivery Point which is currently located on Southern's 12-inch Chattanooga Branch Lines in Whitfield County, Georgia. Southern also proposes to construct and operate a dual 4-inch orifice meter, heater, regulators, and other appurtenant facilities in order to provide transportation service to Dalton No. 2, at the relocation cite. It is stated that Southern proposes to relocate the facilities to a site on its 12-inch Chattanooga Branch Lines in Whitfield County, Georgia. The estimated cost of the relocation of the delivery facilities is approximately $101,500. It is indicated that Dalton will reimburse Southern for the total actual cost of relocating the facilities. Dalton has requested the relocation to serve more efficiently the gas requirements on its distribution system which are growing in the area of the proposed relocation point.

Southern states that it will continue to transport gas to the relocated Dalton No. 2 delivery point, pursuant to its Rate Schedules FT and IT. Dalton does not propose to add or change any transportation demand to its firm service as a result of the relocation of the delivery point. Southern further states that the installation of the proposed facilities will have no adverse impact on its peak day or firm requirements.

Comment date: October 16, 1995, in accordance with Standard Paragraph G at the end of this notice.

2. Colorado Interstate Gas Company

[Docket No. CP95–711–000]

Take notice that on August 25, 1995, Colorado Interstate Gas Company (CIG), P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP95–711–000 a request pursuant to Sections 157.205, 157.216 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.216 and 157.212) for authorization to abandon the existing Fort Lupton taps and to construct new delivery facilities at the same location for Public Service Company of Colorado (PSCo), a local distribution company, under CIG's blanket certificate issued in Docket No. CP83–21–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

CIG proposes to abandon two taps and construct a new meter station and appurtenant facilities at Section 34, Township 2 North, Range 66 West, Weld County, Colorado. The proposed new facilities are to be bi-directional, will increase deliverability and will cost $506,600. The deliveries at the Fort Lupton delivery point will provide service to PSCo's Fort St. Vrain power plant and other loads in the area. Currently, there is 15,500 Dth/d of entitlement under existing agreements, but after the proposed installation, the initial deliveries will be up to 100,000 Dth/d. The total annual and daily contract entitlement for the contracts serving the Fort Lupton delivery facilities are within the certificated entitlements. CIG's existing tariff does not prohibit this change and CIG states that there is sufficient capacity to accomplish the increased deliveries without detriment or disadvantage to other customers.

Comment date: October 16, 1995, in accordance with Standard Paragraph G at the end of this notice.

3. Colorado Interstate Gas Company

[Docket No. CP95–712–000]

Take notice that on August 25, 1995, Colorado Interstate Gas Company (CIG), P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP95–712–000 a request pursuant to Sections 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.212) for authorization to operate a new delivery point, the South Bennett delivery facilities, for service under CIG's existing Rate Schedule NNT–2 for Eastern Colorado Utility Company (Eastern Colorado), a local distribution company, in Arapahoe County, Colorado under the blanket certificate issued in Docket No. CP83–21–000, pursuant to Section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

CIG states that it will operate a tap, two-inch tee, valve, approximately 50 feet of two-inch pipe and appurtenant facilities. CIG states that it plans to construct these facilities pursuant to Section 311 of the Natural Gas Policy Act. CIG estimates that cost of the proposed facilities is approximately $10,000. CIG asserts that it will provide transportation service to Eastern Colorado pursuant to its open access blanket certificate; and therefore, it has authorization for the proposed service. Additionally, CIG notes that the proposed service is not prohibited by an existing CIG tariff. CIG states that it has sufficient capacity to accomplish deliveries to the proposed facilities without detriment or disadvantage to CIG's other customers.

CIG states that it does not currently make deliveries to Eastern Colorado at the proposed South Bennett delivery facility. CIG asserts that the proposed facilities will be capable of delivering approximately 850 Dth/d. Additionally, CIG notes that the end use of the gas delivered by CIG to Eastern Colorado will be for new residential development. CIG claims that the impact of the proposed changes will be minimal because of the proposed delivery volume size and the use of an existing agreement.

Comment date: October 16, 1995, in accordance with Standard Paragraph G at the end of this notice.

4. Williams Natural Gas Company

[Docket No. CP95–717–000]

Take notice that on August 29, 1995, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101 filed in Docket No. CP95–717–000 a request pursuant to Sections 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.212) for authorization to utilize the facilities originally installed for the delivery of NGPA Section 311 gas to Missouri Gas Energy (MGE) for the Simmons chicken hatchery in McDonald County, Missouri, and for other purposes under Williams' blanket authorization issued in Docket No. CP82–479–000 pursuant to Section 7(c) of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Williams states that it will utilize the Section 311 facilities installed to deliver transportation gas to MGE for Simmons for any purpose. Williams began delivering gas to MGE for Simmons on July 31, 1995 and reported such initial transportation in Docket No. ST95–3275–000. The authorization Williams is requesting will allow receipt point flexibility in the future. Williams states that is has sufficient capacity to accomplish the deliveries specified without detriment to its other customers.

The cost to construct the facilities was $57,875 which will be partially reimbursed.

Comment date: October 16, 1995, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

G. Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22452 Filed 9–8–95; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. ER95–1381–000]

Alliance Strategies; Notice of Issuance of Order

September 6, 1995.

On July 17, 1995, Alliance Strategies (Alliance) submitted for filing a rate schedule under which Alliance will engage in wholesale electric power and energy transactions as a marketer. Alliance also requested waiver of various Commission regulations. In particular, Alliance requested that the Commission grant blanket approval under 18 CFR part 34 of all future issuances of securities and assumptions of liability by Alliance.

On August 25, 1995, pursuant to delegated authority, the Director, Division of Applications, Office of Electric Power Regulation, granted requests for blanket approval under part 34, subject to the following:

Within thirty days of the date of the order, any person desiring to be heard or to protest the blanket approval of issuances of securities or assumptions of liability by Alliance should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Absent a request for hearing within this period, Alliance is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of the applicant, and compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approval of Alliance's issuances of securities or assumptions of liability.

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is September 25, 1995.

Copies of the full text of the order are available from the Commission's Public

Reference Branch, Room 3308, 941 North Capitol Street NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22447 Filed 9–8–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP95–429–000]

ANR Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, ANR Pipeline Company (ANR), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets, with an effective date of September 1, 1995:

Ninth Revised Sheet No. 8
Eleventh Revised Sheet No. 9
Eleventh Revised Sheet No. 13
Eleventh Revised Sheet No. 16
Thirteenth Revised Sheet No. 18

ANR states that the above-referenced tariff sheets are being filed pursuant to the approved recovery mechanism of its Tariff to implement recovery of $9.3 million of costs that are associated with its obligations to Dakota Gasification Company (Dakota). ANR proposes a reservation fee surcharge applicable to its Part 284 firm transportation customers to collect ninety percent (90%) of the Dakota costs and an adjustment to the maximum base tariff rates of Rate Schedule ITS and overrun rates applicable to Rate Schedule FTS–2 so as to recover the remaining ten percent (10%). ANR has requested that the Commission accept the tendered sheets to become effective September 1, 1995.

ANR states that all of its Volume No. 1 customers and interested State Commissions have been mailed a copy of this filing.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

FR Doc. 95–22408 Filed 9–8–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP95–432–000]

Columbia Gas Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Columbia Gas Transmission Corporation (Columbia) tendered a filing with the Federal Energy Regulatory Commission (Commission) for proposed changes to its FERC Gas Tariff, Second Revised Volume No. 1, to be effective October 1, 1995:

First Rev Tenth Revised Sheet No. 25
First Rev Tenth Revised Sheet No. 26
First Rev Tenth Revised Sheet No. 27
First Rev Eleventh Revised Sheet No. 28

Columbia states that this Mid-Cycle Transportation Costs Rate Adjustment (TCRA) filing is being made in accordance with the General Terms and Conditions (GTC) of its FERC Gas Tariff (Section 36) which provides, among other things, that Columbia will adjust its TCRA rates prospectively by means of a filing to become effective October 1 of each year.

Columbia states that copies of its filing have been mailed to all firm customers and affected state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP95–433–000]

CNG Transmission Corporation; Notice of Filing of Report of Account No. 191 Costs

September 5, 1995.

Take notice that on August 31, 1995, CNG Transmission Corporation (CNG), filed a report of certain data regarding its Account No. 191 Transition Costs, as required by Section 18.1.D of the General Terms and Conditions of its FERC Gas Tariff.

CNG states that this one-time reporting requirement was established as part of the comprehensive Order No. 636 restructuring settlement among CNG and its customers, in Docket No. RS92–14. Section 18.1.D of the General Terms requires CNG to file a report by September 1, 1995, with supporting workpapers, detailing the adjustments made by CNG under Section 18.1.D. The nature of these adjustments is set forth in seven enumerated categories. As provided under Section 18.1.D., CNG's customers have 45 days to review this report, and to file comments with the Commission.

CNG states that it has previously reported all adjustments as required in categories 1 through 6 of this Section, to support its filings in Docket Nos. RP94–31, RP94–300, and RP95–347.

CNG states that it has served this data upon all affected customers at the time of each filing, and CNG has incorporated this data by reference in the instant report. To satisfy the Section 18.1.D. requirement as to the seventh category, "amounts received by Pipeline as a result of the direct bill" under this Section, CNG states that it is providing detailed data regarding the amounts received from each customer through direct bills in Docket Nos. RP94–31, RP94–300, and RP95–347.

CNG states that copies of this report and enclosures are being mailed to CNG's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a protest or motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure, 18 CFR Sections 385.214 and 385.211. All motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM96–1–22–000]

CNG Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, CNG Transmission Corporation (CNG), pursuant to Section 4 of the Natural Gas Act, Section 154.38(d)(6) of the Commission's Regulations providing for the Annual Charge Adjustment, and Section 14 of the General Terms and Conditions of CNG's tariff, filed the following revised tariff sheets to its FERC Gas Tariff, with a proposed effective date of October 1, 1995:

Second Revised Volume No. 1

Fifth Revised Sheet No. 31
Tenth Revised Sheet No. 32
Tenth Revised Sheet No. 33
Sixth Revised Sheet No. 35
Sixth Revised Sheet No. 36

Original Volume No. 2

Eighth Revised Sheet Nos. 250 and 290

Original Volume No. 2A

Eighth Revised Sheet Nos. 18, 28, 35, 48 and 87

CNG states that the proposed tariff sheets reflect a new ACA unit rate of .22 cents per dekatherm.

CNG states that copies of the filing were served upon CNG's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP95–427–000]

El Paso Natural Gas Company; Notice of Tariff Filing

September 5, 1995.

Take notice that on August 31, 1995, pursuant to Part 154 of the Commission's Regulations Under the Natural Gas Act, El Paso Natural Gas Company (El Paso) tendered for filing a notice of the following:

(i) A revision to El Paso's Take-or-Pay Buyout and Buydown Monthly Direct Charge and Throughput Surcharge: (a) To reflect the addition of principal dollars to be amortized based upon recent take-or-pay buyout and buydown costs and (b) for interest pursuant to Sections 22 and 21, Take-or-Pay Buyout and Buydown Cost Recovery of its Second Revised Volume No. 1–A and Third Revised Volume No. 1, FERC Gas Tariffs, respectively; and

(ii) That the Annual Charge Adjustment (ACA) in accordance with Section 21, Annual Charge Adjustment Provision, of said Volume No. 1–A Tariff does not require a change.

El Paso states that the additional principal dollars to be amortized are El Paso's last remaining take-or-pay case eligible for recovery under its Take-or-Pay Buyout and Buydown Cost Recovery mechanism.

El Paso states that it proposed to amortize the direct bill portion of the additional costs over a period of one month because the aggregate dollar amounts are small and it would be administratively burdensome for the majority of El Paso's customers to have to account and pay for the de minimis direct bill amounts over a more extended period. With respect to the Throughput Surcharge, El Paso states that it proposed to amortize the additional take-or-pay costs over a period extending through March 31, 1996, which is the end of the amortization period for its Take-or-Pay Cost Recovery mechanism. El Paso states that as a result of this filing, the Throughput Surcharge has decreased $.0008 per dth, from $0.0348 to $0.0340 per dth. El Paso further states that its ACA surcharge of $0.0023 per dth to be collected for the fiscal year beginning October 1, 1995 reflects no change.

Pursuant to Section 21.6 of El Paso's Volume No. 1 Tariff, El Paso is required to file with the Commission certain information supporting the buyout and/or buydown amounts paid. Accordingly, El Paso states that it is submitting concurrently herewith, but under separate cover letter, the schedules reflecting such information for which El Paso has requested confidential treatment.

El Paso requested that the Commission accept the tendered tariff sheets for filing and permit them to become effective on October 1, 1995.

El Paso states that copies of the filing were served upon all of El Paso's affected interstate pipeline system customers and interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP95–713–000]

El Paso Natural Gas Company; Notice of Request Under Blanket Authorization

September 5, 1995.

Take notice that on August 25, 1995, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978, filed a prior notice request with the Commission in Docket No. CP95–713–000 pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to construct and operate a delivery point to serve Southwest Gas Corporation (Southwest) in Cochise County, Arizona, under El Paso's blanket certificates issued in Docket Nos. CP82–435–000 and CP88–433–000 pursuant to Section 7 of the NGA, all as more fully set forth in the request which is open to the public for inspection.

El Paso proposes to construct and operate dual one-inch tap and valve assemblies with appurtenances on its 26-inch diameter California Line and 30-inch diameter California First Loop Line in Cochise County. El Paso states that Southwest has agreed to reimburse El Paso for the estimated $21,700 construction cost of the proposed delivery tap. El Paso would deliver to Southwest on a firm basis approximately 24.4 Mcf of natural gas per day, 98 Mcf per peak day, and 8,905 Mcf per year by the third year of operating the proposed tap in the Kartchner Caverns area.

El Paso further states that its tariff allows for construction of the proposed delivery tap and that the volumes to be delivered at the tap are within Southwest's certificated entitlements. El Paso also states that it has sufficient capacity to deliver the requested natural gas volumes to Southwest without detriment or disadvantage to El Paso's other customers.

Any person or the Commission's staff may, within 45 days after the Commission has issued this notice, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the NGA (18 CFR 157.205) a protest to the request. If no protest is filed within the allowed time, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the NGA.

Lois D. Cashell,

Secretary.

[Docket No. ER90–1399–000

ElecTech, Inc.; Notice of Issuance of Order

September 6, 1995.

On July 19, 1995, ElecTech, Inc. (ElecTech) submitted for filing a rate schedule under which ElecTech will engage in wholesale electric power and energy transactions as a marketer. ElecTech also requested waiver of various Commission regulations. In particular, ElecTech requested that the Commission grant blanket approval under 18 CFR Part 34 of all future issuances of securities and assumptions of liability by ElecTech.

On August 25, 1995, pursuant to delegated authority, the Director, Division of Applications, Office of Electric Power Regulation, granted requests for blanket approval under Part 34, subject to the following:

Within thirty days of the date of the order, any person desiring to be heard or to protest the blanket approval of issuances of securities or assumptions of liability by ElecTech should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Absent a request for hearing within this period, ElecTech is authorized to issue securities and assume obligations or liabilities as a guarantor, endorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approval of ElecTech's issuances of securities or assumptions of liability.

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is September 25, 1995.

Copies of the full text of the order are available from the Commission's Public Reference Branch, Room 3308, 941 North Capitol Street NE., Washington, D.C. 20426.

[Docket No. TM96–1–51–000]

Great Lakes Gas Transmission Limited Partnership; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Great Lakes Gas Transmission Limited Partnership (Great Lakes) tendered for filing to become part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheet, with a proposed effective date of October 1, 1995:

Fourth Revised Sheet No. 7

Great Lakes states that the above tariff sheet reflects the new ACA rate to be charged pursuant to the Annual Charges Adjustment Clause provisions established by the Commission in Order No. 472, issued May 29, 1987. The new ACA rate to be charged by Great Lakes was established by FERC notice given on July 10, 1995 and is to be effective October 1, 1995.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such petitions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection.

Iroquois Gas Transmission System L.P.; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Iroquois Gas Transmission System, L.P. (Iroquois) tendered a filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, Ninth Revised Sheet No. 4. The proposed effective date of the tariff sheet is October 1, 1995.

Iroquois states that, pursuant to section 154.38(d)(6) of the Commission's regulations and Section 12.2 of the General Terms and Conditions of its Tariff, Iroquois is making its Annual Charge Adjustment ("ACA") filing to reflect a decrease of $.0001 per Dth (from $.0024 to $.0023 per Dth) in its ACA surcharge.

Iroquois states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

JPower; Notice of Issuance of Order

September 6, 1995.

On July 21, 1995, JPower (JPower) submitted for filing a rate schedule under which JPower will engage in wholesale electric power and energy transactions as a marketer. JPower also requested waiver of various Commission regulations. In particular, JPower requested that the Commission grant blanket approval under 18 CFR Part 34 of all future issuances of securities and assumptions of liability by JPower.

On August 25, 1995, pursuant to delegated authority, the Director, Division of Applications, Office of Electric Power Regulation, granted requests for blanket approval under Part 34, subject to the following:

Within thirty days of the date of the order, any person desiring to be heard or to protest the blanket approval of issuances of securities or assumptions of liability by JPower should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Absent a request for hearing within this period, JPower is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of the applicant, and compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approval of JPower's issuances of securities or assumptions of liability.

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is September 25, 1995.

Copies of the full text of the order are available from the Commission's Public Reference Branch, Room 3308, 941 North Capitol Street NE., Washington, DC 20426.

Kentucky West Virginia Gas Company; Notice of Proposed Change in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Kentucky West Virginia Gas Company (Kentucky West) tendered for filing to become part of its FERC Gas Tariff, Third Revised Volume No. 1, Fourth Revised Sheet No. 163, to become effective October 1, 1995.

Kentucky West states the revised tariff sheet amends its Annual Charge Adjustment (ACA) charge to place in effect the new ACA funding unit of $.0023 per MCF which represents a decrease of $.0001 per MCF. This rate is $.0018 per Dth as converted on Kentucky West's system.

Kentucky West states that a copy of its filing has been served upon each of its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket Nos. RP95–426–000 TM96–2–25–000]

Mississippi River Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Mississippi River Transmission Corporation (MRT) submitted for filing to become part in its FERC Gas Tariff, Third Revised Volume No. 1, the following tariff sheets listed below, with a proposed effective date of October 1, 1995:

Thirteenth Revised Sheet No. 5

Thirteenth Revised Sheet No. 6
Eleventh Revised Sheet No. 7
Fourth Revised Sheet No. 8
First Revised Sheet No. 234
First Revised Sheet No. 235
Original Sheet No. 235A

MRT states that the purpose of the filing is to modify the Fuel Use and Loss Adjustment provisions contained in Section 24 of the General Terms and Conditions of its tariff to (1) Permit MRT, when necessary, to submit out-of-cycle Fuel Use and Loss Adjustment filings more frequency than once a year, and (2) permit MRT to assess a Compressor Fuel Tax Surcharge to recover sales and use taxes assessed on a monthly basis by the States of Arkansas and Louisiana on the value of gas consumed as compressor fuel in such states.

MRT states that concurrent with the submission of the proposed tariff modifications it is also proposing to make its first out-of-cycle Fuel Use and Loss Adjustment applicable to Rate Schedules FTS, SCT, ITS, FSS and ISS as well as its first Compressor Fuel Tax Surcharge adjustment.

MRT states that copies of its filing have been mailed to all of its affected customers and the State Commission of Arkansas, Illinois, and Missouri.

Any person desiring to be heard or protest the subject filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and available for public inspection.

Northern Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Northern Natural Gas Company (Northern), tendered for filing changes in its FERC Gas Tariff, Fifth Revised Volume No. 1 and Original Volume No. 2, the following tariff sheets, proposed to be effective October 1, 1995:

Fifth Revised Volume No. 1

Third Revised Seventeenth Revised Sheet No. 50
Third Revised Seventeenth Revised Sheet No. 51
First Revised Sixth Revised Sheet No. 52
Twenty-Second Revised Sheet No. 53
First Revised Sixth Revised Sheet No. 59
First Revised Seventh Revised Sheet No. 60

Original Volume No. 2

First Revised 145th Revised Sheet No. 1C
First Revised Twentieth Revised Sheet No. 1C.a

Northern states that the filing establishes the revised Annual Charge Adjustment (ACA) rate effective October 1, 1995, for Northern's transportation rates. The ACA rate is designed to recover the charge assessed by the Commission pursuant to Part 382 of the Commission's Regulations.

Northern further states that copies of the filing have been mailed to each of its customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such petitions or protests must be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding.

Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. TM96–1–37–000]

Northwest Pipeline Corporation; Notice of Proposed Change in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Northwest Pipeline Corporation (Northwest) tendered for filing as part of its FERC Gas Tariff, the following tariff sheets with a proposed effective date of October 1, 1995:

Third Revised Volume No. 1

First Revised Sixth Revised Sheet No. 5
First Revised Fifth Revised Sheet No. 8

Original Volume No. 2

Nineteenth Revised Sheet No. 2.2

Northwest states that the purpose of this filing is to update Northwest's tariff to reflect the Commission approved Annual Charge Adjustment (ACA) factor of .23¢ per Mcf to be effective for the twelve-month period beginning October 1, 1995. The ACA surcharge unit equates to .22¢ per MMBtu based on Northwest's system weighted average of 1037 Btu per cubic foot of gas for the twelve months ended June 30, 1995, and is a reduction of .01¢ per MMBtu from Northwest's current ACA surcharge of .23¢ per MMBtu.

Northwest states that a copy of this filing has been served upon Northwest's jurisdictional customers and upon affected state regulatory commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. TM96–1–64–000]

Pacific Interstate Offshore Company; Notice of Change in Rate

September 5, 1995.

Take notice that on August 31, 1995, Pacific Interstate Offshore Company (PIOC) submitted for filing, to be part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheet:

Second Revised Sheet No. 6

PIOC states the purpose of this filing is to set forth the applicable Annual Charge Adjustment (ACA) surcharge of .23 cents per MMBtu, effective October 1, 1995.

PIOC states that a copy of this filing has been served on PIOC's sole customer, the Southern California Gas Company and the Public Utilities Commission of the State of California and other interested parties.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. TM96–1–29–000]

Panhandle Eastern Pipe Line Company; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, revised tariff sheets list on Appendix A to the filing. Panhandle proposes that these tariff sheets become effective October 1, 1995.

Panhandle states that these revised tariff sheets are being submitted in accordance with Section 18.2 (Annual Charge Adjustment Provision) of the General Terms and Conditions of Panhandle's FERC Gas Tariff, First Revised Volume No. 1. This filing reflects the Federal Energy Regulatory Commission's change in the unit rate for the Annual Charge Adjustment surcharge to be applied to rates for recovery of 1995 Annual Charges pursuant to Order No. 472 in Docket No. RM87–3–000. The surcharge attributable to fiscal year 1995 program costs is $0.0023 per Mcf ($0.0023 per Dt. to reflect Panhandle's billing unit) of natural gas transported.

Panhandle states that copies of this filing are being served on all customers subject to the tariff sheets and applicable state regulatory agencies.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22424 Filed 9–8–95; 8:45 am]

BILLING CODE 6717–01–M

[Project No. 2493–006]

Puget Sound Power & Light Company; Notice of Amendment to Application

September 5, 1995.

On June 28, 1995, Puget Sound Power & Light Company (Puget) filed an amendment to its application for a new license for the Snoqualmie River Project No. 2493–006. Puget's application for a new license proposed to make extensive structural modifications to the project to add 31 megawatts (MW) to the existing generation capacity of 42 MW. The amendment was filed as a result of Puget's inability to obtain additional water rights necessary to support its original application.

Puget is now proposing a Refurbished Project that would (1) refurbish the existing diversion dam foundation, in the same location, (2) install an inflatable dam or spillgate system to replace the existing flashboard system, (3) add a 75-foot-long inflatable spillway for flood control, (4) add a sediment exclusion channel to transfer bed load from the Plant 2 intake to pass under the new diversion dam, (5) modify the Plant 1 intake, (6) modify the Plant 1 tailrace channel, (7) remove Units 1–5 penstocks in Plant 1, (8) install new 6-foot and 8-foot diameter penstocks for new Plant 1, Units 1 and 2, (9) install a new Unit 1, sized for 600 cfs, (10) install a new Unit 2, sized for 200 cfs, (11) replace the Plant 1 elevator and elevator house, (12) stabilize the transformer house and machine shops for seismic stability, (13) remove Units 1 through 3 and Unit 5 from Plant 1, (14) retire (in place) Unit 4 in Plant 1, (15) refurbish the existing Plant 2 intake and tunnel, (16) refurbish the existing gatehouse and penstocks for Plant 2, (17) modify the existing Plant 2 forebay for improved safety and operation, (18) upgrade Units 1 and 2 in Plant 2, (19) install a flow bypass system, and (20) refurbish the Plant 2 powerhouse for seismic stability. The Refurbished Project would add 7 MW to the existing 42 MW of generation.

The Refurbished Project proposal also includes instream flows that were identified as potential conditions of a Water Quality Certification by the Washington State Department of Ecology, in a letter dated May 12, 1995.

These proposed minimum instream flows over Snoqualmie Falls are:

From 10 AM to sunset.

March 16–March 31	200 cfs
April 1–April 30	450 cfs
May 1–May 31	700 cfs
June 1–June 30	450 cfs
July 1–July 15	200 cfs
July 16–March 15	100 cfs

Nighttime flows over the falls would not be less than 25 cfs.

A Minor Upgrade alternative that is substantially similar to the Refurbished Project proposal described above was addressed in the draft Environmental Impact Statement issued on November 18, 1994. The Refurbished Project, like the Minor Upgrade alternative, would not increase the 2,500 cubic feet per second (cfs) hydraulic capacity of the existing project.

Some minor differences between the Minor Upgrade alternative and the Refurbished Project proposal are that the Refurbished Project proposal includes: (1) a flow continuation system, (2) minor expansion of the Plant 2 forebay to improve removal of suspended sediments for Plant 2, (3) leaving Unit 4 of Plant 1 in place for historic preservation values, and (4) retaining and refurbishing the existing foot bridge.

Although the Refurbished Project alternative is substantially similar to the Minor Upgrade alternative already addressed in the draft Environmental Impact Statement, we are providing an opportunity for additional interventions, and for entities to reconsider their terms, conditions, prescriptions and comments submitted previously with respect to this application. Comments and/or petitions for intervention will be due 30 days from the date of issuance of this notice with response comments due 45 days from the date of issuance.

A copy of the application and amendment are available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch located at 941 North Capitol Street NE., Room 3104, Washington, DC 20426 or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Puget Sound Power & Light Company, P.O. Box 97034, Bellevue, WA 98009–9734, or by calling (206) 462–3058. The applicant contact for this project is Ms. Virginia Howell.

Contact Ms. Kathleen Sherman at (202) 219–2834 for questions relating to this proceeding.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22425 Filed 9–8–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP95–430–000]

Southern Natural Gas Company; Notice of Take-or-Pay Flowthrough

September 5, 1995.

Take notice that on August 31, 1995, Southern Natural Gas Company (Southern) filed to flowthrough take-or-pay costs paid to Koch Gateway Pipeline Company (Koch) under the terms of Koch's Order No. 500 settlements approved by the Commission in Docket No. RP85–209 on August 4, 1994 (August 4, Order).

Southern states that these take-or-pay settlement costs represent the remaining costs associated with the buyout and buydown of producer contracts by Koch as well flowthrough of take-or-pay costs from Koch's upstream pipeline supplier, Sea Robin Pipeline Company (Sea Robin). Paragraph (6) of Article II of Southern's Stipulation authorizes Southern to flow through, on an as-billed basis, buyout and buydown costs incurred from Koch as well as costs flowed through by Koch from Sea Robin.

Southern is proposing to allocate and bill these costs to its customers in accordance with the methodology approved by the Commission in its August 4 Order, as clarified in its subsequent order of July 6, 1995 in Docket No. RP85–209. Southern submitted the following tariff sheets to its FERC Gas Tariff, Seventh Revised Volume No. 1, with the proposed effective date of October 1, 1995:

Second Revised Sheet No. 23
Second Revised Sheet No. 24
Second Revised Sheet No. 25

Southern states that copies of the filing were served upon Southern's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Southern's filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22426 Filed 9–8–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP95–431–000]

Southern Natural Gas Company; Notice of GSR Cost Recovery Filing

September 5, 1995.

Take notice that on August 31, 1995, Southern Natural Gas Company (Southern) set forth its revised demand surcharges and revised interruptible rates that will be charged in connection with its recovery of GSR costs associated with the payment of price differential costs under realigned gas supply contracts or contract buyout costs associated with continuing realignment efforts as well as sales function costs during the period May 1, 1995 through July 31, 1995. These GSR costs have arisen as a direct result of customers' elections during restructuring to terminate their sales entitlements under Order No. 636.

Southern submitted the following tariff sheets to its FERC Gas Tariff, Seventh Revised Volume No. 1, with the proposed effective date of October 1, 1995.

Tariff Sheets Applicable to Contesting Parties:

Twenty-Second Revised Sheet No. 15
Twenty-Second Revised Sheet No. 17
Twelfth Revised Sheet No. 18
Fifteenth Revised Sheet No. 29
Fifteenth Revised Sheet No. 30
Fifteenth Revised Sheet No. 31

Tariff Sheets Applicable to Supporting Parties:

Third Revised Sheet No. 15A
Third Revised Sheet No. 17A

Southern states that copies of the filing were served upon Southern's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Southern's filing with the Commission are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. TM96–1–115–001]

Sumas International Pipeline Inc.; Notice of Tariff Filing

September 5, 1995.

Take notice that on August 29, 1995, Sumas International Pipeline Inc. (SIPI), tendered for filing as part of its FERC Gas Tariff, Original Volume No. 2, the following tariff sheets, with a proposed effective date of October 1, 1995:

Substitute Fifth Revised Sheet No. 4
First Revised Sheet Number 7
First Revised Sheet Number 8

SIPI states that the above tariff sheets reflect the new ACA unit surcharge rate of $.0023 per Mcf which is equivalent to $.0022 per MMBtu on SIPI's system.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211) All such protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. TM96–1–18–000]

Texas Gas Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Texas Gas Transmission Corporation (Texas Gas) tendered for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, the following revised tariff sheets:

Eleventh Revised Sheet No. 10
Eight Revised Sheet No. 11
Third Revised Sheet No. 11A
Thirteenth Revised Sheet No. 12
Fourth Revised Sheet No. 13

Texas Gas states that the revised tariff sheets are being filed pursuant to Section 23 of the General Terms and Conditions of Texas Gas's FERC GAS Tariff, First Revised Volume No. 1, which affords Texas Gas the right to recover the costs billed to Texas Gas by the Federal Energy Regulatory Commission via the FERC ACA Unit Charge method. That unit charge, as determined by the Commission, is $.0022/Mcf ($.0021/MMBtu converted) as set forth on Texas Gas's Annual Charges Bill for fiscal year 1995, to be effective October 1, 1995.

Texas Gas states that copies of the revised tariff sheets are being mailed to Texas Gas's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

[Docket No. CP95–721–000]

Transcontinental Gas Pipe Line Corporation; Notice of Application

September 5, 1995.

Take notice that on August 31, 1995, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP95–721–000 an application pursuant to Section 7(b) of the Natural Gas Act for authorization to abandon a certificated firm transportation service for Columbia Gas Transmission Corporation (Columbia Gas), effective January 31, 1994, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that, by order issued January 31, 1983, in Docket No. CP82–545–000, it was authorized to transport on a firm basis up to 9,000 dt equivalent of natural gas per day for Columbia Gas, and subsequently filed the related transportation agreement as its Rate Schedule X–244. Transco states that it receives the gas at a production platform in High Island Block A–471, offshore Texas, and delivers the gas at the interconnection between Transco and Transco-Columbia Gulf Transmission Company's jointly owned High Island Block A–448 system, offshore Texas.

Transco states that Article II of the underlying transportation agreement provides that the agreement become effective August 5, 1982, and shall remain in force for a primary term of ten years from the date on initial delivery, February 1, 1983, and year to year thereafter unless and until terminated by either party giving prior written notice to the other party of not less than year, which termination may be effective at the end of the primary term or at the end of any year thereafter. Transco states that Columbia Gas provided written notice of termination to Transco by letter dated December 1, 1992, to be effective January 31, 1994. Additionally, Transco states that, pursuant to a stipulation between Transco and Columbia Gas dated June 20, 1994, and approved by the United States Bankruptcy Court for the District of Delaware by June 20, 1994, Transco and Columbia Gas agreed, *inter alia*, to terminate the agreement underlying Rate Schedule X–244.

Transco further states that it does not propose to abandon any facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 26, 1995, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Transco to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No.: RP95–425–000]

Transwestern Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995 Transwestern Pipeline Company (Transwwestern) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets, with a proposed effective date of October 1, 1995:

114th Revised Sheet No. 5
19th Revised Sheet No. 5A
13th Revised Sheet No. 5A.01
11th Revised Sheet No. 5A.02
11th Revised Sheet No. 5A.03
Original Sheet No. 5B.01

Transwestern states that it is seeking to recover certain take-or-pay settlement, buy-out, buy-down, and contract reformation costs ("TCR II Costs") paid by Transwestern. These costs qualify for recovery by Transwestern under Commission Order Nos. 500 and 528 as well as the terms and conditions of the Stipulation and Agreement ("Stipulation") filed by Transwestern in Docket No. RP95–271–000 and approved by Commission order dated July 27, 1995.

In this filing, Transwestern is seeking recovery of $10,622,519.55 in TCR II costs and is revising certain tariff sheets and requesting authority to begin recovery of such amounts under the tariff sheets effective October 1, 1995.

Transwestern requested any waiver of any Commission Regulation and its tariff provisions as may be required to allow the tariff sheets referenced above to become effective on October 1, 1995.

Transwestern states that copies of the filing were served on its gas utility customers, interested state commissions, and all parties to this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM96–1–42–000]

Transwestern Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Transwestern Pipeline Company (Transwestern) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets, with a proposed effective date of October 1, 1995:

113th Revised Sheet No. 5
18th Revised Sheet No. 5A
10th Revised Sheet No. 5A.02
10th Revised Sheet No. 5A.03
16th Revised Sheet No. 5B

Transwestern states that the tariff sheets referenced above are being filed to adjust Transwestern's Annual Charge Adjustment (ACA) pursuant to Section 23 of the General Terms and Conditions of Transwestern's FERC Gas Tariff, Second Revised Volume No. 1. The adjustment of the ACA Surcharge is determined each fiscal year pursuant to the Commission's Order No. 472. The ACA Surcharge of $0.0022/dth as determined by the Commission reflects an decrease of $0.0001/dth from the currently effective ACA Surcharge of $0.0023/dth.

Transwestern states that copies of the filing were served on its gas utility customers, interested state commissions, and all parties to this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. TM96–1–30–000]

Trunkline Gas Company; Notice of Proposed Change in FERC Gas Tariff

September 5, 1995.

Take notice that on August 31, 1995, Trunkline Gas Company (Trunkline) tendered for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, Fourth Revised Sheet No. 13. Trunkline requests an effective date of October 1, 1995.

Trunkline states that the above-referenced tariff sheet is being filed in accordance with the Commission's Order No. 472 and pursuant to Section 21 (Annual Charge Adjustment (ACA) Provision) of the General Terms and Conditions of Trunkline's FERC Gas Tariff, First Revised Volume No. 1.

Trunkline's current ACA Unit Surcharge of $0.0023 per Dt effective October 1, 1994 as approved by the Commission's Order dated September 30, 1994 in Docket No. TM95–1–30–000 changes to $0.0022 per Dt with the tracking of the ACA Unit Surcharge authorized for the fiscal year 1995.

Trunkline requests waiver of any provisions of the Commission's Regulations which may be necessary to make the tariff sheet and rates submitted herewith effective October 1, 1995.

Trunkline further states that copies of the filing are being served on all customers subject to the tariff sheets and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such petitions or protests should be filed on or before September 11, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. ER95–1382–000]

Utility-Trade Corp.; Notice of Issuance of Order

September 6, 1995.

On July 17, 1995, Utility-Trade Corp. (UTC) submitted for filing a rate schedule under which UTC will engage in wholesale electric power and energy transactions as a marketer. UTC also requested waiver of various Commission regulations. In particular, UTC requested that the Commission grant blanket approval under 18 CFR Part 34 of all future issuances of securities and assumptions of liability by UTC.

On August 25, 1995, pursuant to delegated authority, the Director, Division of Applications, Office of Electric Power Regulation, granted requests for blanket approval under Part 34, subject to the following:

Within thirty days of the date of the order, any person desiring to be heard or to protest the blanket approval of issuances of securities or assumptions of liability by UTC should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Absent a request for hearing within this period, UTC is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of the applicant, and compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approval of UTC's issuances of securities or assumptions of liability.

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is September 25, 1995.

Copies of the full text of the order are available from the Commission's Public Reference Branch, Room 3308, 941 North Capitol Street NE., Washington, DC 20426.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5294–3]

Retrofit/Rebuild Requirements for 1993 and Earlier Model Year Urban Buses; Approval of an Application for Certification of Equipment

AGENCY: Environmental Protection Agency.

ACTION: Notice of agency approval of an application for equipment certification.

SUMMARY: The Agency received an application dated October 24, 1994 from the Engelhard Corporation (Engelhard) with principal place of business at 101 Wood Avenue, Iselin, New Jersey for certification of urban bus retrofit/rebuild equipment pursuant to 40 CFR 85.1401–85.1415. On March 6, 1995 EPA published notification that the application had been received and made the application available for public review and comment for a period of 45 days (60 FR 12185). EPA has completed its review of this application and the Director of the Manufacturers Operations Division has determined that it meets all the requirements for certification. Accordingly, EPA approves the certification of this equipment effective September 11, 1995.

The candidate equipment provides a reduction in emissions of particulate matter (PM) for Detroit Diesel Corporation 6V92TA MUI(mechanical unit injection) petroleum fueled diesel engines. The certification of this equipment is applicable under program 2 only. It does not apply for operators utilizing Program 1 as Engelhard specifically applied under Program 2 only and did not perform the additional testing required for Program 1 certification.

The Engelhard application, as well as other materials specifically relevant to it, are contained in Public Docket A–93–42, entitled "Certification of Urban Bus Retrofit/Rebuild Equipment". This docket is located in room M–1500, Waterside Mall (Ground Floor), U.S. Environmental Protection Agency, 401 M Street SW, Washington, DC 20460. Docket items may be inspected from 8:00 a.m. until 4:00 p.m., Monday through Friday. As provided in 40 CFR Part 2, a reasonable fee may be charged by the Agency for copying docket materials.

DATES: The date of this notice, September 11, 1995, is the official certification date for this application. The equipment is immediately available for installation.

FOR FURTHER INFORMATION CONTACT: Anthony Erb, Technical Support Branch, Manufacturers Operations Division (6405J), U.S. Environmental Protection Agency, 401 M St. SW, Washington, D.C. 20460. Telephone: (202) 233–9259.

SUPPLEMENTARY INFORMATION:

I. Background

On October 24, 1995 Engelhard applied for certification of a kit, for use on 2-cycle petroleum fueled diesel DDC 6V92TA MUI urban bus engines for the 1979 through 1989 model years, that includes a catalytic converter muffler (CCM) and incorporates a ceramic in-cylinder coating applied to the piston crowns, valve face and fire deck on the engine head. The application was submitted under EPA's Urban Bus/Retrofit program under Program 2 only.[1]

The CCM functions as a catalytic converter and a muffler. It takes the place of the original muffler in the engine exhaust system. Through testing in accordance with the Federal Test Procedure for heavy-duty diesel engines, Engelhard documented that emissions of particulate matter (PM) were reduced to a level of 0.22 g/bhp-hr with the candidate equipment installed. Engelhard is certifying this equipment to a maximum PM emission level of 0.25g/bhp-hr.

TABLE A.—CERTIFICATION LEVELS

Engine model	Model year	PM level with standard rebuild and addition of CCM and GPX coating	Code	Family designation
DDC 6V92TA MUI	1979–1989	0.25	All	All.

Emission test results supplied by Engelhard in the application are shown in Table B. The test data show the reduction in PM. Hydrocarbon (HC), carbon monoxide (CO), oxides of nitrogen (NO_X) and smoke emissions were within the applicable emission standards with the CCM installed.

TABLE B. CERTIFICATION EMISSION TEST RESULTS (GM/BHP–HR)

	Baseline engine before rebuild	Rebuilt engine with catalyst and GPX–4 coating
HC	1.19	0.23
CO	2.53	0.46
NO_X	9.55	5.53
PM	0.87	0.22
Smoke Test:		
Accel	....	6.0%
Lug	....	3.4%
Peak	....	7.6%

Urban bus operators who choose to comply with Program 2 and use the Engelhard equipment will use the PM emission value from Table A when calculating their average fleet PM level.

II. Summary and Analysis of Comments

EPA received comments from one party on this Engelhard application during the comment period. The Greater Bridgeport Transit District stated that their experience using GPX–4 ceramic coatings since 1991 has been positive. The engines have gotten better fuel economy, emitted less smoke, and consumed less lubrication oil. A copy of the comments can be found in EPA Docket A–93–42.

III. Certification Approval

The Agency has reviewed this application, along with comments received from interested parties, and finds that this equipment reduces particulate matter emissions without causing urban bus engines to fail to meet any applicable Federal emission requirements. Additionally, EPA finds that installation of this equipment will not cause or contribute to an unreasonable risk to the public health, welfare or safety, or result in any additional range of parameter adjustability or accessibility to adjustment than that of the engine manufacturer's emission related part. The application meets the requirements for certification under the Retrofit/Rebuild Requirements for 1993 and Earlier Model Year Urban Buses (40 CFR 85.1401 and 85.1415). Thus, the Agency hereby approves the certification of this equipment.

IV. Operator Requirements and Responsibilities

For operators who have chosen to comply with Program 2, this equipment is immediately available for use and those who use this certified kit may claim the PM emissions reduction as stated in Table A when calculating their Fleet Level Attained.

As stated in the regulations, operators should maintain records for each engine in their fleet to demonstrate that they are in compliance with the requirements beginning in January 1, 1995. These records include purchase records, receipts, and part numbers for the parts and components used in the rebuilding of urban bus engines.

Mary D. Nichols,

Assistant Administrator for Air and Radiation.

BILLING CODE 6560–50–P

[FRL–5294–8]

Ozone, Particulate Matter and Regional Haze Implementation Program Subcommittee

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: On November 8, 1990, the EPA gave notice of the establishment of a Clean Air Act Advisory Committee

---

[1] EPA promulgated the Retrofit/Rebuild Requirements for 1993 and Earlier Model Year Urban Buses on April 23, 1993 (58 FR 21359). This final rule established the provisions for an urban bus retrofit/rebuild program as required by section 219(d) of the Clean Air Act Amendments (CAAA) of 1990.

(CAAAC) (55 FR 46993) which was established pursuant to the Federal Advisory Committee Act (5 U.S.C. app. 2).

Today, EPA announces establishment of the Ozone, Particulate Matter (PM) and Regional Haze Implementation Programs Subcommittee (Subcommittee) under the CAAAC. The purpose of the Subcommittee is to provide advice and recommendations on integrated approaches for implementing potentially new national ambient air quality standards (NAAQS) for ozone and particulate matter, as well as a new regional haze program. These programs have an interrelationship in the atmospheric processes that form ozone and fine particulate matter and possess common sources of precursor emissions. Further, EPA recognizes the importance of considering these programs in an integrated manner if cost effective control strategies are to be developed to meet public health and welfare objectives. The EPA envisions an open process that will examine key aspects of the existing implementation programs to provide for more effective implementation of the potential new standards, as well as approaches that will more completely integrate broad regional and national control strategies with more localized efforts. The focus of the Subcommittee will be to assist EPA in developing implementation strategies, preparing supporting analyses, and identifying and resolving impediments to the adoption of the resulting programs.

OPEN MEETING DATE: Notice is hereby given that the Subcommittee will hold an open meeting on September 26, 1995 from 9 a.m. to 4 p.m. at the Sheraton Imperial, 4700 Emperor Boulevard, Morrisville, North Carolina 27560. Due to the size of the meeting room, seating is limited to approximately 150 observers and will be made available on a first come, first served basis. To assist EPA in planning the public meeting, persons interested in attending should register with EPA by contacting Ms. Cathy Ward at TRC Environmental Corporation at 919–419–7500 to give their name and address before September 19, 1995.

The public is invited to submit written views and recommendations on new integrated approaches for implementing these programs. Such comments should be submitted (in duplicate) to Docket A–95–38 by October 10, 1995.

INSPECTION OF DOCUMENTS: A transcript of the meeting as well as other relevant materials will be available for public inspection in EPA Air Docket No. A–95–38. The docket is open for public inspection and copying between 8:30 a.m. and 5:30 p.m., weekdays, at the Air and Radiation Docket and Information Center (6102), room M–1500, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. John H. Haines, Designated Federal Officer for the Subcommittee, at 919–541–5533, or by mail at U.S. EPA, Office of Air Quality Planning and Standards, Air Quality Strategies and Standards Division, MD–15, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION: The EPA is presently reviewing the NAAQS for ozone and particulate matter. In a related action, EPA is in the process of developing a regional haze program to address visibility impairment in Federal Class I areas. The EPA's schedule for ozone calls for proposal in mid-1996 and final action in mid-1997. The EPA is under a court-ordered schedule for particulate matter to announce a proposal decision by June 30, 1996, and to take final action by January 31, 1997. The development of a regional haze program is on a schedule similar to the particulate matter review.

Based on the assessment to date, a principle consideration would be to replace the existing 1-hour primary standard for ozone with a new 8-hour standard. Consideration is also given to replacing the existing 1-hour secondary standard for ozone with a new secondary standard with a more appropriate averaging period. While the review of the particulate matter NAAQS has not progressed as far as the ozone review, preliminary assessments of the available scientific information suggest that fine particles are more likely to be associated with reported health effects. In addition, fine particles are the major cause of visibility impairment. Therefore, consideration is being given to the establishment of a new 24-hour and annual fine particle NAAQS to replace the existing 24-hour PM–10 (particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers) standard. The existing annual PM–10 standard is likely to be retained. To address the welfare effects of fine particles on visibility, consideration is being given to a regional haze program which allows for regional variations in implementation.

Given the likelihood that both the ozone and particulate matter NAAQS may be revised, as well as the development of a new regional haze program, EPA believes it is important at this time to obtain the advice and recommendations from a broad spectrum of the public on new approaches for implementing these programs. Toward this end, EPA has established the Subcommittee to be comprised of approximately 50 members from business and industry, environmental groups, State, local and tribal governments, as well as other Federal agencies. Members of the Subcommittee were selected on the basis of their professional qualifications and diversity of perspectives in order that EPA has the benefit of the full range of views in developing new approaches for implementing these programs.

Meetings will be held approximately four times a year, as determined by the chairperson. The meetings will be open to the public and will be announced in the Federal Register. The Designated Federal Officer will be present at all meetings and is authorized to adjourn any meeting whenever it is determined to be in the public interest. Each meeting will be conducted in accordance with an agenda approved in advance of the meeting by the Designated Federal Officer.

Dated: September 6, 1995.

John S. Seitz,

Director, Office of Air Quality Planning and Standards.

[FRL–5294–2]

Environmental Radiation Protection Standards for Yucca Mountain, NV

AGENCY: U.S. Environmental Protection Agency.

ACTIONS: Notice of Availability, Request for Comments, and Announcement of Public Meetings.

SUMMARY: As required under the Energy Policy Act of 1992 (Pub. L. 102–486), the National Academy of Sciences/National Research Council (NAS) has completed a study of the technical bases for environmental radiation protection standards for the potential repository for radioactive waste at Yucca Mountain, Nevada (hereafter referred to as the NAS Report). The Environmental Protection Agency (EPA) is announcing the availability of the NAS Report and requesting comments on its contents. Instructions for obtaining the NAS Report and submitting comments are given below.

EPA is also announcing public meetings to inform the public of the role which the Agency will play in setting standards for Yucca Mountain and to solicit initial comments and concerns.

DATES: Even though this is an informal comment process, comments will be of greatest value if received on or before October 26, 1995 at the address given below.

ADDRESSES: *To obtain the NAS Report.* The entire NAS Report may be purchased from the National Academy Press, 2101 Constitution Ave. NW., Box 285, Washington, DC 20055 or by calling 800–624–6242 or 202–334–3313. Also, the Agency will make photocopies of the Executive Summary available in response to written requests sent to NAS Report Executive Summary, Radioactive Waste Management Branch (6602J), Office of Radiation and Indoor Air, U.S. Environmental Protection Agency, 401 M St. SW., Washington, DC 20460–0001 or by calling 202–233–9310 or 800–331–9477 and leaving your name and address. Finally, the text of the NAS Report will be available via computer on EPA's Technology Transfer Network; for access: call 919–541–5742 (modems up to 14,400 bps) or via Internet at TELNET ttnbbs.rtpnc.epa.gov.

A copy of the NAS Report is in both dockets which have been established for this rulemaking. One docket, designated Docket A–95–12, is located in Room 1500 (ground level inside of Waterside Mall near the Washington Information Center), U.S. Environmental Protection Agency, 401 M St. SW., Washington, DC. The docket may be inspected between 8:30 a.m. and 12 noon and between 1:30 p.m. and 3:30 p.m. on weekdays. As provided in 40 CFR Part 2, a reasonable fee may be charged for photocopying docket materials. This other docket is in the Government Publications Department, Dickinson Library, University of Nevada-Las Vegas, 4505 Maryland Parkway, Las Vegas, Nevada.

To send comments. To comment upon the contents of the NAS Report, write to NAS Report Comments, Radioactive Waste Management Branch (6602J), Office of Radiation and Indoor Air, U.S. Environmental Protection Agency, 401 M St. SW., Washington, DC 20460–0001.

FOR FURTHER INFORMATION CONTACT: Ray Clark; Radioactive Waste Management Branch (6602J), Office of Radiation and Indoor Air, U.S. Environmental Protection Agency, 401 M St. SW., Washington, DC 20460–0001; telephone 202–233–9310.

SUPPLEMENTARY INFORMATION: The Nuclear Waste Policy Act of 1982 (NWPA, Pub. L. 97–425) established the current national program for the disposal of spent nuclear fuel (SNF) and high-level radioactive waste (HLW). In 1985, the Agency established generic standards, i.e., for applicable activities in the U.S., for the management and disposal of SNF and HLW in 40 CFR part 191. (50 FR 38066). The NWPA was amended by the Nuclear Waste Policy Amendments Act of 1987 which did not affect EPA's authority or responsibility but did narrow the characterization of potential disposal sites for SNF and HLW to Yucca Mountain, Nevada.

In October 1992, the Waste Isolation Pilot Plant Land Withdrawal Act (WIPP LWA, Pub. L. 102–579) and the Energy Policy Act of 1992 (EnPA, Pub. L. 102–486) were enacted. The WIPP LWA exempted the potential Yucca Mountain disposal system from coverage under 40 CFR part 191. However, the EnPA assigned the authority and responsibility to establish site-specific environmental radiation protection standards for Yucca Mountain. It also required EPA to contract with the NAS to provide findings and recommendations on the technical bases of the Yucca Mountain standards prior to writing those standards. The NAS study began in February 1993 and was presented to the Agency on August 1, 1995.

"(A) Whether a health-based standard based upon doses to individual members of the public from releases to the accessible environment (as that term is defined in the regulations contained in subpart B of part 191 of title 40, Code of Federal Regulations, as in effect on November 18, 1985) will provide a reasonable standard for protection of the health and safety of the general public;

(B) Whether it is reasonable to assume that a system for post-closure oversight of the repository can be developed, based upon active institutional controls, that will prevent an unreasonable risk of breaching the repository's engineered or geologic barriers or increasing the exposure of individual members of the public to radiation beyond allowable limits; and

(C) Whether it is possible to make scientifically supportable predictions of the probability that the repository's engineered or geologic barriers will be breached as a result of human intrusion over a period of 10,000 years."

Recommendations and Conclusions of the NAS

The EPA will now begin establishing site-specific standards for Yucca Mountain taking into account the recommendations and conclusions of the NAS. In the Executive Summary of their report, the NAS recommended:

(a) The use of a standard that sets a limit on the risk to individuals of adverse health effects from releases from the repository;

(b) That compliance assessment be conducted for the time when the greatest risk occurs, within the limits imposed by long-term stability of the geologic environment;

(a) The use of a standard that sets a limit on the risk to individuals of adverse health effects from releases from the repository;

(b) That compliance assessment be conducted for the time when the greatest risk occurs, within the limits imposed by long-term stability of the geologic environment;

(c) Against a risk-based calculation of the adverse effect of human intrusion into the repository;

(d) That the consequences of an intrusion be calculated to assess the resilience of the repository to human intrusion;

(e) That resolution of policy issues be done through a rulemaking process that allows opportunity for wide-ranging input from all interested parties;

(f) That the critical-group approach be used in the Yucca Mountain standards; and,

(g) That EPA require that the estimated risk calculated from the assumed intrusion scenario be no greater than the risk limit adopted for the undisturbed-repository case because a repository that is suitable for safe long-term disposal should be able to continue to provide acceptable waste isolation after some type of intrusion.

The NAS also reached several conclusions:

(a) An individual-risk standard would protect public health, given the particular characteristics of the site, provided that policy makers and the public are prepared to accept that very low radiation doses pose a negligibly small risk;

(b) The physical and geologic processes are sufficiently quantifiable and the related uncertainties sufficiently boundable that performance can be assessed over time frames during which the geologic system is relatively stable or varies in a boundable manner;

(c) It is not possible to predict, on the basis of scientific analyses, the societal factors for an exposure scenario. Specifying exposure scenarios therefore requires a policy decision that is appropriately made in a rulemaking process conducted by EPA;

(d) With respect to the second question of Section 801, it is not reasonable to assume that a system for post-closure oversight of the repository can be developed, based on active institutional controls, that will prevent an unreasonable risk of breaching the repository's engineered barriers or increasing the exposure of individual members of the public to radiation beyond allowable limits;

(e) With respect to the third question in Section 801, it is not possible to make scientifically supportable predictions of the probability that a repository's engineered or geologic barriers will be breached as a result of human intrusion over a period of 10,000 years; and,

(f) There is no scientific basis for incorporating the ALARA [as low as reasonably achievable] principle into the EPA standards or Nuclear Regulatory Commission licensing regulations for the repository.

Request for Comments on the NAS Report

As the first step in the public process, EPA is requesting comments on the NAS Report. While comments will be accepted on any part of the report, the Agency has several questions upon which it is particularly requesting comments. First, did the report sufficiently answer the questions found in the Act? Second, was there sufficient rationale to support the findings and conclusions? Third, do provisions other than those found in the findings and conclusions need to be included in the EPA standards? Fourth, are any of the findings or conclusions which are inappropriate or inaccurate regarding Yucca Mountain? Fifth, would the cost of imposing the findings and recommendations be justifiable when compared with the benefits provided?

Public Meetings

The second step in the standards-setting process will be to hold a series of public meetings. The purpose of these meetings is to inform the public of the role of the Environmental Protection Agency including the extent and limitations of its authority. They will also be used to receive early comments from and discuss issues with the public.

Public meetings will be held: (a) from 1:00–5:00 p.m. and 6:30–9:30 p.m. on September 20, 1995 in the Multi-Purpose Building, 821 East Farm Road in Amargosa Valley, Nevada (call Stan Sims at 702–727–7727 for directions); (b) from 1:00–5:00 p.m. and 6:30–9:30 p.m. on September 21, 1995 in Wright Hall, Room 103, University of Nevada-Las Vegas, 4505 Maryland Parkway in Las Vegas, Nevada (see the campus map on page 57 of the Las Vegas telephone directory for directions); and from 9:00 a.m.–noon and 1:00 p.m.–5:00 p.m. on September 27, 1995 in the National Gallery Ballroom, Radisson Barcelo Hotel, 2121 P St., NW, in Washington, DC (call 202–293–3100 for directions).

Dated: September 5, 1995.

Mary Nichols,

Assistant Administrator, Office of Air and Radiation.

Toxics Release Inventory Phase 3; Chemical Use; Notice of Public Meeting; Change of Meeting Date

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In the **Federal Register** of August 22, 1995, EPA announced a 2-day public meeting to receive public comments on whether to expand the reporting requirements of the Toxics Release Inventory (TRI) to include chemical use data. This notice announces new dates for the meeting.

DATES: The location of the meeting has not changed (Waterside Towers, Conference Room, 907 6th St., SW., Washington, DC); however, the dates have been changed to October 18 and 19, 1995, at 9 a.m. The issues paper will be available October 4, 1995, by contacting EPA at the telephone number listed under FOR FURTHER INFORMATION CONTACT. In order to schedule speakers and accomodate attendees, please contact EPA by October 6, 1995.

FOR FURTHER INFORMATION CONTACT: The Toxic Substances Control Act Hotline, Environmental Assistance Division, Office of Pollution Prevention and Toxics, 7408, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: (202) 554–1404, e:mail: TSCA-Hotline@epamail.epa.gov. Attention: Administrative Record No. AR 128.

SUPPLEMENTARY INFORMATION: The meeting is intended to explore issues related to the possible collection of chemical use-related data, such as materials accounting, under the Emergency Planning and Community Right-to-Know Act or other appropriate Federal statutes. The purpose of the issues paper is to provide a focus for discussion at the meeting. Speakers are asked to bring a disk containing any written comments they may have.

List of Subjects

Environmental protection, Community right-to-know.

Dated: September 5, 1995.

Susan B. Hazen,

Director, Environmental Assistance Division, Office of Pollution Prevention and Toxics.

TSCA Chemical Testing; Receipt of Test Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the receipt of test data on ethyl acetate (CAS No. 141–78–6) and diglycidyl ether of bisphenol A (CAS No. 1675–54–3) (DGEBPA), submitted pursuant to consent orders under the Toxic Substances Control Act (TSCA). Publication of this notice is in compliance with section 4(d) of TSCA.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–543B, 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD (202) 554–0551; e-mail: TSCA-Hotline@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: Section 4(d) of TSCA requires EPA to publish a notice in the **Federal Register** reporting the receipt of test data submitted pursuant to test rules promulgated under section 4(a). Under 40 CFR 790.60, all results of testing conducted pursuant to a consent order must be announced to the public in accordance with section 4(d) of TSCA.

I. Test Data Submissions

Test data for ethyl acetate were submitted by The Chemical Manufacturers Association Oxo Process Panel pursuant to a consent order at 40 CFR 799.5050. They were received by EPA on July 13, 1995. The submission includes a final report entitled "A Ten-Day Vapor Inhalation Study in the Rat." Ethyl acetate is used as a solvent for lacquers and enamel coatings, as a solvent for inks, as a plastics solvent, and in chemical synthesis.

Test data for DGEBPA were submitted by The Society of the Plastics Industry Epoxy Resin Systems DGEBPA Task Force pursuant to a testing consent order at 40 CFR Part 799.5000. They were received on June 14, 1995. The submissions include a final report entitled "DGEBPA: Two Week Dermal Irritation Probe Study in Fischer 344 Rats" and a final report entitled

"DGEBPA: Two Week Dermal Irritation Study in Male B6C3F1 Mice." DEGEBPA is used as a principal component in epoxy resins which are used for sealing and encapsulating, for making castings and pottings, for formulating light-weight foams, and as binders in laminates of fiber, glass, paper, wood sheets, and polyester cloth.

EPA has initiated its review and evaluation process for these data submissions. At this time, the Agency is unable to provide any determination as to the completeness of the submissions.

II. Public Record

EPA has established a public record for this TSCA section 4(d) receipt of data notice (docket number OPPTS–44620). This record includes copies of all studies reported in this notice. The record is available for inspection from 12 noon to 4 p.m., Monday through Friday, except legal holidays, in the TSCA Nonconfidential Information Center (NCIC) (also known as the TSCA Public Docket Office), Rm. B–607 Northeast Mall, 401 M St., SW., Washington, DC 20460.

Authority: 15 U.S.C. 2603.

List of Subjects

Environmental protection, Test data.

Dated: August 30, 1995.

BILLING CODE 6560-50-F

FEDERAL LABOR RELATIONS AUTHORITY

Federal Service Impasses Panel

Information Collection Under OMB Review

SUMMARY: The Federal Service Impasses Panel submits the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: September 11, 1995.

The customer survey document lists the following information: (1) Identification of respondent as either an agency or union representative; (2) respondent's organizational level of representation and years of experience in Federal sector labor-management relations; (3) number of cases taken before the Panel in 1994 and 1995; (4) number of bargaining units and employees represented or serviced; (5) time spent by an agency representative on labor-management matters; (6) respondent's experience with the Panel's regulations and views over various aspects of the regulations; (7) identification of the method(s) used to file request(s) for assistance; (8) explanation for not using the Panel's request for assistance form; (9) suggestions for improving the form; (10) views on various aspects of the Panel's letter acknowledging receipt of the request for assistance; (11) views on various aspects of the initial investigation process and on the manner in which the Panel staff representative(s) conducted the investigation(s); (12) if applicable, views on various aspects of the Panel's decision to decline to assert jurisdiction and explanation of the impact of that decision on the parties; (13) if applicable, views on various aspects of the Panel's decision to assert jurisdiction in cases where an obligation-to-bargain issue was raised; (14) views on various aspects of each of seven specified procedures with which the respondent may have had experience; (15) comments on how the procedures worked; (16) views on holding a face-to-face procedure at the Panel's office in Washington, D.C., rather than at the site of the impasse; (17) if applicable, views on various aspects of the Panel's *Decisions and Orders* and arbitration awards; (18) indication of whether the parties did something other than what the Panel ordered; (19) comments on the differences between mediation-arbitration by a Panel representative and private mediation-arbitration where the respondent has participated in both procedures; and (20) comments to the Chair. The letter accompanying the survey identifies (a) the group of individuals asked to respond to the survey (users of the Panel's services in FY 94 and 95); (b) the time estimated for completing and returning the survey (25 minutes or less and 14 days, respectively); (c) the purpose of the survey (evaluation of the Panel's services); and (d) how respondents can obtain a copy of the survey report.

Additional information or comments: Copies of the proposed survey and supporting documents may be obtained from Linda A. Lafferty, Executive Director, 607 14th Street, NW., Suite 220, Washington, D.C. 20424–0001, (202) 482–6670.

Linda A. Lafferty,

Executive Director.

BILLING CODE 6727-01-M

FEDERAL RESERVE SYSTEM

First United Bancshares, Inc.; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than September 25, 1995.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. First United Bancshares, Inc., El Dorado, Arkansas; to engage *de novo* through its subsidiary, First United Trust Company, N.A., El Dorado, Arkansas, in trust company functions, pursuant to § 225.25(b)(3) of the Board's Regulation Y, and in providing portfolio investment advice, pursuant to § 225.25(b)(4)(iii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 5, 1995.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210-01-F

Malvern Bancorporation, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 5, 1995.

A. Federal Reserve Bank of Philadelphia (Michael E. Collins, Senior Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Malvern Bancorporation*, Malvern, Pennsylvania; to become a bank holding company by acquiring 100 percent of the voting shares of The National Bank of Malvern, Malvern, Pennsylvania.

B. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Alabama National Bancorporation*, Shoal Creek, Alabama; to merge with National Commerce Corporation, Birmingham, Alabama, and thereby indirectly acquire Commerce Bankshares, Inc., Birmingham, Alabama, and National Bank of Commerce, Birmingham, Alabama.

Board of Governors of the Federal Reserve System, September 5, 1995.

BILLING CODE 6210-01-F

State Street Boston Corporation; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies; Correction

This notice corrects a notice (FR Doc. 95-20914) published on page 43800 of the issue for Wednesday, August 23, 1995.

Under the Federal Reserve Bank of Boston heading, the entry for State Street Boston Corporation, Boston, Massachusetts, is revised to read as follows:

1. *State Street Boston Corporation*, Boston, Massachusetts; to establish, through its subsidiary, Boston Financial Data Services, Inc., Quincy, Massachusetts, a *de novo* joint venture, BancBoston State Street Investor Services, L.P., Canton, Massachusetts, with The First National Bank of Boston, N.A., Boston, Massachusetts, as co-venturer, and thereby perform functions and activities that may be performed by a trust company and provide data processing and data transmission services and activities incidental thereto, pursuant to § 225.25(b)(3) and (b)(7) of the Board's Regulation Y. The services provided by the joint venture may include the processing of creditor claims in bankruptcy proceedings or plaintiff claims in class action legal proceedings, including processing claim information received from creditors and plaintiffs, creating a database regarding creditors and plaintiffs, responding to inquiries from creditors and plaintiffs, and printing and remitting payments to creditors and plaintiffs. Boston Financial Data Services, Inc., is equally owned by State Street Boston Corporation and DST Systems, Inc.

Comments on this application must be received by September 18, 1995.

Board of Governors of the Federal Reserve System, September 6, 1995.

Jennifer J. Johnson,

Deputy Secretary of the Board.

GOVERNMENT PRINTING OFFICE

Public Meeting for Federal, State and Local Agencies, and Others Interested in A Demonstration of GPO Access, the Online Service Providing the Federal Register and Other Federal Databases

The Superintendent of Documents will hold a public meeting for Federal, state and local government agencies, and any others interested in an overview and demonstration of the Government Printing Office's online service, *GPO Access*, provided under the Government Printing Office Electronic Information Access Enhancement Act of 1993 (Public Law 103–40).

The demonstration will be held Thursday, October 19, 9 a.m.–10:30 a.m. and 11 a.m.–12:30 p.m. at the Johnson County Library, 9875 West 87 St., Overland Park, Kansas 66212. There is no charge to attend.

The online **Federal Register** Service offers access to the daily issues of the **Federal Register** by 6 a.m. on the day of publication. All notices, rules and proposed rules, Presidential documents, executive orders, separate parts, and reader aids are included in the database as ASCII text files, with graphics provided in TIFF format and as Adobe Acrobat Portable Document Format files (PDF). The online **Federal Register** is available via the Internet or as a dial-in service. Historical data is available from January 1994 forward.

Other databases currently available online through *GPO Access* include the *Congressional Record; Congressional Record Index,* including the *History of Bills;* Congressional Bills; Public Laws; *U.S. Code;* and *GAO Reports.*

Individuals interested in attending may reserve a space by contacting John Berger, Product Manager at the GPO's Office of Electronic Information Dissemination Services, by Internet e-mail at john@eids05.eids.gpo.gov; by telephone: 202–512–1525; or by fax: 202–512–1262 . Seating reservations will be accepted through Friday, October 13, 1995.

Dated: August 23, 1995.

Michael F. DiMario,

Public Printer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Agency Forms Undergoing Paperwork Reduction Act Review

Periodically, the Public Health (PHS) publishes a list of information collection requests under review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the PHS Reports Clearance Office on (202)–690–7100.

1. Interdisciplinary Generalist Curriculum (IGC) Project: External Evaluation—New—The main focus of the IGC project deals with the medical faculty and curriculum by requiring demonstration schools to develop collaborative, clinically-oriented teaching during the first two years of medical school among the generalist faculty, require primary care, community-based preceptorships for first and second year medical students, and expose students to 150 hours of curriculum time in the preclinical years (half of which must be devoted to direct supervised patient care experiences; schools funded for the IGC will implement their own curricula which adhere to these guidelines. Two mail surveys will be conducted for the evaluation of the Interdisciplinary Generalist Curriculum Project; a longitudinal survey of faculty at the IGC demonstration schools on attitudes, beliefs and observations about the IGC innovations, and a survey of deans at medical schools and colleges of osteopathic medicine on the implementation of similar curriculum innovations.

Title	Number of respondents	Number of responses per respondent	Average burden per response (hour)
Faculty Survey	1552	1	.25
Survey of Deans	153	1	.5
Estimated Total Annual Burden: 465 hours.			

Written comments and recommendations concerning the proposed information collections should be sent within 30 days of this notice to: Allison Eydt, Human Resources and Housing Branch, Office of Management and Budget. New Executive Office Building, Room 10235, Washington, DC 20503.

James Scanlon,

Director, Data Policy Staff, Office of the Assistant Secretary for Health and PHS Reports Clearance Officer.

BILLING CODE 4160–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. FR–3932–D–01]

Redelegation of Authority

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice of redelegation of authority.

SUMMARY: In this notice, the Assistant Secretary for Public and Indian Housing redelegates to certain HUD officials in field offices (also referred to as State and Area offices) the power and authority to order Limited Denials of Participation (LDPs). A Limited Denial of Participation is a sanction which may be imposed against contractors and participants in HUD programs under certain circumstances. The Assistant Secretary for Public and Indian Housing redelegates authority to issue LDPs, as specified, to the Directors and Deputy Directors of Public Housing and to the Administrators of Field Offices of Native American Programs.

EFFECTIVE DATE: September 1, 1995.

FOR FURTHER INFORMATION CONTACT: Casimir Bonkowski, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 7th Street, S.W., Room 4228, Washington, D.C. 20410, (202) 708–0440; or Dominic Nessi, Director, Office of Native American Programs, 451 7th Street, S.W., Room B–133, Washington, DC 20410, (202) 755–0032. A telecommunications device for the hearing-impaired is available at 202–

708–0850. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The HUD regulations at 24 CFR 24.700 provide that officials designated by the Secretary, including the Assistant Secretary for Public and Indian Housing, are authorized to order Limited Denials of Participation (LDPs) and to redelegate this authority. In the present redelegation, the Assistant Secretary for Public and Indian Housing redelegates to the Director and the Deputy Director of Public Housing for each HUD field office (also referred to as a State or Area office) and to the Administrator of each Field Office of Native American Programs, the authority to order Limited Denials of Participation relating to programs under the jurisdiction of the Assistant Secretary for Public and Indian Housing.

Accordingly, the Assistant Secretary for Public and Indian Housing redelegates authority as follows:

Section A. Authority Redelegated

The Assistant Secretary for Public and Indian Housing redelegates the power and authority to order Limited Denials of Participation pursuant to 24 CFR 24.700, whenever the program under which the cause for LDP arose is a program under the jurisdiction of the Assistant Secretary for Public and Indian Housing, to the Director and the Deputy Director of Public Housing for each HUD field office (also referred to as a State or Area office) and to the Administrator of each Field Office of Native American Programs.

Section B. No Authority to Further Redelegate

The authority granted in Section A, above, may not be further redelegated pursuant to this redelegation.

Authority: Sec. 7(d) of the Department of HUD Act (42 U.S.C. 3535(d)).

Dated: September 1, 1995.

Michael B. Janis,

General Deputy Assistant Secretary for Public and Indian Housing.

[FR Doc. 95–22383 Filed 9–8–95; 8:45 am]

BILLING CODE 4210–33–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CO–016–1220–00]

Temporary Travel Restrictions for the Serviceberry Mountain Area of Colorado

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Order of Area, Road and Trail Use Restriction.

SUMMARY: This order closes certain public lands to motorized vehicle use (except snowmobiles) in the Serviceberry Mountain area of the Little Snake Resource Area, Craig district. This order modifies the "unclassified" Off-Highway Vehicle (OHV) designation (3,108 acres) on public lands newly acquired through the Bridges Land Exchange (COC54336). It also modifies the existing "open" (3,246 acres) and "limited" (1440 acres) OHV designations on public lands adjoining the public lands acquired through the exchange. This order is issued under the authority of 43 CFR 8364.1 and 43 CFR 8341.2(a) as a temporary measure while the off-highway vehicle (OHV) management portion of the Little Snake Resource Area Resource Management Plan is reviewed and modified as needed to address public issues, concerns and needs, as well as resource uses, development, impacts and protection.

This Order Affects All Public Lands in the Serviceberry Mountain Area of Moffat County Within

T. 12 N,, R. 90 W., 6th PM
  Sec. 21, S. ½ S. ½ (south of the fence line)
  Sec. 28
  Sec. 29
  Sec. 31
  Sec. 32
  Sec. 33
T. 11 N,, R. 90 W., 6th PM
  Sec. 5
  Sec. 6
  Sec. 7
  Sec. 8
  Sec. 17
  Sec. 18
  Sec. 19
  Sec. 20
  Sec. 21
  Sec. 29
  Sec. 30

EFFECTIVE DATES: This restriction order shall be effective September 14, 1995, and shall remain in effect until rescinded or modified by the Authorized Officer.

SUPPLEMENTARY INFORMATION: Current OHV use designations for public lands in the Serviceberry Mountain area, allow motorized vehicle use on and off roads and trails year round or limit motorized vehicle use to all-terrain vehicles and snowmobiles. State and local agencies and neighboring landowners expressed concerns that recent easements and acquisitions would open public lands in the Serviceberry Mountain area to motorized traffic and cause unacceptable impacts to natural resources, especially wildlife and soils.

In addition, consistent motor vehicle limitations are needed throughout the adjoining public lands in the Serviceberry Mountain area to avoid public confusion. The affected public lands includes identified soil erosion hazards and important high quality big game habitat.

Given due consideration of the concerns expressed by the public and potential impacts of unrestricted motorized vehicle use, a modification of existing OHV use designations is necessary to adequately protect natural resources on public land, minimize conflicts with other uses, prevent trespass problems, and ensure public safety until these issues can be more thoroughly addressed in activity planning for these areas. Provisions will be made to allow for necessary motorized travel on the public lands for administrative purposes and to facilitate non-motorized public access to the public lands.

The area, roads, and trails affected by this order will be posted with appropriate regulatory signs. Information, including detailed maps of the restricted area, roads and trails will be available at the access sites and in the Resource Area Office and District Office at the addresses shown below.

Persons who are exempt from the restrictions contained in this notice include:

1. Any Federal, State, or local officers engaged in fire, emergency and law enforcement activities.
2. BLM employees engaged in official duties.
3. Persons or agencies holding a valid permit or right-of-way on or across the restricted public land for access to private land, for purposes related to the access of private land only.
4. Persons or agencies holding a special use permit or right-of-way for access to maintenance and operation of authorized facilities within the restricted area, for purposes related to access for maintenance and operation of authorized facilities, and provided such motorized use is limited to the routes specifically identified in the special use permit or right-of-way.
5. Grazing permittees authorized during the permitted grazing season for grazing related purposes provided such motorized use is limited to existing roads and trails and subject to any additional conditions in the grazing permit. Any motorized use before or after the permitted grazing season necessary for maintenance and operation of range facilities shall require advance approval by the authorized officer specifically authorizing such use and subject to whatever restrictions are deemed necessary.

Penalties: Violations of this restriction order are punishable by fines not to exceed $1,000 and/or imprisonment not to exceed 12 months.

[CA–064–05–1430–00, CARI 1366]

Notice of Realty Action; Transfer of Public Lands, Kern County, California

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice of Realty Action; Recreation and Public Purpose Act Transfer Kern County, California.

SUMMARY: The following described land has been examined and found suitable for classification for transfer to Kern County under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 et seq.).

Mount Diablo Meridian

T.27S., R.39E.,
  Section 12: NW¼SW¼, W½NW¼.

Containing 120 acres of public land, more or less.

SUPPLEMENTARY INFORMATION: The County of Kern has applied to transfer the site currently leased for the Ridgecrest Landfill. The lands are not needed for Federal purposes and conveyance would be consistent with the 1980 California Desert Conservation Area Plan, as amended. The lease and conveyance of the land would be subject to the following terms and conditions:

1. Provisions of the Recreation and Public Purpose Act and applicable regulations of the Secretary of the Interior.
2. A right of way to the United States for ditches and canals, pursuant to the Act of August 30, 1890 (43 U.S.C. 945).
3. A reservation of all minerals to the United States, and the right to prospect, mine and remove the minerals.
4. A declaratory covenant stating that the site has been used for disposal of solid waste.

Publication of this Notice in the **Federal Register** segregates the public lands from all other forms of appropriation under the public land laws and the general mining laws, but not the mineral leasing laws or the Recreation and Public Purpose Act. Detailed information concerning this action is available for review at the California Desert District, 6221 Box Springs Blvd., Riverside, CA 92507. For a period of 45 days after publication of this notice in the **Federal Register** interested parties may submit comments to the District Manager, California Desert District, in care of the above address. Objections will be reviewed by the State Director, who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, the classification will become effective November 13, 1995.

Dated: August 24, 1995.

Henri R. Bisson,

District Manager.

[FR Doc. 95–22261 Filed 9–8–95; 8:45 am]

BILLING CODE 4310–40–P

[NV–930–4210–05; N–59989]

Notice of Realty Action: Conveyance for Recreation and Public Purposes

AGENCY: Bureau of Land Management.

ACTION: Recreation and public purpose conveyance.

SUMMARY: The following described public land near Laughlin, Clark County, Nevada has been examined and found suitable for conveyance for recreational or public purposes under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 *et seq.*). Clark County proposes to use the land for a municipal solid waste landfill.

Mount Diablo Meridian, Nevada

T. 32 S., R. 66 E.,
  Sec. 8: NE¼NE¼;
  Sec. 9: NW¼NW¼.

Containing 80 acres, more or less.

The land is not required for any federal purpose. The conveyance is consistent with current Bureau planning for this area and would be in the public interest. The patent, when issued, will be subject to the provisions of the Recreation and Public Purposes Act and applicable regulations of the Secretary of the Interior, and will contain the following reservations to the United States:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States Act of August 30, 1890 (43 U.S.C. 945).
2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas District, 4765 W. Vegas Drive, Las Vegas, Nevada.

Upon publication of this notice in the **Federal Register**, the above described land will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for conveyance under the Recreation and Public Purposes Act, leasing under the mineral leasing laws and disposals under the mineral material disposal laws.

By no later than October 26, 1995, interested parties may submit comments regarding the proposed conveyance for classification of the lands to the District Manager, Las Vegas District, 4765 W. Vegas Drive, Las Vegas, Nevada 89108.

CLASSIFICATION COMMENTS: Interested parties may submit comments involving the suitability of the land for a municipal solid waste landfill. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, or if the use is consistent with State and Federal programs.

APPLICATION COMMENTS: Interested parties may submit comments regarding the specific use proposed in the application and plan of development, whether the BLM followed proper administrative procedures in reaching the decision, or any other factor not directly related to the suitability of the land for a municipal solid waste landfill.

Any adverse comments will be reviewed by the State Director. In the absence of any adverse comments, the classification of the land described in this Notice will become effective November 13, 1995. The lands will not be offered for conveyance until after the classification becomes effective.

Dated: August 30, 1995.

Michael F. Dwyer,

District Manager, Las Vegas, NV.

[FR Doc. 95–22379 Filed 9–8–95; 8:45 am]

BILLING CODE 4310–HC–P

Bureau of Reclamation

Central Valley Project Improvement Act, Criteria for Evaluating Water Conservation Plans

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of draft decision of evaluation of water conservation plans.

SUMMARY: To meet the requirements of the Central Valley Project Improvement Act (CVPIA), the Bureau of Reclamation (Reclamation) developed and published the Criteria for Evaluating Water Conservation Plans (Criteria) dated April 30, 1993. These Criteria were developed based on information provided during public scoping and public review sessions held throughout Reclamation's Mid-Pacific (MP) Region. Reclamation uses these Criteria to evaluate the adequacy of all water conservation plans developed by project contractors in the MP Region, including those required by the Reclamation Reform Act of 1982. The Criteria were developed and the plans evaluated for the purpose of promoting the most efficient water use reasonably achievable by all MP Region's contractors. Reclamation made a commitment (stated within the Criteria) to publish a notice of its draft determination on the adequacy of each contractor's water conservation plan in the **Federal Register** and to allow the public a minimum of 30 days to comment on its preliminary determinations. This program is ongoing; an updated list will be published to recognize districts as plans are revised to meet the Criteria.

DATES: All public comments must be received by Reclamation by October 11, 1995.

ADDRESSES: Please mail comments to the address provided below.

FOR FURTHER INFORMATION CONTACT: Debra Goodman, Bureau of Reclamation, 2800 Cottage Way, MP–402, Sacramento, CA 95825. To be placed on a mailing list for any subsequent information, please write Debra Goodman or telephone at (916) 979–2397.

SUPPLEMENTARY INFORMATION: Under provisions of Section 3405(e) of the CVPIA (Title 34 of Public Law 102–575), "The Secretary (of the Interior) shall establish and administer an office on Central Valley Project water conservation best management practices that shall * * * develop criteria for evaluating the adequacy of all water conservation plans developed by project contractors, including those plans required by section 210 of the Reclamation Reform Act of 1982." Also, according to Section 3405(e)(1), these criteria will be developed "* * * with the purpose of promoting the highest level of water use efficiency reasonably achievable by project contractors using best available cost-effective technology and best management practices."

The MP Criteria states that all parties (districts) that contract with Reclamation for water supplies (municipal and industrial contracts greater than 2,000 acre feet and agricultural contracts over 2,000 irrigable acres) will prepare water conservation plans which will be evaluated by Reclamation based on the following required information detailed in the steps listed below to develop, implement, monitor, and update their water conservation plans. The steps are:

1. Coordinate with other agencies and the public.
2. Describe the district.
3. Inventory water resources.
4. Review the past water conservation plan and activities.
5. Identify best management practices to be implemented.
6. Develop schedules, budgets, and projected results.
7. Review, evaluate, and adopt the water conservation plan.
8. Implement, monitor, and update the water conservation plan.

The MP contractors listed below have developed water conservation plans which Reclamation has evaluated and preliminarily determined meet the requirements of the Criteria.

- Clear Creek Community Services District
- Fresno Irrigation District
- Orland-Artois Water District
- Stockton East Water District

Public comment on Reclamation's preliminary (i.e., draft) determinations at this time is invited. Copies of the plans listed above will be available for review at Reclamation's MP Regional Office and MP's area offices. If you wish to review a copy of the plans, please contact Ms. Goodman to find the office nearest you.

Dated: August 28, 1995.

Franklin E. Dimick,

Assistant Regional Director.

[FR Doc. 95–22300 Filed 9–8–95; 8:45 am]

BILLING CODE 4310–94–M

Recision of the Record of Decision on the Final Environmental Impact Statement for the Narrows Project, Small Reclamation Loan Program, Utah

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA) of 1969, as amended, the Department of the Interior, Bureau of Reclamation (Reclamation), has prepared a final environmental impact statement (EIS) on the proposed Narrows Project. The EIS describes and presents the environmental effects of three alternatives, including no action, for a multiple purpose water development project that would provide water for irrigation and municipal use in north Sanpete County, Utah. This notice is for the purpose of rescinding the Record of Decision for this FEIS.

FOR FURTHER INFORMATION CONTACT: Charles A. Calhoun, Regional Director, Upper Colorado Region, Bureau of Reclamation, UC–100, Mail Room 6107, 125 South State Street, Salt Lake City, Utah 84138–1102; Telephone: (801) 524–5592.

SUPPLEMENTARY INFORMATION: On July 28, 1995, the Carbon Water Committee, *et. al.*, filed an action in the United States District Court against Reclamation for declaratory judgment and injunctive relief. The primary assertion in the complaint is that Reclamation failed to comply with NEPA, in the preparation of the final environmental impact statement (EIS) for the proposed Narrows Project.

The complaint alleges a conflict of interest on the part of the contractor that Sanpete Water Conservancy District hired to prepare the EIS and the Loan application. By this recision action, Reclamation intends to initiate a close review of the NEPA document, specifically in light of a possible conflict of interest, to determine whether the contractor accurately portrayed the environmental consequences of the proposed action, both for the public and the decision makers.

Any further action under NEPA or processing of the loan application will await the outcome of this review.

Dated: September 6, 1995.

Charles A. Calhoun,

Regional Director.

BILLING CODE 4310–94–M

National Park Service

Notice of Inventory Completion of Native American Human Remains in the Possession of the Utah Field House of Natural History State Park, Vernal, UT

AGENCY: National Park Service, Interior

ACTION: Notice

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003(d), of the completion of an inventory of human remains in the possession of the Utah Field House of Natural History State Park, Vernal UT.

In May, 1953, a Ms. Wadel (or Wadell) donated a single cranium to the Utah Field House of Natural History State Park. Writing on the occipital vault reads: "skull of Sioux Chief Gall. Age 99 years and 7 months. Died 1879 at Poplar, Montana, then the Ft. Peck Military Post. He surrendered to General Miles."

A detailed inventory and assessment of this human cranium has been made by Utah Field House professional curatorial staff and specialists in physical anthropology, forensic anthropology, and prehistoric archaeology in consultation with the Standing Rock Sioux Tribal Council. Osteometric and forensic analyses by Dr. George Gill and Dr. Michael Charney established that the cranium is siouan in configuration. Many of the details written on the skull are at variance with generally acknowledged dates and locations of Chief Gall's life. However, a photographic superimposition of the skull with known photographs of Hunkpapa Chief Gall reveals a striking similarity in form.

Contact with the Standing Rock Sioux Tribal Council and the family of Gall's descendants was initiated in June 1991. On October 4, 1991, a grave located in the St. Elizabeth Episcopal Cemetery, on the Standing Rock Sioux Tribe Reservation and said to be the burial site of Chief Gall was exhumed. Family members, a mortician, a doctor, and the South Dakota State Anthropologist, witnessed the excavation. The grave appeared to have not been previously disturbed. A shattered cranium in the grave yielded no corroborating measurements. The lineal descendants of Chief Gall are satisfied that the remains in the grave are of their ancestor.

The Standing Rock Tribal Council acknowledges the lineal descendants decision on the identity of the cranium. Following the decision by Gall's lineal decendants, broader consultation was initiated with the Fort Belknap Community Council, the Prairie Island Community Council, the Shakopee Sioux Community Council, the Upper Sioux Board of Trustees, the Lower Sioux Indian Community Council, the Flandreau Santee Sioux Executive Committee, the Santee Sioux Tribal Council, the Sisseton-Wahpeton Sioux Tribal Council, the Lower Brule Sioux Tribal Council, the Rosebud Sioux Tribal Council, the Cheyenne River Sioux Tribal Council, the Oglala Sioux Tribe, the Devils Lake Sioux Tribe, the Fort Peck Tribal Executive Board, the Crow Creek Sioux Tribal Council, and the Yankton Sioux Tribal Business and Claims.

Based on the above mentioned information, officials of the Utah Field House of Natural History State Park have determined pursuant to 25 U.S.C. (2) that there is a relationship of shared group identity which can be reasonably traced between this cranium and the Standing Rock Tribe.

This notice has been sent to lineal descendants of Chief Gall and to officials of the Standing Rock Sioux Tribal Council, the Fort Belknap Community Council, the Prairie Island Community Council, the Shakopee Sioux Community Council, the Upper Sioux Board of Trustees, the Lower Sioux Indian Community Council, the Flandreau Santee Sioux Executive Committee, the Santee Sioux Tribal Council, the Sisseton-Wahpeton Sioux Tribal Council, the Lower Brule Sioux Tribal Council, the Rosebud Sioux Tribal Council, the Cheyenne River Sioux Tribal Council, the Oglala Sioux Tribe, the Devils Lake Sioux Tribe, the Fort Peck Tribal Executive Board, the Crow Creek Sioux Tribal Council, and the Yankton Sioux Tribal Business and Claims Committee. Individuals or representatives of any other indian tribe that believes itself to be culturally affiliated with these human remains should contact Dr. Sue Ann Bilbey, Curator, Utah Field House of Natural History State Park, 235 East Main, Vernal UT 84078, telephone (801)789–3799 on or before [*thirty days after publication of this notice in the* **Federal Register**]. Repatriation of the cranium to the Standing Rock Sioux Tribe may begin after that date if no additional claimants come forward.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Housing Guaranty Program; Notice of Investment Opportunity

The U.S. Agency for International Development (USAID) has authorized the guaranty of loans to the Infrastructure Leasing & Financial Services Limited, Bombay, Indian, ("Borrower") as part of USAID's development assistant program. The proceeds of these loans will be used to finance a prototype program designed to demonstrate the feasibility of private sector provision of infrastructure in India for the benefit of low income families. At this time, the Borrower plans to request bids from eligible lenders for a loan of $25.0 Million U.S. Dollars (US$25,000,000). The name and address of the Borrower's representatives to be contacted by interested U.S. lenders or investment bankers, the amount of the loan and project number are indicated below:

Infrastructure Leasing & Financial Service Limited, India

Project No.: 386–HG–IV
Housing Guaranty Loan Nos.: 386–HG–015–AO1, 386–HG–016–AO1
Amount: US$25,000,000

Attention:

(1) Mr. Hari Shankaran, Vice President, Infrastructure Leasing & Financial Services Ltd., India Habitat Centre, 4th Floor, East Court, Zone VI, Lodhi Road, New Delhi 110 003, India; Telefax No.: 011–(91–11) 463–6651 (preferred communication); Telephone Nos.: 011–(91–11) 463–6637, 463–6641, 463–6642

(2) Mr. Ravi Parthasarathy, Managing Director, Infrastructure Leasing and Financial Services Ltd., Mahindra Towers, 4th Floor, Road No. 13, Worli, Bombay 400 018; Telefax No.: 011–(91–22) 493–0080 (preferred communication); Telephone Nos.: 011–(91–22) 493–5190, 496–4353, 493–5127

Interested lenders should contact the Borrower and USAID immediately upon receipt of this Notice and indicate their interest in bidding on the proposed financing. Those lenders expressing interest will be included in a short list maintained by USAID for the purpose of facilitating an accelerated auction procedure as and when the actual bid date is set. It is anticipated that the bidding will occur sometime in mid to late September, 1995. As soon as the bid date is established, and in lieu of another public notice, a formal Notice of

Investment Opportunity will be provided directly to those firms appearing on the short list. The time between the actual receipt of the Notice of Investment Opportunity announcing the bid date, and the due date for bids, may be as little as 24 hours.

Lenders seeking to be included in the short list should submit their name, address and telefax number to: Mr. Charles Billand, Assistant Director, Mr. Peter Pirnie, Financial Advisor, U.S. Agency for International Development, Office of Environment and Urban Programs, G/ENV/UP, Room 409, SA–18, Washington, DC 20523–1822; Telex No.: 892703 AID WSA; Telefax Nos.: 703/875–4384 or 875–4639 (preferred communication); Telephone Nos.: 703/875–4300 or 875–4510.

The Borrower is currently considering the following terms:

(1) *Amount:* U.S. $25.0 million.

(2) *Term:* 30 years.

(3) *Grace Period:* Ten years grace on repayment of principal. (During grace period, semi-annual payments of interest only). If *variable* interest rate, repayment of principal to amortize in equal, semi-annual installments over the remaining 20-year life of the loan. If *fixed* interest rate, semi-annual level payments of principal and interest over the remaining 20-year life of the loan.

(4) *Interest Rate*: Alternatives of *fixed rate*, and *variable rate* are requested.

(a) *Fixed Interest Rate*: If rates are to be quoted based on a spread over an index, the lender should use as its index a long bond, specifically the 6⅞% U.S. Treasury Bond due August 15, 2025. Such rate is to be set at the time of acceptance.

(b) *Variable Interest Rate*: To be based on the six-month British Bankers Association LIBOR, or the yield (B.E.Y.) of the 26 week U.S. Treasury Bill, preferably with terms relating to the Borrower's right to convert to fixed. The rate should be adjusted weekly.

(5) *Prepayment*:

(a) Offers should include an option for prepayment and mention prepayment premiums, if any.

(b) Federal statutes governing the activities of USAID require that the proceeds of USAID-guaranteed loans be used to provide affordable shelter and related infrastructure and/or services to below median-income families. In the extraordinary event that the Borrower materially breaches its obligation to comply with this requirement, USAID reserves the right, among its other rights and remedies, to accelerate the loan.

(6) *Closing Date*: As early as practicable with best efforts to close in 30 days, but not to exceed 60 days from date of selection of lender.

Selection of investment bankers and/or lenders and the terms of the loan are initially subject to the individual discretion of the Borrower, and thereafter, subject to approval by USAID. Disbursements under the loan will be subject to certain conditions required of the Borrower by USAID as set forth in agreements between USAID and the Borrower. The full repayment of the loans will be guaranteed by USAID. The USAID guaranty will be backed by the full faith and credit of the United States of America and will be issued pursuant to authority in Section 222 of the Foreign Assistance Act of 1961, as amended (the "Act").

Lenders eligible to receive the USAID guaranty are those specified in Section 238(c) of the Act. They are: (1) U.S. citizens; (2) domestic U.S. corporations, partnerships, or associations substantially beneficially owned by U.S. citizens; (3) foreign corporations whose share capital is at least 95 percent owned by U.S. citizens; and (4) foreign partnerships or associations wholly owned by U.S. citizens.

Information as to the eligibility of investors and other aspects of the USAID housing guaranty program can be obtained from: Mr. Michael J. Lippe, Director, Office of Environment and Urban Programs, U.S. Agency for International Development, Room 409, SA–18, Washington, DC 20523–1822; Fax Nos: 703/875–4384 or 875–4639; Telephone: 703/875–4300.

Dated: September 6, 1995.

Michael G. Kitay,

Assistant General Counsel, Bureau for Global Programs, Field Support and Research, U.S. Agency for International Development.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 95–31]

Charles L. Novosad, Jr., M.D.; Revocation of Registration

On March 14, 1995, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Charles L. Novosad, Jr., M.D. (Respondent), of Pojoaque, New Mexico. The Order to Show Cause proposed to revoke Respondent's DEA Certificate of Registration, AN5283697, under 21 U.S.C. 824(a)(3), and deny any pending applications for renewal of such registration under 21 U.S.C. 823(f). The Order to Show Cause alleged that Respondent is not currently authorized to handle controlled substances in the State of New Mexico.

Respondent filed a request for a hearing on the issues raised by the Order to Show Cause, and the matter was docketed before Administrative Law Judge Paul A. Tenney. On May 2, 1995, the Government filed a motion for summary disposition, which was accompanied by a Decision and Order of the New Mexico Board of Pharmacy dated September 15, 1994. The Board of Pharmacy ordered the revocation of Respondent's state registration to handle controlled substances based upon the May 20, 1994, revocation of his state medical license. As a result, the Government contended that Respondent is not authorized to handle controlled substances in the State of New Mexico.

On May 9, 1995, the Respondent filed a response to the Government's motion. In his response, Respondent argued in part, that due process required a hearing in this matter.

On May 10, 1995, in his opinion and recommended decision, the administrative law judge found that Respondent lacks authorization to handle controlled substances in the State of New Mexico. The administrative law judge therefore granted the Government's motion for summary disposition and recommended that Respondent's DEA Certificate of Registration be revoked.

On June 5, 1995, the Respondent filed a letter with the administrative law judge requesting that the latter stay any dismissal of his DEA registration without a hearing. On June 6, 1995, the administrative law judge issued an order in which he interpreted the Respondent's letter as a motion for reconsideration of his ruling on the Government's motion for summary disposition. The administrative law judge found that Respondent failed to provide any new information regarding the revocation of his state medical license, and accordingly, denied Respondent's motion for reconsideration.

On June 12, 1995, Respondent filed exceptions to the administrative law judge's opinion and recommended ruling. The Respondent presented arguments pertaining to actions taken by the New Mexico Board of Medical Examiners and the New Mexico Board of Pharmacy. The Deputy Administrator has carefully considered the entire record in this matter and, pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon findings of fact and conclusions of law as hereinafter set forth.

The Deputy Administrator adopts the opinion and recommended decision of the administrative law judge in its entirety. The Drug Enforcement Administration cannot register or maintain the registration of a practitioner who is not duly authorized to handle controlled substances in the state in which he conducts his business. 21 U.S.C. 802(21), 823(f) and 824(a)(3). This prerequisite has been consistently upheld. *See James H. Nickens, M.D.*, 57 FR 59847 (1992); *Elliott Monroe, M.D.*, 57 FR 23246 (1992); *Bobby Watts, M.D.*, 53 FR 11919 (1988).

The administrative law judge properly granted the Government's motion for summary disposition. It is well-settled that when no question of fact is involved, or when the facts are agreed upon, a plenary, adversary administrative proceeding involving evidence and cross-examination of witnesses is not obligatory. The rationale is that Congress does not intend administrative agencies to perform meaningless tasks. *Phillip E. Kirk, M.D.*, 48 FR 32887 (1983), aff'd sub nom *Kirk* v. *Mullen*, 749 F.2d 297 (6th Cir. 1984); *Alfred Tennyson Smurthwaite, N.D.*, 43 FR 11873 (1978); see also, *NLRB* v. *International Association of Bridge, Structural and Ornamental Ironworkers, AFL–CIO*, 549 F.2d 634 (9th Cir. 1977); *United States* v. *Consolidated Mines and Smelting Co., Ltd.*, 455 F.2d 432, 453 (9th Cir. 1971).

In his exceptions to the opinion and recommended decision of the administrative law judge, the Respondent argued, *inter alia*, that actions taken by the New Mexico Board of Medical Examiners and the New Mexico Board of Pharmacy, which resulted in the revocation of his state license to handle controlled substances, were improper. However, Respondent presented no evidence to contradict the fact that he is currently without authorization to handle controlled substances in the State of New Mexico.

Accordingly, the Deputy Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AN5283697, previously issued to Charles L. Novosad, Jr., M.D., be, and it hereby is, revoked and that any pending applications for renewal of such registration be, and they hereby are, denied. This order is effective October 11, 1995.

Dated: September 5, 1995.

Stephen H. Greene,

Deputy Administrator.

Adams-Millis, High Point, NC; Notice of Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on August 21, 1995 in response to a worker petition which was filed on August 9, 1995 on behalf of workers at Adams-Millis, High Point, North Carolina (a division of the Sara Lee Corporation).

An active certification covering the petitioning group of workers remains in effect (TA–W–30,083, Adams-Millis, High Point, North Carolina, certified August 29, 1994, impact date of June 29, 1993 and an expiration date of August 29, 1996). Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, DC this 29th day of August, 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[TA–W–30,647]

Amerada Hess Corporation Headquartered in Houston, TX and Operating at Various Locations in the Following States; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued an Amended Certification of Eligibility to Apply for Worker Adjustment Assistance on March 21, 1995, applicable to all workers at the subject firm. The amended notice was published in the **Federal Register** on March 31, 1995 (60 FR 16667).

At the request of the company, the Department reviewed the certification for the subject firm. New findings show that worker separations have occurred at Amerada Hess locations in New Mexico. The Department is again amending the certification to cover these workers.

The intent of the Department's certification is to include all workers of Amerada Hess adversely affected by increased imports.

The amended notice applicable to TA–W–30,647 is hereby issued as follows:

> "All workers of Amerada Hess Corporation, headquartered in Houston, Texas (TA–W–30,647) and operating at various locations in the following cited States who became totally or partially separated from employment on or after January 17, 1994 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974:

TA–W–30,647A	Oklahoma
TA–W–30,647B	Louisiana
TA–W–30,647C	North Dakota
TA–W–30,647D	Texas (except Houston)
TA–W–30,647E	New Mexico"

Signed at Washington, DC this 29th day of August 1995.

Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Notice of Certification Regarding Eligibility to Apply for Worker Adjustment Assistance on June 9, 1995, applicable to all workers of FHF Apparel, Miami, Florida. The notice was published in the **Federal Register** on June 27, 1995 (60 FR 33235). The certification was amended on August 1, 1995, to include the parent company, Fashion 500 Group located in Northampton, Pennsylvania. The notice will soon be published in the **Federal Register**.

The Department reviewed the subject certification, and is again amending the certification to cover the workers at the Fashion 500 Group locations in Whitehall and Philadelphia, Pennsylvania. The workers produce men's suits and sportscoats.

The intent of the Department's certification is to include all workers of FHF Apparel and the 500 Fashion Group who were adversely affected by imports.

The amended notice applicable to TA–W–30,985 is hereby issued as follows:

> All workers of FHF Apparel, Miami, Florida (TA–W–30,985), and the 500 Fashion Group, Northampton, Pennsylvania (TA–W–30,985A), Whitehall, Pennsylvania (TA–W–30,985B), and Philadelphia, Pennsylvania (TA–W–30,985C) who became totally or partially separated from employment on or after April 24, 1994 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, DC this 29th day of August 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA–W–31,102]

Rockwell Graphics Systems of Rockwell, Reading, PA; Notice of Affirmative Determination Regarding Application for Reconsideration

On July 31, 1995, the union requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance for workers of the subject firm. The denial notice was signed on July 25, 1995 and published in the **Federal Register** on August 16, 1995 (60 FR 42589).

The union claims that the Department's survey of Rockwell Graphics Systems' customer base was inadequate, and recent competitive bids lost to foreign firms caused layoffs at the subject facility.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed in Washington, DC. this 25th day of August, 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[FR Doc. 95–22477 Filed 9–8–95; 8:45 am]

BILLING CODE 4510-30-M

[TA–W–31,102]

Rockwell Graphics Systems of Rockwell Reading, PA; Notice of Negative Determination Regarding Application for Reconsideration

By an application dated July 31, 1995, the union requested administrative reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on July 25, 1995 and published in the **Federal Register** on August 16, 1995 (60 FR 42589).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

Investigation findings show that the workers Manufactured commercial printing presses.

The Department's denial was based on the fact that the "contributed importantly" test of the Group Eligibility Requirements of Trade Act was not met.

The "contributed importantly" test is generally demonstrated through a survey of the workers' firm's customers. The Department's survey revealed that none of the respondents increased their purchases of imports while decreasing their purchases from Rockwell Graphics Systems during the relevant period.

District 10 of the United Steelworkers of America claim that recent competitive bids were lost to foreign firms, causing substantial loss of jobs at the Rockwell Graphics Systems Reading, Pennsylvania location.

Investigation findings show that the Department surveyed the major declining customers of Rockwell Graphics Systems at Reading. Further findings show that Rockwell Graphics at Reading did not participate in competitive bids during the relevant time period of the investigation.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC this 25th day of August 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address show below, not later than September 21, 1995.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below not later than September 21, 1995.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 28th day of August, 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

TA–W–31,182 Willwear Hosiery, Shogren Industries, Marion, NC

TA–W–31,183 Willwear Hosiery, Shogren Industries, Chattanooga, TN

TA–W–31,184 Shogren Industries, Concord, NC

TA–W–31,185 Shogren Industries, Upper Brookville, NY

TA–W–31,185A Nation Hosiery Mills, Inc., Chattanooga, TN

TA–W–31,185B Kentucky Lakes Hosiery Mills, Princeton, KY

Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on August 10, 1995, applicable to all workers at Shogren Industries, located in Marion, North Carolina, Chattanooga, Tennessee, Concord, North Carolina, and Upper Brookville, New York. The notice was published in the **Federal Register** on August 24, 1995 (60 FR 44079).

At the request of the company, the Department reviewed the certification for workers of the subject firm. The findings show that workers of Shogren Industries located at Nation Hosiery Mills, Inc. in Chattanooga, Tennessee and Kentucky Lakes Hosiery Mill in

Princeton, Kentucky were inadvertently omitted from the certification.

The intent of the Department's certification is to include all workers of the subject firm adversely affected by imports.

The amended notice applicable to TA W–31,185 is hereby issued as follows:

"All workers of Willwear Hosiery/Shogren Industries, Marion, North Carolina (TA–W–31,182); Chattanooga, Tennessee (TA–W–31,183); Shogren Industries, Concord, North Carolina (TA–W–31,184); Upper Brookville, New York (TA–W–31,185); Nation Hosiery Mills, Inc., Chattanooga, Tennessee (TA–W–31,184A); and Kentucky Lakes Hosiery Mill, Princeton, Kentucky (TA–W–31,185B) who became totally or partially separated from employment on or after May 23, 1994 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, D.C. this 31st day of August 1995.

Victor J. Trunzo,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

Sundstrand Corporation, Electric Power Systems Division, Lima, Ohio; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18(C) an application for administrative reconsideration was filed with the Program Manager of the Office of Trade Adjustment Assistance for workers at Sundstrand Corporation, Electric Power Systems Division, Lima, Ohio. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (95–066)]

Notice of Prospective Patent License

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Prospective Patent License.

SUMMARY: NASA hereby gives notice that Wessex, L.L.C., of Blacksburg, Virginia, has requested a partially exclusive license to practice the invention described and claimed in U.S. Patent No. 5,296,288 entitled "Protective Coating for Ceramic Materials," which issued to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration on March 22, 1994. Written objection to the prospective grant of a license should be sent to Mr. Harry Lupuloff, Senior Patent Attorney, NASA Headquarters.

DATES: Responses to this Notice must be received by November 13, 1995.

FOR FURTHER INFORMATION CONTACT: Mr. Harry Lupuloff, NASA, Code GP, Washington, DC 20546; telephone number (202) 358–2067.

Dated: September 1, 1995.

Edward A. Frankle,

General Counsel.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Education and Human Resources Committee of Visitors; Notice of Meeting

In accordance with the Federal Advisory Committee Act (PL 92–463, as amended), the National Science Foundation announces the following Committee of Visitors meeting:

Name: Committee of Visitors (COV) Review of the Graduate and Minority Graduate Fellowship Programs (1119).

Date & Time: September 25, 1995; 8:00 am to 5:00 pm.

Place: NSF Headquarters, 4201 Wilson Boulevard, Arlington, Virginia.

Type of Meeting: Closed.

Contact Person: Dr. Susan Duby, National Science Foundation, 703/306–1694.

Purpose of Meeting: To provide oversight review of the Graduate and Minority Graduate Fellowship Programs.

Agenda: To carry out Committee of Visitors' review, including examination of decisions on applications, reviewer comments, and other privileged materials.

Reason for Closing: These meetings are closed to the public because the Committee will be reviewing proposal actions that will include privileged intellectual property and personal information that could harm individuals if they were disclosed. If discussions were open to the public, these matters that are exempt under 5 U.S.C. 552 (b)(c)(4) and (6) of the Government in the Sunshine Act would improperly be disclosed.

Dated: September 5, 1995.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Availability of Draft Application; Format and Content Guidance and Review Plan and Acceptance Criteria for Non-Power Reactors

The U.S. Nuclear Regulatory Commission (NRC) is in the process of developing for Non-Power Reactors (NPRs) a "Format and Content for Applications for the Licensing of Non-Power Reactors" (F&C) and a "Standard Review Plan and Acceptance Criteria for Applications for the Licensing of Non-Power Reactors" (SRP). The NRC has made available drafts of Chapters 2, "Site Characteristics," 3, "Design of Structures, Systems, and Components," 4, "Reactor Description," 7, "Instrumentation and Control Systems," 10, "Experimental Facilities and Utilization," 13, "Accident Analyses," and 18, "High-Enriched Uranium to Low-Enriqued Uranium Conversions," of the F&C and SRP documents for comment. Other draft chapters will be made available for comment as they are completed.

Copies of these chapters have been placed in the NRC Public Document Room, the Gelman Building, 2120 L Street, NW, Washington, DC. Single copies of these documents may be requested in writing from Alexander Adams, Jr., Senior Project Manager, U.S. Nuclear Regulatory Commission, MS: O–11–B–20, Washington, DC 20555. Comments on this chapter should be sent by November 28, 1995, to the Director, Non-Power Reactors and Decommissioning Project Directorate at the above address.

Dated at Rockville, Maryland, this 31st day of August 1995.

For the Nuclear Regulatory Commission.

Seymour H. Weiss,

Director, Non-Power Reactors and Decommissioning Project Directorate, Division of Reactor Program Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

[Docket No. 50–293]

Boston Edison Company, Pilgrim Nuclear Power Station; Issuance of Director Decision Under 10 CFR 2.206

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, granted in part and denied in part a Petition dated March 10, 1995 (Petition), filed pursuant to 10 CFR 2.206 by Ms. Mary Elizabeth Lampert and 62 other persons (Petitioners).

The Petition requested that during the March 25, 1995, refueling outage and In-Vessel Visual Inspection conducted by the licensee, certain technical concerns be addressed, and that before Pilgrim goes back on-line, appropriate repairs be made or corrective action be taken, and that the U.S. Nuclear Regulatory Commission (NRC or Commission) discuss the status of such repairs or corrective actions with the public in Plymouth, Massachusetts. The Petition also requested that the NRC terminate its policy of issuing Notices of Enforcement Discretion (NOEDs) and asserted that the NRC has not been enforcing its regulations.

On April 19, 1995, the Director informed the Petitioner that the NRC management and staff was meeting with the Boston Edison Company (licensee) on May 11, 1995, and they would hold a meeting to receive public input on the evening of May 11, 1995. The Petitioner's request to discuss the status of repairs or corrective actions was granted by virtue of the public meeting.

The Director of the Office of Nuclear Reactor Regulation has denied the Petitioners' requests to require repairs and corrective actions before permitting the Pilgrim plant to resume operation, and to terminate the use of NOEDs.

The reasons for this decision are explained in the "Director's Decision Under 10 CFR 2.206," (DD–95–19) which is available for public inspection in the Commission's Public Document Room, in the Gelman Building, Lower Level, 2120 L Street, NW., Washington, DC 20555 and at the Local Public Document Room for the Pilgrim facility at Plymouth Public Library, 11 North Street, Plymouth, Massachusetts 02360.

A copy of the Decision will be filed with the Office of the Secretary for the Commission's review in accordance with 10 CFR 2.206(c). As provided by this regulation, the Director's Decision will constitute the final action of the Commission 25 days after date of issuance of the Decision unless the Commission, on its own motion, institutes review of the Decision within that time period.

Dated at Rockville, Maryland, this 31st day of August 1995.

For the Nuclear Regulatory Commission.

William T. Russell,

Director, Office of Nuclear Reactor Regulation.

Appendix A to this Document—Director's Decision Under 10 CFR 2.206: DD–95–19; Boston Edison Company, License No. DRP–35

I. Introduction

Ms. Mary Elizabeth Lampert and 62 other individuals (Petitioners) submitted a Petition dated March 10, 1995, pursuant to 10 CFR 2.206 requesting action with regard to the Pilgrim Nuclear Power Station (Pilgrim), operated by the Boston Edison Company (licensee).

The Petition requested that: (1) during the refueling outage and In-Vessel Visual Inspection scheduled for March 25, 1995, by the licensee, certain technical concerns be addressed, and that before Pilgrim goes back on-line, appropriate repairs be made or corrective action be taken; (2) the U.S. Nuclear Regulatory Commission (NRC or Commission) discuss the status of such repairs or corrective actions with the public in Plymouth, Massachusetts; and (3) the NRC terminate its policy of issuing Notices of Enforcement Discretion (NOEDs) and begin enforcing the regulations again.

As the bases for these requests, the Petitioners identified three groups of technical concerns: (1) age-related deterioration of 25 safety related reactor internals; (2) parts and components "known to be a problem at Pilgrim," including the core shroud, water level indicators, quality assurance for fuel pool cooling system during loss-of-coolant accident/loss of offsite power, motor-operated valves, containment integrity, drywell liner corrosion vulnerability, station blackout vulnerability, and Rosemount transmitters; and (3) parts and components "potentially a problem at Pilgrim," including potential fuel rod corrosion and substandard and/or counterfeit parts. The Petitioners contend that allowing the reactor to operate under a NOED cannot pose less risk to the public health and safety than keeping the reactor shut down until NRC regulations are met.

II. Background

By letter dated April 19, 1995, the NRC acknowledged receipt of the Petition and offered a public meeting, which was held in Plymouth, Massachusetts on May 11, 1995. At that meeting, the results of the licensee's inspections conducted during the outage were discussed.

I have completed my evaluation of the Petition. As explained below, Petitioners have failed to raise any safety concern which would warrant delaying restart of the Pilgrim Nuclear Power Station (which occurred on June 2, 1995), and the Petitioners' request that the NRC terminate the use of NOEDs is denied.

III. Discussion

A. Age-Related Deterioration of Reactor Internals

Many components inside boiling-water reactor (BWR) vessels (i.e., internals) are made of materials such as stainless steel and various alloys that are susceptible to corrosion and cracking. As materials age, they degrade. This degradation can be accelerated by stresses from temperature and pressure changes, irradiation effects on material properties, chemical interactions, and other corrosive environments. As BWRs age, the amount of cracking is expected to increase. Several cases of internals cracking and degradation have been reported to the NRC over the years. In a number of cases, the NRC has concluded that full power operation of the reactor with time-dependent degradation, related to the operating environment, of reactor vessel internals is acceptable as long as the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code) safety margins are satisfied and maintained. In the remaining cases, replacement or repairs were performed on the degraded components or internals. The NRC has met with industry every year since 1988 to review the generic safety implications of reactor internals potentially susceptible to age-related cracking. Additionally, a special industry review group, the Boiling Water Reactor Vessels and Internals Project (BWRVIP), was formed to focus on resolution of reactor vessel and internals degradation.

Several industry standards and regulatory requirements and guidelines are in place to address inservice inspections (ISIs) of reactor components. Moreover, the NRC and industry have responded as new issues emerge. For example, issued Generic Letter (GL) 94–03, "Intergranular Stress Corrosion Cracking of Core Shrouds (IGSCC) in Boiling Water Reactors," "in July 1994 requesting Licensees to inspect their shrouds and provide an analysis justifying continued operation until inspections could be completed. General Electric issued Services Information Letter (SIL) No. 588, "Top Guide and Core Plate Cracking," in February 1995 providing specific recommendations for inspections of BWR top guides and core plates. In addition to addressing emerging the BWRVIP is working on a comprehensive plan that will provide detailed guidance on managing cracking in all BWR internals. The plan will address cracking susceptibility, safety consequences, inspection scope and methodology, flaw evaluation, repair strategies, and mitigation of degradation. Several top level executives and technical staff of the Licensee are on the various BWRVIP committees that are developing generic standards for ISI and repairs.

Petitioners request that 25 components be inspected during the 1995 refueling outage (RFO No. 10), and that they be free of any signs of IGSCC or other kind of fatigue.

During RFO No. 10, the licensee indicated completion of the ISI examinations for the third period of the second Pilgrim 10-year inspection interval in accordance with Section XI of the ASME Code, 1980 Edition with Winter 1980 Addenda. This included all 25 components requested by the Petitioners, except the steam separator, neutron source holder and surveillance sample holders which are not safety-related components. The in-core neutron flux monitor components, in-housings, guide tubes, dry tubes, the vessel head cooling spray nozzle, and the fuel supports are not required by NRC regulations to be inspected. The NRC inspected Pilgrim's ISI program and related activities during the 1994 RFO No. 9 and concluded that the second interval program plan was sufficiently comprehensive to ensure safety and met the requirements of the ASME Code, and thus 10 CFR 50.55a(a)(2). The ISI examinations conducted in RFO No. 10 included the core support structure, control rod drive housing, core spray internal piping and spargers, and feedwater spargers.

Augmented examinations were also conducted in which various internals were examined, including the shroud support and access hole covers, jet pump riser braces, shroud head bolts, jet pump sensing lines, steam dryer support, steam dryer baffle plate, top guide, core plate, and control rod stub tubes.

Control blades (control rods for BWRs) are replaced at specified intervals. The licensee also implemented a preemptive repair of its core shroud due to the high susceptibility to IGSCC. See Section III.B.(1), below. As discussed during the May 11, 1995, meeting between the NRC and the public, the inspection results from RFO No. 10 did not reveal any indications of significant time-dependent deterioration of the reactor internals.

The NRC staff concludes that the inspections, examinations, and repairs performed by the licensee during RFO No. 10 and previous outages are sufficient to provide reasonable assurance that no age-related failure of components or internals would occur during the next operating cycle, which is scheduled to end March 21, 1997. Design features, plant procedures, and operator training are developed to ensure safety in the unlikely event that a failure were to occur. The NRC will continue to take regulatory action on a plant-specific or generic basis, as may be appropriate, when time-dependent degradation issues are identified. During the next refueling outage, the licensee will again conduct an in-vessel inspection of safety-related interval components.

Accordingly, Petitioners have not raised a safety concern regarding age-related degradation of reactor internals at Pilgrim which would have warranted prohibiting restart after RFO No. 10.

B. Parts and Components Known To Be a Problem at Pilgrim

(1) Core Shroud

Petitioners express concern about the type of repairs that would be done to the core shroud during RFO No. 10, based on "the different approach taken in Germany at the Wuergassen NPS and at the Oyster Creek NPS in NJ." Petitioners state that German nuclear regulators required replacement of shrouds with cracking, rather than repair of the shroud. Petitioners state that at Oyster Creek, ten tie rods are attached to holes in Type 304 stainless steel, which is subject to IGSCC and is welded to the bottom of the core shroud assembly. Petitioners are concerned that if the same approach were used at Pilgrim, there would be problems with the structural integrity of the materials the tie rods are welded to and with "loose parts."

Officials of PreussenElektra AG, the owner of Wuergassen, initially intended to replace the core shroud at Wuergassen, as reported in *Nucleonics Week* on November 24, 1994. Differences in the design of Wuergassen and NRC-licensed BWRs exist which would make replacement of the core shroud at Wuergassen less complicated than at NRC-licensed plants. For example, the shroud at Wuergassen is bolted on to the shroud support, whereas shrouds of NRC licensees are welded. However, in a press release issued June 1, 1995, PreussenElektra AG decided to decommission the Wuergassen NPS based on economic considerations. As a result, replacement of a BWR core shroud, foreign or domestic, has yet to be undertaken.

By letter dated November 25, 1994, the NRC staff issued the "Safety Evaluation Regarding the Oyster Creek Core Shroud Repair," which approved the scheduled repair as an acceptable alternative to the standards of the ASME Boiler and Pressure Vessel Code. See 10 C.F.R. § 50.55a(a)(2) and 50.55a(a)(3)(i). Oyster Creek and Pilgrim are utilizing similar tie-rod assemblies to structurally replace the core shroud during normal and accident conditions. The difference in the number of tie-rod assemblies used, i.e., ten tie-rod assemblies at Oyster Creek and four tie-rod assemblies at Pilgrim, is related to the contracted vendor's loading distribution design and the associated hardware on the tie-rod assembly. The NRC staff has thoroughly reviewed the Pilgrim repair design and conducted inspections during the core shroud repair process. The staff issued the "Safety Evaluation Regarding Pilgrim Nuclear Power Station Core Shroud Repair," dated May 12, 1995. A synopsis of our review follows.

The design of the Pilgrim shroud repair consists of four (4) stabilizer assemblies, which are installed 90° apart in the shroud/reactor vessel annulus, between attachment points at the top of the shroud and the gusset assemblies on the lower shroud support plate. Each stabilizer assembly consists of a tie rod, and upper spring, a lower spring, an upper bracket and other smaller parts. The tie rod provides the vertical load transfer from the upper bracket to the reactor pressure vessel (RPV) gusset attachment and supports the springs. The upper spring provides radial load transfer at the top guide elevation from the shroud to the RPV. The lower spring provides radial load transfer from the shroud at the core plate elevation to the RPV. The upper bracket provides an attachment to the top of the shroud and restrains the upper shroud weld. Upper-mid and lower-mid supports along the tie rod length provide radial load transfer for the mid sections of the shroud and increase the natural frequency of the tie rods to reduce flow-induced vibration. Two wedges between the core support plate and the shroud are also installed at each stabilizer location to prevent relative motion of the core plate to the shroud. Each cylindrical section of the shroud between welds H1 through H9 is prevented from unacceptable lateral motion by the stabilizers. The section between H9 and H10 is prevented from unacceptable motion by the existing gussets. The lower end of the stabilizers are attached to pins which are placed in holes cut into gusset plates at the bottom. The gusset assemblies and their welds are Inconel and are not considered subject to cracking by industry and the NRC staff. Inconel is a nickel based alloy which is less likely to corrode and degrade than stainless steel, which is an iron based alloy. However, these welds, including those attaching the gussets to the vessel and to the lower shroud support plate (which must resist the vertical stabilizer loads) have been inspected for cracks during this outage, and no crack indications were found. Together, the tie rods and lateral restraints resist both vertical and lateral loads resulting from normal operation and design accident loads, including seismic loads and postulated pipe ruptures.

The NRC staff found that the proposed repair does not affect the ability of operators to insert control rods, the performance of the ECCS, particularly the core spray system, or the ability to reflood and cool the core. The staff concluded that the proposed repair does not pose adverse consequences to plant safety; therefore, plant operation is acceptable with the proposed core shroud repair installed.

In compliance with 10 CFR 50.55a(a)(3)(i), the core shroud repair has been designed as an alternative to the requirements of the ASME Code. Based on a review of the shroud modification hardware from structural, systems, materials, and fabrication considerations, the NRC staff concludes that the proposed modifications of the Pilgrim core shroud would provide an acceptable level of quality and safety. The staff has determined that the licensee's repair of the core shroud will not result in any increased risk to the public health and safety and is, therefore, acceptable.

(2) Water Level Indicators

Petitioners assert that because of a pipe design deficiency, water level indicators at Pilgrim are not fully operable due to high-pressured gas in the water, and that operator training is not the appropriate solution.

Level anomalies were observed in reactor vessel water level indication at several BWRs during controlled depressurization, while commencing plant outages or following reactor trips. These anomalies consisted of "spiking" or "notching" of level indication, and in one instance, a sustained error in level indication. The root cause of these level indication anomalies is the effect of non-condensible gas dissolved in the reference leg of "cold reference leg" type water level instruments. Under rapid depressurization conditions, non-condensible gases can cause significant errors in the level indication.

Cold reference leg water level instruments measure reactor vessel water level by

measuring the differential pressure of two columns of water, i.e., the variable leg and the constant height reference leg. The reference leg is maintained filled to a constant height of water by the condensate chamber. Steam is condensed in the condensate chamber and keeps the reference leg full. Excess condensate is returned to the vessel through the steam supply line. Non-condensible gases, such as hydrogen and oxygen, formed by radiolysis in the reactor vessel, are present in the steam supplied to the condensate chamber. The gases can collect in the condensate chamber and can accumulate to high partial pressures. The gases then become dissolved in the water at the top of the reference leg, and the dissolved gases can be transported down the reference leg by small leaks in valves and fittings at the bottom of the reference leg, diffusion, and/or thermal convection.

Dissolved gases in the reference leg do not present a problem unless the instrument is depressurized. When depressurized, the gases come out of solution and form bubbles that travel up the reference leg. During slow depressurization, level indication has been seen to temporarily "spike" or "notch" while a bubble moves through the vertical sections of the piping. Significant spiking may automatically actuate such systems as the primary containment isolation system (PCIS). This occurred at the Pilgrim plant. After spiking, which is of short duration, the indicated water level returns to actual level. Level spiking is of little significance. Bubbling of the gases may eject a significant amount of water from the reference leg. Loss of reference leg inventory will cause an erroneously high level indication. This occurred during a normal plant cooldown on January 21, 1993, at Washington Nuclear Power Unit 2 (WNP–2), resulting in a 32-inch error in level indication that gradually recovered over a period of 2 hours. If the reactor is rapidly depressurized, as would occur during a design basis loss-of-coolant accident (LOCA) or opening of the automatic depressurization system (ADS) valves, even larger errors in the level indication could result. However, analyses presented by the industry indicated that significant errors would not be expected until the reactor is depressurized below approximately 450 psi.

The NRC staff has taken several actions to address this problem. The BWR Owners Group (BWROG) Regulatory Response Group (RRG) was activated during July 1992. The staff also issued Information Notice 92–54 in July 1992, GL 92–04 in August 1992, and Information Notice 93–27 in March 1993 to alert licensees to the potential problem and to request information concerning actions taken or planned by licensees in response to potential errors in level indication. The BWROG conducted a test program to support their efforts to resolve this issue. The results of the BWROG reference leg de-gas test program confirmed that no significant errors in level indication will occur until the reactor is depressurized below 450 psig, and that large errors in level indication are possible once the reactor is depressurized to lower pressures.

The NRC staff received additional information from the BWROG pertaining to reactor vessel water level instrumentation inaccuracies during normal depressurization due to the effects of non-condensible gas. At the staff's request, the BWROG submitted a report on May 20, 1993, discussing the impact of level errors on automatic safety system response and operator actions during transients and accidents initiated from reduced pressure conditions during plant cooldown (shutdown mode). Based on this information, in addition to the January 21, 1993, WNP–2 event, and data from the reference leg de-gas testing that was conducted by the BWROG, the staff concluded that additional short-term actions needed to be taken for protection against potential events occurring during normal cooldown. On May 28, 1993, NRC Bulletin (NRCB) 93–03,

"Resolution of Issues Related to Reactor Vessel Water Level Instrumentation," was issued, in which the staff requested each BWR licensee to implement additional short-term compensatory actions, and to implement a hardware modification to resolve this issue at the next cold shutdown after July 30, 1993.

The staff has received responses to NRC Bulletin 93–03 from all licensees. All licensees completed short-term compensatory actions and committed to install hardware modifications. Licensees for all affected plants have either completed installation of hardware modifications or are currently shutdown and will install the hardware modifications prior to restart.

To solve the problem identified in NRC Bulletin 93–03, Pilgrim installed a backfill modification to all safety-related water level instrumentation in July 1993. Non-safety-related control instrumentation was not modified by Pilgrim, because such instrumentation was not covered by the actions requested in NRC Bulletin 93–03.

As Petitioners note, an event occurred at Pilgrim on November 8, 1993, involving the non-safety-related water level instrumentation. This event was caused by failure of the licensee to back flush the feedwater control instrumentation reference legs prior to restart due to procedural inadequacy and failure to cross-check multiple indications of reactor vessel water level during startup due to operator error. This event is not safety significant for the following reasons:

(a) event initiation was the result of two independent errors which are not expected to have a high frequency of recurrence;

(b) safety systems and non-safety systems are separated by design; thus, the availability and capability of the safety systems should not be impacted by errors in the non-safety instrumentation and the ability of safety systems to protect the plant should not be compromised; and

(c) the safety systems responded to the event as expected.

This issue is closed because the licensee took adequate corrective actions in response to the November 8, 1993, event. *See* NRC Inspection Report 50–293/93–20, dated January 11, 1994.

Based on the above, Petitioners have not raised a substantial safety concern regarding safety-related water level instrumentation at Pilgrim.

(3) Quality Assurance for Fuel Pool Cooling System During LOCA/LOOP

The Petitioners asserted that workers would be exposed to fatal levels of radiation while manually activating the backup cooling system during a LOCA.

In November 1992 two engineers working under contract at Susquehanna Steam Electric Station filed a 10 CFR 21.21 report. The report detailed design concerns at Susquehanna that could lead to the sustained loss of forced cooling for the stored spent fuel under certain accident or abnormal conditions. The engineers postulated that the environmental conditions developed following a loss of forced cooling would adversely affect equipment necessary for safe-shutdown and accident mitigation. The engineers concluded that these issues had generic implications.

Between November 1992 and October 1994, the NRC staff performed an extensive evaluation of the Susquehanna spent fuel pool cooling design concerns. The staff concluded that these concerns were of low safety significance in the "Final Safety Evaluation By the Office of Nuclear Reactor Regulation Regarding Loss of Spent Fuel Pool Cooling Events," dated June 19, 1995. This conclusion was based on the fact that the probability of recovering forced cooling of the stored spent fuel with access to the necessary equipment was high, and the probability of experiencing a severe core damage accident, which may prevent access to systems need to cool the spent fuel pool, was low.

The staff issued Information Notice 93–83, "Potential Loss Of Spent Fuel Pool Cooling Following A Loss Of Coolant Accident," (October 7, 1993), describing the Section 21.21 report related to Susquehanna. The information notice did not require specific action by licensees. Recognizing the plant-specific design features and operational controls of most spent fuel pool cooling system designs, the staff concluded that further evaluation of spent fuel pool storage safety issues at other plants was warranted to determine the need for further generic action.[1]

The staff has developed and begun implementing a generic action plan to evaluate generic issues. On-site safety assessments of spent fuel storage at selected reactor facilities have been completed. Monticello Nuclear Power Plant is similar to Pilgrim and was one of the nuclear facilities assessed during the week of March 27, 1995. The assessment team concluded that the potential for a sustained loss of spent fuel pool cooling or a significant loss of spent fuel pool coolant inventory at the site visited was remote based on observed design features and operational controls. Based on the above, the NRC staff has concluded that the Petitioners have not identified any safety concerns at Pilgrim regarding spent fuel pool cooling during a LOCA/LOOP.

---

[1] In the near future, the staff will issue an additional information notice describing the results of its detailed evaluation of the Susquehanna facility. This information notice will be an interim communication and will not represent the end of the staff's generic review.

(4) Motor-Operated Valves

Petitioners request information on the status of the motor-operated valve (MOV) program at Pilgrim, and inquire why Pilgrim has not been required to fix all MOVs during the March 1995 outage.

The NRC issued GL 89–10, "Safety-Related Motor-Operated Valve Testing and Surveillance" (June 28, 1989) to request that licensees verify the capability of all safety-related MOVs to perform their design basis functions. GL 89–10 requested that licensees complete differential pressure and flow testing for the verification of MOV design basis capability within 5 years after the issuance of GL 89–10 or three refueling outages after December 1989, whichever was later.

Pilgrim is scheduled to complete its MOV Design Basis Capability Verification by April 1997. Although this is somewhat later than some other plants, the licensee is being given the same number of outages (three outages with 24 month cycles) as other licensees to complete the verification, and the program commenced somewhat later at Pilgrim due to the 1990 restart from an extended outage.

During the implementation of GL 89–10, licensees have discovered more MOV concerns and experienced greater difficulty in conducting MOV tests at full design basis differential pressure and flow than envisioned when the GL 89–10 schedule was established. Where significant MOV problems are identified, the NRC ensures that licensees resolve these problems promptly. Further, when the evaluation of NRC-sponsored MOV test results indicated potential problems with specific MOVs in high pressure systems at boiling-water reactor (BWR) nuclear power plants, the NRC issued Supplement 3 to GL 89–10 in October 1990. Supplement 3 requested that BWR licensees promptly evaluate the capability of MOVs used for containment isolation in the steam lines of the high-pressure coolant injection and reactor core isolation cooling systems and in the supply line to the reactor water cleanup system. Further, the staff issued Supplement 5 to GL 89–10 in June 1993, requesting that licensees ensure that new information on the increased inaccuracy of MOV diagnostic equipment be addressed. These two actions were satisfactorily completed by Pilgrim.

The NRC staff has been monitoring the progress of the GL 89–10 program at Pilgrim closely. From December 13 to 17, 1993, and March 22 to 25, 1994, the NRC staff conducted an inspection of the GL 89–10 program at Pilgrim. As stated in NRC Inspection Report 50–293/92–80, the NRC staff had the following findings as a result of the March 1992 inspection:

(a) The method used to set the MOV torque switches using diagnostic testing equipment was inadequate;

(b) the torque switch settings on several safety-related MOVs were not set in accordance with the plant design documents;

(c) corrective actions taken in response to an internal audit of the GL 89–10 Program regarding the torque switch settings of safety-related valves were inadequate:

(d) the GL Supplement 3 response for the reactor water cleanup system isolation valve 1202–5 was inadequate;

(e) plans for conducting design-basis differential pressure testing have not been clearly established;

(f) the current work instructions for performing design basis reviews and switch setting calculations lack adequate detail; and

(g) a considerable effort remains to implement the GL 89–10 program in a timely manner.

The NRC staff found considerable progress in the licensee's MOV program since the initial NRC team inspection in March 1992. Particularly, the staff concluded that the findings from the March 1992 inspection had been satisfactorily addressed. See Inspection Report No. 50–293/93–22 (April 14, 1994). In addition, the testing of differential pressure and/or static pressure of all of the Priority 1 (highest risk) MOVs that can be tested was completed by the end of RFO No. 10. Additionally, the licensee has evaluated all of the GL 89–10 MOVs for susceptibility to pressure locking and thermal binding and, by the end of RFO No. 10, completed modifications on the few valves that were considered susceptible. The staff concludes that the licensee is on schedule to meet its April 1997 completion date.

Based on the progress made to date by the licensee in implementing its GL 89–10 program at Pilgrim, the NRC staff did not consider it necessary that the licensee complete its GL 89–10 program during RFO No. 10. In addition to review of the licensee's submittals in response to GL 89–10 and its supplements, the NRC staff is conducting an extensive inspection program to evaluate the MOV program implemented in response to GL 89–10 at Pilgrim, as well as at other nuclear power plants. The NRC staff concludes that the licensee has substantially reduced the concerns with MOV operation under design basis conditions and is progressing significantly toward completing the GL 89–10 program. Nevertheless, if significant MOV problems are identified at Pilgrim, the licensee will be responsible for addressing those problems in accordance with their safety significance, irrespective of the GL 89–10 completion schedule. Further, the NRC will continue to take regulatory action on a plant-specific or generic basis, as appropriate, when MOV problems are identified.

Based upon the actions taken to date by the licensee to address safety-related MOV issues and the NRC's inspections regarding the licensee's actions on the GL 89–10 program, the NRC staff concludes that no corrective actions are required.

(5) Containment Integrity

Petitioners ask whether the hardened wetwell vent system (HWWVS), referred to as the "Torus Vent", which "allows venting of radioactive effluents directly into our atmosphere," will be corrected in RFO No. 10.

The licensee installed the HWWVS modification during the 1986–1988 outage, thus providing the capability to establish alternate containment decay heat removal if RHR torus cooling capability is lost. The direct torus venting minimizes the potential for core damage and containment failure. The HWWVS has the capability of mitigating a wide range of events including many that are beyond the Design Basis Accidents for the facility. Its installation, along with the procedures for its use, will reduce the likelihood of a core melt from accident sequences involving the loss of long-term decay heat removal. This accomplished by preventing any further damage to safety equipment in the reactor building by ensuring that the piping from the containment to the venting stack will not fail. Further, as a mitigation measure, the vent pathway is located in the wetwell air space. This location ensures that the vented non-condensible gases will pass through the suppression pool thereby significantly scrubbing the fission products. The HWWVS is an improvement that the NRC staff recommended in its Mark I Containment Performance Improvement Program, which identified plant modifications that could enhance the capability to both prevent and mitigate the consequences of severe accidents.

The HWWVS has valves that are kept closed during plant operation, assuring containment integrity. Additionally, the HWWVS design incorporates a device called a rupture disc, which provides an additional leak-tight barrier to further prevent the transport of the containment atmosphere in the wetwell to the atmosphere. The HWWVS is not in use during normal plant operation, nor is it expected to be used during anticipated transient conditions. Petitioners have not demonstrated any basis why this system should be "corrected."

(6) Drywell Liner Corrosion

Petitioners request information on the status of drywell liner corrosion vulnerability and asks whether it would be corrected during RFO No. 10.

The NRC issued GL 87–05, "Request For Additional Information-Assessment of Licensee Measures to Mitigate and/or Identify Potential Degradation of Mark I Drywells," as a result of the November 1986 discovery of corrosion of the Oyster Creek steel drywell in the area of the sand cushion. GL 87–05 did not establish any regulatory requirements other than for Mark I licensees to provide the staff with information as to what actions, if any, were being taken as a result of the Oyster Creek finding. The licensee responded to GL 87–05 by letter dated May 11, 1987. The licensee implemented a surveillance program to detect whether a corrosive environment exists on the external surface of the drywell. This is done by checking the drywell liner air gap drain lines for the presence of water during every refueling outage.

In January 1987, prior to issuance of GL 87–05, the licensee conducted ultrasonic inspections of the interior of the drywell liner in the area of the sand drains, which confirmed liner integrity. In January 1988, the drain lines were verified not to be blocked by using a boroscope. As of the last surveillance, conducted on March 31, 1995, no water leakage had been detected. Petitioners have not demonstrated any basis for correcting this system.

(7) Station Blackout

Petitioners request information on station blackout vulnerability and ask whether it would be corrected during RFO No. 10.

On December 23, 1993, the NRC issued "NRC Pilot Station Blackout Team Inspection," a report concerning the Pilgrim plant, Inspection Report 50–293/93–80. The purpose of that inspection was to review Pilgrim's programs, procedures, training, equipment and systems, and supporting documentation for implementing the Station Blackout (SBO) Rule, 10 CFR 50.63. The actions taken to implement the station blackout rule are important because many of the systems required for decay heat removal and containment cooling are dependent on the availability of alternating current (ac) power. In the event of a station blackout, relatively few systems that do not require ac power are depended upon to remove decay heat, until ac power is restored.

The staff concluded in Inspection Report 50–293/93–80 that:

(a) Pilgrim had sufficient condensate inventory to cope with an 8-hour SBO duration;

(b) all areas which contained equipment needed for SBO coping had proper cooling;

(c) there was sufficient evidence that the torus temperature and the reactor vessel conditions would be maintained according to the plant TSs;

(d) the overall communications capability available during an SBO were adequate;

(e) adequate emergency lighting was available to support plant personnel operations during a station blackout; and

(f) plant modifications were properly installed, and post-modification and pre-operational tests were conducted in accordance with proper test procedures. Quality assurance and maintenance practices, operator training, and staffing levels were appropriate to cope with an SBO.

Accordingly, the Pilgrim plant is in compliance with Section 50.63 and the plant does not have a SBO vulnerability requiring "correction" during RFO No. 10.

(8) Rosemount Transmitters

Petitioners request information on the status of Rosemount transmitters at Pilgrim, and ask whether all would be inspected and corrected during RFO No. 10.

On December 22, 1992, the NRC staff issued Bulletin 90–01, Supplement 1, "Loss of Fill-Oil in Transmitters Manufactured by Rosemount," which requested that licensees take appropriate corrective actions for Model 1153, Series B and D, and Model 1154 Rosemount transmitters manufactured before July 11, 1989, and used in safety-related applications or Anticipated Transient Without Scram (ATWS) systems. The performance of a transmitter that is leaking fill-oil gradually deteriorates and may eventually lead to failure. Although some failed transmitters have shown symptoms of loss of fill-oil prior to failure, it has been reported that in some cases the failure of a transmitter that is leaking fill-oil may be difficult to detect during operation. Transmitter failures that are not readily detectable increase the potential for common mode failure and may result in the affected safety system not performing its intended safety function. Supplement 1 identified specific actions for replacement or enhanced surveillance monitoring of the these transmitters, used in high pressure (greater than 1500 psi), medium pressure (greater than 500 psi and less than 1500 psi), and low pressure (less than 500 psi) applications.

The licensee responded to the requested actions of Bulletin 90–01, Supplement 1, on March 5, 1993 and August 30, 1993. There are a total of 40 Model 1153B transmitters currently in service, 14 medium pressure transmitters and 26 low pressure transmitters. The licensee committed to include each of these transmitters in its enhanced surveillance monitoring program. The licensee stated that there were no Model 1153D or 1154 transmitters currently in service.

The licensee also stated that there were 33 Model 1153B transmitters, manufactured after July 1989, in service. Such transmitters are not subject to the Bulletin 90–01, Supplement 1, requested actions because Rosemount corrected the oil leakage problem by an improved manufacturing and quality assurance process. Although Supplement 1 does not require these transmitters to be included in an enhanced surveillance monitoring program, the licensee has chosen to include them in its program. The licensee's enhanced surveillance program is based on both the trending of operating drift data and calibration drift data, and is in accordance with Rosemount Technical Bulletin No. 4.

The NRC, with assistance from its contractor, reviewed the licensee's response to Supplement 1, and in a letter dated November 29, 1994, concluded that the licensee satisfied the reporting requirements and conformed to the requested actions of Bulletin 90–01, Supplement 1. Accordingly, no further actions by the licensee were required with respect to this Rosemount Issue during RFO No. 10.

C. Parts and Components Potentially a Problem at Pilgrim

(1) Fuel Rod Corrosion

Petitioners request information regarding the status of zirconium alloy tubes installed at Pilgrim, and asks if their susceptibility to nodular corrosion would be corrected during RFO No. 10.

Nodular corrosion is a phenomena seen in plants that have copper in the reactor water at a concentration in the 20–30 parts per billion (ppb) range. Pilgrim systems design limits copper levels to less than 1 ppb in the reactor water. Additionally, all fuel rod cladding in use at Pilgrim has been subject to the GE Nuclear Energy in-process heat treatment (IPHT) process[2], which is a heat treatment process that evenly distributes the composition of the alloy thus lowering the susceptibility to nodular corrosion. Pilgrim has not experienced nodular corrosion, and failure of fuel rods is not expected from this phenomenon.

The NRC staff conducted two inspections of Teledyne Wah Chang Albany (TWCA), the manufacturer of zirconium alloy tubes. In April 1990, an employee of Teledyne Wah Chang Albany (TWCA) raised two concerns regarding the efficacy of TWCA's "beta quench" process, a step in the manufacture of zircaloy tube shells which improves the corrosion resistance of that product: (1) the accuracy of temperature indicating devices as a predictor of the temperature of the bulk profile of the zircaloy billet the beta quench process was measuring, and (2) even if the profiles of the induction furnaces are accurate, the induction furnaces cannot reproduce the profile conditions for each production zircaloy billet as the heating in the furnace is very sensitive to the position of the billet in the furnace.

Neither of the two NRC inspections substantiated the employee's concerns. See Inspection Reports 99901229/91–01 (November 27, 1991) and 99901229/94–01 (January 31, 1995). These inspection reports are available in the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. TWCA also investigated these concerns. In a letter to the NRC dated January 10, 1991, TWCA forwarded the results of its investigation, concluding that these concerns were unfounded, although the employee continued to have concerns.

Based on the above, Petitioners have not demonstrated any basis for fuel rod corrosion corrective actions.

(2) Substandard and/or Counterfeit Parts

Petitioners state that Pilgrim was one of several plants identified in a 1990 study by the United States Government Accounting Office as using parts which did not meet government standards, but that the NRC has not asked plants such as Pilgrim to replace those parts. Petitioners request information on the status of substandard or counterfeit parts at Pilgrim, such as nuts, bolts, pipe fittings, circuit breakers and fuses, and whether corrective action would be required during RFO No. 10.

The NRC has been pursuing the issue of counterfeit and substandard parts as a two prong process for a number of years. The first process is reactive, directly addressing the possibility that substandard or counterfeit parts may have been supplied to nuclear power plants, assessing the safety significance and, if needed, replacing the parts. The second process is a proactive approach of improving the assurance that parts are of a high quality before they are put into use.

Since 1988, the NRC has performed over 200 inspections of vendors. During these inspections, the staff occasionally identified suspect practices and referred those cases to the Office of Investigations to determine if wrongdoing had been committed. The NRC also quickly published and disseminated the information to the entire nuclear industry. Over the past several years, the NRC has issued numerous Bulletins and Information Notices having to do with *potential* counterfeit and/or substandard parts and material. However, the staff has not yet identified an issue that, from a safety standpoint, resulted in any plant shutdowns. Nonetheless, the NRC determined that several issues could potentially reduce the margin of safety in some plants and requested some actions by licensees, usually through a Bulletin.

---

[2] TWCA does not produce fuel clad tubing, but supplies an intermediate product form to customers that do, including GE Nuclear Energy, who performs the IPHT on the forms.

If the NRC obtains information that some licensees are identified as potential customers of a vendor suspected of supplying counterfeit or substandard parts, an Information Notice is issued. The issuance of an Information Notice does not mean that the identified licensee(s) did, in fact, receive the questionable parts, but rather that they were potential customers. The licensees are responsible for reviewing their own procurement records to identify if they received the suspect parts. Their actions are subject to NRC review and inspection.

The 1990 GAO report, "Nuclear Safety and Health: Counterfeit and Substandard Products Are a Governmentwide Concern," lists a wide range of products as having been received or suspected of having been received by nuclear plants. The information provided by the GAO report regarding products used in nuclear operations was obtained from the NRC and all of the information was made public through various NRC Information Notices and Bulletins. The Pilgrim station was listed in the GAO report as having received counterfeit or substandard fasteners and circuit breakers. Pilgrim was also listed as being suspected of receiving counterfeit or substandard pipe fittings/flanges and fuses.

On November 6, 1987, the NRC issued Bulletin 87–02, "Fastener Testing to Determine Compliance With Applicable Material Specifications." The Bulletin requested all licensees to review their receipt inspection requirements and internal controls for fasteners and to determine, through testing, whether fasteners in stores at their facilities met required mechanical and chemical material specification requirements. Licensee responses were summarized in NUREG–1349, "Compilation of Fastener Testing Data Received in Response to NRC Compliance Bulletin 87–02." NUREG–1349 identified that, of over 3500 fasteners tested, 8 percent of safety-related and 12 percent of nonsafety-related fasteners were found to be nonconforming. However, only 2 percent of the safety-related fasteners were found to be sufficiently out of specification to cause a concern regarding their ability to perform their intended safety function. As a result of the licensees' responses to Bulletin 87–02, the NRC issued a temporary inspection instruction to ensure that licensees verified that fasteners used in nuclear plants met the requisite specifications and that operability of safety-related components was not affected.

In response to Bulletin 87–02, Pilgrim tested 35 safety-related and 29 non-safety-related fasteners. Three safety-related and 6 non-safety-related fasteners were identified as having hardness values slightly out of specification. These slight deviations were not considered safety significant since the hardness deviations consisted of only 1 to 2 Rockwell points which is very close to the test accuracy of ± 1.0 Rockwell point. Furthermore, it is commonly recognized in the industry that this property is most easily influenced by variations in chemistry, heat treatment, and surface treatments.

On May 6, 1988, the NRC issued Bulletin 88–05, "Nonconforming Materials Supplied by Piping Supplies, Inc. at Folsom, New Jersey and West Jersey Manufacturing Company at Williamstown, New Jersey." That Bulletin required NRC licensees to submit information regarding materials supplied by the named companies and requested the licensees to assure that the materials complied with ASME Code Section III, Subarticle NCA–3800 and design specifications requirements, or were suitable for their intended use, or to replace the materials. Following the issuance of that Bulletin and actions taken by licensees, the NRC met with representatives of the Nuclear Management and Resources Council (NUMARC) to discuss the status of licensee actions. NUMARC presented information on licensee and NUMARC/Electric Power Research Institute (EPRI) testing and evaluation methodology of numerous flanges. The information presented at that meeting showed that the material in question had acceptable strength and that continued use of the fittings and flanges did not present a safety problem. Therefore, the NRC issued Supplement 2 to Bulletin 88–05 on August 3, 1988, announcing that it was appropriate to suspend the actions requested by the Bulletin. NUMARC follow-up reports were analyzed by the staff and judged acceptable. Therefore, no further actions were required.

In response to Bulletin 88–05, Pilgrim identified and tested a number of suspect flanges. All were found to be satisfactory, with the exception of one which tested low in hardness. An engineering evaluation performed by Pilgrim determined the flange was acceptable and did not need to be replaced.

On July 8, 1988, the NRC issued Information Notice 88–46, "Licensee Report of Defective Refurbished Circuit Breakers," which alerted licensees to the possibility of defective circuit breakers being supplied to the nuclear industry. Following the issuance of the notice, the NRC issued Bulletin 88–10, "Nonconforming Molded-Case Circuit Breakers," which requested licensees to take action to provide reasonable assurance that those molded-case circuit breakers that did not have verifiable traceability to the circuit breaker manufacturer were able to perform their safety function. In response to the Bulletin, Pilgrim identified only one of 978 circuit breakers in its warehouse as not being traceable to the original equipment manufacturer. That breaker was the only one purchased on its purchase order and was subsequently discarded.

On April 26, 1988, the NRC issued Information Notice 88–19, "Questionable Certification of Class 1E Components," to alert licensees to a possible problem with the certification of Class 1E components by Planned Maintenance Systems (PMS) of Mt. Vernon, Illinois. Information provided to the NRC by a licensee raised questions regarding the validity of certifications issued by PMS for Class 1E fuses PMS supplied. In response to Information Notice 88–19, the licensee reviewed its procurement/QAD documents. There was no indication that the licensee had procured any material from PMS directly or through Bechtel or General Electric. Furthermore, the NRC review of PMS records indicated that PMS did not supply material or services through intermediate suppliers to the Pilgrim station.

In addition to the Information Notices and Bulletins which identified specifics about potential counterfeit or substandard materials, the NRC staff has issued two generic letters providing information to the industry regarding procurement program improvements to help prevent the acceptance and use of counterfeit and/or substandard material. The industry, through the efforts of the Nuclear Energy Institute (NEI, successor to NUMARC), has also taken a strong approach to improve procurement programs by means of a Comprehensive Procurement Initiative, which addressed five areas which included general procurement, vendor audits, tests and/or inspections, obsolescent, and information exchanges. The Comprehensive Procurement Initiative has greatly reduced the incidence of substandard and/or counterfeit parts in the industry.

In view of the above, no action regarding substandard or counterfeit parts needed to be taken by the licensee before start-up of the Pilgrim plant following RFO No. 10.

D. NRC Oversight and Enforcement Discretion

Petitioners state that since September 1989, the NRC has either waived or chosen not to enforce regulations at nuclear reactors more than 340 times, and that of the last 100 industry requests for enforcement discretion, the Commission has granted every one. Petitioners also state that the NRC has granted at least seven NOEDs to Pilgrim since 1989. Petitioners assert that permitting a reactor to operate cannot pose less risk to public health and safety than keeping the reactor shut down until it meets regulations.

The NRC Enforcement Policy, Section VII.C., permits the staff to exercise discretion not to enforce applicable TSs or license conditions by issuance of a NOED. Such enforcement discretion may be exercised only if the NRC staff is clearly satisfied that the action is consistent with protecting the public health and safety, in cases when a licensee's compliance with a TS Limiting Condition for Operation or other license condition would involve:

(a) an unnecessary plant transient; or

(b) performance of testing, inspection or system realignment that is inappropriate with the specific plant conditions; or

(c) unnecessary delays in plant startup without a corresponding health and safety benefit.

For an operating plant, the NOED is intended to (1) avoid undesirable transients as a result of forcing compliance with the license condition and, thus, minimize potential safety consequences and operational risks or (2) eliminate testing, inspection, or system realignment that is inappropriate for the particular plant conditions. For plants in a shutdown condition, the NOED is intended to reduce shutdown risk by avoiding testing, inspection, or system realignment that is inappropriate for the particular plant conditions, in that it does not provide an overall safety benefit, or may, in fact, be detrimental to safety in the particular plant condition.

For plants attempting to start up, the need for exercising enforcement discretion is expected to occur less often than for

operating plants, because delaying startup does not usually leave a plant in a condition in which it could experience undesirable transients. Thus, the issuance of NOEDs for plants attempting to start up must meet a higher threshold.

The use of enforcement discretion does not change the fact that a violation of a license requirement will occur, nor does it imply that enforcement discretion is being exercised for any violation that may have led to the violation for which the licensee requests issuance of a NOED. Where the NRC staff has chosen to issue a NOED, enforcement action is normally considered for the root causes, to the extent violations led to the noncompliance for which enforcement discretion was used.

Petitioners have provided no basis warranting a change in the Commission's policy regarding the exercise of enforcement discretion pursuant to Section VII.C. of the Enforcement Policy.

IV. Conclusion

The institution of proceedings in accordance with Section 2.206, as requested by the Petitioner, is appropriate only where substantial safety issues have been raised. See Consolidated Edison Co. of New York (Indian Point Units 1, 2, and 3), CLI–75–8, NRC 173, 175 (1975), and Washington Public Power Supply System (WPPSS Nuclear Project No. 2), DD–84–7, 19 NRC 899, 923 (1984). This is the standard I have applied to the Petition. Petitioners have not raised any substantial safety concerns regarding age-related deterioration of reactor internals, or with other parts and components at Pilgrim. To the contrary, all potential problems identified by Petitioners regarding reactor internals and components have been satisfactorily addressed by the licensee at Pilgrim. Therefore, Petitioner's request to delay startup of the Pilgrim plant is denied. Additionally, for the reasons discussed above, Petitioners request to terminate the NRC policy of issuing notices of enforcement discretion to reactor licensees is denied. Petitioner's request for a public meeting was granted.

A copy of the Director's Decision will be filed with the Office of the Secretary for the Commission to review in accordance with 10 CFR 2.206(c). As provided by Section 2.206(c), this Decision will constitute the final action of the Commission 25 days after issuance, unless the Commission, on its own motion, institutes a review of the decision within that time.

For the Nuclear Regulatory Commission.

Dated at Rockville, Maryland, this 31st day of August 1995,

William T. Russell,

Director, Office of Nuclear Reactor Regulation

[FR Doc. 95–22461 Filed 9–8–95; 8:45 am]

BILLING CODE 7590–01–P

[Docket Nos. 50–334 and 50–412]

Duquesne Light Company, Ohio Edison Company, Pennsylvania Power Company, The Cleveland Electric Illuminating Company, The Toledo Edison Company, Beaver Valley Power Station, Units 1 and 2; Notice of Partial Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request by Duquesne Light Company (the licensee) to withdraw a portion of its August 31, 1994, application for a proposed amendment to Facility Operating License Nos. DPR–66 and NPF–73 for Beaver Valley Power Station, Units 1 and 2, located in Beaver County, Pennsylvania.

The proposed amendment involved deletion of certain license conditions and the following changes to the technical specifications (TSs):

1. Elimination of the references to specific frequencies for each of the Technical Specification required audits.
2. Elimination of the references to reviews and audits of the Emergency Plan and Security Plan.
3. Separation of the Inservice Inspection (ISI) and Inservice Testing (IST) Programs surveillance requirements and removal of the requirement that relief requests be granted before they are implemented for both IST and ISI.
4. Editorial changes which were necessitated by a reorganization.
5. Elimination of the reference to Appendix A of 10 CFR Part 55.
6. Elimination of the requirement to perform an independent fire protection and loss prevention program inspection annually.
7. Inclusion of the Offsite Dose Calculation Manual and Process Control Program and associated implementing procedures into the list of required audits.

On May 18, 1995, the licensee submitted a letter to the NRC requesting withdrawal of the proposed changes to the TSs dealing with audits of the Beaver Valley Power Station fire protection program and withdrawal of a proposed 25-percent grace period for all audit frequencies (Item 6 of August 31, 1994 application).

The Commission has previously issued a Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing, which was published in the **Federal Register** on December 21, 1994 (59 FR 65812).

For further details with respect to this action, see the application for amendment dated August 31, 1994, and the licensee's letter of May 18, 1995, which withdrew the portion of the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555 and at the B.F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Dated at Rockville, Maryland, this 31st day of August, 1995.

For the Nuclear Regulatory Commission.

Donald S. Brinkman,

Senior Project Manager, Project Directorate I–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 95–22462 Filed 9–8–95; 8:45 am]

BILLING CODE 7590–01–P

[Docket Nos. 50–498 and 50–499]

Exemption

In the matter of Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, City of Austin, Texas (South Texas Project, Units 1 and 2).

I

Houston Lighting & Power Company, (the licensee) is the holder of Facility Operating License Nos. NPF–76 and NPF–80, which authorizes operation of the South Texas Project, Units 1 and 2 (STP). The operating licenses provide, among other things, that the licensee is subject to all rules, regulations, and orders of the Commission now and hereafter in effect.

The facilities consist of two pressurized water reactors at the licensee's site in Matagorda County, Texas.

II

Section III.D.3 of Appendix J to 10 CFR Part 50 states that Type C tests shall be performed during each reactor shutdown for refueling but in no case at intervals greater than 2 years. Type C tests are tests intended to measure containment isolation valve leakage rates.

III

By letter dated May 25, 1995, Houston Lighting & Power (HL&P) requested relief from the requirement to perform Type C tests during each reactor shutdown for refueling. HL&P proposes to perform the required Type C tests while the plant is at power.

The licensee's request cites the special circumstances of 10 CFR 50.12, paragraph (a)(2)(ii), as the basis for the exemption. The licensee states that the underlying purpose of the rule is to assure that adequate testing is done to assure containment integrity. The licensee's view is that from the standpoint of testing adequacy, *when* the testing is performed is not relevant because the conditions of testing are the same regardless of when it is performed. Taking credit for testing performed during power operation provides the same degree of assurance of containment integrity as taking credit for testing performed during shutdown. Therefore, consistent with 10 CFR 50.12, paragraph (a)(2)(ii), the licensee proposes that application of the regulation in this particular circumstance is not necessary to achieve the underlying purpose of the rule.

IV

Section III.D.3 of Appendix J to 10 CFR Part 50 states that Type C tests shall be performed during each reactor shutdown for refueling but in no case at intervals greater than 2 years. The licensee proposes an exemption to this section to perform the required Type C tests while the plant is at power.

The Commission has determined that pursuant to 10 CFR 50.12(a)(1) that this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The Commission further determines that special circumstances, as provided in 10 CFR 50.12(a)(2)(ii), are present justifying the exemption; namely, that application of the regulation in this particular circumstance is not necessary to achieve the underlying purpose of the rule.

The NRC staff has reviewed the basis and supporting information provided by the licensee in the exemption request. The staff agrees with the licensee's views provided above. In addition, the NRC staff position is that the focus of Section III.D.3 of Appendix J is on the maximum time period between Type C tests, not the plant's condition when the tests are performed. This position is illustrated in Section III.D.2 of Appendix J regarding Type B tests (for detection of local leakage of containment penetrations), where it states that Type B tests shall be performed during reactor shutdown for refueling, or other convenient intervals, but in no case at intervals greater than 2 years. From a safety standpoint, Type B and Type C tests are the same kinds of tests, performed on somewhat different types of containment isolation barriers; therefore, Type B and Type C tests can be treated similarly. Also, there is no reason to restrict Type C tests to refueling outages as long as the 2-year maximum interval is not exceeded. Based on the above, the NRC staff finds the basis for the licensee's proposed exemption from the requirement to perform the Type C tests during each reactor shutdown for refueling to be acceptable.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this Exemption will not have a significant impact on the quality of the human environment (60 FR 45171). This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 31st day of August 1995.

For the Nuclear Regulatory Commission.

Jack W. Roe,

Director, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.

RAILROAD RETIREMENT BOARD

Determination of Quarterly Rate of Excise Tax for Railroad Retirement Supplemental Annuity Program

In accordance with directions in Section 3221(c) of the Railroad Retirement Tax Act (26 U.S.C., Section 3221(c)), the Railroad Retirement Board has determined that the excise tax imposed by such Section 3221(c) on every employer, with respect to having individuals in his employ, for each work-hour for which compensation is paid by such employer for services rendered to him during the quarter beginning October 1, 1995, shall be at the rate of 33 cents.

In accordance with directions in Section 15(a) of the Railroad Retirement Act of 1974, the Railroad Retirement Board has determined that for the quarter beginning October 1, 1995, 36.3 percent of the taxes collected under Sections 3211(b) and 3221(c) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Account and 63.7 percent of the taxes collected under such Sections 3211(b) and 3221(c) plus 100 percent of the taxes collected under Section 3221(d) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Supplemental Account.

Dated: August 29, 1995.

By Authority of the Board.

Beatrice Ezerski,

Secretary to the Board.

BILLING CODE 7905–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–36181; File No. SR–Amex–95–24]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change Relating to the Execution of Odd-Lot Market Orders

September 1, 1995.

On June 16, 1995, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Amex Rule 205 [3] to provide for the execution of odd-lot market orders [4] at a price based upon the Intermarket Trading System ("ITS") best bid or offer, subject to certain conditions as described more fully below.

The proposed rule change was published for comment in the **Federal Register** on July 19, 1995.[5] No comments were received on the proposal.

The Exchange proposes to amend Amex Rule 205 in order to establish new odd-lot pricing procedures. The Commission initially approved the Exchange's current odd-lot pricing procedures as a pilot program in January 1989 [6] and extended it eleven times since then.[7] Under the pilot procedures, odd-lot market orders with no qualifying notations are executed at the Amex quotation at the time the order is

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Amex Rule 205 pertains to the manner of executing odd-lot orders.

[4] An odd-lot market order is an order of less than a unit of trading to buy, sell, or sell short, that carries no further qualifying notations. The normal trading unit, or round-lot, is 100 shares.

represented in the market either by being received at the trading post or through the Exchange's Post Execution Reporting ("PER") system.[8] Also, for the purposes of the pilot program, limit orders that are immediately executable based on the Amex quote at the time the order is received at the trading post or through PER are executed in the same manner as market orders. Neither order type is charged an odd-lot differential.[9] Prior to the 1989 pilot program, odd-lot market orders were routed to a specialist and held in accumulation in the PER system or by the specialist until a round-lot execution in that security took place on the Exchange. Subsequent to the round-lot execution, the odd-lot order received the same price as the last Exchange round-lot transaction, plus or minus an odd-lot dealer differential.

In its previous orders, the Commission encouraged the Exchange to evaluate the feasibility of implementing an odd-lot pricing system based on the ITS best bid or offer.[10] The Commission was not satisfied that all customers were receiving the best execution, in terms of price and time, under the pilot procedures. In response, the Exchange, in its most recent request for an extension of the pilot program, stated that it has decided to proceed with systems modifications to provide for the execution of odd-lot market orders at the ITS best bid or offer, subject to certain conditions as hereinafter described, and that such system modifications should be completed by February 8, 1996.[11]

The Exchange now proposes to amend Amex Rule 205, which it intends to implement after the required systems modifications are completed. The proposed amendment provides generally for the execution of odd-lot market orders at the highest bid and lowest offer disseminated by the Amex or by another ITS participant market. In order to protect against the inclusion of incorrect or stale quotations when determining the highest bid and lowest offer, a quotation in a stock from another ITS market center will be considered only if: (1) The stock is included in ITS in that market center, (2) the size of the quotation is greater than 100 shares, (3) the bid or offer is no more than one-quarter dollar away from the bid or offer, respectively, disseminated by the Exchange, (4) the quotation conforms to the Exchange's requirements concerning minimum fractional changes,[12] (5) the quotation does not result in a "locked market,"[13] (6) the market center is not experiencing operational or system problems with respect to the dissemination of quotation information, and (7) the bid or offer is "firm" pursuant to the Commission's and the market's rules.[14] If an ITS quotation from another market is not used because it fails to meet one of the above criteria, the best bid and offer disseminated by the Exchange will be used.

Where quotation information is not available (*e.q.*, when quotation collection or dissemination facilities are inoperable) odd-lot market orders would be executed at the prevailing Amex bid or offer or at a price deemed appropriate under prevailing market conditions. All odd-lot market orders entered prior to the opening of trading will continue to automatically receive the opening price, unless the Rule provides otherwise.[15] The pricing procedures will apply to market orders to buy on the offer and orders to sell on the bid marked "long." The proposal will continue to prohibit odd-lot differentials for these transactions. Finally, these procedures also will apply to odd-lot executable limit orders.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of Section 6 (b).[16] Specifically, the Commission believes the proposal is consistent with Section 6(b) (5) of the Act[17] because the Exchange's proposed pricing procedures for standard odd-lot market orders are designed to facilitate the execution and reporting of odd-lot transactions, assist in the prompt and accurate clearance and settlement of such transactions, perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest. The Commission anticipates this proposal will ensure that customers receive the best execution, both in terms of price and time, for standard odd-lot market orders because such orders will be priced off a current market quote instead of a subsequent transaction. This should result in investors receiving more timely executions at the best prices then prevailing under current market conditions.

The Commission also believes it is reasonable for the Exchange to set certain requirements to trigger the use of the ITS best bid or offer in the odd-lot pricing system. The limited prerequisites for the use of the ITS quote are appropriate to protect the automatic execution feature of the odd-lot pricing system against the inclusion of aberrant quotations. Although the ITS quote remains the Commission's preferred method of pricing standard odd-lot orders, the Commission recognizes that the use of the ITS quote may not always be practicable for the Exchange. Therefore, the Commission believes, in the instances enumerated by the Exchange, it is appropriate to use the Amex best bid or offer. Moreover, even those few orders receiving only the Amex quote will be executed more cheaply than under the pre-1989 system because the Exchange's proposal continues to ensure that a differential is not charged for odd-lot market orders.

When the ITS best bid or offer is unavailable, the Commission believes it is acceptable for the Amex to price standard odd-lot market orders at the price of the last Exchange round-lot sale or at a price deemed appropriate under prevailing market conditions by the odd-lot dealer. In this way, the Exchange continue to provide procedures that facilitate the execution of odd-lot orders.

Finally, the Commission expects, based on the Exchange's representations, the required systems modifications will be completed by

---

[8] Securities Exchange Act Release No. 26445 (Jan. 10, 1989), 54 FR 2248. The PER system provides member firms with the means to electronically transmit equity orders, up to volume limits specified by the Exchange, directly to the specialist's post on the trading floor of the Exchange. Securities Exchange Act Release No. 34869 (Oct. 20, 1994), 59 FR 54016.

[9] A differential is a charge paid by the customer to the specialist odd-lot dealer for executing the order.

[10] Securities Exchange Act Release No. 26445 (Jan. 10, 1989), 54 FR 2248 (approving File No. SR–Amex–88–23).

[11] Securities Exchange Act Release No. 35344 (Feb. 8, 1995), 60 FR 8430 (approving File No. SR–Amex–95–03). The Commission notes that the current odd-lot pilot program is scheduled to expire on February 8, 1996.

[12] Amex Rule 127 governs the Exchange's policy concerning minimum fractional changes for securities.

[13] According to Amex Rule 236(a)(4), a "locked market" occurs whenever the Exchange disseminates a bid for an ITS security at a price that equals or exceeds the price of the offer for the security then being displayed from another ITS participating market center or whenever the Exchange disseminates an offer for an ITS security at a price that is less than the price of the bid for the security then being displayed from another ITS participating market center.

[14] The Exchange considers a bid or offer as "firm" when the members of the market center disseminating the bid or offer are not relieved of their obligations with respect to such bid or offer under paragraph (c)(2) of Rule 11Ac1–1 pursuant to the "unusual market" exception of paragraph (b)(3) of Rule 11Ac1–1. *See* 17 CFR 240.11Ac1–1(b)(3); 17 CFR 240.11Ac1–1(c)(2).

[15] *See* Amex Rule 205 (c) (1) ("Orders Filled After the Close") and Amex Rule 205 (c) (2) ("Non-Regular Way Trades").

[16] 15 U.S.C. 78f(b).

[17] 15 U.S.C. 78f (b) (5).

February 8, 1996. The Commission also expects the Exchange to notify the Commission staff of such completion and the implementation of this proposal.

It Therefore Is Ordered, pursuant to Section 19(b)(2) of the Act,[18] that the proposed rule change (SR–Amex–95–24) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[19]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34–36180; File No. SR–CHX–95–20]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Chicago Stock Exchange, Incorporated Relating to Technical Corrections to Its Enhanced SuperMAX Rules

September 1, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b) (1), notice is hereby given that on August 25, 1995, the Chicago Stock Exchange, Incorporated ("CHX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange, pursuant to Rule 19b–4 of the Act, proposes to amend Rule 37(e) of Article XX, relating to its Enhanced SuperMAX Program.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In Securities Exchange Act Release No. 36027 (July 27, 1995), 60 FR 39465 (Aug. 2, 1995) (File No. SR–CHX–95–15), the CHX added rules for the Enhanced SuperMAX Program into CHX Article XX, Rule 37(e). The purpose of this proposed change is to make technical changes to Rule 37(e) to correct inadvertent errors contained in the prior filing. Specifically, Rule 37(e) (1) and (2) are being changed to make it clear that they refer to stopped orders [1] and not stop orders,[2] among other things.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b)(5) of the Act in that it is designed to promote just and equitable principles of trade, to remove impediments too and to perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on competition

The proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change constitutes a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule of the Exchange and, therefore, has become effective pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4 thereunder. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–CHX–95–20 and should be submitted by October 2, 1995.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF TRANSPORTATION

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended September 1, 1995

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: OST–95–486

Date filed: August 28, 1995

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 25, 1995

Description: Application of Aviateca, S.A., pursuant to 49 U.S.C. 41302 and Subpart Q of the Regulations, requests renewal of its foreign air carrier permit, to engage in foreign air transportation of persons, property, and mail as conferred in Order 90–8–58: 1. Between a point(s) in Guatemala and the terminal point Miami, Florida; 1. Between a points(s) in Guatemala; the intermediate points Cancun and Merida, Mexico; and the coterminal points New Orleans, Louisiana; Houston, Texas; and Dallas/Ft. Worth, Texas; 3. Between a point(s) in Guatemala; the intermediate point Santo Domingo, Dominican Republic; and the terminal point San Juan, Puerto Rico. 4. The authority to engage in charter trips.

BILLING CODE 4910-62-P

Federal Aviation Administration

Receipt of Noise Compatibility Program and Request for Review; Savannah International Airport, Savannah, GA

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces that it is reviewing a proposed noise compatibility program that was submitted for Savannah International Airport under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96–193) (hereinafter referred to as "the Act") and 14 CFR Part 150 by the Savannah Airport Commission. This program was submitted subsequent to a determination by FAA that associated noise exposure maps submitted under 14 CFR Part 150 for Savannah International Airport were in compliance with applicable requirements effective August 23, 1993. The proposed noise compatibility program will be approved or disapproved on or before February 25, 1996.

EFFECTIVE DATE: The effective date of the start of FAA's review of the noise compatibility program is August 29, 1995. The public comment period ends October 28, 1995.

FOR FURTHER INFORMATION CONTACT: Mrs. Cathy Nelmes, FAA/Atlanta Airports District Office, 1701 Columbia Avenue, Suite 2–260, College Park, GA 30337–2747. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA is reviewing a proposed noise compatibility program for Savannah International Airport which will be approved or disapproved on or before February 25, 1996. This notice also announces the availability of this program for public review and comment.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) Part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The FAA has formally received the noise compatibility program for Savannah International Airport, effective on August 29, 1995. It was requested that the FAA review this material and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 104(b) of the Act. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before February 25, 1996.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR Part 150, section 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, Atlanta Airports District Office, 1701 Columbia Avenue, Suite 2–260, College Park, GA 30337–2747.

Mr. Patrick S. Graham, Savannah International Airport, 400 Airways Avenue, Savannah, GA 31408.

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Atlanta, Georgia, on August 29, 1995.

Dell T. Jernigan,

Manager, Atlanta Airports District Office Southern Region.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1415 New York Avenue, NW., Washington, DC 20220.

Bureau of Alcohol, Tobacco and Firearms (BATF)

OMB Number: New.

Form Number: ATF F 1676 (5110.12).

Type of Review: New collection.

Title: Bond Covering Removal To and Use Of Wine At Vinegar Plant.

Description: ATF F 1676 (5510.2) is a bond form which serves as a contract between the proprietor of a vinegar plant and a surety. The bond coverage stated on the form is in an amount sufficient to cover the federal excise tax on wine in transit to and stored on the vinegar plant until and wine becomes vinegar.

Respondents: Business or other for-profit.

Estimated Number of Respondents: 25.

Estimated Burden Hours Per Respondent: 1 hour.

Frequency of Response: Annually.

Estimated Total Reporting Burden: 25 hours.

OMB Number: 1512–0081.

Form Number: ATF F 5130.22 and ATF F 5130.23.

Type of Review: Revision.

Title: Brewer's Bond (5130.22); and Brewer's Bond Continuation Certificate (5130.23).

Description: The Brewer's Bond, AFT Form 5130.22 is executed by a brewer and surety company to ensure payment of excise tax on beer removed from the brewery. The Continuation Certificate, ATF F 5130.23 is executed by a brewer and surety company to continue in effect the coverage of a Brewer's Bond by the surety company.

Respondents: Business or other for-profit.

Estimated Number of Respondents: 280.

Estimated Burden Hours Per Respondent: 1 hour.

Frequency of Response: Other (every four years).

Estimated Total Reporting Burden: 280 hours.

OMB Number: 1512–0378.

Form Number: ATF F 1730 (5530.3) and ATF REC 5530/1.

Type of Review: Revision.

Title: Applications and Notices—Manufacturers of Nonbeverage Products.

Description: Reports (applications and notices) are submitted by manufacturers of nonbeverage products who are using distilled spirits on which drawback will be claimed. Reports ensure that operations are in compliance with law; prevents spirits from diversion to beverage use. Protects the revenue.

Estimated Number of Respondents: 640.

Estimated Burden Hours Per Respondent: 30 minutes.

Frequency of Response: On occasion.

Estimated total Reporting Burden: 640 hours.

Clearance Officer: Robert N. Hogarth, (202) 927–8930, Bureau of Alcohol, Tobacco and Firearms, Room 3200, 650 Massachusetts Avenue, N.W., Washington, DC 20226.

OMB Reviewer: Milo Sunderhauf, (202) 395–7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

BILLING CODE 4810 31–M

Public Information Collection Requirements Submitted to OMB for Review

August 30, 1995.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue NW., Washington, DC 20220.

Departmental Offices/Office of Procurement

OMB Number: 1505–0080.

Form Number: None.

Type of Review: Extension.

Title: Post-Contract Award Information.

Description: Information requested of contractors is specific to each contract and is required for Treasury to evaluate properly the progress made and/or management controls used by contractors providing supplies or services to the Government and to determine contractors' compliance with the contracts, in order to protect the Government's interest.

Respondents: Business or other for-profit, Not-for-profit institutions.

Estimated Number of Respondents: 5,565.

Estimated Burden Hours Per Response: 15 hours, 32 minutes.

Frequency of Response: On occasion (as specified in contract).

Estimated Total Reporting Burden: 86,421 hours.

OMB Number: 1505–0081.

Form Number: None.

Type of Review: Extension.

Title: Solicitation of Proposal Information for Award of Public Contracts.

Description: Information requested of offerors is specific to each procurement solicitation, and is required for Treasury to evaluate properly the capabilities and experience of potential contractors who desire to provide the supplies or services to be acquired. Evaluation will be used to determine which proposals are most advantageous to the Government, price and other factors considered.

Respondents: Business or other for-profit, Not-for-profit institutions.

Estimated Number of Respondents: 29,183.

Estimated Burden Hours Per Response: 34 hours, 27 minutes.

Frequency of Response: Other (one-time response).

Estimated Total Reporting Burden: 1,005,241 hours.

Clearance Officer: Lois K. Holland, (202) 622–1563, Departmental Offices, Room 2110, 1425 New York Avenue NW., Washington, DC 20220.

OMB Reviewer: Milo Sunderhauf, (202) 395–7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Internal Revenue Service (IRS)

OMB Number: New.

Form Number: IRS Form 1040NR–EZ.

Type of Review: New collection.

Title: U.S. Income Tax Return for Certain Nonresident Aliens With No Dependents.

Description: This form is used by certain nonresident aliens with no dependents to report their income subject to tax and compute the correct tax liability. The information on the return is used to determine whether income, deductions, credits, payments, etc. are correctly figured.

Respondents: Individuals or households.

Estimated Number of Respondents/Recordkeepers: 135,500.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—1 hr., 19 min.

Learning about the law or the form—48 min.

Preparing the form—1 hr., 30 min.

Copying, assembling, and sending the form to the IRS—35 min.

Frequency of Response: Annually.

Estimated Total Reporting/Recordkeeping Burden: 567,745 hours.

OMB Number: New.

Form Number: IRS Forms 9779, 9780, 9781, 9782, 9783, 9784, 9785, 9786, 9787, 9788, 9789 and 9790.

Type of Review: New collection.

Title: Electronic Federal Tax Payment System (EFTPS).

1. EFTPS Business Enrollment Form (9779);
2. EFTPS Business Enrollment Form (Spanish Version) (9780);
3. EFTPS Mandated Taxpayers and Subsidiaries Enrollment Form (9781);
4. EFTPS Mandated Taxpayers and Subsidiaries Enrollment Form (Spanish Version) (9782);
5. Individual Taxpayer Enrollment Form (9783);
6. Individual Taxpayer Enrollment Form (Spanish Version) (9784);
7. EFTPS Mandated Taxpayers and Subsidiaries Enrollment—Confirmation/Update Form (9785);
8. EFTPS Mandated Taxpayers and Subsidiaries Enrollment—Confirmation/Update Form (Spanish Version) (9786);
9. EFTPS Business Enrollment Confirmation/Update Form (9787);
10. EFTPS Business Enrollment Confirmation/Update Form (Spanish Version) (9788);
11. Individual Enrollment Confirmation/Update Form (9789); and
12. Individual Enrollment Confirmation/Update Form (Spanish Version) (9790).

Description: Enrollment is vital to the implementation of the Electronic Federal Tax Payment System (EFTPS). EFTPS is an electronic remittance processing system that the Service will use to accept electronically transmitted federal tax payments. This system is a necessary outgrowth of advanced information and communication technologies. It is also an outgrowth of the current TAXLINK system in Atlanta.

Respondents: Business or other for-profit, Individuals or households, State, Local or Tribal Government.

Estimated Number of Respondents/Recordkeepers: 11,640,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Form No.	Response time
9779	20 min.
9780	20 min.
9781	20 min.
9782	20 min.
9783	20 min.
9784	20 min.
9785	20 min.
9786	20 min.
9787	20 min.
9788	20 min.
9789	20 min.
9790	20 min.

Frequency of Response: Annually.

Estimated Total Reporting/Recordkeeping Burden: 3,879,630 hours.

OMB Number: 1545–1277.

Form Number: IRS Form 1040–TEL.

Type of Review: Revision.

Title: TeleFile.

Description: Form 1040EZ filers who are single with no dependents, and whose IRS mail label has not changed, will be given the option to file their return by telephone, with no return to send in to the IRS. The IRS will use the information obtained to compute the taxpayer's refund or balance due.

Respondents: Individuals or households.

Estimated Number of Respondents/Recordkeepers: 3,450,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—7 min.

Learning about the law or the worksheet—4 min.

Preparing the worksheet—16 min.

TeleFile phone call—20 min.

Frequency of Response: Annually.

Estimated Total Reporting/Recordkeeping Burden: 2,725,500 hours.

Clearance Officer: Garrick Shear, (202) 622–3869, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, N.W., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf, (202) 395–7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

FARM CREDIT ADMINISTRATION

Farm Credit Administration Board; Special Meeting

SUMMARY: Notice is hereby given, pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), of the special meeting of the Farm Credit Administration Board (Board).

DATE AND TIME: The special meeting of the Board will be held at the offices of the Farm Credit Administration in McLean, Virginia, on September 12, 1995, from 2:15 p.m. until such time as the Board concludes its business.

FOR FURTHER INFORMATION CONTACT: Floyd Fithian, Secretary to the Farm Credit Administration Board, (703) 883–4025, TDD (703) 883–4444.

ADDRESSES: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090.

SUPPLEMENTARY INFORMATION: Parts of this meeting of the Board will be open to the public (limited space available), and parts of this meeting will be closed to the public. In order to increase the accessibility to Board meetings, persons requiring assistance should make arrangements in advance. The matters to be considered at the meeting are:

Open Session

Approval of Minutes

Closed Session *

A. New Business

Enforcement Actions

B. Reports

OSMO Quarterly Report

Dated September 5, 1995.

Floyd Fithian,

Secretary, Farm Credit Administration Board.

---

* Session Closed—Exempt pursuant to 5 U.S.C. 552b(c) (8) and (9).

[FR Doc. 95–22555 Filed 9–7–95; 11:08 am]

BILLING CODE 6705–01–P

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

TIME AND DATE: 9 a.m. (EDT), September 18, 1995.

PLACE: 4th Floor, Conference Room, 1250 H Street, NW., Washington, DC.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Approval of the minutes of the August 21, 1995 Board meeting.
2. Thrift Savings Plan activity report by the Executive Director.
3. Review of FY 1995 expenditures, approval of FY 1996 proposed budget, and FY 1997 estimates.
4. Proposed 1996 Board meeting schedule.

CONTACT PERSON FOR MORE INFORMATION: Tom Trabucco, Director, Office of External Affairs, (202) 942–1640.

Dated: September 6, 1995.

Roger W. Mehle,

Executive Director, Federal Retirement Thrift Investment Board.

[FR Doc. 95–22558 Filed 9–7–95; 11:09 am]

BILLING CODE 6760–01–M

UNITED STATES INSTITUTE OF PEACE

DATE/TIME: Thursday, September 21, 1995—9:00 a.m.–5:30 p.m.

LOCATION: 1550 M Street, NW., Lobby Conference Room, Washington, DC 20005.

STATUS: (Open Session)—Portions may be closed pursuant to Subsection (c) of Section 552(b) of Title 5, United States Code, as provided in subsection 1706(h)(3) of the United States Institute of Peace Act, Public Law 98–525.

AGENDA: September Board Meeting, Approval of Minutes of the Seventy-first Meeting of the Board of Directors; Chairman's Report; President's Report; General Issues; Fiscal Years 1996 and 1997 Budget Review; Unsolicited Grants and Fellowships.

CONTACT: Dr. Sheryl Brown, Director, Office of Communications, Telephone: (202) 457–1700.

Dated: September 7, 1995.

Charles E. Nelson,

Vice President, United States Institute of Peace.

Part II

Office of Government Ethics

5 CFR Part 2640

Interpretation, Exemptions and Waiver Guidance Concerning Acts Affecting a Personal Financial Interest; Proposed Rule

OFFICE OF GOVERNMENT ETHICS

5 CFR Part 2640

RIN 3209–AA09

Interpretation, Exemptions and Waiver Guidance Concerning 18 U.S.C. 208 (Acts Affecting a Personal Financial Interest)

AGENCY: Office of Government Ethics (OGE).

ACTION: Proposed rule.

SUMMARY: The Office of Government Ethics is issuing a proposed regulation describing circumstances under which the prohibitions contained in 18 U.S.C. 208(a) would be waived. Section 208(a) prohibits employees of the executive branch from participating in an official capacity in particular matters in which they, or certain persons or entities with whom they have specified relationships, have a financial interest. Section 208(b) of title 18 permits waivers of these prohibitions in certain cases. Section 208(b)(1) permits agencies to exempt employees on a case-by-case basis from the disqualification provisions of section 208(a). Similarly, section 208(b)(3) permits agencies to waive, in certain cases, the disqualification requirement that would apply to special Government employees serving on a Federal advisory committee. Finally, under section 208(b)(2), the Office of Government Ethics has the authority to promulgate executive branchwide regulations describing financial interests that are too remote or inconsequential to warrant disqualification pursuant to section 208(a). This proposed regulation describes those financial interests. It also proposes to provide guidance to agencies on the factors to consider when issuing individual waivers under section 208(b)(1) or (b)(3).

DATES: Comments by agencies and the public are invited and are due by November 13, 1995.

ADDRESSES: Office of Government Ethics, suite 500, 1201 New York Avenue, NW., Washington, DC 20005–3917. Attention: Ms. Glynn.

FOR FURTHER INFORMATION CONTACT: Marilyn Glynn, Office of Government Ethics, telephone 202–523–5757, FAX 202–523–6325.

SUPPLEMENTARY INFORMATION: Section 208 of title 18 of the United States Code was enacted in 1962 as part of a general revision of the criminal statutes dealing with bribery, graft, and conflicts of interest. It was the successor to 18 U.S.C. 434, a statute enacted in the Civil War era, which prohibited a Government employee from transacting business for the Government with any business entity in which the employee held a financial interest. Since it became effective in 1963, 18 U.S.C. 208(a) has prohibited an employee of the executive branch from participating in an official capacity in any particular matter in which, to his knowledge, he or other specified persons or organizations, has a financial interest. As originally enacted, section 208(b) provided for certain exceptions to the disqualification mandated by section 208(a). Under 18 U.S.C. 208(b)(1), in individual cases a determination could be made by the official responsible for the employee's appointment that the employee could act in matters in which he or other specified individuals or entities had a financial interest because the interest was not so substantial as to be deemed likely to affect the integrity of the employee's services to the Government. Under 18 U.S.C. 208(b)(2), each agency had the authority to determine, by regulation, that certain financial interests were too remote or too inconsequential to affect the integrity of the services of that agency's employees. These regulatory "waivers" permitted all employees of the particular agency to act in Government matters in which their only financial interest was one of the type specified in the regulation.

The Ethics Reform Act of 1989 (Pub. L. No. 101–94), as amended, ("the Act"), amended 18 U.S.C. 208 to eliminate the authority of individual agencies to adopt agencywide exemptions from the applicability of section 208(a). Instead, section 208(d)(2) directs the Office of Government Ethics, after consultation with the Attorney General, to adopt uniform regulations exempting financial interests from the applicability of section 208(a) for all or a portion of the executive branch if OGE determines that such interests are either too remote or too inconsequential to affect an employee's services to the Government. The Office of Government Ethics has consulted with the Office of Personnel Management and the Department of Justice, and pursuant to section 201(c) of Executive Order 12674, as modified by E.O. 12731, has obtained the concurrence of the Justice Department.

The Office of Government Ethics is separately publishing in the **Federal Register** an interim regulation, effective upon publication, establishing a single exemption under 18 U.S.C. 208(b)(2) for disqualifying financial interests that arise from Federal Government salary and benefits or from Social Security or veterans' benefits. That exemption is being issued for codification on interim basis at § 2640.101 of 5 CFR. However, when this proposed overall section 208 regulation is ultimately issued as a final regulation, the exemption for certain Federal Government employment-related financial interests will be moved and placed with the miscellaneous exemptions described in § 2640.203. Therefore, the exemption being established in the separate interim regulation is also being republished as part of this proposed regulation for eventual codification at 5 CFR 2640.203(d). Section 2640.101 of this proposed regulation sets forth a general discussion of the purpose of the overall regulation.

Although individual agencies no longer have the authority to issue agency-specific general exemptions, previously issued agency regulatory "waivers" continue to apply until this proposed regulation is adopted as a final rule and becomes effective. When effective, this rule will supersede all agency regulatory waivers issued under 18 U.S.C. 208(b)(2) as in effect prior to November 30, 1989. *See* 5 CFR 2635.402(d)(2). As proposed, this regulation would protect employees who acted in reliance on such "waivers" issued by agencies prior to the effective date of the final regulation. Employees who acted in reliance on such an agency regulatory waiver in effect prior to the effective date of the final version of this regulation would be deemed to have acted in accordance with applicable authority.

This proposed regulation describes those holdings or relationships that give rise to financial interests that OGE has determined are either too remote or too inconsequential in value to be likely to affect an employee's consideration of any particular matter. Employees who have these disqualifying financial interests would be permitted, to the extent described in the regulation, to participate in matters affecting such interests notwithstanding the general prohibition in section 208(a).

Section 208, as amended, still authorizes agencies to issue individual waivers to employees on a case-by-case basis under section 208(b)(1). The determinations required by section 208 for issuance of an individual waiver are unchanged from previous statutory requirements. Section 208(b)(1) provides that an individual waiver may be issued if the official responsible for the officer's or employee's appointment determines that the interest in the matter "is not so substantial as to be deemed likely to affect the integrity of the services which the Government may expect from such officer or employee." This proposed regulation provides guidance to agencies in making such determinations by listing factors agencies should consider before granting a waiver.

In addition, section 208, as amended, gives agencies specific authority concerning disqualifying financial interests held by special Government employees serving on, or being considered for appointment to, advisory committees within the meaning of the Federal Advisory Committee Act, 5 U.S.C. app. After reviewing the financial disclosure statement required by the Ethics in Government Act of 1978 to be filed by such an individual, the official responsible for the employee's appointment can "waive" the individual's disqualifying financial interest by certifying that the need for the individual's services on the advisory committee outweighs the potential for a conflict of interest created by the financial interest involved. This proposed regulation would describe the factors an agency is to consider in determining whether a waiver should be granted under section 208(b)(3).

Since section 208 became effective in 1963, agency ethics officials have often used the term "waiver" to describe exceptions to the prohibition authorized under either section 208(b)(1) or (b)(2). This proposed rule uses the term "exemption" to describe regulatory exceptions authorized by OGE under section 208(b)(2), and "waiver" to describe individual exceptions granted under section 208 (b)(1) or (b)(3). The Office of Government Ethics believes the term "exemption" more accurately describes the fact that section 208(b)(2) permits OGE to "exempt" certain financial interests from the prohibition in section 208(a).

I. Scope of 18 U.S.C. 208(a)

Section 208(a) prohibits an officer or employee of the executive branch, or an officer or employee of an independent agency of the United States, or a Federal Reserve bank director, officer or employee, or an officer or employee of the District of Columbia, including a special Government employee, from participating personally and substantially in an official capacity

> through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise, in a judicial or other proceeding, application, request for a ruling or other determination, contract, claim, controversy, charge, accusation, arrest, or other particular matter, in which to his knowledge, he, his spouse, minor child, general partner, organization in which he is serving as officer, director, trustee, general partner or employee, or any person or organization with whom he is negotiating or has any arrangement concerning prospective employment, has a financial interest * * *.

18 U.S.C. 208(a).

An employee has a financial interest in a particular matter "when there is a real possibility that he might gain or lose as a result of developments in or resolution of the matter." 83 OGE 1, at 2 (Jan. 7, 1983), published in the Informal Advisory Letters and Memoranda and Formal Opinions of the United States Office of Government Ethics 1979–1988 (OGE Advisory Publication), pp. 859, 861. The statute does not require that the amount of gain or loss be of any particular size, or likelihood. "All that is required is that there be a real, as opposed to a speculative, possibility of benefit or detriment." *Id.* Section 208(a) has long been interpreted as applying where the matter will have a "direct and predictable effect" on the employee's financial interest or on the financial interests of other persons or entities specified in the statute. *See, e.g.*, 2 Opinions of the Office of the Legal Counsel 151, 155 (June 29, 1978). In this regulation, the financial interests of the employee and of the other individuals and entities specified in section 208 would be referred to as the employee's "disqualifying financial interests."

The meaning of the term "financial interest" is sometimes misunderstood. As used in section 208, the term "financial interest" refers to the possibility of financial gain or loss as a result of action on a matter. For example, if an employee is owed money by a person who is a party to an agency matter, the loan itself is not a "financial interest" within the meaning of section 208. Instead, the employee's financial interest in the matter arises from the possibility that the matter may have an effect on the debtor's ability or willingness to honor his obligation to pay the debt owed to the employee. The loan would be a disqualifying financial interest under section 208 only if the agency matter would have a direct and predictable effect on the debtor's ability or willingness to repay the loan.

Similarly, an employee may have a savings account in a financial institution which conducts business at the employee's agency. While the employee ordinarily would be viewed as having a "financial interest" in the deposits in his savings account, the employee's involvement in agency matters affecting the financial institution would not necessarily affect his financial interest in the savings account. In fact, in most such cases, the employee would not have a disqualifying financial interest within the meaning of section 208 because the agency matter in which the employee would participate would not result in any gain or loss to his savings account. He would be disqualified from acting in matters affecting the financial institution only if the matter would have a direct and predictable effect on his financial interest in his savings account. Even in the unusual case where the matter would have a direct and predictable effect on the employee's savings account, a portion or all of many such accounts may be insured by the Federal Deposit Insurance Corporation or other similar governmental entity. In such cases, the employee's financial interest may not be the amount of the account itself, but the amount of interest paid on the account, or the amount above the level covered by the insurance. Where the matters in which the employee would act would have a direct and predictable effect on the bank's ability to maintain and pay interest on an account or to preserve the amount in the account above the insurance limit, the employee's participation in these matters should be examined by the appointing official on an individual basis.

In summary, because the meaning of the term "financial interest" under section 208 is not identical to its commonplace or conventional meaning, this proposed regulation does not contain exemptions for certain interests that may be commonly thought of as "financial interests," but that are not affected by most Government matters so as to require disqualification under section 208. This would include, for example, deposits in bank accounts and interests arising from most insurance policies.

There may be situations in which there is some potential for an employee's financial holding to be affected by the outcome of a matter, but the employee would not have a disqualifying interest under section 208(a). For example, if an employee is a contingent beneficiary in a will executed by a still living relative, the employee's interest in the assets to be distributed under the will is merely speculative since he may never inherit them. For purposes of section 208(a), the employee would not be disqualified from participating in matters affecting those assets.

Another limitation on the scope of section 208(a) concerns the range of interests it covers. To be within the scope of the statute, the affected interest must be that of the employee, his spouse, his minor children, a general partner of the employee, an organization in which the employee serves as officer, director, trustee, general partner or employee, or an organization with which the employee is negotiating or has any arrangement concerning prospective employment. Thus, section 208(a) prohibits an employee from acting in a particular matter that will have a direct and predictable effect on the financial interests of a company by which he is employed in his off-duty hours. On the other hand, section 208(a) does not necessarily bar an employee from acting in a matter affecting his *spouse's* employer. Because the financial interests of a spouse's employer are not specified as disqualifying financial interests under the statute, an employee is not disqualified from acting in matters affecting a spouse's employer unless the matter would have a direct and predictable effect on the *spouse's* financial interest. For example, where the spouse is a salaried employee, does not have an ownership interest in the employer, and the matter will not affect her continued employment or her benefits, the agency matter ordinarily would not have a direct and predictable effect on her financial interest. *See, e.g.*, OGE Informal Advisory Letter 84x6 (May 1, 1984), OGE Advisory Publication, p. 465. Under such circumstances, the employee would not be disqualified under section 208(a) from participating in the particular matter.

This does not mean, however, that an employee who concludes that a matter will significantly affect the financial interest of a person or entity with whom he has a close business or personal relationship should act on the matter because the financial interest is not within the scope of section 208(a). Even though section 208(a) is not applicable by its terms to a specific situation, administrative regulations might prohibit participation in particular circumstances. The Standards of Ethical Conduct for Employees of the Executive Branch contain procedures an employee should follow in cases where his impartiality might be questioned if he were to participate in a Government matter affecting financial interests that do not fall within the scope of section 208(a). *See* 5 CFR 2635.501 *et seq.* For example, under § 2635.502, an employee must consider whether his impartiality would be questioned if he were to participate in a particular matter involving specific parties in which his spouse's employer is a party, or represents a party.

It is important to note that section 208(a) applies only in cases where the employee knows that he, or any other person or entity specified in section 208, has a financial interest that will be affected. For example, an employee who is a general partner in a partnership is prohibited from acting in an official capacity in matters that would affect the financial interests of his general partners. If one of his general partners owns stock in a corporation that would be affected by an agency matter in which the employee would participate, the employee would be barred from participating only if he knows that his general partner owns stock in the corporation. Employees who are general partners should be alert to the fact that they will have actual knowledge of their partners' assets if they have reviewed copies of partners' financial statements or similar documents.

Section 208 prohibits employees from participating in a "judicial or other proceeding, application, request for a ruling or other determination, contract, claim, controversy, charge, accusation, arrest," or certain other "particular matters." The term "particular matter" is discussed in the regulation at proposed § 2640.103(a)(1). In general, a particular matter is one that is focused upon the interests of specific persons, or a discrete and identifiable class of persons. It may include rulemaking, legislation, or policymaking that is narrowly focused on the interests of a discrete and identifiable class of persons. It does not extend to broad policy options or considerations directed toward the interests of a large and diverse group of persons. Because the meaning of the term "particular matter" is often difficult to apply in specific situations, the proposed regulation contains a number of examples based on the opinions of the Office of Legal Counsel at the Department of Justice. In general, these opinions indicate that certain governmental matters having broad application to a large number of persons are not sufficiently focused on the interests of identifiable persons or classes of persons to be considered "particular matters." However, such broad policy matters may later become particular matters when they are implemented in a way that the interests of specific persons or groups of persons are distinctly affected.

Some of the exemption provisions in this proposed regulation would apply to so-called "particular matters involving specific parties"; others would apply to "particular matters of general applicability not involving specific parties." The distinction between these two categories of "particular matters" is derived from concepts used in other criminal conflict of interest statutes, such as 18 U.S.C. 207. However, to avoid any misunderstanding about the meaning of the terms, the proposed regulation defines "particular matter involving specific parties" by restating a portion of the definition of that term as it is used in 5 CFR 2637.201(c)(1) for purposes of 18 U.S.C. 207.[1] A "particular matter involving specific parties" is one that typically involves a specific transaction affecting the legal rights of parties such as a contract, grant, or case in litigation. For purposes of this regulation, "particular matters of general applicability not involving specific parties" are those types of particular matters not encompassed by the description at 5 CFR 2637.201(c)(1). Examples of such matters are rulemaking and the formulation of policy directed to the interests of a discrete and identifiable class of persons. The regulation generally contains more expansive exemptions for participation in "matters of general applicability not involving specific parties" because it is less likely that an employee's integrity would be compromised by concern for his own financial interests when participating in these broader matters.

Before an employee decides that section 208 might prevent him from participating in a certain governmental matter, he should determine whether the matter is a "particular matter" or a "particular matter involving specific parties." Once he decides that the matter is a "particular matter" or a "particular matter involving specific parties," he should then decide whether the matter will have a direct and predictable effect on his financial interest.

Finally, it is important to note that the requirements of section 208, as well as the exemptions in this proposed regulation, apply not only to regular Government employees, but also to special Government employees as defined in 18 U.S.C. 202(a). The proposed regulation also contains an exemption at § 2640.203(g) applicable solely to special Government employees serving on advisory committees. In addition, waivers issued pursuant to 18 U.S.C. 208(b)(3) for members of Federal advisory committees specifically impact special Government employees, many of whom serve on Federal advisory committees. And, of course, the waiver authority of section 208(b)(1) may be used in individual cases where there is a conflict between the financial interests of a special Government employee and his official responsibilities.

---

[1] Section 207 was amended in part by the Ethics Reform Act of 1989, Pub. L. 101–194, and Pub. L. 101–280. The Office of Government Ethics expects to publish regulations interpreting section 207, as amended. The new regulations are expected to contain a similar definition of the term "particular matter involving specific parties."

II. Exemptions from the Prohibition of Section 208(a)

This proposed regulation contains three categories of exemptions from the prohibitions of 18 U.S.C. 208(a). First, the regulation contains proposed exemptions relating to interests arising out of the ownership of mutual funds, common trust funds, unit investment trusts, and employee benefit plans. Second, the regulation contains proposed exemptions arising out of the ownership of interests in securities. Finally, it contains several miscellaneous provisions which would establish exemptions that would apply only in specific situations or only to employees of certain agencies. It is expected that agencies may ask for additional exemptions applicable only to employees or groups of employees at those agencies, as they become aware of the need for them.

For the most part, the exemptions proposed in this regulation would apply to interests that are common to a large number of employees and that are relatively simple to identify, such as those arising from the ownership of mutual funds and securities. In general, the regulation as proposed does not contain exemptions for other potentially disqualifying financial interests which are not normally disqualifying for most employees, such as the interest of a policyholder of a life insurance policy. In most cases, it is unlikely that the typical Federal employee would be required to act in a matter which would affect an insurance company's ability to fulfill its obligation to pay a benefit upon the death of the insured or which would affect the cash value of the policy. Except in the case of interests arising from the purchase of insurance from a mutual insurance company where employees have more a direct interest in the operations of the company itself, interests such as this are not usually disqualifying financial interests under section 208. Those unusual cases where section 208 would bar an employee from acting in a particular matter are best handled on a case-by-case basis in accordance with the procedures for granting an individual waiver under section 208(b)(1) or (b)(3).

Additionally, there may be certain financial interests that create a problem under section 208 only for employees of a particular agency because of that agency's mission, but that are remote or inconsequential enough that an exemption under section 208(b)(2) would be appropriate. For example, the regulation at proposed § 2640.203(h) has an exemption that applies solely to the Directors of Federal Reserve banks. Although this regulation is an executive branchwide rule, OGE will consider including other exemptions which may have applicability only to employees of a particular agency if an exemption would be significant for a large number of the agency's employees and agency resources that would be utilized in issuing individual waivers under section 208(b)(1) would be better used elsewhere in implementing the agency's ethics program. For example, the proposed exemptions for short-term Government securities at § 2640.202(d) and commercial discount and incentive programs at § 2640.203(e) primarily benefit employees at a limited number of agencies. However, these agencies have a sufficient number of employees that can take advantage of the exemptions that it would be appropriate to include specific exemptions here. The Office of Government Ethics specifically requests suggestions for any such exemptions that should be established and asks that agencies making such suggestions provide proposed "exemption" language to facilitate consideration of the recommendations.

The definitions of some of the terms used in the exemptions proposed in this regulation may appear to be inconsistent with similar or related terms used in other regulations issued by OGE. In particular, the definitions of diversified mutual fund, common trust fund, unit investment trust, and employee benefit plan are not parallel to the definition of an excepted investment fund (EIF) as that term is used in connection with reporting assets on a financial disclosure form and which is defined in 5 CFR 2634.310(c)(2). For the reasons described in section A below, OGE has determined that it is impractical to adopt the definition of "excepted investment fund" for use in defining similar terms in this regulation.

Finally, the Office of Government Ethics has attempted to devise exemptions that can be understood and easily applied by the individual Government employees who have conflicting financial interests. The Office of Government Ethics believes that, to the extent possible consistent with the requirements of section 208, the exemptions in this proposed regulation should not be so complex and technical that a typical Government employee would need the advice and assistance of an agency ethics official to determine how to apply the regulation in his particular case. Because one of the purposes of these regulatory exemptions is to lessen the burden on agency ethics officials who may be issuing numerous individual waivers under section 208(b)(1) or (b)(3), OGE has tried to simplify the language of each proposed exemption. However, because section 208 is a criminal statute with significant penalties, the language of each exemption also must carefully delineate the scope of the exemption.

A. Exemptions for Mutual Funds, Common Trust Funds, Unit Investment Trusts, and Employee Benefit Plans

1. Diversified Mutual Funds, Common Trust Funds, and Unit Investment Trusts

For purposes of section 208, an employee who has an interest in a pooled fund such as a mutual fund, a common trust fund, or unit investment trust is deemed to have a financial interest in a matter that would affect the assets held by the fund or trust. In most cases, the holdings of such funds are diversified, with only a limited portion of the fund's assets placed in the securities of any single issuer. Moreover, a fund typically holds securities of issuers who are engaged in a variety of businesses or industries. Usually an employee's interest in any one fund is only a small portion of the fund's total assets. For these reasons, it is generally unlikely that an employee's official actions with regard to any one of the holdings of the fund in which he holds shares will have any consequential effect on the employee's financial interest. Accordingly, proposed § 2640.201(a) would permit an employee to participate in any particular matter affecting the holdings of a diversified mutual fund, diversified common trust fund, or diversified unit investment trust in which the employee, or any other person specified in section 208, has a direct or beneficial ownership interest. The term "direct or beneficial ownership" means that the employee's interest can arise either through his direct ownership of a share in the fund or trust, or as the beneficiary of a trust or an estate that holds such shares.

To ensure that the foregoing assumptions are satisfied, however, the proposed exemption described in § 2640.201(a) would apply only to the holdings of trusts or funds which meet the following criteria. First, if the fund is a mutual fund, it must be a diversified mutual fund that meets the requirements of section 5(b)(1) of the Investment Company Act of 1940, 15 U.S.C. 80a–5(b)(1), for a "diversified company." Section 80a–5 specifies that, for at least 75% of its assets, a diversified company may not invest more than 5% of its assets in any one issuer nor hold more than 10% of the outstanding voting securities of any issuer. Additionally, the proposed rule's definition of the term "diversified" at § 2640.102(b) requires that the fund not have a stated policy of concentrating its investments in any industry, business, single country (other than the United States), or bonds of a single State. This would ensure, for example, that an employee of the Food and Drug Administration (FDA) would not be given an automatic waiver for investments in a mutual fund which limits its holdings to drug company stocks. Of course, an appropriate FDA official could grant an individual waiver under 18 U.S.C. 208(b)(1) or (b)(3) to an employee in a particular case if the agency determined that the employee's interest in a mutual fund specializing in the pharmaceutical industry was not so substantial that it would affect the integrity of his services.

The Office of Government Ethics decided to define "diversified mutual fund" by reference to the definition of "diversified company" contained in 15 U.S.C. 80a–5 to provide employees a simple way of determining whether the mutual funds they own are, in fact, "diversified." Regulations issued by the Securities and Exchange Commission (SEC) governing the administration of mutual funds specifically require that each mutual fund prospectus contain a statement concerning the fund's investment objectives, including whether the fund is deemed to be diversified for purposes of securities law. In most cases, this requirement will be met by a statement that the fund or the company is a diversified management investment company. By locating this statement in the fund's prospectus, an employee can easily determine whether the fund is considered "diversified" under this section 208 regulation. Alternatively, if the employee cannot find the relevant statement or the prospectus is unavailable, the employee can simply call the fund's manager or the broker through whom he purchased the fund and ask if the fund is a diversified company.

The Office of Government Ethics considered using other standards to define the term "diversified", such as adopting the standard for "excepted investment funds" as that term is used in 5 CFR 2634.310(c) for purposes of financial disclosure. "Excepted investment funds" cannot have more than 5% of the value of the fund's portfolio invested in any one issuer and more than 20% in any particular economic or geographic sector. However, use of standards such as this would require employees to examine the fund's assets and perform lengthy mathematical calculations to determine whether the particular fund was diversified. Moreover, because mutual fund assets continuously change, it would be burdensome to determine whether the fund was diversified at all times after the initial calculations were made. Using a numerical standard such as the 5%/20% formula described above arguably would require an employee to recalculate the ratio of assets in the fund's.portfolio prior to participating in particular matters that occur on a continuing basis.

In informal discussions concerning the draft regulation, some agency ethics officials recommended that OGE define the term "diversified" only in relation to whether investments are concentrated in a particular sector, and not whether the fund's assets are invested in any particular number of issuers. Another ethics official suggested that the term "mutual fund" should not be defined by referencing regulations issued by the Securities and Exchange Commission because the regulations are extremely technical and most employees could not really be sure whether their investment is a "mutual fund" or a "diversified company" as defined by the SEC. The thrust of these recommendations was that an employee who failed to determine whether his investment met the statutory definitions would be misled into violating section 208 by acting in matters affecting interests in an investment that appeared to be a mutual fund, but was in fact some other type of pooled investment vehicle that was not technically a "mutual fund" as defined in SEC regulations. Leaving the relevant terms undefined presumably would absolve employees of the responsibility of determining whether their investments were actually diversified mutual funds and would thus avoid inadvertent violations.

The Office of Government Ethics shares these concerns, but does not agree that employees would be better served by dropping the requirement for "diversification" or by leaving the terms "diversified" and "mutual fund" undefined. First, OGE believes it is essential that the exemption proposed for mutual funds apply to funds that are diversified as to the *number of holdings* in the fund, as well as the sectors in which the holdings are invested. Because OGE has the authority to promulgate exemptions only for financial interests that are too "remote or inconsequential" to affect an employee's services to the Government, it would be difficult to conclude that interests arising from a fund containing only a few holdings would be remote or inconsequential enough to warrant a total exemption under section 208(b)(2).

Moreover, employees would also be at risk of violating section 208 if the terms "mutual fund" and "diversified" were not defined in the regulation. With the increasing variety of complex financial instruments that are available to investors, employees certainly could become confused about whether their particular pooled investments are diversified mutual funds. The experience of OGE in reviewing public financial disclosure forms indicates that private limited partnerships invested in securities are sometimes mistaken for mutual funds even though the partnership has a limited number of investors and holdings, and even though the holdings may not be diversified as to either numbers or sector. It would be unfair to employees not to clarify that interests such as these private partnerships would not be considered mutual funds for purposes of the exemption as proposed.

On balance, OGE decided that proposing to define the term "diversified mutual fund" by reference to 15 U.S.C. 80a–5 would be the most convenient method for determining whether the investment vehicle is a fund and is diversified, since a quick perusal of the fund's prospectus, or a call to the fund's manager, will indicate whether the fund is a diversified management investment company. Employees must be expected to have some responsibility for determining whether their investments meet the criteria for application of the exemption provisions. Employees also deserve to receive guidance that is reasonably specific enough to give them adequate notice of what investments meet the criteria for an exemption.

Similarly, by examining the prospectus or calling the fund's manager, an employee can determine whether the fund has a stated policy of concentrating its investments in any industry, business, or country, or to bonds issued by a single State. For example, some funds clearly limit their investments to biotechnology stocks, energy stocks, precious metals and minerals, agricultural products, telecommunications stocks, or municipal bonds issued by a single State. Securities and Exchange Commission regulations require mutual fund sponsors to describe limitations of this type in the fund's prospectus. Additionally, limitations on the type of assets held by a mutual fund are often reflected in the name of the fund itself, e.g. Vanguard Specialized Portfolios: Health Care or Fidelity Spartan New York High Yield. These types of funds are commonly referred to as "sector" funds.[2]

The Office of Government Ethics decided not to consider funds invested in broad geographical regions as "sector" funds. While funds limited to a single State or a single country (other than the United States) would be excluded from the definition of "diversified" under this proposed rule, OGE concluded that it is unnecessary to also exclude, for example, funds limited to investments in Europe or the Pacific region. The Office of Government Ethics specifically requests comments on whether such funds should be considered "diversified."

Because the term "mutual fund" at proposed § 2640.102(l) includes "registered money market funds," money market mutual funds would also have to be diversified in accordance with the standards described at § 2640.102(b)(1) for the exemption proposed at § 2640.201(a) to be applicable. Registered money market funds may be offered by a mutual fund company or may be marketed through a bank. In either case, however, as with other mutual funds, the prospectus describing the fund will contain the information an employee needs to determine whether the fund is diversified. For purposes of this regulation, money market instruments are not considered a single industry or business, and therefore, money market mutual funds are not considered investments concentrating in a single business or industry. By contrast, however, funds which have a policy of investing only in bank stock, or in savings and loan institutions, or in financial services are clearly limited to a single business or industry and are not considered "diversified" for purposes of this proposed regulation.

Money market deposit accounts (as opposed to money market mutual funds) offered by banks are not included in the proposed definition of the term "mutual fund" as it is used in this regulation. Accordingly, the exemption for diversified mutual funds at § 2640.201(a) as proposed would not be applicable to bank money market deposit accounts. The inapplicability of the proposed exemption to money market deposit accounts is not a problem, however, because in most cases, an interest in such an account is not a disqualifying financial interest under section 208. Unlike a money market mutual fund, a bank money market account is a type of individual deposit account funded by the bank's investments. Just as in the case of a regular bank savings account, it is unlikely that an employee would have a disqualifying financial interest because of his account. First, an employee would rarely have knowledge of the bank's underlying investments. However, even in those unusual cases where the employee did have knowledge of those investments, it would be unlikely that a Government matter involving one of the investments would have a direct and predictable effect on the employee's "financial interest" in his deposit account.

On the other hand, employees whose official responsibilities require them to participate in matters affecting banks where they have money market or other deposit accounts may have to consider whether the Government matters in which they might participate would have a direct and predictable effect on the bank's ability to maintain, and pay the appropriate interest on, the accounts. In such cases, of course, the employee may have a disqualifying financial interest in whether the bank can continue to pay interest on his deposit account, rather than a disqualifying financial interest in the bank's investments.

In summary, to make a definitive determination whether a particular mutual fund is "diversified" for purposes of this proposed regulation, an employee simply has to find whether the prospectus states that the fund is a diversified management company, and whether it has a policy of concentrating its investments in a particular industry, business, single country (other than the United States) or in bonds issued by a single State. Because the SEC requires that this information be contained in the prospectus, employees may properly rely on the accuracy of the information. If the prospectus has the specified information, an employee is not required to make any independent determination concerning the fund's diversification. If the employee cannot find the relevant statement in his prospectus or does not have a prospectus, he may call the fund's manager or the broker who sells the fund and ask whether the fund is a "diversified company."[3]

The regulation, at § 2640.201(a), also contains a proposed exemption for participating in matters affecting the underlying assets of a diversified unit investment trust. A unit investment trust is "diversified" if it meets the definition of a "regulated investment company" at 26 U.S.C. 851(a)(1)(A). The standard set forth in section 851 requires that, for 50% of its assets, no more than 5% of the trust's assets may be invested in any one issuer and the trust may hold no more than 10% of any one issuer's outstanding voting securities. Additionally, no more than 25% of the trust's total assets may be invested in any one issuer, or in two or more issuers that the trust controls and which are engaged in the same or similar trades or businesses. An employee need not make an independent determination whether the unit investment trust in which he has invested meets these criteria. Instead, the employee should consult the prospectus describing the trust or the trust's sponsor to determine whether the trust is a "regulated investment company." If it is so described, it satisfies this regulation's diversification requirements, provided the trust does not have a stated policy of concentrating its investments in any industry, business, or single country (other than the United States), or to bonds issued by a single State.[4]

The assets of a common trust fund will be "diversified" for purposes of this proposed regulation if the common trust fund meets the rules for "diversification" established by the Office of the Comptroller of the Currency at 12 CFR 9.18. These rules provide that no more than 10% of a fund's assets may represent one investor's interest, and that no more than 10% of the fund's assets may be invested in any one issuer. This diversification standard applies explicitly to common trust funds maintained by national banks. It also applies to funds maintained under State law by State banks which are required by 26 U.S.C. 584(a) to adhere to rules established by the Office of the Comptroller of the Currency, including the rules for diversification of common trust funds. An employee may presume that any State bank maintaining a common trust fund adheres to these requirements. Of course, as with mutual funds and unit investment trusts, the bank maintaining the fund cannot have a policy of concentrating its investments in an industry, business, or country, or in bonds issued by a single State.

---

[2] Although a sector fund is not considered a "diversified mutual fund" for purposes of the exemption described at § 2640.201(a), a mutual fund (including a nondiversified mutual fund) is a "publicly traded security" for purposes of the de minimis exemptions described in § 2640.202. Accordingly, the proposed regulation would permit an employee to participate in certain matters affecting financial interests arising from the ownership of a de minimis amount of nondiversified mutual funds. Also, proposed § 2640.201(b) would exempt interests arising from assets in a sector mutual fund which are not invested in the sector in which the fund concentrates.

[3] Although this proposed regulation would reference several definitions contained in statutes and regulations within the purview of the Securities and Exchange Commission, the Office of the Comptroller of the Currency, the Internal Revenue Service, and the Department of Labor, those agencies do not have any role in interpreting the provisions of this regulation. Inquiries concerning the meaning of terms used in those statutes and regulations, and the way those terms are used in this regulation, should be directed to OGE.

[4] A unit investment trust (or a mutual fund) comprised of bonds issued by a single State would not meet the diversification requirements of this regulation. However, the lack of an exemption would not be a problem for most Federal employees since they typically would not have a disqualifying financial interest arising from ownership of State bonds. Except in unusual cases, the official matters in which an employee would participate would not affect the bond's rating or the State's ability or willingness to honor its obligation to pay interest on the bond.

2. Sector Mutual Funds

Section 2640.201(b) would contain a provision permitting an employee to participate in any particular matter affecting the holdings of a sector mutual fund, provided the affected holding is not invested in the sector in which the fund concentrates. This provision would address the problem that might be encountered, for example, by an employee of the Federal Reserve who owns shares in a sector mutual fund that concentrates in biotechnology stocks, but which also has bank stocks in its portfolio. The proposed exemption would permit the Federal Reserve employee to participate in matters affecting banks whose stock is in the fund's portfolio without obtaining an individual waiver under section 208(b)(1).

The proposed regulation does not contain an exemption for holdings in a geographic sector mutual fund where an individual holding creates a section 208 conflict for an employee, but the sector as a whole does not create a conflict. This might occur, for example, when a Food and Drug Administration employee purchases a mutual fund which concentrates its investments in German businesses and the employee is involved in reviewing an application for a drug approval submitted by a German pharmaceutical company whose stock is a holding of the mutual fund. The Office of Government Ethics requests specific suggestions for language for an exemption that would be applicable in this situation.

3. Employee Benefit Plans

Proposed 5 CFR 2640.201(c)(1) (i), (ii) and (iii) would permit an employee to act in any particular matter affecting the *holdings* of the Federal Government's Thrift Savings Plan, a pension plan established or maintained by a State or local government, or other diversified employee benefit plan in which the employee participates. By participating in the plan, the employee has a financial interest in a matter that affects one or more assets held by the plan. The exemption would also apply in situations where any other person specified in section 208 participates in the plan.

In the case of State or local government pension plans, OGE's experience has been that the plans typically are comprised of a large number of varied assets managed by an independent agency or board. Therefore, the proposed exemption at § 2640.201(c)(1) would apply to an employee's disqualifying interest in the holdings of any State or local government pension.

For all other types of employee benefit plans, the exemption would apply only if the plan is (i) diversified; (ii) the plan's investments are administered by an independent trustee; (iii) the employee (or other person specified in section 208) does not participate in the selection of the investments except to direct that contributions be divided among several different types of investments (such as stocks, bonds or mutual funds) available to plan participants; and (iv) the plan is not a profit-sharing or stock bonus plan. Although this proposed provision would apply to all types of employee benefit plans as described in § 2640.102(d), for all practical purposes most of the plans covered by the provision are some form of employee savings or retirement plan that provides deferred income, typically after the employee has retired. Most often employees view these plans as pensions.

Most pensions (and similar employee benefit plans covered by this rule) are one of two types: A defined benefit plan or a defined contribution plan. A defined benefit plan is one that is designed to provide participants with a defined or specified benefit upon retirement, such as an annual income that is a specific percentage of the compensation received by the participant during a certain period of his employment. By contrast, a defined contribution plan is one that establishes an individual account for each participant. In the case of a defined contribution plan, the retirement benefit received by the employee is based upon the contributions to and any income generated by the account, and can vary depending upon the gains, losses, and expenses that are attributable to the account. Benefits to which a participant is entitled under a defined benefit plan may be insured by the Pension Benefit Guaranty Corporation (PBGC) or by private insurance contracts or annuities.

In most cases, an employee will not have a section 208 interest in the *holdings* of a defined benefit plan because payment of the specified benefit is ensured whether or not the plan holdings generate income sufficient to fund the benefit. Therefore, under most circumstances an employee would not need a waiver under section 208 (b)(1) or (b)(3) or an exemption under section 208(b)(2) to act in matters affecting the *underlying assets* of a defined benefit plan. In some cases, the employee may have a financial interest in the sponsor of the plan who has promised to pay the benefit upon retirement. Except as provided in § 2640.201(c)(2) as proposed, authority to act in matters affecting the sponsor of such a plan must be handled on an individual basis in accordance with the provisions of 18 U.S.C. 208(b)(1). As a practical matter, however, most governmental matters in which an employee would participate are unlikely to have a direct and predictable effect on the plan sponsor's ability or willingness to pay an employee's pension benefits. Accordingly, most employees will not have a disqualifying financial interest in either the holdings or the sponsor of a defined benefit plan.

On the other hand, employees would ordinarily have a financial interest in the holdings of a defined contribution plan since those holdings are the assets which will generate the employee's retirement or other income. Therefore, in the absence of an exemption or waiver, an employee cannot act in particular matters that would have a direct and predictable effect on those holdings. The proposed exemption at § 2640.201(c)(1) would permit an employee to act in particular matters affecting the holdings of an employee benefit plan only if the plan meets the criteria described below.

First, the plan must be administered by an independent trustee which is defined in § 2640.102(g) as either a trustee independent of the plan's sponsor and participants, or a registered investment adviser. Second, the proposed rule would not permit the employee to select his own investments. However, the prohibition on participation in selecting plan investments would not bar an employee from directing the division of employer or employee contributions among a variety of types of investments or among a group of specific investment vehicles chosen by the plan trustee or manager. For example, a pension plan may offer participants the opportunity to choose between a bond fund, a common stock

fund, or a government securities fund. Participants may choose to divide their investments among the various funds.

Additionally, as with mutual funds, common trust funds, and unit investment trusts, this regulation as proposed would require that the assets of the plan must be diversified. Unlike mutual funds, common trust funds, and unit investment trusts, however, there is no independent statutory or regulatory diversification requirement for employee benefit plans except that plan sponsors and managers have a fiduciary responsibility to diversify plan assets to reduce risk to the investors. *See* 29 U.S.C. 1104(a)(1)(C). Because there is no specific numerical standard for diversification that this proposed regulation could easily reference to assist employees in determining whether an individual plan is diversified, OGE had to consider whether it wanted to create a diversification standard similar to others referenced in the regulation. Alternatively, OGE considered whether to adopt the same diversification standard used by employees to determine whether they must report the underlying assets of certain funds or trusts on the public financial disclosure statement (SF 278), i.e. no more than 5% of a plan's assets can be invested in any one issuer and no more than 20% of the plan's assets can be invested in any one business, industry, or economic or geographic sector.

The problem with adopting any one of these diversification standards is that before an employee could decide whether the exemption would be applicable, he would be required to obtain a copy of the plan's portfolio and scrutinize it to determine how the plan's assets are invested, including what proportion of assets are invested in particular issuers and particular industries or sectors. The Office of Government Ethics believes that in many cases it is unrealistic to assume that employees can easily obtain an inventory of pension holdings and make accurate calculations about the percentage of holdings in various issuers and industries. The problem is especially exacerbated by the fact that the assets of many employee benefit plan portfolios are continually changing and it would be difficult to establish with any certainty the relative proportion of the plan's assets from day to day. This problem is not so significant for purposes of determining whether an employee benefit plan is an excepted investment fund (EIF) for purposes of financial disclosure because financial disclosure rules only require employees to determine whether the plan is diversified on the day the report is filed. Where section 208 is implicated, however, employees may be participating over a period of time in Government matters and presumably the plan would have to be diversified at all times when the employee would participate in the matter affecting the plan's assets. If OGE created a numerical diversification standard for employee benefit plans in this regulation, it would be nearly impossible for employees to know from day to day whether the plan continued to be "diversified," and OGE's goal of issuing clear and easy-to-use exemptions would be severely undermined.

On the other hand, OGE is unwilling to permit an automatic exemption to apply to any employee benefit plan, whether or not it is diversified. Without a requirement for some type of diversification, employees would be free to act in matters affecting the holdings of a plan which could contain any amount of a single asset, thus increasing the possibility that the employee might significantly gain or lose as a result of the Government matter in which he would participate. This outcome would subvert the statute's clear intent to exempt only interests that are remote or inconsequential.

Because the majority of employee benefit plans are widely diversified in any case, OGE's concern may be somewhat theoretical. Nevertheless, OGE has decided to propose a requirement that, for the exemption to apply, employee benefit plans must be diversified, i.e. the plan trustee or manager must have a written policy of varying plan investments.

This diversification standard would simply require an employee to determine whether the plan trustee or manager has articulated a policy of diversifying plan assets. The diversification policy might ordinarily be stated in materials describing the benefit plan. For example, brochures describing the TIAA-CREF retirement plan for employees of educational and research institutions specifically state that the CREF Stock Account is a "broadly diversified portfolio of U.S. stocks," and that the CREF Social Choice Account is "diversified among stocks, bonds * * *." In the absence of such a statement, the employee could obtain a written statement from the plan manager or trustee indicating that he has a policy of diversification. In most cases, the manager or trustee will attempt to diversify plan investments in accordance with his or her fiduciary responsibilities under 29 U.S.C. 1104(a)(1)(C).

In addition, the proposed regulation would require that the plan not have a stated policy of concentrating its holdings in any business, industry, single country other than the United States, or bonds of a State within the United States. The provision does not require an employee to perform any mathematical calculation to determine whether a particular percentage of the plan's assets are invested in any industry or sector, but simply to ascertain whether the plan has a policy of making such investments.

Finally, the regulation at proposed § 2640.201(c)(1)(iii)(B) states that the plan may not be a profit-sharing or stock bonus plan. This limitation would ensure that the exemption would not allow an employee to participate in matters affecting the corporate sponsor of a plan. However, because profit-sharing plans which are tax-deferred under 26 U.S.C. 401(k) have become a common form of employee benefit, 401(k) plans would be excluded from the term "profit-sharing plan" for purposes of this regulation.

Section 2640.201(c)(2) as proposed contains a provision which would permit an employee to act in particular matters of general applicability affecting the *sponsor* of a State or municipal pension plan in which the employee, his spouse or minor child, or general partner, participates. As used in this regulation, the term "pension" means a plan, fund or program established or maintained by a State or municipality to provide retirement income for its employees or which results in a deferral of income by employees for periods extending to termination of covered employment or beyond.

As used in the regulation, the term "sponsor" means the State or municipality that established or maintains the plan, not any individual State or municipal agency, board, or panel that may administer the plan on behalf of the State or municipality. Of course, the restrictions of section 208 apply only when the particular matter in which the employee would act has a direct and predictable effect on his financial interest. In the vast majority of cases involving defined benefit plans, it would be unlikely that any particular matter would affect a government's ability or willingness to pay the employee's pension. However, in the event that the employee would be required to act in such a matter, this provision would allow an employee to act only in a particular matter not involving specific parties, such as a rulemaking.

If the matter in which the employee would participate affects the State or municipal agency, board or panel which administers the plan on the State or local government's behalf, the employee would not be able to participate in the matter without first receiving an individual waiver in accordance with the terms of 18 U.S.C. 208(b)(1).

B. Exemptions for Interests in Securities

Because many Federal employees own shares of stock and other types of securities, the proposed regulation contains a number of provisions that describe exemptions for matters affecting financial interests arising out of ownership of securities. Some of the exemptions would apply when the employee owns the security directly; others would apply only when the security is owned by other persons specified in section 208, such as an organization in which the employee serves as officer or director. In addition, some of the exemptions would apply to participation in all types of particular matters, including those involving specific parties. Other exemptions would apply only to participation in particular matters of general applicability. In general, the type and extent of exemption depends on the type of matter involved, the amount of the employee's financial interest, and the likelihood that the employee's action will affect the entity issuing the securities.

As defined in the proposed regulation at § 2640.102(r), the term "security" has a somewhat expansive meaning including stock, bonds, mutual funds, long-term Federal Government securities, limited partnership interests, and municipal securities. However, for many of the exemptions to be applicable, the securities must be "publicly traded securities" as defined in the regulation at proposed § 2640.102(p). This means that in addition to being the type of security described in § 2640.102(r), the securities would have to be registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934 (15 U.S.C. 781) and listed on a national exchange or traded through NASDAQ, or be registered under the Investment Company Act of 1940 (15 U.S.C. 80a–8), or be a corporate bond issued by an entity whose stock meets the definition of a "publicly traded security." In general, this requirement ensures that the securities which are the subject of an exemption are widely disseminated. In the case of corporate bonds, the definition of "publicly traded security" will ensure that many bonds which are not traded on a national exchange (but are instead sold over-the-counter) will still be covered by the exemption.

Although most of the securities owned by employees clearly will be "publicly traded" within the meaning of the definition, there may be some cases where the employee is not absolutely certain whether a security is "publicly traded" within the meaning of this regulation. In such cases, employees should discuss the matter with a broker or simply call the issuer.

An interest in stock can create a section 208 disqualifying financial interest in a number of ways. First, ownership of shares of stock in an entity normally represents an ownership interest in the entity itself. Therefore, Government matters that affect the financial interest of the entity have a concomitant effect on the financial interest of the person who owns stock in the entity. For purposes of section 208, the effect of the matter on the entity need not be reflected in a change in the price of the entity's stock. Section 208 is implicated if the matter affects the entity's financial interest in any measurable way, such as when a contract for computer maintenance services is awarded to a large corporation that develops, manufactures and maintains computers. Even if the contract amount is not significant enough to result in an increase in the value of the company's stock, the mere award of the contract has affected the company's finances, and an employee who owns stock in the company has a disqualifying financial interest in the award of the contract to the company. Of course, in some cases a Government matter may be so significant that the price of the company's stock rises or falls to reflect the financial market's reaction to the matter. In such cases, an employee who owns stock in the company would even more clearly have a disqualifying financial interest in the matter.

Corporate bonds and certain municipal and Government bonds are included in the definition of "security" for purposes of the proposed regulation. Of course, a bond is also a form of debt owed by the entity issuing the bond. Ordinarily, ownership of a corporate or municipal bond does not create a disqualifying financial interest unless the Government matter in which the employee participates would have a direct and predictable effect on the market value of the bond or the entity's ability to repay the debt. The proposed rule contains exemptions that would apply in cases where the bond's value or the issuing entity's ability to pay would be affected.

The term "municipal security" is defined in the proposed regulation at § 2640.102(k) to include only the direct obligations of, or obligations guaranteed as to principal or interest by, a municipal entity. Thus, certain industrial development bonds which are issued under municipal aegis, but which actually represent the obligations of a private organization, would not be deemed municipal securities for purposes of this regulation. Since the corporations which issue industrial development bonds are varied, including both public and nonpublic companies, a blanket waiver to cover interests in securities offered by such organizations is inappropriate.

The term "long-term Federal Government security" is defined in the proposed regulation at § 2640.102(j) to mean bonds or notes with a maturity of one year or more issued by the United States Treasury pursuant to 31 U.S.C. chapter 31. Because the value of these long-term securities can fluctuate widely, OGE has determined that it would be appropriate to exempt financial interests arising from the ownership of these Government securities to the same extent that financial interests arising from other securities are exempted. On the other hand, the value of short-term Federal Government securities (with maturities of less than one year) cannot be substantially affected by the actions of employees who participate in matters involving those securities. Therefore, the regulation would contain a separate exemption at § 2640.202(d) for interests arising from the ownership of short-term Federal Government securities. Of course, as a practical matter only employees involved in setting and implementing monetary policy or other similar governmental matters are likely to be participating in matters affecting financial interests in Government securities in any event.

The term "Federal Government security" does not include a security issued by any Federal entity other than the U.S. Treasury pursuant to 31 U.S.C. chapter 31. Accordingly, interests arising from the ownership of securities issued by the Government National Mortgage Association (GNMA), the Federal National Mortgage Association (FNMA), and other similar Government agencies and Government-sponsored entities are not automatically exempt from the requirements of section 208. Of course, in appropriate cases disqualifying financial interests arising from the ownership of Federal agency securities may be waived on an individual basis pursuant to 18 U.S.C. 208(b)(1).

Even though interests in diversified mutual funds, and certain interests in sector mutual funds would be totally exempted under § 2640.201 as proposed, the term "mutual fund" is included in the definition of "security" for the purpose of the de minimis exemptions. This means that nondiversified mutual funds would be exempt to the same extent, and under the same circumstances, that stocks, bonds and other "securities" are exempt. Thus, an interest in $5,000 worth of a biotechnology sector mutual fund would be exempt even though an employee would be participating in a particular matter involving a company whose stock was owned by the mutual fund. Similarly, proposed § 2640.202(c) would permit an employee to participate in a particular matter of general applicability even if he owned $25,000 worth of a sector mutual fund, one of whose holdings was a company affected by the matter in which the employee would participate. For purposes of the de minimis provisions, the value of an employee's interest in a mutual fund would be the value of his interest in the fund as a whole, not the pro rata value of any underlying holding of the fund.

1. De Minimis Exemptions

The first exemption pertaining to ownership of securities at § 2640.202(a) as proposed would permit an employee to participate in any particular matter involving specific parties where the employee's financial interest arises from the direct or beneficial ownership by the employee, his spouse or minor child of publicly traded securities, long-term Federal Government securities, or municipal securities valued at no more than $5,000 where the entity issuing the security is a party to the matter. The term "direct or beneficial ownership" means that the employee's interest can arise either through his direct ownership of the securities, or as the beneficiary of a trust or an estate. The value of securities owned by the employee, his spouse, and his minor children must be aggregated to determine whether the exemption applies.[5] Thus, for example, if an employee owns stock in each of several companies which are parties to the particular matter, the provision at proposed § 2640.202(a) would not exempt him from the prohibition of section 208 unless the aggregate value of the stock he owns in all parties is no more than $5,000.

The Office of Government Ethics considered proposing to set the de minimis standard at no more than $1,000 because that is the minimum value for assets that must be reported on an employee's public financial disclosure statement (SF 278). Setting the de minimis level at $1,000 would have permitted agency ethics officials who review financial disclosure reports to counsel employees that section 208(b)(2) exempts all interests in securities they own whose values fall below the threshold for reporting on the SF 278 statement. However, the actual financial interest one might have in a matter because of the ownership of stock worth no more than $1,000 would have been a significantly lower amount than OGE believes can be considered "inconsequential" within the meaning of section 208(b)(2) and would have clearly limited the exemption's usefulness. After final adoption of this rule (with any modifications), OGE will periodically review this and other specific dollar thresholds as well as other aspects of this regulation.

Where an employee has an interest in a security issued by an entity which is not a party to the particular matter involving specific parties, but which is nonetheless affected by the matter, the employee may act in the matter if the value of the security does not exceed $25,000. *See* proposed § 2640.202(b). This might occur, for example, when one automobile manufacturer sues the Government to enjoin enforcement of a new regulation that will require all manufacturers to incur additional production expenses. A Government attorney involved in the litigation who owns stock in another auto manufacturer not a party to the litigation may continue to act in the case pursuant to this exemption if the value of his stock does not exceed $25,000. Of course, this proposed exemption would be relevant only in cases where section 208 was applicable to the matter at issue, i.e. the matter would have a direct and predictable effect on the employee's financial interest arising from the security.

Proposed § 2640.202(b) would not permit an employee to act in a particular matter if the aggregate value of affected securities owned by the employee, his spouse and minor children exceeds $25,000. For purposes of determining whether the $25,000 limitation is met, the value of securities exempted under § 2640.202(a) would have to be included. For example, if an employee owns $5,000 of stock in an automobile manufacturer which is a party to a case in litigation in which the employee is involved, and he also owns $22,000 of stock in another automobile manufacturer affected by, but not a party to the litigation, he may not rely on the exemptions at §§ 2640.202(a) and (b), as proposed, to participate in the matter. Because the aggregate market value of his holdings in the securities of all affected entities exceeds $25,000, he would have to disqualify himself from the matter, or divest at least $2,000 worth of securities in affected party or non-party entities, or seek an individual waiver under section 208(b)(1) prior to participating in the matter. The purpose of the aggregation requirement is to ensure that the application of more than one exemption to a single matter does not violate the statutory criterion that exemptions be issued only for interests that have been determined to be remote or inconsequential.

The proposed regulation at § 2640.202(c) would permit an employee to participate in any particular matter of general applicability not involving specific parties, where the employee's disqualifying financial interest arises from the ownership of publicly traded, long-term Federal Government, or municipal securities issued by one or more entities, *if* the value of the employee's holdings (including the aggregate holdings of his spouse and minor children) in any one affected entity does not exceed $25,000, and his holdings in all affected entities does not exceed $50,000. This proposed exemption would not permit the employee to participate in particular matters having specific parties whether or not the issuer of the securities is a party. This exemption, as well as the exemption proposed at § 2640.202(b) for cases where the issuer of the security is not a party to the matter, would allow an employee to participate in matters where his financial interest was relatively insubstantial, and where it is not likely that the interest would be affected in a manner disproportionate to other affected entities.

Finally, it should be understood that the amounts set forth in the de minimis provisions in proposed § 2640.202 do *not* establish a threshold over which waivers may not be granted on an individual basis under section 208(b)(1). Therefore, an appointing official may decide in an individual case to grant a waiver to permit an employee to participate in particular matters involving parties in cases where an employee owns more than $5,000 worth of stock in an affected party. Similarly, an appointing official may grant waivers in cases where an employee would participate in matters of general applicability or in matters where he owns stock in affected entities which are not parties, even where the amount of the employee's holdings exceeds the amounts set forth in § 2640.202(b) and (c) as proposed. The criteria an agency should consider in granting such waivers are described in §§ 2640.301 and 2640.302 of this proposed regulation.

---

[5] Some of the exemptions in proposed § 2640.202 apply to the interests of the employee, the employee's spouse and minor children, and the employee's general partner. Others apply to interests arising from the holdings of a general partner, or someone whom the employee serves as officer, director, trustee or employee. Still others apply to the interests of any one listed in section 208.

2. Short-term Federal Government Securities

Proposed § 2640.202(d) would permit an employee to act in any particular matter affecting a financial interest arising from the ownership of "short-term Federal Government securities" by the employee, or any other person specified in section 208. The term "short-term Federal Government security" is defined in proposed § 2640.102(t) to mean a bill issued by the United States Treasury pursuant to 31 U.S.C. chapter 31, with a maturity of less than one year. This provision, for example, would permit employees of the Federal Reserve to act in matters that would affect changes in the interest rates paid on Treasury bills. The Office of Government Ethics believes that the exemption for short-term Federal Government securities is warranted because changes in the interest rates paid on Treasury bills occur in relatively small increments, and do not significantly enhance the value of these bills because of their short maturities.

3. Interests of Tax-Exempt Organizations

Unless he is personally involved in an organization's investment decisions, an employee often would not have knowledge of the investment interests of organizations in which he is an officer, director, trustee, or employee. However, because section 208 bars him from acting in matters in which these organizations have a financial interest, section 208 will be implicated if an employee acts in a particular matter which he *knows* will affect the holdings of an organization he serves as officer, director, trustee, or employee.

The concern about a conflict of interest in such cases is diminished, however, if the organization is nonprofit and tax-exempt under section 501(c)(3) of the Internal Revenue Code, and the employee has no involvement in making investment decisions for the organization. Examples of such organizations include child or animal welfare organizations, community service groups, and health or medical research organizations. Section 2640.202(e) of this proposed regulation contains a provision that would permit an employee to participate in any type of particular matter affecting an entity which issues publicly traded, municipal, or long-term Federal Government securities in which a tax-exempt organization invests, if the employee serves the 501(c)(3) organization as an unpaid officer, director, or trustee, or as an employee. The exemption would apply only if the employee plays no role in making investment decisions for the organization other than participating in the decision to invest in several different categories of investments, the organization's holdings in the entity are limited, and the organization is not related to the entity except as an investor, or through a routine commercial transaction. This proposed exemption is limited in scope and only allows an employee to participate in a matter which affects the tax-exempt organization's investments. It would not permit the employee to participate in matters that directly affect the tax-exempt organization, or matters that would also affect the employee's own financial interests.

4. Interests of General Partners

Section 208(a) prohibits an employee from acting in any particular matter that would affect the financial interests of his general partner. Of course, in many cases, an employee will not have knowledge of his partner's financial interests, so that section 208 will not limit the employee's ability to act in Government matters in which his partner has an interest.

On the other hand, where the employee does have knowledge of his partner's interests, it might often be inappropriate for the employee to act in a matter which would affect those interests. However, where the general partner's interest is derived solely from the ownership of publicly traded, long-term Federal Government, or municipal securities, proposed § 2640.202(f)(1) would permit an employee to act in any particular matter affecting the issuer of the securities, if the value of the securities does not exceed $200,000 and ownership of the securities is not related to the partnership between the employee and his general partner.

Proposed § 2640.202(f)(2) contains a provision that would permit an employee to act in all matters where the disqualifying interest would arise from any interest of an employee's general partner, but only if the employee's relationship to his general partner is that of a limited partner in a large partnership, i.e. one with at least 100 limited partners. OGE believes that, in most such cases, an employee would not have enough of a personal relationship with his general partner that his judgment on official matters affecting his partner would be impaired, or would be perceived to be impaired, by the public. In cases where an employee is a limited partner in a partnership with fewer than 100 limited partners, he would have to receive an individual waiver under section 208(b)(1) before he could participate in particular matters in which he knows his general partner has a financial interest.

C. Miscellaneous Exemptions

1. Hiring Decisions

Employees throughout Government are expected to participate in routine personnel matters that involve current employees of an entity in which they may have a financial interest, but the Government personnel matters are unlikely to have any significant effect on their financial interests. In most such cases, it would be difficult to conclude that the employee has a disqualifying financial interest within the meaning of section 208 in the hiring of an employee. In certain exceptional cases, however, an employee's participation in a hiring decision might affect his financial interests. For example, an employee may be called upon to participate in a decision to hire a new employee currently working for a company in which he owns stock. In the case of some highly paid executives, the executive's departure may cause the company to incur gains or losses, thereby creating a disqualifying financial interest. An exemption under section 208(b)(2) would permit the employee to carry out his duties without raising any serious conflict of interest concerns.

Section 2640.203(a) as proposed would permit an employee who owns publicly traded securities issued by a corporation, or who has a vested interest in a pension plan sponsored by a corporation which issues publicly traded securities, to participate in Government hiring decisions involving an applicant currently employed by the corporation. This exemption would allow an employee to continue participation in routine hiring procedures even when the matter might nominally affect his interest in the corporation. The exemption would also apply in cases where any other person specified in section 208 owns publicly traded securities issued by the corporation or participates in a pension plan sponsored by the corporation.

---

2. Employees on Leave from Institutions of Higher Education

Proposed § 2640.203(b) would permit an employee who is on a leave of absence from an institution of higher education (defined as an educational institution described in 20 U.S.C. 1141(a)) to participate in matters of general applicability which would affect the financial interest of the institution. Because of the tenure system, an employee who comes from an academic setting to work in the Federal Government often takes a leave of absence from his academic position rather than terminate the position entirely. Under these circumstances, in cases where the employee's involvement in a Government matter would affect the educational institutional only as part of a larger class of similarly affected institutions, the likelihood of a conflict of interest is sufficiently remote that an exemption permitting the employee to act is warranted.

The proposed exemption would permit the employee to act only in matters affecting the institution from which he is on leave, not his own direct financial interests. For example, an employee could participate in developing a research plan that is expected to result in a grant announcement soliciting proposals from researchers to study a particular medical procedure even if he knows that the university from which he is on leave may submit a proposal. On the other hand, the employee could not participate under this exemption in a Government decision to increase the current funding levels of a certain type of research conducted by a group of colleges and universities, including the school from which he is on leave, if his university salary when he returns will be paid from an affected research grant.

3. Multi-campus Institutions of Higher Education

18 U.S.C. 208 prohibits an employee, including a special Government employee, from acting in a Government matter which would have a direct and predictable effect on the financial interest of his employer. In the case of some employees, particularly special Government employees, the non-Federal employer may be a multi-campus State institution of higher education. Even though the employee may be employed by only one campus of the institution, his employer is the entire institution and he is therefore barred from acting in official matters which affect any of the institution's campuses.

To lessen the hardship that would result from the application of section 208 in many cases involving multi-campus institutions of higher education and to alleviate the need for numerous individual waivers, the exemption at proposed § 2640.203(c) would permit an employee to act in matters affecting one campus of a state multi-campus institution of higher education if the employee is employed in a position with no multi-campus responsibilities at a different campus of the same institution. Where an employee is employed on one campus of an institution, he is not likely to be involved with matters occurring on other campuses, and therefore his interests in those matters are sufficiently remote that a blanket waiver would be appropriate. The exemption would allow an employee to participate in matters affecting other campuses of the institution only if his responsibilities are confined to the one campus where he is employed; a person whose responsibilities cross more than one campus would not be able to participate in any particular matter involving any campus of the institution without first receiving an individual waiver under 18 U.S.C. 208(b)(1).

4. Employees Whose Official Duties Affect the Financial Interests of Government Employees

Section 2640.203(d) as proposed would restate the exemptive provision contained in interim rule § 2640.101 of 5 CFR, which is being separately published in the **Federal Register** by OGE, that applies to interests that arise from employment in the executive branch of the Federal Government. With two exceptions, the provision exempts all disqualifying financial interests in Government salary and benefits, and in Social Security and veterans' benefits. The exemption does not permit an employee to make (1) determinations that individually or specially affect his own financial interest in Government salary and benefits, or (2) determinations, requests, or recommendations that individually or specially relate to, or affect the Government employment-related financial interests of any other person specified in section 208, such as the employee's spouse, minor child, or general partner. Furthermore, a note following the section explains that the exemption does not permit an employee to take any action in violation of any other statutory or regulatory requirement.

5. Participation in Discount and Incentive Programs

The proposed exemption at § 2640.203(e) concerns benefits earned in discount, incentive and other similar programs. These benefits might include, for example, frequent flier mileage, upgraded seating on airplanes, free tickets for additional airplane flights, and discounted rates for rental cars and hotel rooms. Typically these programs are established by commercial entities to generate loyalty to a particular company. Often participants in the programs earn benefits based on the amount of the company's services they utilize during a specified period. Employees may participate in such programs in a personal capacity, and usually participation would raise no concerns under section 208. However, in unusual cases, the benefits may create a financial interest of the employee in certain types of matters. Employees who act in Government matters which affect an entity's ability or inclination to honor its commitment to provide benefits may have a disqualifying financial interest in those matters. The exemption proposed at § 2640.203(e) would permit an employee who participates in such a significant way in matters affecting one of these entities to participate in these agency matters even if he, or any other person specified in section 208, participates in the benefit program. In the case of frequent flier programs, for example, this might include employees of the Federal Aviation Administration, or the Pension Benefit Guaranty Corporation, or the Antitrust Division of the Department of Justice.

6. Mutual Insurance Companies

An employee's interest as a policyholder of life, health, automobile, house and other types of insurance does not often create a section 208 disqualifying financial interest because there are not many Government matters in which an employee could participate that would affect an insurance company's ability or inclination to continue the benefits to which the employee is entitled under the policy. In the unusual case where an employee were assigned to participate in such a significant matter, the employee should first obtain an individual waiver under section 208(b)(1).

In the case of mutual insurance companies, however, employees may have interests in the company other than those involving the continuation of benefits. Mutual insurance company policyholders may have an interest in the overall financial health of the mutual insurance company because the amount of the policyholders' premiums are based upon the profitability of the company. In such cases, the policyholder would have a disqualifying financial interest in any particular matter that would affect the company's profitability or general financial health. The proposed exemption at § 2640.203(f) would permit an employee to participate in any particular matter, including a matter involving parties, that would affect the financial interest of the employee, or any other individual specified in section 208, as a mutual insurance policyholder.

The exemption would not apply, however, if the matter would affect the company's ability to comply with its obligation to pay claims under the policy or to pay the employee the cash value of the policy. The exemption would, for example, allow an employee to participate in Government matters where his mutual insurance company insures a party to the matter as long as the matter was not so significant that it would impair the company's ability to satisfy its obligation to pay claims under the policy or to pay the employee the cash value of the policy. The exemption also would not apply when an entity specified in section 208 (e.g. a corporation that the employee serves as officer or director) rather than the employee himself or other individual specified in section 208 is a policyholder. OGE decided not to extend the exemption to this situation because of concern whether the financial interest of a corporation or other large entity as a policyholder might be considerably greater than one which could be considered "inconsequential" under the statute.

7. Special Government Employees Serving on Advisory Committees

Federal agencies often utilize the services of outside experts by forming advisory committees under the Federal Advisory Committee Act, 5 U.S.C. app. These committees are organized specifically to obtain the advice and recommendations of persons with expertise in a particular field. Therefore, many of the persons serving on an advisory committee will likely be employed or have some type of business relationship with private sector organizations that may be affected by the matter under review by the committee. Many advisory committee members are appointed as special Government employees and are therefore subject to the requirements of section 208.[6]

When 18 U.S.C. 208 was amended in 1989, a new waiver authority was added concerning the interests of persons serving on advisory committees. This new authority, at section 208(b)(3), permits an agency to waive, on an individual basis, any disqualifying financial interest of a special Government employee (SGE) serving on an advisory committee if the need for the employee's services outweighs the potential for a conflict of interest. Nevertheless, agencies which utilize the services of a large number of special Government employees on advisory committees still have to prepare innumerable waivers, largely on a routine basis, for the disqualifying interests of these employees. To eliminate the need for some of these individual waivers, the proposed regulation at § 2640.203(g) would exempt the employment interests of special Government employees serving on advisory committees, permitting them to participate in any particular matter of general applicability not involving specific parties. The provision would specifically permit a covered employee to act in a particular matter affecting a financial interest created because of his employment status. This would include, for example, the interests of an SGE's principal employer in a regulatory matter applicable to all similarly situated entities. The exemption would not apply, however, if the matter would have a special or distinct effect on the person other than as part of a class.

The Office of Government Ethics believes that this special exemption for members of advisory committees can be justified because the public's interest in the integrity of advisory committee proceedings is protected by the nature of the proceedings themselves. The Federal Advisory Committee Act requires that advisory committee meetings be open to the public, except in unusual circumstances. Moreover, the membership of advisory committees must be balanced so that a variety of viewpoints will be represented. Both of these requirements will ensure that the public is aware of a committee member's ties to persons who may be affected by the committee's deliberations. Finally, the findings of an advisory committee are not binding on an agency, but merely constitute recommendations that can be adopted or rejected by the agency.

Limitations on the use of the exemption would further ensure the integrity of the advisory committee process. First, the exemption would apply only to matters of general applicability which would not have a special and distinct effect on the affected person. Thus, the exemption would not permit a special Government employee to act in a matter in which the affected person was a party, or the competitor of a party. Second, the exemption would apply only to the financial interests which arise from the special Government employee's non-Federal employment, such as the employee's salary or the overall financial well-being of the entity or person who employs the special Government employee. It would not apply to the employee's stockholding interest in his employer, although such an interest could be exempt under § 2640.202(c) of this proposed regulation or under § 2640.201(c) if stock is part of an employee benefit plan as defined in the proposed exemption. Moreover, a disqualifying financial interest arising from the ownership of stock by the special Government employee could be waived on an individual basis under section 208(b)(1) or (b)(3).

8. Directors of Federal Reserve Banks

Although the other conflict of interest prohibitions in title 18 do not apply to the Directors of the twelve Federal Reserve Banks throughout the United States, the Directors are subject to the requirements of section 208. Each of the twelve banks has nine Directors, three of whom represent the interests of that Bank's stockholding member banks, and six of whom represent the interests of the public, with due consideration to the interests of commerce, industry, services, labor and consumers. Because of their ties to the financial services industry and their communities, it is likely that at least some of the Directors will have financial conflicts with their duties. The proposed regulation at § 2640.203(h) would exempt the Directors from the application of section 208 for two primary activities: the role of Directors in establishing the interest rate to be charged on loans made by Reserve Banks, and the role the Directors may play in extending credit to healthy financial institutions or to financial institutions in hazardous condition. The exemptions, which were first issued by the Federal Reserve in 1978 and which are currently set forth in 12 CFR 264a.5, are necessary to resolve any possible conflict between the Directors' statutorily mandated representational function and the performance of their official duties.

In general, proposed § 2640.203(h) would permit a Federal Reserve Director to act in matters involving (1) the establishment of rates to be charged member banks for advances and discounts; (2) approval or ratification of extensions of credit, advances or discounts to depository institutions that are not in a hazardous financial condition; (3) approval or ratification of extensions of credit, advances or discounts to depository institutions that are in a hazardous condition as determined by the President of the Bank in accordance with 12 CFR 264a.3, but only when certain conditions are met; and (4) consideration of monetary policy matters, regulations, statutes, or other similar matters of broad applicability. As described above, these exemptions would simply continue existing regulatory exemptions for Reserve Bank Directors.

9. Medical Products and Devices

Section 2640.203(i) would contain an exemption for special Government employees who serve on advisory committees considering the approval or classification of medical products or devices. Often these special Government employees are employed by hospitals or other medical facilities that purchase these products or devices for use by their patients. Similarly, the special Government employees may prescribe the product or device for their own patients. In some cases, the employees may have a disqualifying financial interest in the matters under consideration by the committee because their employers' profits from providing these products or devices to patients by billing more than the cost of the item. In other cases, it is possible that a special Government employee with private patients could affect his own financial interest by, for example, deciding not to reclassify a drug to permit it to be sold over the counter, thereby resulting in a loss of patients who would otherwise have to seek a prescription from him.

The Office of Government Ethics believes that the types of financial interests described in the proposed exemption are inconsequential enough that special Government employees who serve on these types of advisory committees can be expected to act impartially. Of course, the exemption would apply only when the financial interest is of the type described in the regulation. Other types of financial interests, such as those arising from the ownership of stock in the manufacturer of the product or device, or employment by the manufacturer would not be not covered by this exemption. Such interests may be covered by other exemptions (such as proposed § 2640.202(a)) or an employee may obtain an individual waiver under section 208(b)(1) or (b)(3).

D. Prohibited Financial Interests

The provision at § 2640.204 of this proposed regulation would make clear that none of the exemptions apply to financial interests held or acquired in violation of a statute or agency supplemental regulation issued under 5 CFR 2635.105, or that are otherwise prohibited under 5 CFR 2635.403(b). This provision would prevent an employee who knowingly acquires a prohibited financial interest and who also participates in an agency matter affecting that interest, from asserting that the exemption provisions described in this rule preclude the Government from pursuing appropriate sanctions against him.

E. Employee Responsibility

Section 2640.205 as proposed states that each employee assigned to a matter which may affect a financial interest within the scope of section 208(a) is responsible for determining, prior to taking action, whether an exemption permits him to participate in the matter. If an employee is unsure whether an exemption is applicable in a particular situation, he should consult with the agency ethics official prior to taking action. As proposed, this regulation would be interpreted strictly, so that an employee who has a financial interest in a matter could not act in the matter in reliance on any provision in the regulation unless the interest were specifically exempted by the regulation. Alternatively, an employee may seek an individual waiver under 18 U.S.C. 208(b)(1) or (b)(3).

F. Existing Agency Exemptions

This proposed rule at § 2640.206 contains a provision designed to resolve questions concerning reliance on waivers issued by agency regulation prior to November 30, 1989, the effective date of the 1989 Ethics Reform Act revisions to 18 U.S.C. 208. The provision would make clear that an employee who, prior to the effective date of this regulation, participated in a matter in which he had a financial interest acted in accordance with applicable regulations if he acted in reliance on a regulatory waiver issued by his employing agency under 18 U.S.C. 208(b)(2) as in effect prior to November 30, 1989.

III. Waivers Issued Pursuant to 18 U.S.C. 208(b)(1)

In some situations an employee may have a disqualifying financial interest which would not be exempted from the requirements of section 208(a) by this proposed regulation as being too remote or inconsequential. For example, some disqualifying financial interests are simply too difficult to define precisely enough in a regulation, while in other cases OGE is unable to describe with enough particularity the matters in which the exemptions would apply. In circumstances such as these, an agency may determine pursuant to section 208(b)(1) that an individual waiver should be granted to the employee. The determination required in these cases is that the employee's disqualifying interest in the matter is not so substantial as to be deemed likely to affect the integrity of the services which the Government expects from the employee. In short, the agency must determine whether the employee's interest in the matter is not so significant that the employee can be relied upon to act or appear to act impartially in the matter. While final determinations in these matters rest with the agencies, this proposed regulation at § 2640.301 would establish uniform procedural requirements for such waivers and would provide guidance to agencies in making the determinations necessary for the granting of waivers.

An agency granting a waiver pursuant to section 208(b)(1) should observe a number of procedural requirements. First, the financial interest involved, and the nature and circumstances of the particular Government matter or matters in which the employee would act must be fully disclosed to the Government official responsible for issuing the waiver. If the official decides to grant the waiver, it must be in writing and be issued by the person responsible for the employee's appointment (or by a person to whom the responsibility to issue such waivers has been delegated.) A waiver must be issued prior to any action on the matter by the employee. The waiver should describe the matter or matters to which it applies, the employee's role in these matters, and any limitations to be placed on the employee's involvement in them. There is no requirement in the rule as proposed that the disqualifying financial interest, the particular matter to which the waiver applies, or the employee's role in the matter be described with any specific degree of particularity. This would, for example, permit the agency issuing the waiver to describe the employee's duties in a general way, or to describe a class of matters to which the waiver would apply. Of course, agencies should endeavor to formulate waivers with enough specificity that a member of the public would have a clear understanding of the circumstances to which the waiver applies. In addition, the waiver must be based on a determination that the employee's financial interest is not so substantial as to be deemed likely to affect the integrity of the employee's services to the Government. A waiver may apply to both present and future financial interests provided that the interests are described with specificity.

---

[6] In some cases, a person may be serving on an advisory committee in a representative capacity on behalf of a non-governmental organization, group or industry. Section 208 does not apply to committee members serving in a representative capacity because they are not considered special Government employees. Accordingly, a representative does not need a waiver or exemption as described in this proposed regulation in order to participate in committee matters. *See generally* OGE Informal Advisory Letter 82x22 (July 9, 1982), OGE Advisory Publication, p. 325.

In granting a waiver, section 208(b)(1) specifically requires an agency to determine whether the employee's financial interest in the matter is not so substantial as to affect the integrity of the employee's services to the Government. In large part, this determination depends on the size of the financial interest, its importance to the employee, and the employee's ability to affect his own financial interest directly. Information concerning an employee's good character and past record are irrelevant in making the waiver determination and should not be relied upon as a basis for granting a waiver.

The proposed regulation at § 2640.301(b) lists five factors that an agency official may consider in judging the propriety of granting a waiver. First, the responsible official should consider the type of interest creating the disqualification, such as stock, bonds, or a job offer. Consideration should also be given to the identity of the person whose financial interest is involved. In particular, if the financial interest is not the employee's own, but is the interest of one of the other persons specified in section 208, the agency official should examine the relationship of the person to the employee. Employment interests often create ties stronger than mere stock ownership that might affect an employee's judgment. Moreover, the ethics official should consider the effect of the matter on the interests of the person specified in the statute, not just the ultimate effect, if any, on the interests of the employee. Next, the official should consider the dollar value of the disqualifying interest to the extent it is known or can be estimated, and the value of the financial instrument or holding which is creating the disqualifying interest. Finally, the responsible official should consider the nature and importance of the employee's role in the matter in which he would be allowed to act, including the extent to which he would have to exercise discretion. For example, the agency should consider whether the employee will play a primary role in dealing with an entity in which he has a financial interest, or contribute substantially to a decision affecting such an entity, or play a peripheral role in a matter involving the entity.

Agencies may also consider certain other factors when deciding whether an employee's financial interest is substantial enough to affect the integrity of his services. A responsible official may consider the sensitivity of the agency matter in which the employee would act, the need for the employee's services in the particular matter, and whether adjustments could be made in the employee's duties that would reduce or eliminate the likelihood that the integrity of the employee's services would be questioned. A decision by the responsible official to grant a waiver pursuant to section 208(b)(1) constitutes a determination under 5 CFR 2635.502 of the Standards of Ethical Conduct that the Government's interest in having an employee participate in a particular matter outweighs any questions concerning an employee's impartiality.

IV. Waivers Issued Pursuant to 18 U.S.C. Section 208(b)(3)

This proposed regulation would also address the authority of agencies to issue waivers pursuant to section 208(b)(3) for special Government employees who are members of an advisory committee established under the Federal Advisory Committee Act (5 U.S.C. app.) or nominees to such a committee if these individuals have a disqualifying financial interest. The basis for a determination to grant a waiver under section 208(b)(3) is somewhat different from that which underlies a waiver granted pursuant to section 208(b)(1). To allow an individual to participate in advisory committee matters from which he would otherwise be disqualified, the agency must balance the need for the individual's services against the potential for a conflict of interest created by the employee's disqualifying interest. After reviewing the financial disclosure statement filed by the individual pursuant to the Ethics in Government Act of 1978, the official responsible for appointing the individual to the committee must certify that the need for the individual's services outweighs the potential for conflict created by the financial interest involved.

In making this certification, § 2640.302(b) as proposed would instruct the responsible official to consider the uniqueness of the individual's qualifications and the difficulty of finding a similarly qualified individual to serve on the committee. As in the case of making a determination whether a waiver should be granted under section 208(b)(1), the official should also consider the type of interest that is creating the disqualification, as well as its dollar value to the extent it is known or can be estimated. Consideration should also be given to the identity of the person whose financial interest is creating the disqualification and that person's relationship to the employee. Finally, the official should consider the likelihood that the advisory committee will consider matters which will affect the individual's financial interests individually or particularly.

The regulation at proposed § 2640.302(a) also states that the agency should follow procedural requirements similar to those for granting individual waivers under 18 U.S.C. 208(b)(1). Waivers issued pursuant to section 208(b)(3) may be applicable only to special Government employee members or prospective members of advisory committees within the meaning of the Federal Advisory Committee Act.

V. Consultation and Notification Concerning Waivers

Proposed § 2640.303, in accordance with section 301(d) of Executive Order 12674, would require a responsible official, when practicable, to consult formally or informally with the Office of Government Ethics prior to granting a waiver under either § 2640.301 or § 2640.302 as proposed. The consultation need not take any particular form and may be done informally by telephone. While these waiver determinations are within an agency's discretion, consultation with OGE affords the agency official an opportunity to benefit from OGE's experience and knowledge as to how these provisions are generally interpreted and whether the agency's proposed solution is legally sufficient and is within the range of reasonable interpretations. After issuance of a waiver, a copy of the waiver must be transmitted promptly to OGE. *See* section 301(d) of E.O. 12674, as modified, and 5 CFR 2635.402(d)(4).

VI. Public Availability of Waivers

Agencies are generally required to make copies of waivers issued pursuant

to 18 U.S.C. 208(b)(1) or (b)(3) available to the public upon request. *See* 18 U.S.C. 208(d)(1) and proposed § 2640.304. The procedures to be used for providing access to these waivers are those which are used for public access to financial disclosure statements under the Ethics in Government Act. The procedures are described at 5 CFR 2634.603.

There are certain limitations on the public availability of waivers granted pursuant to 18 U.S.C. 208(b)(1) and (b)(3). Agencies may withhold from disclosure any information contained in a waiver which would be exempt from disclosure under the Freedom of Information Act, 5 U.S.C. 552. In addition, for waivers issued under section 208(b)(3), an agency must withhold any information in the certification concerning an individual's financial interest that is more extensive than what is required to be disclosed by the individual in his financial disclosure statement under the Ethics Act. Agencies should also withhold information in any waiver which is otherwise subject to a prohibition on public disclosure under law.

VII. Matters of Regulatory Procedure

Administrative Procedure Act

Interested persons are invited to submit written comments to OGE on this proposed regulation, to be received on or before November 13, 1995. The Office of Government Ethics will review all comments received and consider any modifications to this rule as proposed which appear warranted before adopting a final rule on this matter.
